#### KONGU ENGINEERING COLLEGE PERUNDURAI ERODE – 638 060 (Autonomous)

#### **INSTITUTE VISION**

To be a centre of excellence for development and dissemination of knowledge in Applied Science, Technology, Engineering and Management for the Nation and beyond.

#### **INSTITUTE MISSION**

We are committed to value based Education, Research and Consultancy in Engineering and Management and to bring out technically competent, ethically strong and quality professionals to keep our Nation ahead in the competitive knowledge intensive world.

#### **QUALITY POLICY**

We are committed to

- Provide value based quality education for the development of students as competent and responsible citizens.
- Contribute to the nation and beyond through research and development
- Continuously improve our services

#### DEPARTMENT OF CHEMICAL ENGINEERING

#### VISION

To be a centre of excellence for development and dissemination of knowledge in Chemical Engineering for the Nation and beyond.

	MISSION
Departn	nent of Chemical Engineering is committed to:
MS1:	Impart knowledge to students at all levels through a vibrant, dynamic and state of the art
	intellectual delivery to ensure the creation of a complete Chemical Engineer with a high sense of
	social responsibility and professional ethics
MS2:	Synergize the efforts of the students and faculty to evolve innovative engineering practices and
	teaching methodologies
MS3:	Generate an environment of continuous learning and research
	PROGRAM EDUCATIONAL OBJECTIVES (PEOs)
Post Gra	aduates of Chemical Engineering will
PEO1:	Take up professional assignments in design and development of advanced chemical engineering
	processes, products and equipment by engaging in lifelong learning and advanced research
PEO2:	Develop viable solutions for real time problems in chemical process industries with a vision
	towards a sustainable future
PEO3:	Exhibit their technical, soft and managerial skills to improve engineering practices for teaching
	and learning

<b>MS\PEO</b>	PEO1	PEO2	PEO3

MS2	2	2	2
MS3	3	3	2

#### MAPPING OF MISSION STATEMENTS (MS) WITH PEOS

1 – Slight, 2 – Moderate, 3 – Substantial

#### PROGRAM OUTCOMES (POs)

Graduates of Chemical Engineering will have an ability to:

- **PO1** Independently carry out research /investigation and development work to solve practical problems
- **PO2** Write and present a substantial technical report/document
- **PO3** Understand the requirement of the industry and perform effectively with the managerial skills
- **PO4** Design and develop advanced chemical processes, products and equipments for the benefit of society through research and continuous learning efforts
- **PO5** Improvise and apply their knowledge in various frontiers of chemical engineering and evolve as a successful leader/ teacher / technocrat and scientist

<b>PEO\PO</b>	PO1	PO2	PO3	PO4	PO5		
PEO1	3	2	2	3	3		
PEO2	1	2	3	3	3		
PEO3	2	3	3	2	2		

#### MAPPING OF PEOs WITH POs AND PSOs

1 -Slight, 2 -Moderate, 3 -Substantial

#### KONGU ENGINEERING COLLEGE, PERUNDURAI, ERODE – 638060

#### (An Autonomous Institution Affiliated to Anna University)

#### **REGULATIONS 2020**

#### CHOICE BASED CREDIT SYSTEM AND OUTCOME BASED EDUCATION

#### MASTER OF ENGINEERING (ME) / MASTER OF TECHNOLOGY (MTech) DEGREE PROGRAMMES

These regulations are applicable to all candidates admitted into ME/MTech Degree programmes from the academic year 2020 – 2021 onwards.

#### 1. DEFINITIONS AND NOMENCLATURE

In these Regulations, unless otherwise specified:

- i. "University" means ANNA UNIVERSITY, Chennai.
- ii. "College" means KONGU ENGINEERING COLLEGE.
- iii. "Programme" means Master of Engineering (ME) / Master of Technology (MTech) Degree programme
- iv. "Branch" means specialization or discipline of ME/MTech Degree programme, like Construction Engineering and Management, Information Technology, etc.
- v. "Course" means a Theory / Theory cum Practical / Practical course that is normally studied in a semester like Engineering Design Methodology, Machine Learning Techniques, etc.
- vi. "Credit" means a numerical value allocated to each course to describe the candidate's workload required per week.
- vii. "Grade" means the letter grade assigned to each course based on the marks range specified.
- viii. "Grade point" means a numerical value (0 to 10) allocated based on the grade assigned to each course.
- ix. "Principal" means Chairman, Academic Council of the College.

- x. "Controller of Examinations" means authorized person who is responsible for all examination related activities of the College.
- xi. "Head of the Department" means Head of the Department concerned of the College.

### 2. PROGRAMMES AND BRANCHES OF STUDY

The following programmes and branches of study approved by Anna University, Chennai and All India Council for Technical Education, New Delhi are offered by the College.

Programme	Branch					
	Construction Engineering and Management					
	Structural Engineering					
	Engineering Design					
	Mechatronics Engineering					
ME	VLSI Design					
	Embedded Systems					
	Power Electronics and Drives					
	Control and Instrumentation Engineering					
	Computer Science and Engineering					
	Information Technology					
MTech	Chemical Engineering					
	Food Technology					

#### 3. ADMISSION REQUIREMENTS

Candidates seeking admission to the first semester of the ME/MTech Degree programme shall be required to have passed an appropriate qualifying Degree Examination of Anna University or any examination of any other University or authority accepted by the Anna University, Chennai as equivalent thereto, subject to amendments as may be made by the Anna University, Chennai from time to time. The candidates shall also be required to satisfy all other conditions of admission prescribed by the Anna University, Chennai and Directorate of Technical Education, Chennai from time to time.

#### 4. STRUCTURE OF PROGRAMMES

#### 4.1 Categorisation of Courses

# 🎉 Kongu Engineering College, Perundurai, Erode – 638060, India

The ME / MTech programme shall have a curriculum with syllabi comprising of theory, theory cum practical, practical courses in each semester and project work, internship,etc that have been approved by the respective Board of Studies and Academic Council of the College. All the programmes have well defined Programme Outcomes (PO) and Programme Educational Objectives (PEOs) as per Outcome Based Education (OBE). The content of each course is designed based on the Course Outcomes (CO). The courses shall be categorized as follows:

- i. Foundation Courses (FC)
- ii. Professional Core (PC) Courses
- iii. Professional Elective (PE) Courses
- iv. Open Elective (OE) Courses
- v. Employability Enhancement Courses (EC) like Innovative Project, Internship cum Project work in Industry or elsewhere, Project Work

### 4.2 Credit Assignment

Each course is assigned certain number of credits as follows:

Contact period per week	Credits
1 Lecture / Tutorial Period	1
2 Practical Periods	1
2 Project Work Periods	1
40 Training /Internship Periods	1

The minimum number of credits to complete the ME/MTech programme is 72.

## 4.3 Employability Enhancement Courses

A candidate shall be offered with the employability enhancement courses like innovative project, internship cum project work and project work during the programme to gain/exhibit the knowledge/skills.

## 4.3.1 Innovative Project

A candidate shall earn two credits by successfully completing the project by using his/her innovations in second semester during his/her programme.

## 4.3.2 Internship cum Project Work

The curriculum enables a candidate to go for full time internship during the third semester and can earn credits through it for his/her academics vide clause 7.6 and clause 7.12. Such candidate shall earn the minimum number of credits as mentioned in the third semester of the curriculum other than internship by either fast track mode or through approved courses in online mode or by self study mode. Such candidate can earn the number of credits for the internship same as that of Project Work in the third semester. Assessment procedure is to be followed as specified in the guidelines approved by the Academic Council.

#### 4.3.4 Project Work

A candidate shall earn nine credits by successfully completing the project work in fourth semester during the programme inside the campus or in industries.

#### 4.4 Value Added Courses / Online Courses / Self Study Courses

The candidates may optionally undergo Value Added Courses / Online Courses / Self Study Courses as elective courses.

- **4.4.1 Value Added Courses:** Value Added courses each with One / Two credits shall be offered by the college with the prior approval from respective Board of Studies. A candidate can earn a maximum of three credits through value added courses during the entire duration of the programme.
- **4.4.2 Online Courses:** Candidates may be permitted to earn credits for online courses, offered by NPTEL / SWAYAM / a University / Other Agencies, approved by respective Board of Studies.
- **4.4.3** Self Study Courses: The Department may offer an elective course as a self study course. The syllabus of the course shall be approved by the respective Board of Studies. However, mode of assessment for a self study course will be the same as that used for other courses. The candidates shall study such courses on their own under the guidance of member of the faculty. Self study course is limited to one per semester.
- **4.4.4** The elective courses in the final year may be exempted if a candidate earns the required credits vide clause 4.4.1, 4.4.2 and 4.4.3 by registering the required number of courses in advance (up to second semester).
- **4.4.5** A candidate can earn a maximum of 15 credits through all value added courses, online courses and self study courses.

#### 4.5 Flexibility to Add or Drop Courses

- **4.5.1** A candidate has to earn the total number of credits specified in the curriculum of the respective programme of study in order to be eligible to obtain the degree. However, if the candidate wishes, then the candidate is permitted to earn more than the total number of credits prescribed in the curriculum of the candidate's programme.
- **4.5.2** From the second to fourth semesters the candidates have the option of registering for additional elective/Honors courses or dropping of already registered additional elective/Honors courses within two weeks from the start of the semester. Add / Drop is only an option given to the candidates. Total number of credits of such courses during the entire programme of study cannot exceed six.
- **4.6** Maximum number of credits the candidate can enroll in a particular semester cannot exceed 30 credits.
- **4.7** The blend of different courses shall be so designed that the candidate at the end of the programme would have been trained not only in his / her relevant professional field but also would have developed to become a socially conscious human being.

