INSTITUTE VISION

To be a centre of excellence for development and dissemination of knowledge in Applied Sciences, Technology, Engineering and Management for the Nation and beyond.

INSTITUTE MISSION

We are committed to value based Education, Research and Consultancy in Engineering and Management and to bring out technically competent, ethically strong and quality professionals to keep our Nation ahead in the competitive knowledge intensive world.

QUALITY POLICY

We are committed to

- Provide value based quality education for the development of students as competent and responsible citizens.
- Contribute to the nation and beyond through research and development
- Continuously improve our services

DEPARTMENT OF FOOD TECHNOLOGY

VISION

To be a centre of excellence for development and dissemination of knowledge in the field of Food Technology for the nation and beyond.

MISSION

Department of Food Technology is committed to::

- MS1: Develop vibrant, competent and ethical food engineers who can promote technical advancements in the field of Food Technology
- MS2: Foster the research activities of faculty and students to explore the state-of- the-art techniques to meet the industrial and societal needs.
- MS3: Endeavour for constant upgradation of technical expertise to support continuous learning.
- MS4: Develop vibrant, competent and ethical food engineers who can promote technical advancements in the field of Food Technology

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

Graduates of Food Technology will be able to

- PEO1: Apply principles of basic sciences, and engineering to succeed in their professional career.
- PEO2: Analyze, design and develop food processes/products that are technically feasible, economically viable and socially relevant.
- PEO3: Exhibit professional, ethical codes of conduct and an aptitude for continuous learning for catering to the ever changing needs of the society.

PROGRAM OUTCOMES (POs)

Graduates of Food Technology will be able to :

- PO1 Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- PO2 Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- PO3 Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- PO4 Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- PO5 Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- PO6 The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- PO7 Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- PO8 Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- PO9 Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- PO10 Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- PO11 Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- PO12 Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM SPECIFIC OUTCOMES (PSOs)

Graduates of Food Technology will:	
PSO1	Explore the ideas and methodologies in developing innovative food processing techniques and food products
PSO2	Adapt multidisciplinary approach to solve food industry problems and ensure food quality and safety

MAPPING OF PEOs WITH POs AND PSOs

(Autonomous)

REGULATIONS 2020

CHOICE BASED CREDIT SYSTEM AND OUTCOME BASED EDUCATION

BACHELOR OF ENGINEERING (BE) / BACHELOR OF TECHNOLOGY (BTech) DEGREE PROGRAMMES

These regulations are applicable to all candidates admitted into BE/BTech Degree programmes from the academic year 2020 – 2021 onwards.

1. DEFINITIONS AND NOMENCLATURE

In these Regulations, unless otherwise specified:

- i. “University” means ANNA UNIVERSITY, Chennai.
- ii. “College” means KONGU ENGINEERING COLLEGE.
- iii. “Programme” means Bachelor of Engineering (BE) / Bachelor of Technology (BTech) Degree programme
- iv. “Branch” means specialization or discipline of BE/BTech Degree programme, like Civil Engineering, Information Technology, etc.
- v. “Course” means a Theory / Theory cum Practical / Practical course that is normally studied in a semester like Mathematics, Physics etc.
- vi. “Credit” means a numerical value allocated to each course to describe the candidate’s workload required per week.
- vii. “Grade” means the letter grade assigned to each course based on the marks range specified.
- viii. “Grade point” means a numerical value (0 to 10) allocated based on the grade assigned to each course.
- ix. “Principal” means Chairman, Academic Council of the College.
- x. “Controller of Examinations” means authorized person who is responsible for all examination related activities of the College.
- xi. “Head of the Department” means Head of the Department concerned of the College

2. PROGRAMMES AND BRANCHES OF STUDY

The following programmes and branches of study approved by Anna University, Chennai and All India Council for Technical Education, New Delhi are offered by the College.

Programme	Branch
BE	Civil Engineering
	Mechanical Engineering
	Electronics and Communication Engineering
	Computer Science and Engineering
	Electrical and Electronics Engineering
	Electronics and Instrumentation Engineering
	Mechatronics Engineering
	Automobile Engineering
	Computer Science and Design
BTech	Chemical Engineering
	Information Technology
	Food Technology
	Artificial Intelligence and Data Science
	Artificial Intelligence and Machine Learning

3. ADMISSION REQUIREMENTS

3.1 First Semester Admission

The candidates seeking admission to the first semester of the eight semester BE / BTech Degree Programme:

Should have passed the Higher Secondary Examination (10 + 2) in the academic stream with Mathematics, Physics and Chemistry as three of the four subjects of study under Part-III subjects of the study conducted by the Government of Tamil Nadu or any examination of any other University or authority accepted by the Anna University, Chennai as equivalent thereto.

(OR)

Should have passed the Higher Secondary Examination of Vocational stream (Vocational groups in Engineering / Technology) as prescribed by the Government of Tamil Nadu.

They should also satisfy other eligibility conditions as prescribed by the Anna University, Chennai and Directorate of Technical Education, Chennai from time to time.

3.2 Lateral Entry Admission

The candidates who hold a Diploma in Engineering / Technology awarded by the State

Board of Technical Education, Tamilnadu or its equivalent are eligible to apply for Lateral entry admission to the third semester of BE / BTech in relevant branches of study.

(OR)

The candidates who hold a BSc degree (10+2+3 stream) with mathematics as one of the subjects at the BSc level from a recognised University are eligible to apply for Lateral entry admission to the third semester of BE / BTech. Such candidates shall undergo two additional Engineering course(s) in the third and fourth semesters as prescribed by the College.

They should satisfy other eligibility conditions prescribed by the Anna University, Chennai and Directorate of Technical Education, Chennai from time to time.

4. STRUCTURE OF PROGRAMMES

4.1 Categorisation of Courses

The BE / BTech programme shall have a curriculum with syllabi comprising of theory, theory cum practical, practical courses in each semester, professional skills training/industrial training, project work, internship, etc. that have been approved by the respective Board of Studies and Academic Council of the College. All the programmes have well defined Programme Outcomes (PO), Programme Specific Outcomes (PSO) and Programme Educational Objectives (PEOs) as per Outcome Based Education (OBE). The content of each course is designed based on the Course Outcomes (CO). The courses shall be categorized as follows:

- i. Humanities and Social Sciences (HS) including Management Courses
- ii. Basic Science (BS) Courses
- iii. Engineering Science (ES) Courses
- iv. Professional Core (PC) Courses
- v. Professional Elective (PE) Courses
- vi. Open Elective (OE) Courses
- vii. Employability Enhancement Courses (EC) like Project work, Professional Skills Training, Industrial Training, Comprehensive Test & Viva, Entrepreneurships/Start ups and Internship in Industry or elsewhere
- viii. Audit Courses (AC)
- ix. Mandatory Courses (MC) like Student Induction Program and Environmental Science.
- x. Honours Degree Courses (HC)

4.2 Credit Assignment and Honours Degree

4.2.1. Credit Assignment

Each course is assigned certain number of credits as follows:

Contact period per week	Credits
1 Lecture / Tutorial Period	1

2 Practical Periods	1
2 Project Work Periods	1
40 Training / Internship Periods	1

The minimum number of credits to complete the BE/BTech programme is 169.

4.2.2. Honours Degree

If a candidate earns 18 to 20 additional credits in an emerging area, then he/she can be awarded with Honours degree mentioning that emerging area as his/her specialization. The respective board of studies shall recommend the specializations for honours degree and appropriate additional courses to be studied by the candidate which shall get approval from Academic Council of the institution. A candidate shall have not less than 8.0 CGPA and no history of arrears during the entire programme to opt for the honours degree.

Various specializations for various branches recommended by the respective boards of studies are given below:

SNo	Specializations for Honours degree in emerging areas	To be offered as Honours, Only for the following branches mentioned against the specialization
1.	Construction Technology	BE – Civil Engineering
2.	Smart Cities	BE – Civil Engineering
3.	Smart Manufacturing *	BE – Mechanical Engineering
4.	Computational Product Design *	BE – Mechanical Engineering
5.	Intelligent Autonomous Systems *	BE – Mechatronics Engineering
6.	E-Mobility *	BE – Automobile Engineering
7.	Artificial Intelligence and Machine Learning	BE – Electronics and Communication Engineering
8.	System on Chip Design *	BE – Electronics and Communication Engineering
9.	Electric Vehicles	BE – Electrical and Electronics Engineering
10.	Microgrid Technologies	BE – Electrical and Electronics Engineering
11.	Intelligent Sensors Technology *	BE – Electronics and Instrumentation Engineering
12.	Smart Industrial Automation *	BE – Electronics and Instrumentation Engineering
13.	Data Science	BE – Computer Science and Engineering
14.	Cyber Security	BE – Computer Science and Engineering
15.	Data Science	BTech – Information Technology
16.	Cyber Security	BTech – Information Technology
17.	Petroleum and Petrochemical Engineering *	BTech – Chemical Engineering
18.	Waste Technology *	BTech – Chemical Engineering
19.	Food Processing and Management *	BTech – Food Technology
20.	Virtual and Augmented Reality	BE- Computer Science and Design
21.	Data Science	BE- Computer Science and Design
22.	Internet of Things (IoT)	BTech – Artificial Intelligence and Data Science
23.	Blockchain	BTech – Artificial Intelligence and Data Science
24.	Internet of Things (IoT)	BTech – Artificial Intelligence and Machine Learning
25.	Blockchain	BTech – Artificial Intelligence and Machine Learning

*Title by KEC

The courses specified under Honours degree in the emerging area may include theory, theory cum practical, practical, project work, etc. under the particular specialization. A

candidate can choose and study these specified courses from fourth semester onwards and he/she shall successfully complete the courses within the stipulated time vide clause 5. Total number of credits earned in each semester may vary from candidate to candidate based on the courses chosen. The registration, assessment & evaluation pattern and classification of grades of these courses shall be the same as that of the courses in the regular curriculum of the programme of the candidate vide clause 6, clause 7 and clause 15 respectively. A candidate can earn Honours degree in only one specialization during the entire duration of the programme.

4.3 Employability Enhancement Courses

A candidate shall be offered with the employability enhancement courses like project work, internship, professional skills training/industrial training, comprehensive test & viva, internship and entrepreneurships/start ups during the programme to gain/exhibit the knowledge/skills.

4.3.1 Professional Skills Training/ Industrial Training/Entrepreneurships/Start Ups

A candidate may be offered with appropriate training courses imparting programming skills, communication skills, problem solving skills, aptitude skills etc. It is offered in two phases as phase-I in fifth semester and phase-II in sixth semester including vacation periods and each phase can carry two credits.

(or)

A candidate may be allowed to go for training at research organizations or industries for a required number of hours in sixth semester vacation period. Such candidate can earn two credits for this training course in place of Professional Skills Training Phase-II in sixth semester. He/She shall attend Professional Skills Training Phase-I in fifth semester and can earn two credits.

(or)

A candidate may be allowed to set up a start up and working part-time for the start ups by applying his/her innovations and can become a student entrepreneur during BE/BTech programme. Candidates can set up their start up from fifth semester onwards either inside or outside of the college. Such student entrepreneurs may earn a maximum of 2 credits per semester for two semesters each in place of either Professional Skills Training-I / II or Industrial Training-I/ II respectively. The area in which the candidate wants to initiate a start up may be interdisciplinary or multidisciplinary. The progress of the startup shall be evaluated by a panel of members constituted by the Principal through periodic reviews.