**4.8** The medium of instruction, examinations and project report shall be English.

#### 5. DURATION OF THE PROGRAMME

- **5.1** A candidate is normally expected to complete the ME / MTech Degree programme in 4 consecutive semesters (2 Years), but in any case not more than 8 semesters (4 Years).
- **5.2** Each semester shall consist of a minimum of 90 working days including continuous assessment test period. The Head of the Department shall ensure that every teacher imparts instruction as per the number of periods specified in the syllabus for the course being taught.
- **5.3** The total duration for completion of the programme reckoned from the commencement of the first semester to which the candidate was admitted shall not exceed the maximum duration specified in clause 5.1 irrespective of the period of break of study (vide clause 11) or prevention (vide clause 9) in order that the candidate may be eligible for the award of the degree (vide clause 16). Extension beyond the prescribed period shall not be permitted.

#### 6. COURSE REGISTRATION FOR THE EXAMINATION

- **6.1** Registration for the end semester examination is mandatory for courses in the current semester as well as for the arrear courses failing which the candidate will not be permitted to move on to the higher semester. This will not be applicable for the courses which do not have an end semester examination.
- **6.2** The candidates who need to reappear for the courses which have only continuous assessment shall enroll for the same in the subsequent semester, when offered next, and repeat the course. In this case, the candidate shall attend the classes, satisfy the attendance requirements (vide clause 8), earn continuous assessment marks. This will be considered as an attempt for the purpose of classification.
- **6.3** If a candidate is prevented from writing end semester examination of a course due to lack of attendance, the candidate has to attend the classes, when offered next, and fulfill the attendance requirements as per clause 8 and earn continuous assessment marks. If the course, in which the candidate has a lack of attendance, is an elective, the candidate may register for the same or any other elective course in the subsequent semesters and that will be considered as an attempt for the purpose of classification.

#### 7. ASSESSMENT AND EXAMINATION PROCEDURE FOR AWARDING MARKS

7.1 The ME/MTech programmes consist of Theory Courses, Theory cum Practical courses, Practical courses, Innovative Project, Internship cum Project work and Project Work. Performance in each course of study shall be evaluated based on (i) Continuous Assessments (CA) throughout the semester and (ii) End Semester Examination (ESE) at the end of the semester except for the courses which are evaluated based on continuous assessment only. Each course shall be evaluated for a maximum of 100 marks as shown below:

## 🗼 Kongu Engineering College, Perundurai, Erode – 638060, India

Sl. No.	Category of Course	Continuous Assessment Marks	End Semester Examination
1.	Theory / Practical	50	50
2.	Theory cum Practical	The distribution of decided based on the assigned to theor components respecti	f marks shall be e credit weightage y and practical vely.
3.	Innovative Project/ Project Work / Internship cum Project Work	50	50
4.	Value Added Course	The distribution of	
5.	All other Courses	marks shall be decided based on the credit the credit weightage assigned	

**7.2** Examiners for setting end semester examination question papers for theory courses, theory cum practical courses and practical courses and evaluating end semester examination answer scripts, project works, innovative project and internships shall be appointed by the Controller of Examinations after obtaining approval from the Principal.

#### 7.3 Theory Courses

For all theory courses out of 100 marks, the continuous assessment shall be 50 marks and the end semester examination shall be for 50 marks. However, the end semester examinations shall be conducted for 100 marks and the marks obtained shall be reduced to 50. The continuous assessment tests shall be conducted as per the schedule laid down in the academic schedule. Three tests shall be conducted for 50 marks each and reduced to 30 marks each. The total of the continuous assessment marks and the end semester examination marks shall be rounded off to the nearest integer.

**7.3.1** The assessment pattern for awarding continuous assessment marks shall be as follows:

Sl. No.	Туре	Max. Marks	Remarks
	Test – I	30	
1.	Test – II	30	Average of best two
	Test - III	30	
2.	Tutorial	15	Should be of Open Book/Objective Type. Average of best 4 (or more, depending on the nature of the course, as may be approved by Principal)

Kongu Engineering College, Perundurai, Erode – 638060, India

3.	Assignment / Paper Presentation in Conference / Seminar / Comprehension / Activity based learning / Class notes	05	To be assessed by the Course Teacher based on any one type.
	Total	50	Rounded off to the one decimal place

However, the assessment pattern for awarding the continuous assessment marks may be changed based on the nature of the course and is to be approved by the Principal.

- **7.3.2** A reassessment test or tutorial covering the respective test or tutorial portions may be conducted for those candidates who were absent with valid reasons (Sports or any other reason approved by the Principal).
- **7.3.3** The end semester examination for theory courses shall be for duration of three hours.

#### 7.4 Theory cum Practical Courses

For courses involving theory and practical components, the evaluation pattern as per the clause 7.1 shall be followed. Depending on the nature of the course, the end semester examination shall be conducted for theory and the practical components. The apportionment of continuous assessment and end semester examination marks shall be decided based on the credit weightage assigned to theory and practical components approved by Principal.

#### 7.5 Practical Courses

For all practical courses out of 100 marks, the continuous assessment shall be for 50 marks and the end semester examination shall be for 50 marks. Every exercise / experiment shall be evaluated based on the candidate's performance during the practical class and the candidate's records shall be maintained.

**7.5.1** The assessment pattern for awarding continuous assessment marks for each course shall be decided by the course coordinator based on rubrics of that particular course, and shall be based on rubrics for each experiment.

#### 7.6 Project Work

- **7.6.1** Project work shall becarried out individually. Candidates can opt for full time internship (vide clause 7.8) in lieu of project work in third semester. The project work is mandatory for all the candidates.
- **7.6.2** The Head of the Department shall constitute review committee for project work. There shall be two assessments by the review committee during the semester. The candidate shall make presentation on the progress made by him/her before the committee.

# 🎉 Kongu Engineering College, Perundurai, Erode – 638060, India

# **7.6.3** The continuous assessment and end semester examination marks for Project Work and the Viva-Voce Examination shall be distributed as below.

		End Semester Examination (Max. 50 Marks)							
Review I (Max10 Marks)		Review (Max 20 M	II /larks)	Review III (Max. 20 Marks)		Report Evaluation (Max. 20 Marks)	Viva - Voce (Max. 30 Marks)		
Rv. Com	Guide	Review Committee (excluding guide)	Guide	Review Committee (excluding guide)	Guide	Ext. Exr.	Guid e	Exr. 1	Exr. 2
5	5	10	10	10	10	20	10	10	10

- **7.6.4** The Project Report prepared according to approved guidelines and duly signed by the Guide and Project Co-ordinator shall be submitted to Head of the Department. A candidate must submit the project report within the specified date as per the academic schedule of the semester. If the project report is not submitted within the specified date then the candidate is deemed to have failed in the Project Work and redo it in the subsequent semester. This applies to both Internship cum Project work and Project work.
- **7.6.5** If a candidate fails to secure 50% of the continuous assessment marks in the project work, he / she shall not be permitted to submit the report for that particular semester and shall have to redo it in the subsequent semester and satisfy attendance requirements.
- **7.6.6** Every candidate shall, based on his/her project work, publish a paper in a reputed journal or reputed conference in which full papers are published after usual review. A copy of the full paper accepted and proof for that shall be produced at the time of evaluation.
- **7.6.7** The project work shall be evaluated based on the project report submitted by the candidate in the respective semester and viva-voce examination by a committee consisting of two examiners and guide of the project work.
- **7.6.8** If a candidate fails to secure 50 % of the end semester examination marks in the project work, he / she shall be required to resubmit the project report within 30 days from the date of declaration of the results and a fresh viva-voce examination shall be conducted as per clause 7.6.7.
- **7.6.9** A copy of the approved project report after the successful completion of viva-voce examination shall be kept in the department library.

## 7.7 Innovative Project

The evaluation method shall be same as that of the Project Work as per clause 7.6 excluding clause 7.6.6.

## 7.8 Internship cum Project Work

Each candidate shall submit a brief report about the internship undergone and a certificate issued from the organization concerned at the time of Viva-voce examination to the review committee. The evaluation method shall be same as that of the Project Work as per clause 7.6 excluding 7.6.6.

Kongu Engineering College, Perundurai, Erode – 638060, India

#### 7.9 Value Added Course

Two assessments shall be conducted during the value added course duration by the offering department concerned.

#### 7.10 Online Course

The Board of Studies will provide methodology for the evaluation of the online courses. The Board can decide whether to evaluate the online courses through continuous assessment and end semester examination or through end semester examination only. In case of credits earned through online mode from NPTEL / SWAYAM / a University / Other Agencies approved by Chairman, Academic Council, the credits may be transferred and grades shall be assigned accordingly.

#### 7.11 Self Study Course

The member of faculty approved by the Head of the Department shall be responsible for periodic monitoring and evaluation of the course. The course shall be evaluated through continuous assessment and end semester examination. The evaluation methodology shall be the same as that of a theory course.

#### 7.12 Audit Course

A candidate may be permitted to register for specific course not listed in his/her programme curriculum and without undergoing the rigors of getting a 'good' grade, as an Audit course, subject to the following conditions.

The candidate can register only one Audit course in a semester starting from second semester subject to a maximum of two courses during the entire programme of study. Such courses shall be indicated as 'Audit' during the time of Registration itself. Only courses currently offered for credit to the candidates of other branches can be audited.