4.3.2 Comprehensive Test & Viva

The overall knowledge of the candidate in various courses he/she studied shall be evaluated by (i) conducting comprehensive tests with multiple choice questions generally with pattern similar to GATE and/or (ii) viva-voce examination conducted by a panel of experts assigned by the Head of the department. The members can examine the knowledge of the candidate by asking questions from various domains and the marks will be assigned based on their answers. This course shall carry two credits.

4.3.3 Internships

The curriculum enables a candidate to go for full time project through internship during a part of seventh semester and/or entire final semester and can earn credits vide clause 7.6 and clause 7.11.

A candidate is permitted to go for full time projects through internship in seventh semester with the following condition: The candidate shall complete a part of the seventh semester courses with a total credit of about 50% of the total credits of seventh semester including Project Work-I Phase-II in the first two months from the commencement of the seventh semester under fast track mode. The balance credits required to complete the seventh semester shall be earned by the candidate through either approved Value Added Courses /Online courses / Self Study Courses or Add/Drop courses as per clause 4.4 and clause 4.5 respectively.

A candidate is permitted to go for full time projects through internship during eighth semester. Such candidate shall earn the minimum number of credits required to complete eighth semester other than project through either approved Value Added Courses /Online courses / Self Study Courses or Add/Drop courses as per clause 4.4 and clause 4.5 respectively.

Assessment procedure is to be followed as specified in the guidelines approved by the Academic Council.

4.4 Value Added Courses / Online Courses / Self Study Courses

The candidates may optionally undergo Value Added Courses / Online Courses / Self Study Courses as elective courses.

4.4.1 Value Added Courses: Value Added courses each with One / Two credits shall be offered by the college with the prior approval from the respective Board of Studies. A candidate can earn a maximum of six credits through value added courses during the entire duration of the programme.

4.4.2 Online Courses: Candidates may be permitted to earn credits for online courses, offered by NPTEL / SWAYAM / a University / Other Agencies, approved by respective Board of Studies.

4.4.3 Self Study Courses: The Department may offer an elective course as a self study course. The syllabus of the course shall be approved by the respective Board of Studies. However, mode of assessment for a self study course will be the same as that used for other courses. The candidates shall study such courses on their own under the guidance of member of the faculty following due approval procedure. Self study course is limited to one per semester.

4.4.4 The elective courses in the final year may be exempted if a candidate earns the required credits vide clause 4.4.1, 4.4.2 and 4.4.3 by registering the required number of courses in advance.

4.4.5 A candidate can earn a maximum of 30 credits through all value added courses, online courses and self study courses.

4.5 Flexibility to Add or Drop Courses

4.5.1 A candidate has to earn the total number of credits specified in the curriculum of the respective programme of study in order to be eligible to obtain the degree. However, if the candidate wishes, then the candidate is permitted to earn more than the total number of credits prescribed in the curriculum of the candidate's programme.

- 4.5.2** From the first to eighth semesters the candidates have the option of registering for additional elective/Honours courses or dropping of already registered additional elective/Honours courses within two weeks from the start of the semester. Add / Drop is only an option given to the candidates. Total number of credits of such courses during the entire programme of study cannot exceed eight.
- 4.6** Maximum number of credits the candidate can enroll in a particular semester cannot exceed 30 credits.
- 4.7** The blend of different courses shall be so designed that the candidate at the end of the programme would have been trained not only in his / her relevant professional field but also would have developed to become a socially conscious human being.
- 4.8** The medium of instruction, examinations and project report shall be English.

5. DURATION OF THE PROGRAMME

- 5.1** A candidate is normally expected to complete the BE / BTech Degree programme in 8 consecutive semesters/4 Years (6 semesters/3 Years for lateral entry candidate), but in any case not more than 14 semesters/7 Years (12 semesters/6 Years for lateral entry candidate).
- 5.2** Each semester shall consist of a minimum of 90 working days including continuous assessment test period. The Head of the Department shall ensure that every teacher imparts instruction as per the number of periods specified in the syllabus for the course being taught.
- 5.3** The total duration for completion of the programme reckoned from the commencement of the first semester to which the candidate was admitted shall not exceed the maximum duration specified in clause 5.1 irrespective of the period of break of study (vide clause 11) or prevention (vide clause 9) in order that the candidate may be eligible for the award of the degree (vide clause 16). Extension beyond the prescribed period shall not be permitted.

6. COURSE REGISTRATION FOR THE EXAMINATION

- 6.1** Registration for the end semester examination is mandatory for courses in the current semester as well as for the arrear courses failing which the candidate will not be permitted to move on to the higher semester. This will not be applicable for the courses which do not have an end semester examination.
- 6.2** The candidates who need to reappear for the courses which have only continuous assessment shall enroll for the same in the subsequent semester, when offered next, and repeat the course. In this case, the candidate shall attend the classes, satisfy the attendance requirements (vide clause 8), earn continuous assessment marks. This will be considered as an attempt for the purpose of classification.

- 6.3** If a candidate is prevented from writing end semester examination of a course due to lack of attendance, the candidate has to attend the classes, when offered next, and fulfill the attendance requirements as per clause 8 and earn continuous assessment marks. If the course, in which the candidate has a lack of attendance, is an elective, the candidate may register for the same or any other elective course in the subsequent semesters and that will be considered as an attempt for the purpose of classification.
- 6.4** A candidate shall register for the chosen courses as well as arrear courses (if any vide clause 6.2 and 6.3) from the list of courses specified under Honours degree.

7. ASSESSMENT AND EXAMINATION PROCEDURE FOR AWARDING MARKS

- 7.1** The BE/BTech programmes consist of Theory Courses, Theory cum Practical courses, Practical courses, Project Work, Professional Skills Training / Industrial Training, Internship and Entrepreneurships/ Start ups. Performance in each course of study shall be evaluated based on (i) Continuous Assessments (CA) throughout the semester and (ii) End Semester Examination (ESE) at the end of the semester except for the courses which are evaluated based on continuous assessment only. Each course shall be evaluated for a maximum of 100 marks as shown below:

Sl. No.	Category of Course	Continuous Assessment Marks	End Semester Examination Marks
1.	Theory / Practical	50	50
2.	Theory cum Practical	The distribution of marks shall be decided based on the credit weightage assigned to theory and practical components.	
3.	Professional Skills Training / / Comprehensive Test & Viva / Entrepreneurships / Start ups / Project Work - I / Industrial Training / Mandatory Course	100	---
4.	Project Work-II Phase-I / Project Work-II Phase-II / Internships	50	50
5.	Value Added Course	The distribution of marks shall be decided based on the credit weightage assigned	---
6.	All other Courses		

- 7.2** Examiners for setting end semester examination question papers for theory courses, theory cum practical courses and practical courses and evaluating end semester examination answer scripts, project works, internships and entrepreneurs/start ups shall be appointed by the Controller of Examinations after obtaining approval from the Principal.

7.3 Theory Courses

For all theory courses out of 100 marks, the continuous assessment shall be 50 marks and the end semester examination shall be for 50 marks. However, the end semester examinations shall be conducted for 100 marks and the marks obtained shall be reduced to 50. The continuous assessment tests shall be conducted as per the schedule laid down in the academic schedule. Three tests shall be conducted for 50 marks each and reduced to 30 marks each. The total of the continuous assessment marks and the end semester examination marks shall be rounded off to the nearest integer.

- 7.3.1** The assessment pattern for awarding continuous assessment marks shall be as follows:

Sl. No.	Type	Max. Marks	Remarks
1.	Test - I	30	Average of best two
	Test - II	30	
	Test - III	30	
2.	Tutorial	15	Should be of Open Book/Objective Type. Average of best 4 (or more, depending on the nature of the course, as may be approved by Principal)
3.	Assignment / Paper Presentation in Conference / Seminar / Comprehension / Activity based learning / Class notes	05	To be assessed by the Course Teacher based on any one type.
Total		50	Rounded off to the one decimal place

However, the assessment pattern for awarding the continuous assessment marks may be changed based on the nature of the course and is to be approved by the Principal.

- 7.3.2** A reassessment test or tutorial covering the respective test or tutorial portions may be conducted for those candidates who were absent with valid reasons (Sports or any other reason approved by the Principal).

7.3.3 The end semester examination for theory courses shall be for a duration of three hours and shall be conducted between November and January during odd semesters and between April and June during even semesters every year.

7.4 Theory cum Practical Courses

For courses involving theory and practical components, the evaluation pattern as per the clause 7.1 shall be followed. Depending on the nature of the course, the end semester examination shall be conducted for theory and the practical components. The apportionment of continuous assessment and end semester examination marks shall be decided based on the credit weightage assigned to theory and practical components approved by Principal.

7.5 Practical Courses

For all practical courses out of 100 marks, the continuous assessment shall be for 50 marks and the end semester examination shall be for 50 marks. Every exercise / experiment shall be evaluated based on the candidate's performance during the practical class and the candidate's records shall be maintained.

7.5.1 The assessment pattern for awarding continuous assessment marks for each course shall be decided by the course coordinator based on rubrics of that particular course, and shall be based on rubrics for each experiment.

7.6 Project Work-II Phase-I / Project Work-II Phase-II

7.6.1 Project work shall be assigned to a single candidate or to a group of candidates not exceeding 4 candidates in a group. The project work is mandatory for all the candidates.

7.6.2 The Head of the Department shall constitute review committee for project work. There shall be two assessments by the review committee during the semester. The candidate shall make presentation on the progress made by him/her before the committee.

7.6.3 The continuous assessment and end semester examination marks for Project Work-II (both Phase-I and Phase-II) and the Viva-Voce Examination shall be distributed as below:

Continuous Assessment (Max. 50 Marks)						End Semester Examination (Max. 50 Marks)			
Zeroth Review		Review I (Max.. 20 Marks)		Review II (Max. 30 Marks)		Report Evaluation (Max. 20 Marks)	Viva - Voce (Max. 30 Marks)		
Rv. Com	Guide	Review Committee (excluding guide)	Guide	Review Committee (excluding guide)	Guide	Ext. Exr.	Guide	Exr.1	Exr.2
0	0	10	10	15	15	20	10	10	10

- 7.6.4** The Project Report prepared according to approved guidelines and duly signed by the Supervisor shall be submitted to Head of the Department. The candidate(s) must submit the project report within the specified date as per the academic schedule of the semester. If the project report is not submitted within the specified date then the candidate is deemed to have failed in the Project Work and redo it in the subsequent semester.
- 7.6.5** If a candidate fails to secure 50% of the continuous assessment marks in the project work, he / she shall not be permitted to submit the report for that particular semester and shall have to redo it in the subsequent semester and satisfy attendance requirements.
- 7.6.6** The project work shall be evaluated based on the project report submitted by the candidate in the respective semester and viva-voce examination by a committee consisting of two examiners and guide of the project work.
- 7.6.7** If a candidate fails to secure 50 % of the end semester examination marks in the project work, he / she shall be required to resubmit the project report within 30 days from the date of declaration of the results and a fresh viva-voce examination shall be conducted as per clause 7.6.6.
- 7.6.8** A copy of the approved project report after the successful completion of viva-voce examination shall be kept in the department library.