A course appearing in the curriculum of a candidate cannot be considered as an audit course. However, if a candidate has already met the Professional Elective and Open Elective credit requirements as stipulated in the curriculum, then, a Professional Elective or an Open Elective course listed in the curriculum and not taken by the candidate for credit can be considered as an audit course.

Candidates registering for an audit course shall meet all the assessment and examination requirements (vide clause 7.3) applicable for a credit candidate of that course. Only if the candidate obtains a performance grade, the course will be listed in the semester Grade Sheet and in the Consolidated Grade Sheet along with the grade SF (Satisfactory). Performance grade will not be shown for the audit course.

Since an audit course has no grade points assigned, it will not be counted for the purpose of GPA and CGPA calculations.

#### 8. **REQUIREMENTS FOR COMPLETION OF A SEMESTER**

**8.1** A candidate who has fulfilled the following conditions shall be deemed to have satisfied the requirements for completion of a semester and permitted to appear for the examinations of that semester.

### Kongu Engineering College, Perundurai, Erode – 638060, India

- **8.1.1** Ideally, every candidate is expected to attend all classes and secure 100 % attendance. However, a candidate shall secure not less than 80 % (after rounding off to the nearest integer) of the overall attendance taking into account the total number of working days in a semester.
- **8.1.2** A candidate who could not satisfy the attendance requirements as per clause 8.1.1 due to medical reasons (hospitalization / accident / specific illness) but has secured not less than 70 % in the current semester may be permitted to appear for the current semester examinations with the approval of the Principal on payment of a condonation fee as may be fixed by the authorities from time to time. The medical certificate needs to be submitted along with the leave application. A candidate can avail this provision only twice during the entire duration of the degree programme.
- **8.1.3** In addition to clause 8.1.1 or 8.1.2, a candidate shall secure not less than 60 % attendance in each course.
- **8.1.4** A candidate shall be deemed to have completed the requirements of study of any semester only if he/she has satisfied the attendance requirements (vide clause 8.1.1 to 8.1.3) and has registered for examination by paying the prescribed fee.
- 8.1.5 Candidate's progress is satisfactory.
- **8.1.6** Candidate's conduct is satisfactory and he/she was not involved in any indisciplined activities in the current semester.
- **8.2.** The candidates who do not complete the semester as per clauses from 8.1.1 to 8.1.6 except 8.1.3 shall not be permitted to appear for the examinations at the end of the semester and not be permitted to go to the next semester. They have to repeat the incomplete semester in next academic year.
- **8.3** The candidates who satisfy the clause 8.1.1 or 8.1.2 but do not complete the course as per clause 8.1.3 shall not be permitted to appear for the end semester examination of that course alone. They have to repeat the incomplete course in the subsequent semester when it is offered next.

#### 9. REQUIREMENTS FOR APPEARING FOR END SEMESTER EXAMINATION

- **9.1** A candidate shall normally be permitted to appear for end semester examination of the current semester if he/she has satisfied the semester completion requirements as per clause 8, and has registered for examination in all courses of that semester. Registration is mandatory for current semester examinations as well as for arrear examinations failing which the candidate shall not be permitted to move on to the higher semester.
- **9.2** When a candidate is deputed for a National / International Sports event during End Semester examination period, supplementary examination shall be conducted for such a candidate on return after participating in the event within a reasonable period of time. Such appearance shall be considered as first appearance.

# 🥸 Kongu Engineering College, Perundurai, Erode – 638060, India

**9.3** A candidate who has already appeared for a course in a semester and passed the examination is not entitled to reappear in the same course for improvement of letter grades / marks.

## 10. PROVISION FOR WITHDRAWAL FROM EXAMINATIONS

- **10.1** A candidate may, for valid reasons, be granted permission to withdraw from appearing for the examination in any regular course or all regular courses registered in a particular semester. Application for withdrawal is permitted only once during the entire duration of the degree programme.
- **10.2** The withdrawal application shall be valid only if the candidate is otherwise eligible to write the examination (vide clause 9) and has applied to the Principal for permission prior to the last examination of that semester after duly recommended by the Head of the Department.
- **10.3** The withdrawal shall not be considered as an appearance for deciding the eligibility of a candidate for First Class with Distinction/First Class.
- **10.4** If a candidate withdraws a course or courses from writing end semester examinations, he/she shall register the same in the subsequent semester and write the end semester examinations. A final semester candidate who has withdrawn shall be permitted to appear for supplementary examination to be conducted within reasonable time as per clause 14.
- **10.5** The final semester candidate who has withdrawn from appearing for project viva-voce for genuine reasons shall be permitted to appear for supplementary viva-voce examination within reasonable time with proper application to Controller of Examinations and on payment of prescribed fee.

## 11. PROVISION FOR BREAK OF STUDY

**11.1** A candidate is normally permitted to avail the authorised break of study under valid reasons (such as accident or hospitalization due to prolonged ill health or any other valid reasons) and to rejoin the programme in a later semester. He/She shall apply in advance to the Principal, through the Head of the Department, stating the reasons therefore, in any case, not later than the last date for registering for that semester examination. A candidate is permitted to avail the authorised break of study only once during the entire period of study for a maximum period of one year. However, in extraordinary situation the candidate may apply for additional break of study not exceeding another one year by paying prescribed fee for the break of study.

- **11.2** The candidates permitted to rejoin the programme after break of study / prevention due to lack of attendance shall be governed by the rules and regulations in force at the time of rejoining.
- **11.3** The candidates rejoining in new Regulations shall apply to the Principal in the prescribed format through Head of the Department at the beginning of the readmitted semester itself for prescribing additional/equivalent courses, if any, from any semester of the regulations in-force, so as to bridge the curriculum in-force and the old curriculum.
- **11.4** The total period of completion of the programme reckoned from the commencement of the semester to which the candidate was admitted shall not exceed the maximum period specified in clause 5 irrespective of the period of break of study in order to qualify for the award of the degree.
- **11.5** If any candidate is prevented for want of required attendance, the period of prevention shall not be considered as authorized break of study.
- **11.6** If a candidate has not reported to the college for a period of two consecutive semesters without any intimation, the name of the candidate shall be deleted permanently from the college enrollment. Such candidates are not entitled to seek readmission under any circumstances.

#### **12. PASSING REQUIREMENTS**

- **12.1** A candidate who secures not less than 50 % of total marks (continuous assessment and end semester examination put together) prescribed for the course with a minimum of 50 % of the marks prescribed for the end semester examination in all category of courses vide clause 7.1 except for the courses which are evaluated based on continuous assessment only shall be declared to have successfully passed the course in the examination.
- **12.2** A candidate who secures not less than 50 % in continuous assessment marks prescribed for the courses which are evaluated based on continuous assessment only shall be declared to have successfully passed the course. If a candidate secures less than 50% in the continuous assessment marks, he / she shall have to re-enroll for the same in the subsequent semester and satisfy the attendance requirements.
- **12.3** For a candidate who does not satisfy the clause 12.1, the continuous assessment marks secured by the candidate in the first attempt shall be retained and considered valid for subsequent attempts. However, from the fourth attempt onwards the marks scored in the end semester examinations alone shall be considered, in which case the candidate shall secure minimum 50 % marks in the end semester examinations to satisfy the passing requirements, but the grade awarded shall be only the lowest passing grade irrespective of the marks secured.

#### **13. REVALUATION OF ANSWER SCRIPTS**

A candidate shall apply for a photocopy of his / her semester examination answer script within a reasonable time from the declaration of results, on payment of a prescribed fee by submitting the proper application to the Controller of Examinations. The answer script shall be pursued and justified jointly by a faculty member who has handled the course and the course coordinator and recommended for revaluation. Based on the recommendation, the candidate can register for revaluation through proper application to the Controller of Examinations. The Controller of Examinations will arrange for revaluation and the results will be intimated to the candidate concerned. Revaluation is permitted only for Theory courses and Theory cum Practical courses where end semester examination is involved.

#### 14. SUPPLEMENTARY EXAMINATION

If a candidate fails to clear all courses in the final semester after the announcement of final end semester examination results, he/she shall be allowed to take up supplementary examinations to be conducted within a reasonable time for the courses of final semester alone, so that he/she gets a chance to complete the programme.

🍇 Kongu Engineering College, Perundurai, Erode – 638060, India

## **15. AWARD OF LETTER GRADES**

Range of % of Total Marks	Letter Grade	Grade Point
91 to 100	O (Outstanding)	10
81 to 90	A+ (Excellent)	9
71 to 80	A (Very Good)	8
61 to 70	B+ (Good)	7
50 to 60	B (Average)	6
Less than 50	RA (Reappear)	0
Satisfactory	SF	0
Withdrawal	W	-
Absent	AB	-
Shortage of Attendance in a course	SA	-

The Grade Point Average (GPA) is calculated using the formula:

 $GPA = \frac{\sum [(course credits) \times (grade points)] \text{ for all courses in the specific semester}}{\sum (course credits) \text{ for all courses in the specific semester}}$ 

The Cumulative Grade Point Average (CGPA) is calculated from first semester (third semester for lateral entry candidates) to final semester using the formula

$$CGPA = \frac{\sum [(course credits) \times (grade points)] \text{ for all courses in all the semesters so far}}{\sum (course credits) \text{ for all courses in all the semesters so far}}$$

The GPA and CGPA are computed only for the candidates with a pass in all the courses.