7.7 Project Work-I Phase-I / Industrial Training

The evaluation method shall be same as that of the Project Work-II as per clause 7.6 excluding 7.6.3, 7.6.5, 7.6.6 and 7.6.7. The marks distribution is given below:

Continuous Assessment (Max. 100 Marks)								
Zeroth Review		Review I (Max.. 20 Marks)		Review II (Max.. 30 Marks)		Review III (Max. 50 Marks)		
						Report Evaluation (Max. 20 Marks)	Viva – Voce (Max. 30 Marks)	
Review Commi ttee	Guide	Review Committee (excluding guide)	Guide	Review Committee (excluding guide)	Guide	Review Committee	Guide	Review Committee
0	0	10	10	15	15	20	10	20

If a candidate fails to secure 50 % of the continuous assessment marks in this course, he / she shall be required to resubmit the project report within 30 days from the date of declaration of the results and a fresh viva-voce examination shall be conducted.

7.8 Professional Skills Training

Phase-I training shall be conducted for minimum of 80 hours in 4th semester vacation and during 5th semester. Phase-II training shall be conducted for minimum of 80 hours in 5th semester vacation and during 6th semester. The evaluation procedure shall be approved by Principal.

7.9 Comprehensive Test and Viva

A candidate can earn 2 credits by successfully completing this course. The evaluation procedures shall be approved by the Principal.

7.10 Entrepreneurships/ Start ups

A start up/business model may be started by a candidate individually or by a group of maximum of three candidates during the programme vide clause 4.3.1. The head of the department concerned shall assign a faculty member as a mentor for each start up.

A review committee shall be formed by the Principal for reviewing the progress of the Start ups / Business models, innovativeness, etc. The review committee can recommend the appropriate grades for academic performance for the candidate(s) involved in the start ups. This course shall carry a maximum of two credits in fifth semester and two credits in sixth semester respectively and shall be evaluated through continuous assessments for a maximum of 100 marks vide clause 7.1. A report about the start ups is to be submitted to the review committee for evaluation for each start up and the marks will be given to Controller of Examinations after getting approval from Principal.

7.11 Projects through Internships

Each candidate shall submit a brief report about the project through internship undergone and a certificate issued from the organization concerned at the time of Viva-voce examination to the review committee. The evaluation method shall be same as that of the Project Work-II as per clause 7.6.

7.12 Value Added Course

Minimum of two assessments shall be conducted during the value added course duration by the offering department concerned.

7.13 Online Course

The Board of Studies will provide methodology for the evaluation of the online courses. The Board can decide whether to evaluate the online courses through continuous assessment and end semester examination or through end semester examination only. In case of credits earned through online mode from NPTEL / SWAYAM / a University / Other Agencies approved by Chairman, Academic Council, the credits may be transferred and grades shall be assigned accordingly.

7.14 Self Study Course

The member of faculty approved by the Head of the Department shall be responsible for periodic monitoring and evaluation of the course. The course shall be evaluated through continuous assessment and end semester examination. The evaluation methodology shall be the same as that of a theory course.

7.15 Audit Course

A candidate may be permitted to register for specific course not listed in his/her programme curriculum and without undergoing the rigors of getting a 'good' grade, as an Audit course, subject to the following conditions.

The candidate can register only one Audit course in a semester starting from second semester subject to a maximum of two courses during the entire programme of study. Such courses shall be indicated as 'Audit' during the time of registration itself. Only courses currently offered for credit to the candidates of other branches can be audited.

A course appearing in the curriculum of a candidate cannot be considered as an audit course. However, if a candidate has already met the Professional Elective and Open Elective credit requirements as stipulated in the curriculum, then, a Professional Elective or an Open Elective course listed in the curriculum and not taken by the candidate for credit can be considered as an audit course.

Candidates registering for an audit course shall meet all the assessment and examination requirements (vide clause 7.3) applicable for a credit candidate of that course. Only if the candidate obtains a performance grade, the course will be listed in the semester Grade Sheet and in the Consolidated Grade Sheet along with the grade SF (Satisfactory). Performance grade will not be shown for the audit course.

Since an audit course has no grade points assigned, it will not be counted for the purpose of GPA and CGPA calculations.

7.16 Mandatory Course

A candidate shall attend and complete the induction training program of duration three weeks at the beginning of the first semester. It is mandatory for all candidates who have joined in various branches of all BE/BTech programmes. No credits shall be given for such courses and shall be evaluated through continuous assessment tests only vide clause 7.1 for a maximum of 100 marks each. Since these courses have no grade points assigned, these courses will not be counted for the purpose of GPA and CGPA calculations.

7.17 Yoga and Values for Holistic Development (YVHD) and Universal Human Values (UHV)

Courses such as YVHD and UHV shall be offered to all candidates of all BE/BTech programmes. These courses shall carry a maximum of 100 marks each and shall be evaluated through continuous assessment tests only vide clause 7.1. The candidate(s) can earn 2 credits for UHV and 1 credit for YVHD by successfully completing these courses. Two continuous assessment tests will be conducted and the average marks will be taken for the calculation of grades.

8. REQUIREMENTS FOR COMPLETION OF A SEMESTER

- 8.1** A candidate who has fulfilled the following conditions shall be deemed to have satisfied the requirements for completion of a semester and permitted to appear for the examinations of that semester.

8.1.1 Ideally, every candidate is expected to attend all classes and secure 100 % attendance. However, a candidate shall secure not less than 80 % (after rounding off to the nearest integer) of the overall attendance taking into account the total number of working days in a semester.

8.1.2 A candidate who could not satisfy the attendance requirements as per clause 8.1.1 due to medical reasons (hospitalization / accident / specific illness) but has secured not less than 70 % in the current semester may be permitted to appear for the current semester examinations with the approval of the Principal on payment of a condonation fee as may be fixed by the authorities from time to time. The medical certificate needs to be submitted along with the leave application. A candidate can avail this provision only twice during the entire duration of the degree programme.

A candidate who could not satisfy the attendance requirements as per clause 8.1.1 due to his/her entrepreneurship/ start ups activities, but has secured not less than 60 % in the current semester can be permitted to appear for the current semester examinations with the recommendation of review committee and approval from the Principal.

8.1.3 In addition to clause 8.1.1 or 8.1.2, a candidate shall secure not less than 60 % attendance in each course.

8.1.4 A candidate shall be deemed to have completed the requirements of study of any semester only if he/she has satisfied the attendance requirements (vide clause 8.1.1 to 8.1.3) and has registered for examination by paying the prescribed fee.

8.1.5 Candidate's progress is satisfactory.

8.1.6 Candidate's conduct is satisfactory and he/she was not involved in any indisciplined activities in the current semester.

8.2. The candidates who do not complete the semester as per clauses from 8.1.1 to 8.1.6 except 8.1.3 shall not be permitted to appear for the examinations at the end of the semester and not be permitted to go to the next semester. They have to repeat the incomplete semester in next academic year.

8.3 The candidates who satisfy the clause 8.1.1 or 8.1.2 but do not complete the course as per clause 8.1.3 shall not be permitted to appear for the end semester examination of that course alone. They have to repeat the incomplete course in the subsequent semester when it is offered next.

9. REQUIREMENTS FOR APPEARING FOR END SEMESTER EXAMINATION

9.1 A candidate shall normally be permitted to appear for end semester examination of the current semester if he/she has satisfied the semester completion requirements as per clause 8, and has registered for examination in all courses of that semester. Registration is mandatory for current semester examinations as well as for arrear examinations failing which the candidate shall not be permitted to move on to the higher semester.

- 9.2** When a candidate is deputed for a National / International Sports event during End Semester examination period, supplementary examination shall be conducted for such a candidate on return after participating in the event within a reasonable period of time. Such appearance shall be considered as first appearance.
- 9.3** A candidate who has already appeared for a course in a semester and passed the examination is not entitled to reappear in the same course for improvement of letter grades / marks.

10. PROVISION FOR WITHDRAWAL FROM EXAMINATIONS

- 10.1** A candidate may, for valid reasons, be granted permission to withdraw from appearing for the examination in any regular course or all regular courses registered in a particular semester. Application for withdrawal is permitted only once during the entire duration of the degree programme.
- 10.2** The withdrawal application shall be valid only if the candidate is otherwise eligible to write the examination (vide clause 9) and has applied to the Principal for permission prior to the last examination of that semester after duly recommended by the Head of the Department.
- 10.3** The withdrawal shall not be considered as an appearance for deciding the eligibility of a candidate for First Class with Distinction/First Class.
- 10.4** If a candidate withdraws a course or courses from writing end semester examinations, he/she shall register the same in the subsequent semester and write the end semester examinations. A final semester candidate who has withdrawn shall be permitted to appear for supplementary examination to be conducted within reasonable time as per clause 14.
- 10.5** The final semester candidate who has withdrawn from appearing for project viva-voce for genuine reasons shall be permitted to appear for supplementary viva-voce examination within reasonable time with proper application to Controller of Examinations and on payment of prescribed fee.

11. PROVISION FOR BREAK OF STUDY

- 11.1** A candidate is normally permitted to avail the authorised break of study under valid reasons (such as accident or hospitalization due to prolonged ill health or any other valid reasons) and to rejoin the programme in a later semester. He/She shall apply in advance to the Principal, through the Head of the Department, stating the reasons therefore, in any case, not later than the last date for registering for that semester examination. A candidate is permitted to avail the authorised break of study only once during the entire period of study for a maximum period of one year. However, in extraordinary situation the candidate may apply for additional break of study not exceeding another one year by paying prescribed fee for the break of study.
- 11.2** The candidates permitted to rejoin the programme after break of study / prevention due to lack of attendance shall be governed by the rules and regulations in force at the time of rejoining.

- 11.3** The candidates rejoining in new Regulations shall apply to the Principal in the prescribed format through Head of the Department at the beginning of the readmitted semester itself for prescribing additional/equivalent courses, if any, from any semester of the regulations in-force, so as to bridge the curriculum in-force and the old curriculum.
- 11.4** The total period of completion of the programme reckoned from the commencement of the semester to which the candidate was admitted shall not exceed the maximum period specified in clause 5 irrespective of the period of break of study in order to qualify for the award of the degree.
- 11.5** If any candidate is prevented for want of required attendance, the period of prevention shall not be considered as authorized break of study.
- 11.6** If a candidate has not reported to the college for a period of two consecutive semesters without any intimation, the name of the candidate shall be deleted permanently from the college enrollment. Such candidates are not entitled to seek readmission under any circumstances.

12. PASSING REQUIREMENTS

- 12.1** A candidate who secures not less than 50 % of total marks (continuous assessment and end semester examination put together) prescribed for the course with a minimum of 45 % of the marks prescribed for the end semester examination in all category of courses vide clause 7.1 except for the courses which are evaluated based on continuous assessment only shall be declared to have successfully passed the course in the examination.
- 12.2** A candidate who secures not less than 50 % in continuous assessment marks prescribed for the courses which are evaluated based on continuous assessment only shall be declared to have successfully passed the course. If a candidate secures less than 50% in the continuous assessment marks, he / she shall have to re-enroll for the same in the subsequent semester and satisfy the attendance requirements.
- 12.3** For a candidate who does not satisfy the clause 12.1, the continuous assessment marks secured by the candidate in the first attempt shall be retained and considered valid for subsequent attempts. However, from the fourth attempt onwards the marks scored in the end semester examinations alone shall be considered, in which case the candidate shall secure minimum 50 % marks in the end semester examinations to satisfy the passing requirements.