The GPA and CGPA indicate the academic performance of a candidate at the end of a semester and at the end of successive semesters respectively.

A grade sheet for each semester shall be issued containing Grade obtained in each course, GPA and CGPA.

A duplicate copy, if required can be obtained on payment of a prescribed fee and satisfying other procedure requirements.

Withholding of Grades: The grades of a candidate may be withheld if he/she has not cleared his/her dues or if there is a disciplinary case pending against him/her or for any other reason.

## 16. ELIGIBILITY FOR THE AWARD OF DEGREE

A candidate shall be declared to be eligible for the award of the ME / MTech Degree provided the candidate has

i. Successfully completed all the courses under the different categories, as specified in the regulations.

ii. Successfully gained the required number of total credits as specified in the curriculum M.Tech.– Chemical Engineering, Regulations, Curriculum and Syllabus – R2020 Page 18

# 🎉 Kongu Engineering College, Perundurai, Erode – 638060, India

corresponding to the candidate's programme within the stipulated time (vide clause 5).

- iii. Successfully passed any additional courses prescribed by the respective Board of Studies whenever readmitted under regulations other than R-2020 (vide clause 11.3)
- iv. No disciplinary action pending against him / her.

## 17. CLASSIFICATION OF THE DEGREE AWARDED

### **17.1** First Class with Distinction:

- **17.1.1** A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have passed the examination in First class with Distinction:
  - Should have passed the examination in all the courses of all the four semesters in the **First Appearance** within four consecutive semesters excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
  - Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
  - Should have secured a CGPA of not less than 8.50

#### (OR)

- **17.1.2** A candidate who joins from other institutions on transfer or a candidate who gets readmitted and has to move from one regulation to another regulation and who qualifies for the award of the degree (vide clause 16) and satisfies the following conditions shall be declared to have passed the examination in First class with Distinction:
  - Should have passed the examination in all the courses of all the four semesters in the **First Appearance** within four consecutive semesters excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
  - Submission of equivalent course list approved by the respective Board of studies.
  - Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
  - Should have secured a CGPA of not less than 9.00

#### 17.2 First Class:

A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have passed the examination in First class:

- Should have passed the examination in all the courses of all four semesters within six consecutive semesters excluding authorized break of study (vide clause 11) after the commencement of his / her study.
- Withdrawal from the examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 7.00

#### 17.3 Second Class:

All other candidates (not covered in clauses 17.1 and 17.2) who qualify for the award of the degree (vide clause 16) shall be declared to have passed the examination in Second Class.

**17.4** A candidate who is absent for end semester examination in a course / project work after having registered for the same shall be considered to have appeared for that examination for the purpose of classification.

#### **18. MALPRACTICES IN TESTS AND EXAMINATIONS**

If a candidate indulges in malpractice in any of the tests or end semester examinations, he/she shall be liable for punitive action as per the examination rules prescribed by the college from time to time.

#### **19. AMENDMENTS**

Notwithstanding anything contained in this manual, the Kongu Engineering College through the Academic council of the Kongu Engineering College, reserves the right to modify/amend without notice, the Regulations, Curricula, Syllabi, Scheme of Examinations, procedures, requirements, and rules pertaining to its ME / MTech programme.

#### 20AMT16 - ADVANCED CALCULUS AND NUMERICAL ANALYSIS

Programme & Branch	M.TECH. Chemical Engineering	Sem.	Category	L	т	Р	Credit
Prerequisites	Nil	1	FC	3	1	0	4

Preamble	Preamble This course is designed to enrich the knowledge in tensor calculus and calculus of variations. Also the course will develop problem solving skills in numerical methods aided by technology to apply finite difference methods for solving the boundary value problems in differential equations.							
Unit - I	Tensor Calculus	9+3						
Spaces of N with tensors tensor – Chr	Spaces of N-dimensions – Coordinate transformations – Covariant, Contravariant and mixed tensors – Fundamental operation with tensors – Symmetric and Skew-symmetric tensors – Riemannian Metric: Metric tensor – Associated tensors – Conjugate tensor – Christoffel symbols – Covariant derivative.							
Unit - II	Calculus of Variations:	9+3						
Concept of variation and its properties – Euler's equation – Functional dependant on first and higher order derivatives – Functionalsdependant on functions of several independent variables – Variational problems with moving boundaries – Isoperimetric problems - Direct methods : Ritz and Kantorovich methods.								
1								
Unit - III	Numerical solution of Ordinary differential equations	9+3						
Unit - III Runge - Kutt Shooting me	Numerical solution of Ordinary differential equations a methods for system of IVPs – Numerical stability of Runge - Kutta method – Adams - Bashforth multistep me ethod –Solution of BVP : Finite difference method – Collocation method and orthogonal collocation method.	<b>9+3</b> thod –						
Unit - III Runge - Kutt Shooting me Unit - IV	Numerical solution of Ordinary differential equations   a methods for system of IVPs – Numerical stability of Runge - Kutta method – Adams - Bashforth multistep method –Solution of BVP : Finite difference method – Collocation method and orthogonal collocation method.   Finite difference method for time dependent partial differential equations	9+3 thod – 9+3						
Unit - III Runge - Kutt Shooting me Unit - IV Parabolic eq conditions - along charac	Numerical solution of Ordinary differential equations   a methods for system of IVPs – Numerical stability of Runge - Kutta method – Adams - Bashforth multistep method –Solution of BVP : Finite difference method – Collocation method and orthogonal collocation method.   Finite difference method for time dependent partial differential equations   uations: Explicit and implicit finite difference methods – Weighted average approximation - Dirichlet's and Neutron dimensional parabolic equations – ADI method: First order hyperbolic equations – Method of numerical integrations – Wave equation: Explicit scheme – Stability.	9+3 thod – 9+3 umann gration						
Unit - III Runge - Kutt Shooting me Unit - IV Parabolic eq conditions – along charac Unit - V	Numerical solution of Ordinary differential equations   a methods for system of IVPs – Numerical stability of Runge - Kutta method – Adams - Bashforth multistep method –Solution of BVP : Finite difference method – Collocation method and orthogonal collocation method.   Finite difference method for time dependent partial differential equations   uations: Explicit and implicit finite difference methods – Weighted average approximation - Dirichlet's and New Two dimensional parabolic equations – ADI method: First order hyperbolic equations – Method of numerical integrations – Wave equation: Explicit scheme – Stability.   Finite Difference Methods For Elliptic Equations	9+3 thod – 9+3 umann gration 9+3

#### 20GET11 INTRODUCTION TO RESEARCH

(Common to Engineering and Technology Branches)

Programme & Branch	M.E. & Construction Engineering and Management		Category	L	т	Р	Credit
Prerequisites	Nil	1	PC	2	1	0	3

Preamble This course will familiarize the fundamental concepts/techniques adopted in research, problem formulation and patenting. Also will disseminate the process involved in collection, consolidation of published literature and rewriting them in a presentable form using latest tools.

#### Unit - I Concept of Research:

Meaning and Significance of Research: Skills, Habits and Attitudes for Research - Time Management - Status of Research in India. Why, How and What a Research is? - Types and Process of Research - Outcome of Research - Sources of Research Problem -Characteristics of a Good Research Problem - Errors in Selecting a Research Problem - Importance of Keywords - Literature Collection – Analysis - Citation Study - Gap Analysis - Problem Formulation Techniques.

#### Unit - II Research Methods and Journals:

Interdisciplinary Research - Need for Experimental Investigations - Data Collection Methods - Appropriate Choice of Algorithms / Methodologies / Methods - Measurement and Result Analysis - Investigation of Solutions for Research Problem - Interpretation - Research Limitations. Journals in Science/Engineering - Indexing and Impact factor of Journals - Citations - h Index - i10 Index - Journal Policies - How to Read a Published Paper - Ethical issues Related to Publishing - Plagiarism and Self-Plagiarism.

#### Unit - III Paper Writing and Research Tools:

Types of Research Papers - Original Article/Review Paper/Short Communication/Case Study - When and Where to Publish? -Journal Selection Methods. Layout of a Research Paper - Guidelines for Submitting the Research Paper - Review Process -Addressing Reviewer Comments. Use of tools / Techniques for Research - Hands on Training related to Reference Management Software - EndNote, Software for Paper Formatting like LaTeX/MS Office. Introduction to Origin, SPSS, ANOVA etc., Software for detection of Plagiarism.

#### Unit - IV Effective Technical Thesis Writing/Presentation:

How to Write a Report - Language and Style - Format of Project Report - Use of Quotations - Method of Transcription Special Elements: Title Page - Abstract - Table of Contents - Headings and Sub-Headings - Footnotes - Tables and Figures - Appendix - Bibliography etc. - Different Reference Formats. Presentation using PPTs.

#### Unit - V Nature of Intellectual Property:

Patents - Designs - Trade and Copyright. Process of Patenting and Development: Technological research - innovation - patenting - development. International Scenario: International cooperation on Intellectual Property. Procedure for grants of patents.

## 20MHT13 - MODELING IN CHEMICAL ENGINEERING

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	т	Р	Credit
Prerequisites	Nil	1	PC	3	0	0	3

# Preamble This course makes the students knowledgeable in different aspects of modeling chemical process systems & familiarizes with the numerical simulation of models in fluid flow operations, separation processes and reactors. They will also acquire knowledge on the fundamental concepts of recent techniques in process simulation

#### Unit - I Fundamentals of process modeling:

Basics of Mathematical modeling, use of modeling, fundamental laws used in modeling, Model building, Constitutive equations, initial conditions and boundary conditions, Classification of model equations, types of mathematical models, White box, black box and grey box modeling, Introduction to simulation.