13. REVALUATION OF ANSWER SCRIPTS

A candidate shall apply for a photocopy of his / her semester examination answer script within a reasonable time from the declaration of results, on payment of a prescribed fee by submitting the proper application to the Controller of Examinations. The answer script shall be pursued and justified jointly by a faculty member who has handled the course and the course coordinator and recommended for revaluation. Based on the recommendation, the candidate can register for revaluation through proper application to the Controller of Examinations. The Controller of

Examinations will arrange for revaluation and the results will be intimated to the candidate concerned. Revaluation is permitted only for Theory courses and Theory cum Practical courses where end semester examination is involved.

14. SUPPLEMENTARY EXAMINATION

If a candidate fails to clear all courses in the final semester after the announcement of final end semester examination results, he/she shall be allowed to take up supplementary examinations to be conducted within a reasonable time for the courses of final semester alone, so that he/she gets a chance to complete the programme.

15. AWARD OF LETTER GRADES

Range of % of Total Marks	Letter Grade	Grade Point
91 to 100	O (Outstanding)	10
81 to 90	A+ (Excellent)	9
71 to 80	A (Very Good)	8
61 to 70	B+ (Good)	7
50 to 60	B (Average)	6
Less than 50	RA (Reappear)	0
Satisfactory	SF	0
Withdrawal	W	-
Absent	AB	-
Shortage of Attendance in a course	SA	-

The Grade Point Average (GPA) is calculated using the formula:

$$\text{GPA} = \frac{\sum[(\text{course credits}) \times (\text{grade points})] \text{ for all courses in the specific semester}}{\sum(\text{course credits}) \text{ for all courses in the specific semester}}$$

The Cumulative Grade Point Average (CGPA) is calculated from first semester (third semester for lateral entry candidates) to final semester using the formula

$$\text{CGPA} = \frac{\sum[(\text{course credits}) \times (\text{grade points})] \text{ for all courses in all the semesters so far}}{\sum(\text{course credits}) \text{ for all courses in all the semesters so far}}$$

The GPA and CGPA are computed only for the candidates with a pass in all the courses.

The GPA and CGPA indicate the academic performance of a candidate at the end of a semester and at the end of successive semesters respectively.

A grade sheet for each semester shall be issued containing Grade obtained in each course, GPA and CGPA.

A duplicate copy, if required can be obtained on payment of a prescribed fee and satisfying other procedure requirements.

Withholding of Grades: The grades of a candidate may be withheld if he/she has not cleared his/her dues or if there is a disciplinary case pending against him/her or for any other reason.

16. ELIGIBILITY FOR THE AWARD OF DEGREE

A candidate shall be declared to be eligible for the award of the BE / BTech Degree provided the candidate has

- i. Successfully completed all the courses under the different categories, as specified in the regulations.
- ii. Successfully gained the required number of total credits as specified in the curriculum corresponding to the candidate's programme within the stipulated time (vide clause 5).
- iii. Successfully passed any additional courses prescribed by the respective Board of Studies whenever readmitted under regulations other than R-2020 (vide clause 11.3)
- iv. No disciplinary action pending against him / her.

17. CLASSIFICATION OF THE DEGREE AWARDED

17.1 First Class with Distinction:

17.1.1 A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have passed the examination in First class with Distinction:

- Should have passed the examination in all the courses of all the eight semesters (six semesters for lateral entry candidates) in the **First Appearance** within eight consecutive semesters (six consecutive semesters for lateral entry candidates) excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
- Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 8.50

(OR)

17.1.2 A candidate who joins from other institutions on transfer and who gets readmitted and has to move from one regulations to another regulations and who qualifies for the award of the degree (vide clause 16) and satisfies the following conditions shall be declared to have passed the examination in First class with Distinction:

- Should have passed the examination in all the courses of all the eight semesters (six semesters for lateral entry candidates) in the **First Appearance** within eight consecutive semesters (six consecutive semesters for lateral entry candidates) excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
- Submission of equivalent course list approved by the respective Board of studies.
- Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 9.00

17.2 First Class:

A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have passed the examination in First class:

- Should have passed the examination in all the courses of all eight semesters (six semesters for lateral entry candidates) within ten consecutive semesters (eight consecutive semesters for lateral entry candidates) excluding authorized break of study (vide clause 11) after the commencement of his / her study.
- Withdrawal from the examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 7.00

17.3 Second Class:

All other candidates (not covered in clauses 17.1 and 17.2) who qualify for the award of the degree (vide clause 16) shall be declared to have passed the examination in Second Class.

- 17.4** A candidate who is absent for end semester examination in a course / project work after having registered for the same shall be considered to have appeared for that examination for the purpose of classification.

17.5 Honours Degree:

A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have earned the BE/BTech degree with Honours (vide clause 16 and clause 4.2.2):

- Should have passed the examination in all the courses of all the eight semesters (six semesters for lateral entry candidates) in the **First Appearance** within eight consecutive semesters (six consecutive semesters for lateral entry candidates) excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
- Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 8.00

18. MALPRACTICES IN TESTS AND EXAMINATIONS

If a candidate indulges in malpractice in any of the tests or end semester examinations, he/she shall be liable for punitive action as per the examination rules prescribed by the college from time to time.

19. AMENDMENTS

Notwithstanding anything contained in this manual, the Kongu Engineering College through the Academic council of the Kongu Engineering College, reserves the right to modify/amend without notice, the Regulations, Curricula, Syllabi, Scheme of Examinations, procedures, requirements, and rules pertaining to its BE / BTech programme.

20EGT11 ENGLISH LANGUAGE SKILLS
(Common to all Engineering and Technology Branches)

Programme & Branch	All BE/BTech branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	1	HS	3	0	0	3

Preamble This course is designed to impart required levels of fluency in using the English Language at A2/B1 Level in the Common European Framework (CEFR).

Unit - I **Listening, Speaking, Reading, Writing and Grammar & Vocabulary. Activity Based Learning – Phase – I** **9**

Listening - Talking about past experiences - listening to descriptions - Speaking - Exchanging personal information - Talking about cities and transportation - Reading - Life and achievements of a famous personality - Global transport systems - Writing - Childhood experiences - Process Description – Grammar & Vocabulary – Past tense – Expressions of quantity – Indirect questions.

Unit - II **Listening, Speaking, Reading, Writing and Grammar & Vocabulary. Activity Based Learning – Phase – II** **9**

Listening - Information about hotels and accommodation - Recipes and food items - Speaking - Life style changes and making comparisons - Talking about food - Reading - Habit formation and changing habits - International cuisine - Writing - Personal email - emails about food and recipes – Grammar & Vocabulary – Evaluations and Comparisons with adjectives – Simple past and present perfect tenses.

Unit - III **Listening, Speaking, Reading, Writing and Grammar & Vocabulary. Activity Based Learning – Phase – III** **9**

Listening - Information about travel - descriptions / conversations about family life - Speaking - Vacations and Holidays - Requests, complaints and offering explanations - Reading - Tourist places and travel experiences - Group behaviour and politeness - Writing - Personal letter about travelling - Writing guidelines and checklists – Grammar & Vocabulary – Future tense – Modals – Two-part verbs.

Unit - IV **Listening, Speaking, Reading, Writing and Grammar & Vocabulary. Activity Based Learning – Phase – IV** **9**

Listening - Descriptions about festivals - Presentations on technology - Speaking - About technology - festivals, special events and traditions - Reading - Sports, hobbies and past time - About different cultures - Writing - Product Description - Writing web content – Grammar & Vocabulary – Infinitives and Gerunds for uses and purposes – Imperatives for giving suggestions – Relative clauses of time.

Unit - V **Listening, Speaking, Reading, Writing and Grammar & Vocabulary. Activity Based Learning – Phase – V** **9**

Listening - Talking about changes - Job preferences - Speaking - Comparing different periods or phases in life – Changes that happen - Skills and abilities, Personality Development - Employability Skills – Reading - Reading about life experiences - Emotions and feelings – Job preferences – Jobs and Personality – Writing - Writing about one's past, present and future – Researching job options – Choosing the right job – Grammar & Vocabulary – Time contrasts – Conditional sentences with “if clauses” – Gerunds – short responses.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	use language effectively and accurately acquiring vocabulary from real-life context	Applying (K3)
CO2	listen/view and comprehend different spoken discourses / excerpts in different accents	Applying (K3)
CO3	read different genres of texts adopting various reading strategies	Analyzing (K4)
CO4	write cohesively, coherently and flawlessly avoiding grammatical errors, using a wide range of vocabulary, organizing their ideas logically on a topic	Creating (K6)
CO5	speak clearly, confidently, comprehensibly and communicate with others using appropriate communicative strategies	Creating (K6)

Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO2									2	3		1		
CO3						1				3	1	1		
CO4										3		1		
CO5									2	3		2		
1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy														

ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1		16	30	37		17	100
CAT2		17	30	37		16	100
CAT3		13	33	37		17	100
ESE		7	21	37		35	100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20MAC11 - MATRICES AND DIFFERENTIAL EQUATIONS**

(Common to All Engineering and Technology Branches)

Programme & Branch	All BE/BTech branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	1	BS	3	1*	2*	4

Preamble	To provide the skills to the students for solving different real time problems by applying matrices and differential equations.	
Unit - I	Matrices:	9
Introduction – Characteristic equation – Eigen values and Eigen vectors of a real matrix – Properties of Eigen values and Eigen vectors (without proof) – Cayley - Hamilton theorem (Statement and applications only) – Orthogonal matrices – Orthogonal transformation of a symmetric matrix to diagonal form – Quadratic form – Nature of Quadratic forms - Reduction of quadratic form to canonical form by orthogonal transformation.		
Unit - II	Ordinary Differential Equations:	9
Introduction – Solutions of First order differential equations: Exact differential equations – Leibnitz's Linear Equation – Bernoulli's equation – Clairaut's equation.		
Unit - III	Ordinary Differential Equations of Higher Order:	9
Linear differential equations of second and higher order with constant coefficients - Particular Integrals for the types: $e^{ax} - \cos ax / \sin ax - x^n - e^{ax}x^n$, $e^{ax}\sin bx$ and $e^{ax}\cos bx - x^n\sin ax$ and $x^n\cos ax$ – Differential Equations with variable coefficients: Euler-Cauchy's equation – Legendre's equation.		
Unit - IV	Applications of Ordinary Differential Equations:	9
Method of variation of parameters – Simultaneous first order linear equations with constant coefficients – Applications of differential equations: Simple harmonic motion – Electric circuits (Differential equations and associated conditions need to be given).		
Unit - V	Laplace Transform & Inverse Laplace Transform:	9
Laplace Transform: Conditions for existence – Transform of elementary functions – Basic properties – Derivatives and integrals of transforms – Transforms of derivatives and integrals – Transform of unit step function – Transform of periodic functions. Inverse Laplace transform: Inverse Laplace transform of elementary functions – Partial fraction method – Convolution theorem (Statement only) – Solution of linear ODE of second order with constant coefficients.		

List of Exercises / Experiments:

1.	Introduction to MATLAB
2.	Computation of eigen values and eigen vectors
3.	Plotting and visualizing single variable functions
4.	Solving first and second order ordinary differential equations
5.	Solution of Simultaneous first order ODEs
6.	Solving second order ODE by variation of parameters
7.	Determining Laplace and inverse Laplace transform of basic functions
8.	Solution of Second order ODE by employing Laplace transforms

Alternate week*Lecture: 45, Tutorial and Practical:15, Total:60****TEXT BOOK:**

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	solve engineering problems which needs matrix computations.	Applying (K3)
CO2	identify the appropriate method for solving first order ordinary differential equations.	Applying (K3)
CO3	solve higher order linear differential equations with constant and variable coefficients.	Applying (K3)
CO4	apply the concept of ordinary differential equations for modeling and finding solutions to engineering problems.	Applying (K3)
CO5	apply Laplace Transform to find solutions of Linear Ordinary Differential Equations	Applying (K3)
CO6	know the basics of MATLAB and computing eigen values and eigen vectors of real matrix by MATLAB.	Understanding (K2), Manipulation (S2)
CO7	solve ordinary differential equations with constant and variable coefficients and simultaneous first order ordinary differential equations using MATLAB.	Applying (K3), Manipulation (S2)
CO8	compute Laplace and inverse Laplace Transform of basic functions and solve Second Order ODE by using Laplace Transform with MATLAB.	Applying (K3), Manipulation (S2)

20PHT11 - APPLIED PHYSICS
(Common to All Engineering and Technology Branches)

Programme & Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	1	BS	3	0	0	3

Preamble	This course aims to impart the essential concepts of propagation of elastic waves, acoustics, ultrasonics, laser and fiber optics, quantum physics, crystal structure and crystal defects. It also describes the physical phenomena related to the aforementioned concepts and their applications in engineering and provides motivation towards innovations	
Unit - I	Propagation of Elastic Waves:	9
Oscillatory Motion: Introduction to simple harmonic motion - Damping velocity - Damping coefficient - Differential equation of simple harmonic motion - Velocity and acceleration - Restoring force - Vibration of a spring and mass system - Frequency response - Phase response - Resonance - Wave motion: Definition of a plane progressive wave - Attenuation of waves - Differential equation of a plane progressive wave - Phase velocity - Phase and phase difference - Solution of the differential equation of a plane progressive wave.		
Unit - II	Acoustics and Ultrasonics:	9
Acoustics: Introduction - Reverberation and reverberation time - Growth and decay of sound - Sabine's formula for reverberation time – Determination of sound absorption coefficient – Design of an auditorium: Factors affecting acoustics of buildings and the remedies. Ultrasonics: Introduction – Properties of ultrasonic waves – Generation of ultrasonic waves: Magnetostrictive generator and Piezoelectric generator - Determination of velocity of ultrasonics in a liquid: Acoustic grating – Industrial application: Non-destructive testing - Other applications of ultrasonic waves (qualitative).		
Unit - III	Laser and Fiber Optics:	9
Laser and Applications: Introduction – Interaction of light with matter - Three quantum process: Stimulated absorption, spontaneous emission and stimulated emission - Population inversion - Einstein's coefficients and their relations - Pumping methods - Nd:YAG laser - CO ₂ laser - Holography. Fiber Optics and Applications: Introduction - Numerical aperture and acceptance angle - Classification of optical fibers based on refractive index, modes and materials - Fiber optics communication system (qualitative) - Fiber optic sensors: Temperature and displacement sensors.		
Unit - IV	Quantum Physics:	9
Introduction - Blackbody radiation - Planck's quantum hypothesis - Compton scattering (qualitative) - de Broglie's hypothesis - Properties of matter waves - Application of Heisenberg uncertainty principle - Schrodinger's time independent and time dependent wave equations - Physical significance of wave function - The free particle - Potential energy step - Infinite potential well (one - dimensional).		
Unit - V	Crystal Physics:	9
Introduction - Classification of solids - Space lattice - Crystal structure - Unit cell - Bravais lattice - Single and polycrystalline materials - Lattice planes - Miller indices - Indices of crystal direction - Interplanar spacing in cubic system - Hexagonal close packed crystal structure and c/a ratio - Symmetry -Symmetry elements in cubic crystal - Crystal imperfections: line, surface and volume imperfections - Features of crystal imperfections (qualitative).

TEXT BOOK:

1. Avadhanulu M.N., Kshirsagar P.G. and Arun Murthy T.V.S., "A Textbook of Engineering Physics", 11th Edition, S. Chand & Company Pvt. Ltd., New Delhi, 2019.

REFERENCES:

1. Purnima Khare and Swarup A., "Engineering Physics: Fundamentals and Modern Applications", 1st Edition, Jones and Bartlett Publishers, Sudbury, Massachusetts, 2009.
2. Gaur R.K. and Gupta S.L., "Engineering Physics", 8th Edition, Dhanpat Rai and Sons, New Delhi, 2009.
3. Tamilarasan K. and Prabu K., "Engineering Physics – I", 3rd Edition, McGraw Hill Education Pvt. Ltd., New Delhi, 2014.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	make use of the concepts of oscillatory and wave motion to comprehend the phenomena related to the propagation of elastic waves.	Applying (K3)
CO2	apply the concepts of growth and decay of sound energy in a hall to compute Sabine's formula to recognize the requirements of acoustically good buildings, and to describe the production of ultrasonic wave, working of acoustic grating & non-destructive testing using ultrasonic waves.	Applying (K3)
CO3	apply the concepts of stimulated emission to explain the working and the applications of laser in engineering and technology, and to apply the principle of propagation of light through optical fiber to compute acceptance angle and numerical aperture to comprehend the loss in optical fiber, fiber optic communication system and working of fiber optic sensors.	Applying (K3)
CO4	use the concepts of quantum mechanics to describe the behavior of electrons in a metal by solving Schrodinger's wave equation for particle motion in infinite potential well.	Applying (K3)
CO5	utilize the concepts of the seven crystal systems to obtain interplanar spacing in cubic lattice and c/a ratio of HCP crystal structure, and to comprehend symmetry elements, reciprocal lattice and the types of crystal imperfections and their impacts.	Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

20CYT11 - APPLIED CHEMISTRY
(Common to All Engineering and Technology Branches)

Programme & Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	1	BS	3	0	0	3

Preamble	Applied Chemistry course explores the basic principles and advancements of chemistry in the field of engineering and technology. It aims to impart the fundamentals of chemistry towards innovations in science and technology and also for societal applications.	
Unit - I	Water Technology:	9
Introduction - sources of water - impurities in water - types of water - hardness of water- expression of hardness (simple problems) - units of hardness –estimation of hardness of water by EDTA method – determination of alkalinity - disadvantages of using hard water in Industries - boiler troubles - scale and sludge, boiler corrosion, caustic embrittlement, priming and foaming - softening of water: i) Internal treatment process - carbonate and calgon conditioning ii) External treatment method -demineralization process iii) Treatment of water for municipal water supply (Removal of suspended particles and disinfection methods, Break-point of chlorination).		
Unit - II	Electrochemistry:	9
Introduction – electrochemical cells - applications of electrochemical series - reference electrode - standard calomel electrode - ion selective electrode - glass electrode - concentration cells - electrode and electrolyte concentration cells (simple problems) - applications- potentiometric titrations - acid-base, redox, precipitation titrations - advantages- conductometric titrations - strong acid vs strong base, weak acid vs strong base, mixture of weak and strong acid vs strong base- advantages of conductometric titrations.		
Unit - III	Corrosion and its Control:	9
Introduction – causes and effects of corrosion - types of corrosion - chemical corrosion – Pilling Bed-worth rule - electrochemical corrosion –types - galvanic corrosion, concentration cell corrosion – other types of corrosion -stress, intergranular and microbiological corrosion- galvanic series - factors influencing rate of corrosion – corrosion control methods - design and material selection, anodic protection, corrosion inhibitors, protective coatings - i) metallic coatings : hot dipping (tinning and galvanizing) ii) non-metallic coating : anodizing iii) organic coating : paints – constituents and their functions.		
Unit - IV	Fuels and Combustion:	9
Introduction – classification of fuels - characteristics of a good fuel - combustion - calorific values – gross and net calorific values - Dulong's formula (simple problems) - Flue gas analysis by Orsat's method - ignition temperature - spontaneous ignition temperature - explosive range - solid fuels - coal and its varieties – proximate and ultimate analysis – significance – metallurgical coke - Otto-Hoffman byproduct method - liquid fuel - refining of petroleum – manufacture of synthetic petrol - hydrogenation of coal - Bergius process - knocking - octane number – cetane number - gaseous fuel - water gas.		
Unit - V	Polymers:	9
Introduction – terminology - classification - polymerization - types of polymerization (definition only)- polymerisation techniques- bulk, solution, suspension and emulsion polymerisation - plastics- difference between thermoplastics and thermosetting plastics - compounding of plastics- plastic moulding methods - compression, injection, extrusion and blow moulding methods - industrial polymers: preparation, properties and applications of PVC, PAN, polyurethane, polyesters –biodegradable polymers-classification and applications.

**20FTT11 - FUNDAMENTALS OF BIOCHEMISTRY**

Programme & Branch	BTech – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	1	PC	3	0	0	3

Preamble	To impart knowledge about the structure and properties of biomolecules, actions of enzymes and metabolism	
Unit - I	Carbohydrates:	9
Classification; Simple Sugars: mono and disaccharides, Hygroscopicity and solubility, optical rotation, muta rotation; Sweetness: structure-activity relationship and sweetness index; Dextrose Equivalent; Sugar alcohols; Oligosaccharides: structure and occurrence. Polysaccharides: Starch-amylose and amylopectin- properties. Cellulose. Pectins, gums and seaweeds – structure & properties. Dietary fibres - Food sources, functional role.		
Unit - II	Lipids:	9
Structure, classification and composition of fats. Food lipids and health. Physical properties of fats and oils: crystal formation, polymorphism, melting point, plasticity. Shortening power of fats, smoke point. Chemical properties of fats – Hydrolysis, saponification, halogenation. Hydrolytic rancidity and oxidative rancidity. Chemical constants.		
Unit - III	Proteins:	9
Amino acids - Definition, structure and classification. Protein - classification and structural conformation, Food sources and biological role. Properties of proteins in food systems: solubility, hydration, foam formation & stabilization, gel formation, emulsifying effect. Denaturation.		
Unit - IV	Enzymes:	9
Introduction, Nature, classification and nomenclature of enzymes. Mechanism of enzyme action; active site; Specificity. Enzyme kinetics – Michelis - Menten equation, Factors affecting enzyme action, Immobilization methods.		
Unit - V	Nucleic Acids and Energy Metabolism:	9
Nucleic Acids: Composition and structure of DNA and RNA. Energy Metabolism: Glycolysis; TCA cycle; substrate level phosphorylation. Cellular respiration - electron transport chain. Fatty acid metabolism – beta oxidation and fatty acid synthesis.		

Total: 45**TEXT BOOK:**

**OMEC11 – ENGINEERING DRAWING**

(Common to Civil, Mechanical, Mechatronics, Automobile Engineering, Chemical & Food Technology Branches)

Programme & Branch	BE(Civil, Mech, MTS, Auto) & BTech(Chem, FT)	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	1	ES	2	0	2	3

Preamble	To impart knowledge on orthographic, isometric projections, sectional views and development of surfaces by solving different application oriented problems.						
----------	---	--	--	--	--	--	--

Unit - I	General Principles of Orthographic Projection:	9
----------	--	---

Importance of graphics in engineering applications - Use of drafting instruments - BIS conventions and specifications - Size, layout and folding of drawing sheets - Lettering and dimensioning - Projections of Points, Lines and Planes - General principles of orthographic projection - First angle projection - Layout of views - Projection of points located in all quadrant and straight lines located in the first quadrant - Determination of true lengths and true inclinations and location of traces - Projection of polygonal surface and circular lamina inclined to both reference planes.