#### Unit - II Modeling of simple systems:

Settling velocity of particles, cooling of a small sphere in a stagnant fluid, modeling of a surge tank, neutralization process, long chain polymerization reactions, detailed modeling of a transport reactor, Axial and radial mixing of catalyst particles in a slurry reactor.

#### Unit - III Modeling of complex systems:

CSTR and CSTBR (exhibiting multiple solutions), Linearization of nonlinear equations, Phase plane method, modeling of magnetic levitation system, Isothermal CSTR with input multiplicities, Epidemiological model, Nonlinear phenomena.

## Unit - IV Simulation using the packages Matlab and Scilab:

Over-view on Newton-Raphson method, Runge-Kutta method, and finite difference scheme method. Simulation of systems using Matlab and Scilab.

#### Unit - V Analysis and applications of model equations:

Sensitivity analysis, Estimation of model parameters by Least Squares optimization method, model based control.

#### 20MHT21 CHEMICAL EQUIPMENT DESIGN

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	т	Р	Credit
Prerequisites	Nil	2	PC	3	1	0	4

Unit - I	Design of pressure vessel:	9+3
Preamble	This course provides a basic understanding of design parameter, complete knowledge of design procedu commonly used process equipment like pressure vessel, heat exchangers, distillation column, absorption of extractor, crystallizer, cooling tower and dryers. The concepts and skills learnt in process calcu thermodynamics, momentum transfer, mass transfer and heat transfer will be utilized.	res for olumn, ations,

#### Unit - I Design of pressure vessel:

Introduction- pressure vessel codes and standards- Fundamental principles and equations, Failure mode in pressure vessel. Design of pressure vessels under combined loading and high pressure. Design of storage vessel.

#### Unit - II Design of heat transfer equipment:

Process design of Shell and tube heat exchanger, double pipe heat exchanger - estimation of individual and overall heat transfer coefficient, estimation of pressure drop. Design of single effect evaporator - calculation of steam requirement and heat transfer area.

#### Unit - III Design of mass transfer equipment:

Design of distillation column- Determination of number of stages, column diameter and height - McCabe Thiele and Ponchon Savarit method. Design of absorption column - Calculation of diameter and height, Absorption factor - estimation of number of plates required.

#### Unit - IV Design of extractor and crystallizer:

Extractor - Industrial applications of liquid-liquid extraction, choice of solvent, equipment used for liquid-liquid extraction, process design of counter current multistage extractor - steps involved in determination of number of stages. Design of crystallizers -Determination of length and number of sections

#### Unit - V Design of Miscellaneous Equipment:

Design of cooling tower - Calculation of HTU, NTU, Height and diameter. Design of Reboiler - Typical design procedure for thermosyphon reboiler and estimation of various parameters. Design of dryers – Design of rotary dryer – Estimation of length and diameter, Design of fluid bed dryer - calculation of diameter of distributor grid and disengagement zone.

## 20MHT22 ADVANCED CHEMICAL ENGINEERING THERMODYNAMICS

Programme& Branch	M.TECH. Chemical Engineering		Category	L	т	Р	Credit
Prerequisites	Nil	2	PC	3	1	0	4

Preamble	This course presents the laws of thermodynamics and their applications in process industries	
Unit – I	Laws of thermodynamics:	9+3
Basic conce theorem; a and separa	epts; first law of thermodynamics – applications to closed and open systems; second law of thermodynamics; oplications of second law to the feasibility analysis of devices and processes; evaluation of entropy change – tion of gases, mixing and separation of liquids, heating and cooling of process fluids.	Carnot mixing
Unit – II	Properties of solutions:	9+3
Molar prope Gibbs-Duhe	erties and partial molar properties; methods for determination of partial molar properties; ideal and non-ideal sol em equation; mixing of liquids – volume change, enthalpy change, Gibbs free energy change.	utions;
Unit – III	Phase equilibrium:	9+3
Vapour-liqu phase diag equation; c fugacity; the	id equilibrium; fugacity and fugacity coefficient; activity and activity coefficient; Raoult's law; modified Raoult ram of binary system; models for excess Gibbs free energy - Margules two-suffix equation, Van Laar equation, ' riterion for equilibrium between phases in multi-component non-reacting system in terms of chemical potenti ermodynamic consistency test of VLE data.	's law; Wilson ial and
Unit – IV	Chemical reaction equilibrium:	9+3
<b>T</b> I I	· · · · · · · · · · · · · · · · · · ·	

Thermodynamic analysis of chemical reactions – single reactions, simultaneous parallel reactions, prediction of equilibrium composition of reaction mixture; homogeneous gas phase reactions; homogeneous liquid phase reactions; standard Gibbs free energy change and reaction equilibrium constant; evaluation of standard free energy change; evaluation of equilibrium constant.

#### Unit – V Refrigeration and liquefaction:

Refrigeration principles; Carnot refrigeration cycle; methods of refrigeration – vapour compression refrigeration, absorption refrigeration; evaluation of COP and capacity of refrigeration cycles; air refrigeration; refrigerants for low temperature refrigeration; ozone depletion potential of refrigerants; liquefaction of gases; methods for liquefaction of gases – Claude liquefaction process; Linde liquefaction process.

## 20MHT23 - COMPUTER CONTROL OF PROCESSES

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	т	Р	Credit
Prerequisites	Nil	2	PC	3	0	0	3

Preamble	This course enables the students to acquire basic knowledge in recent control strategies of chemical processe proper input – output pairing for multiple single input – single output controllers and gain exposure on process cont with digital computers.	əs, rol
Unit – I	Data Acquisition and Control (DA&C):	9

Data acquisition systems, PC add-on-card for DA&C, Analog signal conditioning, Digital signal conditioning, Process Control examples with DA&C, Software, Industrial signal conditioners.

#### Unit – II Multi variable Systems and Control:

Model based control – development and design of IMC structure; IMC based PID controller for stable and unstable process; Model Predictive Control – dynamic matrix control, constraints and multivariable systems

#### Unit – III Discrete Time Systems:

Z-transform, Inverse of Z-transform, Sampling, Hold device, Discrete time transfer function, Time response of discrete-time systems.

#### Unit – IV Control of Discrete Time Systems:

Position algorithm for PID controllers, Velocity form of PID algorithm, Dead Beat Algorithm, Dahlin's Algorithm, Internal model control for discrete time systems

#### Unit – V Programming Logic Controllers (PLC) and Distributed control systems (DCS):

Basic features of PLC, Operation of PLC, Relay logic and Ladder Logic, Ladder diagrams, examples of ladder diagram realization, PLC timer, PLC counter. DCS Concepts, DCS hardware and software, DCS structure, Advantages and Disadvantages of DCS, Representative DCS, Basics of SCADA systems.

#### 20MHT24 INDUSTRIAL WASTEWATER TREATMENT

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	Т	Ρ	Credit
Prerequisites	Nil	2	PC	3	0	0	3

 Preamble
 Waste water treatment constitutes a major role in environmental conservation. This course provides a broad overview about the waste water characterization and treatment practices followed in industries.

 Unit – I
 Sources and types of Industrial Wastewater:
 9

## Sources and types of industrial wastewater – Characterization: Physical, Inorganic non metallic constituents, metallic constituents, Organic constituents, Biological Characteristic, Toxicity tests

#### Unit – II Introduction to process selection:

Physical unit operation: Screening, Coarse solid reduction, Mixing and flocculation, Equalization, Gravity separation, Grit removal, Sedimentation, Neutralization, Clarification, Flotation. Role of Chemical unit operations in waste water treatment, Chemical unit Process: Chemical Coagulation, Chemical Precipitation- Heavy metal Removal, Phosphorus removal, Chemical oxidation, Chemical Neutralization and stabilization

#### Unit – III Biological Treatment:

Composition and Classification, Bacterial growth, Microbial growth, Aerobic biological oxidation, biological Nitrification, Anaerobic fermentation and oxidation, Biological removal of heavy metals, Activated sludge process, Trickling Filters, Rotating Biological Contactors, Combined aerobic treatment processes, Anaerobic treatment process, Anaerobic sludge blanket process, Attached growth process

#### Unit – IV Advanced wastewater treatment:

Depth filtration, surface filtration Membrane filtration, Adsorption, Ion exchange, advanced oxidation process, Photo catalysis, Wet Air Oxidation, Evaporation. Disinfection Processes: Disinfection with chlorine, Disinfection with chlorine dioxide, Dechlorination, Disinfection with ozone, Ultraviolet radiation Disinfection. Other chemical Disinfection methods

## Unit – V Effluent Treatment Plants:

Individual and Common Effluent Treatment Plants – Zero effluent discharge systems –Wastewater reuse – Disposal of effluent on land – Quantification, characteristics and disposal of Sludge Industrial process description, wastewater characteristics, source reduction options and waste treatment flow sheet for Textiles – Tanneries – Pulp and paper – metal finishing – petrochemical – Pharmaceuticals – Sugar and Distilleries – Food Processing –fertilizers – Thermal Power Plants and Industrial Estates, Indian regulations

#### 20MHL21 CHEMICAL ENGINEERING LABORATORY II

Programme & Branch	M.TECH Chemical Engineering	Sem.	Category	L	т	Р	Credit
Prerequisites	Nil	2	PC	0	0	2	1
Preamble	This course covers various methods of modeling , sin Operations / Equipment	mulatior	and perform	analy	sis of	Chemi	cal Plant

#### List of Exercises / Experiments :

1.	Drawing of a Process Flow Diagram using AutoCAD
2.	3D equipment drawing using AutoCAD/ MS Vision
3.	Design of Shell and Tube Heat Exchanger using MATLAB
4.	Design of Double Pipe Heat Exchanger using MATLAB
5.	Design of Single Effect Evaporator using MATLAB
6.	Design of Reboiler using MATLAB
7.	Heat Integration by Pinch Technology for a Process Flow Diagram using Aspen Energy Analyzer
8.	Design of Experiments using Minitab
9.	Analysis of Variables and Optimization using Minitab
10.	3D modeling using Solid Works
11.	Introduction to Finite Element Analysis using ANSYS
12.	Introduction to Monte Carlo Simulation

## Practical: 30, Total: 30

#### **REFERENCES/MANUAL/SOFTWARE:**

1. Lab Manual

COUR On co	SE OUTCOMES: mpletion of the course, the students will be able to	BT Mapped (Highest Level)
CO1	create 2D and 3D models of Process equipment and plants using Autocad / MS Visio / ANSYS Solid works	Analyzing (K4), Imitation (S1)
CO2	design and simulate heat and mass transfer equipment using MATLAB, simulate physical phenomena of transfer processes using FEA ANSYS and optimize heat exchanger network design using Aspen Energy Analyzer	Analyzing (K4), Manipulation (S2)
CO3	analyze quality/design factors using Minitab (DOE) and perform risk analysis in various systems using Monte Carlo Simulation	Analyzing (K4), Imitation (S1)

#### 20MHE01 ADVANCED FLUIDIZATION ENGINEERING

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	т	Ρ	Credit
Prerequisites	Nil	1	PE	3	0	0	3

Preamble	This course provides an overview about the fluidization phenomena and technology. It gives vast knowledge ab flow regimes, hydrodynamics of bubbling, turbulent, fast fluidized beds and pneumatic conveying.	out
Unit – I	Applications of Fluidized Beds:	9
Introduction,	Industrial application of fluidized beds, physical operations and reactions.	
Unit – II	Mapping of regimes and dense bed:	9
Fixed beds distributor ty	of particles, types of fluidization without carryover and with carryover of particles, mapping of fluidization regim bes, Davidson model for gas flow at bubbles.	ıes,
Unit – III	Heat and Mass Transfer in Fluidized Bed Systems:	9
Mass and h surfaces.	eat transfer between fluid and solid. Gas conversion in bubbling beds. Heat transfer between fluidized bed a	and
Unit – IV	Elutriation and Entrainment:	9
RTD and dis	tribution of solid in a fluidized bed, Circulation systems- circuits for the circulation of solids, flow of gas- solid mixtu ers, flow in pneumatic transport lines.	ires
Unit – V	Design of Fluidized Bed Systems:	9
Three phoe	e fluidization, design of fluidization columns for physical operations, catalytic and non- catalytic reactions

## 20MHE02 ENERGY MANAGEMENT IN CHEMICAL INDUSTRIES

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	т	Р	Credit
Prerequisites	Nil	1	PE	3	0	0	3

Preamble	This course gives a broad overview about renewable and non-renewable energy resources, energy consumpt planning, energy audit and optimization. It also outlines the need for energy recovery and heat recovery techniques	ion, S.			
Unit – I	General:	9			
Energy Resc	ources: Coal, Petroleum, Natural gas; Reserves and Depletion, need for conservation				
Unit – II	Power Generation:	9			
Fossil-fuelled reactors, nue economic fac	Fossil-fuelled power plants: components, advanced cycles; Nuclear-fuelled power plants: nuclear energy, radioactivity, nuclear reactors, nuclear fuel cycle, fusion; Co-Generation of power; Generation Process: Economical and technical efficiency, Socio economic factor				
Unit – III	Alternative Energy:	9			
Renewable S Energy, biom	Sources: Hydropower, wind energy, geothermal energy, tidal power, ocean wave power, ocean thermal power, so nass energy; Issues and challenges in using the renewable energy sources	olar			
Unit – IV	Energy Consumption and Audit:	9			
Various type monitoring a	s of Energy audit, Advantages of each type; Bureau of Energy Efficiency; Energy Conservation act of 2001. Concep nd targeting, energy targets, reporting techniques, waste avoidance, prioritizing. Energy Analysis	ot of			
Unit – V	Optimisation Techniques in Energy Management:	9			
Recovery of waste heat using recuperative and regenerative heat exchangers; optimum shell and tube exchanger networks, evaporator systems, boiler turbo generator system.

#### 20MHE04 ADVANCED SEPARATION TECHNIQUES

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	т	Ρ	Credit
Prerequisites	Nil	2	PE	3	0	0	3

Preamble This course highlights the recent advancements in separation techniques and provides an exposure with the selection criteria of membrane materials, adsorbents, etc..

#### Unit – I Recent Advancements in Separation Techniques:

Recent advances in separation techniques based on size, surface properties, ionic properties and other special characteristics of substances. Process concept, theory and equipment used in cross flow filtration, cross flow electro filtration and dual functional filter. Surface based solid – liquid separations involving a second liquid, sirofloc filter.

#### Unit – II Membranes and Modules:

Types and choice of membranes; membrane manufacturing techniques; plate and frame, tubular, spiral wound and hollow fiber membrane reactors and their relative merits.

#### Unit – III Membrane Processes:

Dialysis, reverse osmosis, nanofiltration, ultrafiltration, and microfiltration and donnan dialysis; design of the reverse osmosis plant – cleaning of membrane – economics of membrane operations.

#### Unit – IV Adsorption and Ionic Separations:

Adsorption based Processes: Types and choice of adsorbents, Affinity chromatography and immune chromatography; lonic Separation Processes: Working principle, controlling factors, equipment employed for electrophoresis, dielectrophoresis, ion exchange chromatography and electro dialysis.

#### Unit – V Other Techniques:

Separations involving lyophilisation, pervaporation and permeation techniques for solids, liquids and gases; zone melting; adductive crystallization; foam separation; supercritical fluid extraction; Industrial effluent treatment by modern techniques

#### 20MHE05 COMPUTATIONAL FLUID DYNAMICS

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	Т	Р	Credit
Prerequisites	Nil	2	PE	3	0	0	3

Unit – I	Conservation Laws of Fluid Motion and Boundary Conditions:	9
Preamble	With the advent of high speed computing, CFD has become an integral part of engineering design, simulatic performance analysis. This course deals with the fundamentals of CFD, grid generation, meshing and so techniques using finite volume method.	on and olution

#### Unit – I Conservation Laws of Fluid Motion and Boundary Conditions:

Governing equations of fluid flow and heat transfer, equations of state, Navier-Stokes equations for Newtonian fluid, conservative form of governing equations of flow, differential and integral forms of general transport equations, classification of physical behaviour.

#### Unit – II Finite Volume Method for Diffusion and Convective- Diffusion Problems:

Finite volume method for one-dimensional, two-dimensional and three-dimensional steady state diffusion, steady one-dimensional convection and diffusion, the central differencing scheme. Properties of discretization schemes, assessment of the central differencing scheme for convection-diffusion problems, the upwind differencing scheme, the hybrid differencing scheme, the powerlaw scheme, higher order differencing schemes for convection-diffusion problems – QUICK scheme.

#### Unit – III Solution Algorithms for Pressure-Velocity Coupling in Steady Flows:

Staggered grid, momentum equations, SIMPLE algorithm, assembly of a complete method, SIMPLER, SIMPLEC, and PISO algorithms; Solution of discretised equations: tri-diagonal matrix algorithm, application of TDMA to two-dimensional and threedimensional problems.

#### Unit – IV Finite Volume Method for Unsteady Flows:

One-dimensional unsteady state heat conduction, implicit method for two-and three-dimensional problems, discretisation of transient convection-diffusion equation, transient convection-diffusion using QUICK differencing scheme, solution procedures for unsteady flow calculations, steady state calculations using pseudo-transient approach.

#### Unit – V Turbulence and its Modeling:

Transition from laminar to turbulent flow, effect of turbulence on properties of the mean flow, Reynolds-averaged Navier-Stokes equations and classical turbulence models, mixing length model, K- ${\cal E}$  model, Reynolds Stress model and Algebraic Stress model

#### 20MHE06 MIXING TECHNOLOGY

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	т	Р	Credit
Prerequisites	Nil	2	PE	3	0	0	3

Preamble	This course gives a vast knowledge about the importance of mixing in process industries and technical aspects of mixing
Unit – I	Introduction: 9
Agitation and Liquids. Fund	I mixing, Impeller types and flow pattern, Impeller Power Number, Power correlation for Newtonian and Non Newtonian damentals of Blending and Emulsion
Unit – II	Flow Patterns, Fluid Velocities and Mixing in Agitated Vessel: 9
Relationship mixing in agit	between flow pattern, fluid velocities, flow rates and mixing, Impeller discharge rates, Batch mixing and continuous tated vessel, Flow regime and flow map in agitated vessel
Unit – III	Mass Transfer: 9
Dispersion ir mass transfe	n mass transfer, Measurement of physical properties of fluid dispersion, mechanics of dispersion of fluids, Theory of r in continuous phases, continuous phase heat and mass transfer properties of dispersion
Unit – IV	Suspension of Solids: 9
Variable which on suspension	ch affects uniformity of solid suspension, impellers and circulation patterns- Effects of vessel and auxiliary equipment on, operating techniques, extrapolation of small-scale tests
Unit – V	Equipment selection and Sizing: 9
Principles of for scale-up,	similarity, design correlations, Common rules of thumb, agitation intensity, Scaling based on tests Procedure Design and selection of agitator-case study
	Total: 45