Unit - II	Projections of Solid:	9
-----------	-----------------------	---

Projections of simple solids like prisms, pyramids, cylinder and cone when the axis is inclined to one reference plane by change of position method.

Unit - III	Sectioning of Solids:	9
------------	-----------------------	---

Sectioning of solids - prisms, pyramids, cylinder and cone in simple vertical position by cutting planes inclined to one reference plane and perpendicular to the other - Obtaining true shape of section.

Unit - IV	Development of Surfaces:	9
-----------	--------------------------	---

Development of lateral surfaces of simple solids like prisms, pyramids, cylinders and cones – development of simple truncated solids involving prisms, pyramids, cylinders and cones.

Unit - V	Isometric Projection and Introduction to AutoCAD:	9
----------	---	---

Principles of isometric projection - Isometric scale - Isometric projections of simple and truncated solids like prisms, pyramids, cylinders and cones - Conversion of isometric projection into orthographic projection - Introduction to AutoCAD.

3. Parthasarathy N.S., Vela Murali. "Engineering Drawing", 1st Edition, Oxford University Press, 2015.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	interpret international standards of drawings and sketch the projections of points, lines and planes.	Understanding (K2)
CO2	draw the projections of 3D primitive objects like prisms, pyramids, cylinders and cones.	Applying (K3)
CO3	construct the various sectional views of solids like prisms, pyramids, cylinders and cones.	Applying (K3)
CO4	develop the lateral surfaces of simple and truncated solids.	Applying (K3)
CO5	sketch the isometric projections of simple and truncated solids and convert isometric drawing in to orthographic projection.	Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CAT1	20	40	40				100
CAT2	20	40	40				100
CAT3	20	40	40				100
ESE	25	35	40				100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20MEL11 – ENGINEERING PRACTICES LABORATORY**

(Common to Civil, Mechanical, Mechatronics, Automobile Engineering, Chemical & Food Technology Branches)

Programme & Branch	BE (Civil, Mech, MTS, Auto) & BTech (Chem, FT)	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	1	ES	0	0	2	1

Preamble	This course is designed to provide a hands-on experience in basic of mechanical and electrical engineering practices.
----------	---

List of Exercises / Experiments:

PART A – MECHANICAL ENGINEERING	
1.	To prepare square or rectangular shaped MS plates using power tools for cutting, polishing and shaping to the required dimensions.
2.	To carryout drilling, tapping and assembly on the given MS plates.
3.	To carryout thread forming on a GI/PVC pipes and prepare water leak proof water line from overhead tank.
4.	To prepare a wood or plywood box/tray/any innovative models using modern power tools like cutting machine, router, jigsaw, power screw driver etc.
5.	Welding practice through arc welding / simulator
PART B – ELECTRICAL AND ELECTRONICS ENGINEERING	
1.	Safety Aspects of Electrical Engineering, Electrical Symbols, Components Identification, Fuse selection and installation, Circuit Breakers selection
2.	Wiring circuit for fluorescent lamp and Stair case wiring
3.	Measurement of Earth resistance
4.	Soldering of Simple Circuits and trouble shooting
5.	Implementation of half wave and full wave Rectifier using diodes

Total: 30**REFERENCES /MANUAL / SOFTWARE:**

1.	Engineering Practices Laboratory Manual.
----	--

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	plan the sequence of operations for effective completion of the planned models/ innovative articles	Creating (K6), Precision (S3)
CO2	identify and use appropriate modern power tools and complete the exercises/models accurately	Applying (K3), Precision (S3)
CO3	select fuses and Circuit breakers	Understanding (K2), Manipulation (S2)
CO4	perform house wiring and realize the importance of earthing	Applying (K3), Manipulation (S2)
CO5	trouble shoot the electrical and electronic circuits	Applying (K3), Manipulation (S2)

Mapping of COs with POs and PSOs

20PHL11 – PHYSICAL SCIENCES LABORATORY I
(Common to All Engineering and Technology Branches)

Programme & Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	1	BS	0	0	2	1

Preamble	This course aims to impart hands on training in the determination of the physical parameters such as Young's modulus, rigidity modulus, frequency of vibration, velocity of ultrasonic waves, compressibility of water, wavelength of laser, acceptance angle and the numerical aperture of an optical fiber, and to develop the skills in handling different basic instruments and also aims to impart the basic concepts of volumetric, conductometric and pH meter experiments and thereby, to improve the analytical capability.
----------	--

List of Exercises / Experiments:

1.	Determination of the Young's modulus of the material of a given beam using uniform bending method.
2.	Determination of the rigidity modulus of the material of a given wire using torsional pendulum.
3.	Determination of frequency of electrically vibrating rod by forming standing waves using Melde's apparatus.
4.	Determination of the velocity of ultrasonic waves in a liquid and the compressibility of a liquid using ultrasonic interferometer.
5.	Determination of (i) the wavelength of a semiconductor laser and (ii) the acceptance angle and the numerical aperture of a given optical fiber.
6.	Estimation of total, temporary and permanent hardness of water by EDTA method.
7.	Estimation of Ca^{2+} and Mg^{2+} hardness separately by EDTA method.
8.	Estimation of alkalinity of the given water sample.
9.	Conductometric titration -Mixture of acids.
10.	Estimation of hydrochloric acid using pH meter.

Total: 30**REFERENCES:**

1.	Tamilarasan K. and Prabu K., "Physics Laboratory Manual", 1 st Edition, SCM Publishers, Erode, 2020.
2.	Palanisamy P.N., Manikandan P., Geetha A. and Manjula Rani K., "Chemistry Laboratory Manual", 1 st Edition, Rajaganapathy Publishers, Erode, 2020.

COURSE OUTCOMES:

On completion of the course, the students will be able to

**BT Mapped
(Highest Level)**

CO1	determine the Young's modulus of a material using the concepts of elasticity and bending moment of a beam and to determine the rigidity modulus of a wire using the concepts of twisting couple and to compute the frequency of electrically vibrating rod using the concept of standing waves formed in fixed vibrating string.	Applying (K3), Precision (S3)
CO2	determine the wavelength of a semiconductor laser beam using the concept of diffraction of light, and to compute the acceptance angle and the numerical aperture of an optical fiber using the concepts of total internal reflection and divergence of light in air and estimate the amount of hardness for the given water sample by EDTA method, and the amount of alkalinity for the given water sample.	Applying (K3), Precision (S3)
CO3	demonstrate the conductivity meter and pH meter to estimate the amount of the given solution.	Applying (K3), Precision (S3)

Mapping of COs with POs and PSOs

CO3				3										

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

20VEC11 – YOGA AND VALUES FOR HOLISTIC DEVELOPMENT

Programme & Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	1	HS	1	0	1	1

Preamble	Providing Value Education to improve the Students' character - understanding yogic life and physical health - maintaining youthfulness - Measure and method in five aspects of life	
Unit - I	Physical Health:	2
Manavalakalai (SKY) Yoga: Introduction - Education as a means for youth empowerment - Greatness of Education - Yoga for youth Empowerment. Simplified Physical Exercises: Need and Objectives of Simplified Physical Exercise - Hand, Leg, Breathing, Eye exercises - Kapalabathi, Makarasana Part I, Makarasana Part II, Body Massage, Acu pressure, Relaxation exercises - Benefits. Yogasanas: Pranamasana - Hastha Uttanasana - Pada Hasthasana - Aswa Sanjalana Asana - Thuvipatha asva Sanjalana asana - Astanga Namaskara - Bhujangasana - Atha Muktha Savasana - Aswa Sanjalana Asana - Pada Hasthasana - Hastha Uttanasana - Pranamasana. Pranayama: Naddi suddi - Clearance Practice - Benefits.		
Unit - II	Life Force:	2
Reasons for Diseases: Body Function - Reason for Diseases and Prevention - Natural reasons (Genetic / imprints, Planetary Position, Natural calamities and climatic changes) - Unnatural reasons (Food habits, Thoughts, Deeds). Philosophy of Kaya kalpa: Enriching Bio-Magnetism - Physical body - Sexual vital fluid - Life force - Bio-Magnetism - Mind. Maintaining youthfulness: Postponing old age - Transformation of food into seven components - Importance of sexual vital fluid - Measure and method in five aspects of life - Controlling undue Passion. Kayakalpa practice: Aswini Mudra - Ojas breath - Benefits of Kaya Kalpa.		
Unit - III	Mental Health:	2
Mental Frequencies: Beta, Apha, Theta and Delta wave - Agna Meditation explanation - benefits. Shanti meditation: Shanthi Meditation explanation – benefits. Thuriya Meditation: Thuriya Meditation explanation – benefits. Benefits of Blessing: Self blessing (Auto suggestion) - Family blessing - Blessing the others - World blessing - Divine protection.		
Unit - IV	Values:	2
Human Values: Self control - Self confidence - Honesty Contentment - Humility – Modesty - Tolerance - Adjustment - Sacrifice – Forgiveness - Purity (Body, Dress, Environment) - Physical purity - Mental purity - Spiritual purity. Social Values: Non violence – Service. Patriotism – Equality. Respect for parents and elders - care and protection - Respect for teacher. Punctuality - Time Management.		
Unit - V	Morality (Virtues):	2
Importance of Introspection: I - Mine (Ego, Possessiveness). Six Evil Temperaments - Greed - Anger - Miserliness - Immoral sexual passion - Inferiority and superiority Complex – Vengeance. Maneuvering of Six Temperaments: Contentment - Tolerance - Charity - Chastity - Equality - Pardon (Forgiveness). Five essential Qualities acquired through Meditation: Perspicacity - Magnanimity - Receptivity - Adaptability - Creativity (Improved Memory Power).		