#### 20MHE08 PROCESS INTENSIFICATION

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	Т	Р	Credit
Prerequisites	Nil	2	PE	3	0	0	3

Preamble	Process Intensification is a collective term which refers to cutting edge technologies implicated to improve the performance of a chemical industry. This course throws light upon various intensification techniques and their applications						
Unit – I	Overview of Intensification and Miniaturized equipment:	9					
Introduction - Implementati	<ul> <li>Philosophy, opportunities and merits of Process Intensification; Miniaturization – effects of miniaturized equip on of micro systems, Pitfalls and Solutions.</li> </ul>	ment,					
Unit – II	Intensification of Mixing Operation:	9					
Flow pattern Fields Atomiz mixers, Hige	s in reactors, Mixing in stirred tanks: Scale up of mixing, Heat transfer. Principle and applications of High – G zer, Ultra sound Atomization, Nebulizers, High intensity inline Mixers, Static mixers, Ejectors, Tee mixers, Rotor e reactors.	ravity stator					
Unit – III	Intensification of Heat Transfer Operations:	9					
Compact hea Finned heat heat exchang	at exchangers – Classifications, Heat transfer and Pressure drop in Plate, Spiral and micro channel Heat exchar exchangers, Phase change heat exchangers, Regenerative heat exchangers for energy conservation, Selecti ger technology.	igers, on of					
Unit – IV	Process Integration:	9					
Combined sy Reactive dist	ystems: Integration of heat exchangers in separation systems, Principle and applications of Reactive absor illation and Reactive Extraction.	ption,					
Unit – V	Advanced Fields:	9					
Intensification processes, S	n for energy conservation; Sono-chemical systems- Cavitation reactors, Sono-crystallization; Microwave assupercritical fluids in chemical processes.	sisted					
	Tot	al: 45

#### 20MHE09 RISK ANALYSIS

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	т	Р	Credit
Prerequisites	Nil	2	PE	3	0	0	3

llnit – l	Introduction:		q
Preamble	This course provides an awareness on the importance of risk assessment and enables the students to understa methodology of assessing and evaluating risk.	and th	е

#### Unit – I Introduction:

Industrial accidents; accident costs; identification of accident spots; remedial measures; Identification and analysis of causes of injury to men and machines; Accident prevention; Accident proneness; Vocational guidance, Fire prevention and Fire protection.

#### Unit – II **Risk Assessment:**

Risk methodologies and assessment steps; quantitative risk assessment, rapid risk analysis; comprehensive risk analysis; identification, Probability theory, Interaction between process units, Revealed and Unrevealed failures, Probability of coincidence. Application to chemical process problems.

#### Unit – III Process Safety Analysis & Risk Management:

HAZOP, HAZAN, FAULT Tree Analysis. Safety system followed in Ammonia plants, refineries and power plants. Elements of a risk management program, risk assessment and risk management; Relief concepts, Location of relief, Relief types, Relief scenarios, Data for sizing reliefs and Relief systems.

#### Unit – IV **Risk Evaluation:**

Risk analysis model, Developing accident scenario and initiating events, Event trees, Consequences determination, uncertainty, Risk evaluation, Calculating safety costs, Evaluation and control of risk.

#### Unit – V Case studies:

Flixborough accident, Bhopal accident, Seveso accident, Binhai,-Tianjin China, Gazipur, Bangladesh and Kaohsiung gas explosions

#### 20MHE11 PROCESS OPTIMIZATION TECHNIQUES

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	Т	Р	Credit
Prerequisites	Nil	3	PE	3	0	0	3

Preamble	Optimization is an integral part in design and operation of a process industry. This course provides knowledge abo	out
	the fundamentals of optimization techniques and its applications in process industries.	
Unit – I	Basic Concepts of Optimization:	9
Problem form problems.	nulation, degree of freedom analysis, objective functions, constraints and feasible region, types of optimizati	ion
Unit – II	Non-linear Unconstrained Optimization:	9
Convex and method.	concave functions unconstrained NLP, Scanning and bracketing procedures, Newton's method, Quasi-Newto	n's
Unit – III	Non-linear Constrained and Multi-Objective Optimization:	9
Direct substi method, Epsi	tution, Quadratic programming, Penalty, Barrier and Augmented Lagrangian Methods, weighted Sum of Squar ilon constraint method and Goal attainment.	res
Unit – IV	Linear Programming and Dynamic Programming:	9
Simplex meth	nod, Barrier method, sensitivity analysis, Introduction to integer and mixed integer programming.	
Unit – V	Applications of Optimization in Chemical Engineering:	9
Heat transfer	and energy conservation, separation processes and chemical reactor design and operation	
	Total:	45

# 20MHE12 BIOPROCESS ENGINEERING

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	т	Ρ	Credit
Prerequisites	Nil	3	PE	3	0	0	3

 Preamble
 This course provides application of engineering principles to biological processes, to achieve commercial success in designing biochemical reactor with proper knowledge in enzyme engineering

 Unit – I
 Enzyme Kinetics:
 9

Classification of enzymes, Commercial application of Enzyme, Immobilization of Enzymes, Michaelis –Menten kinetics, Evaluation of parameters in the Michaelis –Menten equation, Inhibition Kinetics

### Unit – II Sterilization and Fermentation:

Sterilization: Sterilization of medium, batch and continuous sterilization, Sterilization of air, Sterilization of fermenter. Fermentation: Medium requirements, Application of fermentation process, Types of fermentation process –aerobic and anaerobic, solid state and submerged fermentation.

### Unit – III Mass Transfer and Biochemical Reaction in Porous Catalyst:

Theories of diffusional and convective mass transfer, oxygen transfer methodology in fermenter, Factors affecting oxygen transfer rate, intra particle diffusion and reaction rate, effectiveness factor and Thiele Modulus.

### Unit – IV Product Recovery:

Removal of solids, Filtration, Sedimentation, Centrifugation, Cell disruption, Extraction, Membrane separation, Chromatography, Electrophoresis, Crystallization and Drying.

### Unit – V Design and Analysis of Bioreactors:

Stability and Analysis of bioreactors, Design and operation of continuous stirred tank bioreactor, fed batch bioreactor, air-lift bioreactor, Fluidized bed bioreactor, Introduction to Scale up of bioreactors, criteria for selection of bioreactors

# 20MHE13 MULTIPHASE FLOW

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	Т	Р	Credit
Prerequisites	Nil	4	PE	3	0	0	3

Preamble	This course provides knowledge about the fundamentals of transfer phenomena in multi phase systems to momentum and mass balance. It also gives understanding of design, scaling and application of multi phase read	draw tors.
Unit – I	Flow Classification:	9

Fluid – solid systems, Flow through porous media, Fluid–fluid system- Flow pattern and flow regimes. Two–phase co–current flow of fluids-upward and downward flow in vertical pipes, Suspension rheology. Models for chemical reactor – Diffusion and bubbling bed model –Role of draft tube and wall baffles.

### Unit – II Flow – Power Correlation:

Theories of intensity and scale of turbulence, Calculation of circulation velocities and power consumption in agitated vessels for Newtonian/ Non-Newtonian fluids. Blending and Mixing of phases. Power required for aeration to suspend to an immiscible liquid or solids in Slurry reactors, Segregation phenomena, Prediction of optimum speed of impeller rotor and Design criteria for scale up.

### Unit – III Flow- Two Phase system:

Prediction of holdup and pressure drop of volume fraction, Bubble size in pipe flow, Lockhart – Martinelli parameters, Bubble Column and its design aspects, Minimum carryover velocity. Holdup ratios, Pressure drop and Transport velocities and their prediction.

### Unit – IV Flow – Three Phase Systems:

Gas, Solid and Liquid composite slurries in horizontal and vertical pipes, Flow through Porous media of composite mixtures, Prediction of holdup, pressure drop and throughput. Velocities in Three phase system. Design of multiphase contactors involving fluidization, pervaporation, lyophilisation and permeation for solids, liquids and gases.

### Unit – V Design and Development of Software programmes:

Design and development of software programmes in multiphase flow, simulation in packed and fluidized beds and Stirred tank process equipment. Selection of equipment for gaseous, particulate and liquid effluents of various industries such as scrubbers, stacks and chimneys, absorbers, combustion devices, electrostatic precipitators and filtration / reverse osmosis devices.