Lecture:10, Practical:10, Total:20

TEXT BOOK:

1. Thathuvagnani Vethathiri Maharishi, "Yoga for Youth Empowerment", Vethathiri Publications, 2019.

REFERENCES:

1. Thathuvagnani Vethathiri Maharishi, "Yoga for Modern Age", Vethathiri Publications, 2019.
2. Thathuvagnani Vethathiri Maharishi, "Simplified Physical Exercises", Vethathiri Publications, 2019.
3. Neelam Sharma, "Holistic Education and Yoga", Shipra Publications, 2017.
4. Dr. Joseph Murphy, "The Power of Your Subconscious Mind", Pushpak Publication, 2019.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	understand the importance of physical health and practice simplified physical yoga exercise.	Applying (K3)
CO2	understand the importance of Kayakalpa exercise to enrich Bio-Magnetism and practice it.	Applying (K3)
CO3	understand the significance of meditation and do meditation to get sound mind.	Applying (K3)
CO4	understand the human and social values to provide service to society.	Applying (K3)
CO5	understand the evil temperaments and five essential qualities acquired through meditation	Applying (K3)

Mapping of COs with POs and PSOs

20EGT21 - ADVANCED COMMUNICATION SKILLS
(Common to all Engineering and Technology Branches)

Programme & Branch	All BE/BTech branches	Sem.	Category	L	T	P	Credit
Prerequisites	20EGT11 – English Language Skills	2	HS	3	0	0	3

Preamble	This course is designed to impart required levels of fluency in using the English Language at B1Level in the Common European Framework (CEFR).	
Unit - I	Listening, Speaking, Reading, Writing and Grammar & Vocabulary. Activity Based Learning – Phase –VI	9
Listening – Job and career related descriptions and conversations – requests of different kinds and the responses – Speaking - Career choices and professional skills – making requests and responding to requests – Reading – Using texts about jobs and careers – about different societies and cultural differences – Writing – Resumes, CVs and job oriented advertisements – business and career related emails – Grammar &Vocabulary – Gerunds and elements of comparison – requests and indirect requests.		
Unit - II	Listening, Speaking, Reading, Writing and Grammar & Vocabulary. Activity Based Learning – Phase – VII	9
Listening – Expository and narrative descriptions – information about different cultures, nations and societies. Speaking – Narrating and describing – talking about other countries and other cultures – Reading – Using texts about media and information technology – living abroad and experiencing different cultures – Writing – Blog writing – brochures and tourist pamphlets – Grammar & Vocabulary – The past tense forms - noun phrases and relative clauses.		
Unit - III	Listening, Speaking, Reading, Writing and Grammar & Vocabulary. Activity Based Learning – Phase – VIII	9
Listening – Consumerism – product description – complaints and redressal – environmental issues – ecology – saving the planet – Speaking – Talking about problems, issues, complaints – solutions and redressal – talking about environmental issues – Reading – Using texts on segregating wastes – recycling and reusing – texts on environmental issues – Writing – Online reviews, articles and writing web content – Grammar & Vocabulary – Phrases and sentences used for describing problems – passives – prepositions and infinitives.		
Unit - IV	Listening, Speaking, Reading, Writing and Grammar & Vocabulary. Activity Based Learning – Phase – IX	9
Listening – Education, learning and the choice of courses – various services needed in daily life – self-improvement for success in life – Speaking - Discussions about educational and career oriented issues – talking about everyday services – giving advice and self improvement – Reading – Reading about learning strategies and learning styles – using texts about personality development – Writing – Writing about hobbies – pastime and individual skills – writing short articles on everyday life and personality development – Grammar & Vocabulary – Using of “would” and certain gerund forms – use of modals, verbs, gerunds, negative questions and infinitives.		
Unit - V	Listening, Speaking, Reading, Writing and Grammar & Vocabulary. Activity Based Learning – Phase – X	9
Listening – Historical narratives – biographies and learning about the future – important life events, milestones and happenings of the past – Speaking – Talking about the past, present and the future – talking about important events in life – Reading – Texts about new technologies and future science – using texts about social organization, culture and social practices – Writing – Biographical sketches – historical events – famous personalities, stages of life and getting along with people – Grammar & Vocabulary – Future tense forms – time clauses and certain “if clauses”.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	use functional grammar for improving communication skills	Applying (K3)
CO2	listen and comprehend different spoken excerpts critically and infer Unspoken and implied meanings.	Applying (K3)
CO3	read different genres of texts, infer implied meanings and critically analyze and evaluate them for ideas as well as for method of presentation.	Analyzing (K4)
CO4	write effectively and persuasively and produce different types of writing such as narration, description, exposition and argument as well as creative, critical, analytical and evaluative writing.	Creating (K6)
CO5	speak effectively, to express opinions clearly, initiate and sustain a discussion and also negotiate using appropriate communicative strategies.	Creating (K6)

Mapping of COs with POs and PSOs

ESE		6	40	36	-	18	100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20MAC21 - MULTIVARIABLE CALCULUS AND COMPLEX ANALYSIS**

(Common to All Engineering and Technology Branches)

Programme & Branch	All BE/BTech branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	2	BS	3	1*	2*	4

Preamble	To impart the knowledge of partial derivatives, evaluation of real and complex integrals, vector calculus and analytic functions to the students for solving the problems related to various engineering disciplines.						
----------	---	--	--	--	--	--	--

Unit - I	Functions of Several Variables:	9
----------	--	---

Functions of two or more variables – Partial derivatives – Total differential – Taylor's series for functions of two variables – Maxima and minima – Constrained maxima and minima – Lagrange's multiplier method

Unit - II	Multiple Integrals:	9
-----------	----------------------------	---

Double integration in cartesian coordinates – Change of order of integration – Application: Area between two curves – Triple integration in cartesian coordinates – Volume as triple integrals

Unit - III	Vector Calculus:	9
------------	-------------------------	---

Directional derivative – Gradient of a scalar point function – Divergence of a vector point function – Curl of a vector – Solenoidal and Irrotational vectors – Green's, Stoke's and Gauss divergence theorems (without proof) – Verification of the above theorems and evaluation of integrals using them.

Unit - IV	Analytic Functions:	9
-----------	----------------------------	---

Functions of a complex variable – Analytic functions – Necessary and sufficient conditions (excluding proof) – Cauchy–Riemann equations (Statement only) – Properties of analytic function (Statement only) – Harmonic function – Construction of analytic function – Conformal mapping: $w = z + a$, az , $1/z$ – Bilinear transformation.

Unit - V	Complex Integration:	9
----------	-----------------------------	---

Introduction – Cauchy's theorem (without proof) – Cauchy's integral formula – Taylor's and Laurent series – Singularities – Classification – Cauchy's residue theorem (without proof) – Applications: Evaluation of definite integrals involving sine and cosine functions over the circular contour.

List of Exercises / Experiments:

1.	Finding ordinary and partial derivatives
2.	Computing extremes of a single variable function
3.	Evaluating double and triple integrals
4.	Finding the area between two curves
5.	Computing gradient, divergence and curl of point functions
6.	Applying Milne-Thomson method for constructing analytic function
7.	Determination of Mobius transformation for the given set of points
8.	Finding poles and residues of an analytic function

Alternate week*Lecture: 45, Tutorial and Practical:15, Total:60****TEXT BOOK:**

4.	MATLAB Manual.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	compute extremal values which arise in function of several variables.	Applying (K3)
CO2	solve Problems involving Double and Triple integrals.	Understanding (K2)
CO3	apply the concept of vectors in engineering problems.	Applying (K3)
CO4	identify, construct and apply analytic functions in electrostatics and fluid flow problems.	Applying (K3)
CO5	evaluate complex integrals which are extensively applied in engineering.	Applying (K3)
CO6	compute maxima and minima of a single variable function, gradient, curl and divergence of a vector function using MATLAB.	Understanding (K2), Manipulation (S2)
CO7	evaluate Double, Triple integrals and determine area between two curves using MATLAB	Applying (K3), Manipulation (S2)
CO8	construct analytic function, find bilinear transformation and compute poles and residues using MATLAB.	Applying (K3), Manipulation (S2)

**20PHT26 - PHYSICS FOR FOOD TECHNOLOGY**

Programme & Branch	BTech – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Applied Physics	2	BS	3	0	0	3

Preamble	This course aims to impart the knowledge on the physics of conductors, dielectrics, magnetic materials and nano materials. It also describes the phenomena related microwaves, the select crystal growth and characterization techniques and the applications of aforementioned materials in Food Technology and provides motivation towards innovations.						
----------	---	--	--	--	--	--	--

Unit - I	Conducting and Dielectric Materials:	9
-----------------	---	----------

Conducting Materials: Introduction - Classical free electron theory – Electrical and thermal conductivities based on classical free electron theory of metals - Merits and demerits of classical free electron theory - Quantum free electron theory of metals - Fermi distribution function - Effect of temperature on Fermi function - Dielectric materials: Introduction - Dielectric constant –Types of polarization (qualitative) – Frequency and temperature dependence of polarization – Concepts of dielectric loss and dielectric breakdown – Uses of dielectric materials in ohmic heating.

Unit - II	Magnetic Materials and Microwaves:	9
------------------	---	----------

Introduction - Domain theory of ferromagnetism – Hysteresis of ferromagnetic materials based on domains - Classification of soft and hard magnetic materials based on domains – Ferrites: Properties and structures - Applications: Metal detector and magnetic inductive flow meter. Microwaves: Introduction - Conversion of microwaves into heat - Penetration depth and applications.

Unit - III	Nanomaterials:	9
-------------------	-----------------------	----------

Introduction - Low dimensional structures: quantum dot, quantum wire and quantum well –Properties of nanomaterials - Synthesis techniques: Ball milling, physical vapour deposition, chemical vapour deposition and sol-gel methods – Properties and applications of nanomaterials – Carbon nanotubes: structures, properties and synthesis by laser ablation method – Industrial applications of nanotechnology in food processing and packaging.

Unit - IV	Crystal Growth:	9
------------------	------------------------	----------

Introduction – Nucleation: Classical theory of nucleation – Critical radius and critical free energy – homogeneous and heterogeneous nucleation – Free energy formation of critical nucleus – Crystal growth techniques – Melt growth methods: Bridgman and Czochralski methods – Solution growth method: High temperature solution growth and low temperature solution growth methods - Examples in food processing.

Unit - V	Materials Characterization:	9
-----------------	------------------------------------	----------

Importance of food materials characterization - X-ray diffraction - Scanning electron microscope: principle, construction and working - Transmission electron microscope: principle, construction and working – Spectroscopy: IR and UV-visible spectroscopy, Raman spectroscopy (qualitative) - Thermal analysis: Thermo gravimetric analysis, Differential scanning calorimetry.

**20CYT25 - CHEMISTRY FOR FOOD TECHNOLOGY**

Programme & Branch	BTech - Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Applied Chemistry	2	BS	3	0	0	3

Preamble	Chemistry for Food Technology aims to realize the students to have a sound knowledge of chemistry and stimulate them to know about Fertilizer, Pesticide, materials for sustainable food processing.	
Unit - I	Fertilizers :	9
Introduction- plant nutrients -nutrient function – micronutrients -fertilizer type - need for fertilizers - classification of fertilizers - straight and mixed fertilizers - sources of fertilizers - natural organic fertilizers - natural inorganic fertilizers - artificial fertilizers - synthesis and importance of i) Nitrogenous fertilizers - ammonium nitrate - urea - action of urea as fertilizer ii) Phosphate fertilizers - phosphate rock - normal superphosphate - triple superphosphate - phosphate fixation – iii) Potassium fertilizers iv) NPK fertilizers - mixed fertilizers.		
Unit - II	Insecticides and Pesticides :	9
Introduction - classification – i) Inorganic insecticides - ii) Natural or plant insecticides – iii)Organic insecticides - Dinitrophenols - DDT - BHC or benzene hexachloride - Aldrin and dieldrin - endrin - synthesis of organochlorines - Tetraethyl pyrophosphate (TEPP) - Malathion - Parathion - attractants and repellents - Fumigants - Fungicides - Herbicides - synthetic insecticides - pesticides pollution - persistent pesticides - biodegradation of pesticides - mode of poisoning of pesticides - degradation and mobility of pesticides.		
Unit - III	Chemistry of Materials :	9
Abrasives – properties of abrasives – types: i) natural abrasives - diamond, corundum, emery, garnets and quartz ii) synthetic abrasives - silicon carbide, boron carbide – industrial applications of abrasives. Adhesives – requisites of a good adhesive– classification of adhesives - process of bonding- advantages and disadvantages of adhesive bonding - industrial applications of adhesives. Insulator – characteristics of insulating materials – electrical insulator – thermal insulator – applications. Lubricant – mechanism of lubrication – classification – properties – viscosity index, flash and fire point, cloud and pour point, oiliness, aniline point – selection of lubricants.		
Unit - IV	Food and Energy Resources:	9
Forest resources: Importance – causes and consequences of deforestation, case studies - Food resources: malnutrition, under nutrition, world food problems, changes caused by modern agriculture, water logging, salinity, case studies– applications of biotechnology in agriculture – food science – medicines. Energy resources: Growing energy needs, renewable and non-renewable energy sources, solar energy, hydropower, use of alternate energy sources. Case studies – role of an individual in conserving food and energy resources.		
Unit - V	Sustainable Food Processing :	9
Sustainability: green engineering technologies in the food processing industries – drivers for sustainable food Processing: legislative, economic, consumer, corporate performance – environmental impacts of food processing: energy, solid waste, water and wastewater - environmental impact assessment methods in food processing – carbon foot print, ecological foot print, life cycle assessment.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	organize the manufacture and properties of different types of fertilizers and its applications.	Applying (K3)
CO2	make use of the knowledge of pesticide and insecticide to know their effects on soil, water and air.	Applying (K3)
CO3	illustrate the chemistry of materials for better understanding the industrial needs.	Understanding (K2)
CO4	Illustrate the various food and energy resources and role of individual for its conservation.	Understanding (K2)
CO5	apply the green engineering principle for sustainable food processing.	Applying (K3)