# 20MHE14 PIPING FLOW SHEETING PROCESS AND INSTRUMENTATION DIAGRAMS

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	т	Р	Credit
Prerequisites	Nil	4	PE	3	0	0	3

Preamble	This course enables the students to present a process flow diagram and flow sheeting principles from a cherengineering point of view. The students will be well versed with the development of process flow diagrams and constructions. Main advantage of the course will be to deal with applications of process flow diagrams in design stage study further provides a comprehensive exposition to theory and application of P&ID in HAZOPS and Risk Analy	emical control e. The rsis.
Unit – I	Flow Sheets & Process Flow Diagram:	9
Types of flow Flow sheetin	v sheets, Flow sheet Presentation, Flow Sheet Symbols, Process Flow Diagram-Synthesis of Steady State Flow s g software. P& I D objectives, guide rules, Symbols, Line numbering, Line Schedule	sheet.
Unit – II	Piping and Instrumentation Diagrams (P&ID):	9
P & I D dev Absorber, Ev	velopment, typical Stages of P & ID, P & ID for rotating equipment and static pressure vessels, Process ve vaporator	ssels,
Unit – III	Control System –I:	9
Heat Transfe	er Equipment and Reactors: Control System for Heater, Heat exchangers, Reactors.	
Unit – IV	Control System – II:	9
Mass Transf	er Equipment: Control System for Dryers, Distillation Column, Expander.	
Unit – V	Applications of P & ID:	9
Applications Applications	of P & ID in design stage –Construction stage –Commissioning stage –Operating stage –Revamping sta of P & ID in HAZOPS and Risk analysis.	age –

### 20MHE16 ADVANCED MATERIALS FOR CHEMICAL ENGINEERS

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	Т	Ρ	Credit
Prerequisites	Nil	4	PE	3	0	0	3

Unit – I	Materials – Structure & Analysis:		9
Preamble	This course aims to introduce elementary concepts and implicate expertise with selection of materials for prevand control of corrosion	ventic	ึ่งท

#### Unit – I Materials – Structure & Analysis:

Classification of Materials -Functional, Structural; Atomic Structure, Atomic Bonding, Binding Energy and interatomic spacing, Atomic arrangement and Crystal Structure; Imperfections: Point defect, Dislocations, Surface defects; Deformation of Materials Elastic & Plastic, Deformation of Single and Polycrystalline materials, Recovery, Recrystallization, and Grain growth.

#### Unit - II Fracture Mechanics and Materials Characterization:

Fracture – Ductile, Brittle, Fracture Mechanism, Impact Fracture testing; Fatigue – Cyclic stresses, The S-N Curve, Crack initiation and propagation, Factors affecting fatigue life, Fatigue testing; Creep – Creep Behavior, Stress and Temperature effects; Mechanical Testing – Tensile tests, Compression tests, Hardness tests, Creep and Stress rupture tests.

#### Unit - III Ceramics & Polymer:

Ceramics: Properties, Synthesis and processing of Ceramic powders, Characteristics - Sintered Ceramics, Grains and Grain Boundaries, Porosity; Inorganic Glasses; Refractories; Polymers: Structure, Polymer Crystallinity, Crystallization, Melting, and Glass Transition Phenomena in Polymers, Polymerization, Forming Techniques for Plastics, Fabrication of Elastomers, Fabrication of Fibers and Films.

#### Unit - IV **Composite Materials**

Introduction - Particle-Reinforced Composites, Fiber-Reinforced Composites - Influence of Fiber length, Orientation, Concentration , Fiber & Matrix Phase, Polymer-Matrix, Metal-Matrix, Ceramic-Matrix, Carbon–Carbon, Hybrid Composites; Structural Composites: Laminar Composites and Sandwich Panels

#### Unit - V Materials Selection and Design Consideration

Introduction - Materials selection for a torsionally stressed cylindrical shaft; Artificial Total Hip Replacement; Chemical Protective Clothing; Materials for Integrated Circuit Packages; Economic Considerations - Component Design, Materials, Manufacturing Techniques; Environmental and Societal Considerations - Recycling Issues in Materials Science and Engineering

# 20MHE17 INDUSTRIAL DRYING

Programme& Branch	M.TECH. Chemical Engineering	Sem.	Category	L	Т	Р	Credit
Prerequisites	Nil	4	PE	3	0	0	3

Preamble	The objective of this course is to study the types, selection and applications of industrial drivers.						
Unit – I	Fundamentals Aspects of Drying:	9					
Principles, cl	assification and selection of dryers. Basic process calculation and transport properties in drying						
Unit - II	Types of Industrial Dryers:						
Rotary dryer	, fluidized bed dryer, industrial spray drying, solar drying, spouted bed drying, impingement drying and infrared d	rying					
Unit - III	Dryers for Food and Pharmaceuticals:	9					
Drying of foo	d stuff, drying of pharma products, drying of nano size products						
Unit - IV	Dryers for Textile and Polymers:	9					
Drying of tex	tile products, Drying of bio products, drying of polymers						
Unit - V	Control and safety aspects of Industrial Dryers:	9					
Drying emiss	sion control system control of industrial dryers. Safety aspects of industrial dryers. Cost estimation methods for dry	/ers					
DECEDENC	Tot	al: 45

3. Delgdo, J.M.P.Q and Gilson Barbosa "Drying and Energy Technology" Springler, 2015.

COUF On co	BT Mapped (Highest Level)	
CO1	describe the classification, applications of drying and calculate the transport properties	Applying (K3)
CO2	employ various dryers in process industries	Applying (K3)
CO3	utilize dryers for pharma and food industries	Applying (K3)
CO4	apply dryers for drying of bio, polymers and textile products	Applying (K3)
CO5	comprehend the emission control systems and analyze the safety and economics of dryers	Analyzing (K4)

# Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5

# 20MHE18 DESIGN AND ANALYSIS OF EXPERIMENTS

Programme& Branch	M.TECH. Chemical Engineering		Category	L	т	Р	Credit
Prerequisites	Nil	4	PE	3	0	0	3

Preamble	The objective of this course is to introduce concepts of Design of Experiments	
Unit – I	Introduction to Experimental Design:	9
Introduction experiments	<ul> <li>Principles and applications of Design of Experiments, Design of a process and product, Guidelines for design Using statistical techniques for experimentation, Case studies</li> </ul>	ning
Unit - II	Foundations of Statistics:	9
Sampling an Regression	nd Sampling Distributions, Inferences on Randomized and paired comparison designs, Analysis of Variat Analysis – Linear, Multiple regression, Testing for lack of fit	oles,
Unit - III	Randomized Complete Block Design:	9
Framing RC Block Desigr	BD experiments, Latin Square Desing, Graeco-Latin Square Design, Central Composite Design, Balanced Incomp n, Model adequacy checking, Leas Square estimation, regression, Case Studies in Chemical Engineering	lete
Unit - IV	Factorial Experiments:	9
Principles a experiments Engineering	nd Merits of Factorial design, Analysis of two factorial experiments, Analysis of two level Fractional factor, Three level Factorial experiments, Introduction to mixed and non regular factorial designs, Case Studies in Chem	orial nical
Unit - V	Response Surface Methodology using software tools:	9
Introduction Mixture expe	to RSM, Steepest Ascent method, Analysis of Second order response surface, Designs for Fitting Response surface riments, Case Studies in Chemical Engineering Introduction to software tools – Minitab	ces,
	Total	: 45

COUF On co	BT Mapped (Highest Level)	
CO1	apply the basic principles and strategies of experimental design to real time experimental data	Applying (K3)
CO2	apply fundamental concepts of statistics for testing a hypothesis	Applying (K3)
CO3	formulate and analyze Randomized complete block experiments	Analyzing (K4)
CO4	analyze Factorial experiments for deriving conclusions	Analyzing (K4)
CO5	perform response surface analysis using software tools and interpret the results	Analyzing (K4)

# 20GET13 - INNOVATION, ENTREPRENEURSHIP AND VENTURE DEVELOPMENT

Programme & Branch		All ME/MTech, MCA Programmes	Sem.	Category	L	т	Р	Credit		
Prerequisite		Nil		PE	3	0	0	3		
Preamble	e This course will direct the students on how to employ their innovations towards a successful entrepreneurial venture development.									
UNIT – I	Innovation and Entrepreneurship: 9									
Creativity and of entreprene vs Intraprene	d Innova eurship - eurship	tion – Types of innovation – challenges in innovation- steps Role of Entrepreneurship in Economic Development - Fac	s in inn ctors aff	ovation manag ecting Entrepr	ement- eneurst	Meanir nip – Er	ng and htreprei	concept neurship		

### UNIT – II Design Thinking and Product Design:

Design Thinking and Entrepreneurship – Design Thinking Stages: Empathize – Define – Ideate – Prototype – Test. Design thinking tools: Analogies – Brainstorming – Mind mapping. Techniques and tools for concept generation, concept evaluation – Product architecture –Minimum Viable Product (MVP)- Product prototyping – tools and techniques– overview of processes and materials – evaluation tools and techniques for user-product interaction

### UNIT – III Business Model Canvas (BMC) and Business Plan Preparation:

Lean Canvas and BMC - difference and building blocks- BMC: Patterns – Design – Strategy – Process–Business model failures: Reasons and remedies. Objectives of a Business Plan - Business Planning Process and Preparation

### UNIT – IV IPR and Commercialization:

Need for Intellectual Property- Basic concepts - Different Types of IPs: Copy Rights, Trademarks, Patents, Geographical Indications, Trade Secrets and Industrial Design– Patent Licensing - Technology Commercialization – Innovation Marketing

### UNIT – V Venture Planning and Means of Finance:

Startup Stages - Forms of Business Ownership - Sources of Finance – Idea Grant – Seed Fund – Angel & Venture Fund – Institutional Support to Entrepreneurs – Bank and Institutional Finance to Entrepreneurs

COUR On cor	BT Mapped (Highest Level)	
CO1:	understand the relationship between innovation and entrepreneurship	Understanding (K2)
CO2:	understand and employ design thinking process during product design and development	Analysing (K4)
CO3:	develop suitable business models as per the requirement of the customers	Analysing (K4)
CO4:	Practice the procedures for protection of their ideas' IPR	Applying (K3)
CO5:	understand and plan for suitable type of venture and modes of finances	Applying (K3)

Mapping of COs with POs and PSOs