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20FTT21 - BASICS OF MECHANICAL ENGINEERING**

Programme & Branch	BTech – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	2	BS	3	0	0	3

Preamble	To impart knowledge on basic concepts of steam power and boiler, IC Engine and manufacturing technology.	
Unit - I	Boilers:	9
Types and classification of boilers – Fire tube and water tube boilers - Cochran Boiler, Lancashire boiler, Locomotive Boiler, Babcock and Wilcox boiler. Fluidized Bed Boiler. Boiler mountings and Accessories. Performance and energy efficiency of boilers. Simple calculation of Boiler efficiency. Importance of boiler water treatment and blow down.		
Unit - II	Steam Properties:	9
Properties of steam, usage of steam table and h-s chart. Determination of dryness fraction of steam. Calorimeters – Tank or barrel type, throttling, separating, separating and throttling. Steam distribution systems. Application of steam in food process industries.		
Unit - III	I.C Engines:	9
Classifications of Internal Combustion engines and their working principles –Lubrication – Types, Cooling systems – Types. Air Fuel Ratio, Delay Period or Ignition Lag, Variable effecting Delay Period, Diesel Knocks, Methods of Controlling Diesel Knock, I.C Engine Combustion Chambers, Cold Starting of I.C. Engine and Cold Starting Aids.		
Unit - IV	Mechanical Components And Their Applications:	9
Basic principles and applications of power transmission systems such as belt, rope, chain and gear drives – Function and principles of coupling, clutch, brake, flywheel and governor.		
Unit - V	Manufacturing Technology:	9
Principle and applications of Metal forming process – Foundry, Forging. Principle and applications of Metal Joining process – Welding, Soldering and Brazing, Basics of CAD/CAM/CIM.

**20FTT22 - ENGINEERING PROPERTIES OF FOOD MATERIALS**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Applied Physics	2	PC	3	0	0	3

Preamble	To impart knowledge on physical, thermal, optical, electromagnetic, rheological and textural properties of food materials and its measurement methods	
Unit - I	Physical Properties:	9
Importance of engineering properties, Physical properties of food materials- size, shape, volume, density, porosity and surface area – definitions and measurements, Frictional properties –coefficient of friction, angle of repose – types and its determination, rolling resistance and angle of internal friction – definition, Aerodynamic properties – Drag co efficient, Terminal Velocity and its application.		
Unit - II	Thermal Properties:	9
Definition of specific heat, enthalpy, thermal conductivity, thermal diffusivity, surface heat transfer coefficient. Measurement of specific heat, thermal conductivity – steady state and unsteady state methods, thermal diffusivity – Dickerson’s method, Calorific value of food, Bomb calorimeter, Boiling point elevation and freezing point depression - definition, Applications of thermal properties.		
Unit - III	Optical Properties:	9
Refractive index of food items, Abbes refractometer, Optical activity, Polarimeter, Gloss and glossimeter, color, translucency – Definitions and applications. Electromagnetic Properties: Electrical properties- electrical conductivity and its measurement, dielectric properties - measurement methods, effect on moisture, temperature and composition, microwave heating and other applications.		
Unit - IV	Rheological Properties:	9
Classification of rheology, Stress Strain behavior of Newtonian and Non- Newtonian fluids- Bingham and Non Bingham. Stress-strain relationships in solids, liquids and visco elastic behavior- stress relaxation test, creep test and dynamic test, stress-strain diagrams, Rheological models – Kelvin and Maxwell model. Viscosity – Types and its definitions, measurement methods - Capillary, Orifice, Falling and Rotational viscometers..		
Unit - V	Textural Properties:	9
Types of food textures, Texture measuring instruments- Compression, Snap Bending, Cutting Shear, Puncture, Penetration and TPA, Properties of food powders. Color: Interaction of object with light, Measurement methods -Spectrophotometer and Colorimeter, Color order systems- Munsel color system, CIE color system, Hunter lab color space, Lovibond system.

**20FTL21 - BASICS OF MECHANICAL ENGINEERING LABORATORY**

Programme & Branch	BTech – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	2	BS	0	0	2	1

Preamble To provide practical exposure on various manufacturing processes in Mechanical Engineering.

LIST OF EXPERIMENTS:

1.	To prepare different weld joints like T/L/Lap weld joints by using horizontal and vertical position of Arc welding operations
2.	To prepare different weld joints by using Gas welding operations.
3.	To prepare the Gas cutting and spot welding operations.
4.	To prepare a sand mold using Foundry tools
5.	Perform facing, plain turning and step turning operations in centre lathe
6.	Perform knurling and taper turning operations in centre lathe
7.	Perform external thread cutting operations in centre lathe
8.	Perform eccentric turning and bush turning operations in centre lathe
9.	Drill and tap on the flat metal plate by using drilling and tapping tools
10.	Perform various milling operations by using milling machine

REFERENCES / MANUALS /SOFTWARES:

1.	Laboratory Manual
2.	Pravin Kumar, "Basic Mechanical Engineering", Pearson Publishers", New Delhi, 2013.

COURSE OUTCOMES:

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	perform the welding joint using the given welding process	Applying (K3), Manipulation (S2)
CO2	prepare mould for given component	Applying (K3), Precision (S3)
CO3	produce different profiles on metal parts by machining operations using lathe, milling, shaping and drilling machines	Applying (K3), Manipulation (S2)

**20PHL30 - PHYSICAL SCIENCES LABORATORY II**

Prog. & Branch	BTech - Food Technology	Sem.	Category	L	T	P	Credit
Pre requisite	Nil	2	BS	0	0	2	1

Preamble	This course aims to impart hands on training in the determination of physical parameters such as specific resistance, thermal conductivity, the wavelength of Hg spectrum, the thickness of a nano-crystalline thin film and particle size, and to develop the skills in handling different basic instruments. This course also aims to impart the knowledge of water quality parameters and thereby, to improve the analytical capability.
-----------------	---

List of Exercises / Experiments:

1.	Determination of the specific resistance of a conductor using Carey Foster's bridge.
2.	Determination of the thermal conductivity of a dielectric material using Lee's disc arrangement.
3.	Determination of the wavelength of Hg spectrum using spectrometer grating.
4.	Determination of the thickness of a nano-crystalline thin film using air-wedge arrangement.
5.	Determination of the particle size of given powder using a Laser.
6.	Estimation of chloride ion in the given water sample using Argentometric method.
7.	Determination of Dissolved Oxygen in the given wastewater sample.
8.	Determination of COD in the given wastewater sample.
9.	Kinetics of reactions – Acid catalyzed hydrolysis of an ester.
10.	Determination of physical characterization of wastewater (pH, color, turbidity and dissolved solids).

Total: 30**REFERENCES:**

1.	Tamilarasan K. and Prabu K., "Physics Laboratory Manual", 1 st Edition, SCM Publishers, Erode, 2020.
2.	Palanisamy P.N., Manikandan P., Geetha A. and Manjula Rani K., "Chemistry Laboratory Manual", 1 st Edition, Kalaikathir Publishers, Coimbatore, 2020.

COURSE OUTCOMES:

On completion of the course, the students will be able to

**BT Mapped
(Highest Level)**

CO1	determine the specific resistance of metals using the concept of electrical conductivity and to determine the thermal conductivity of dielectric materials using the concept of heat conduction through the materials.	Applying (K3), Precision (S3)
CO2	determine the wavelength of Hg spectrum and the particle size of powder using the concept of diffraction of light, and to determine the thickness of nano-crystalline thin film using the concept of interference of light. Determine the amount of chloride and DO in the given water sample and the rate constant of hydrolysis of an ester.	Applying (K3), Precision (S3)
CO3	determine the pH, colour, turbidity, dissolved solids and COD in the given wastewater.	Applying (K3), Precision (S3)

Mapping of COs with POs and PSOs

20MAT31 - PROBABILITY AND PARTIAL DIFFERENTIAL EQUATIONS

(Common to Civil, Mechanical, Mechatronics, Automobile, Chemical & Food Technology branches)

Programme & Branch	BE & Civil, Mechanical, Mechatronics, Automobile Engineering & BTech Chemical, Food Technology branches	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	3	BS	3	1	0	4

Preamble	To provide the skills for solving the real time engineering problems involving partial differential equations and impart knowledge in applying probability concepts in their respective fields and express functions in terms of Fourier series.	
Unit - I	Random Variables:	9+3
Introduction to Probability – Definition of random variable – Discrete and Continuous random variables – Probability Mass and Probability density functions – Mathematical expectation and Variance – Moments – Moment generating functions.		
Unit - II	Standard Probability Distributions:	9+3
Discrete Distributions: Binomial distribution – Poisson distribution – Geometric distribution – Continuous Distributions: Uniform distribution – Exponential distribution – Normal distribution.		
Unit - III	Fourier Series:	9+3
Dirichlet's conditions – General Fourier series – Change of interval – Odd and even functions – Half range Sine series – Half range Cosine series – Harmonic analysis.		
Unit - IV	Partial Differential Equations:	9+3
Formation of partial differential equations by elimination of arbitrary constants and arbitrary functions – Lagrange's linear equation – Solution of homogeneous linear partial differential equations of higher order with constant coefficients.		
Unit - V	Applications of Partial Differential Equations:	9+3
Classification of second order quasi linear partial differential equations – Solutions of one dimensional wave equation – One dimensional heat equation – Steady state solution of two dimensional heat equation (excluding insulated edges).

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	interpret the concept of random variables.	Applying (K3)
CO2	implement the exact distribution for solving engineering problems.	Applying (K3)
CO3	express the given function or data in terms of Fourier series.	Applying (K3)
CO4	formulate and solve higher order partial differential equations	Applying (K3)
CO5	apply Fourier series techniques in solving one and two dimensional heat flow problems and one dimensional wave equations.	Applying (K3)

20CSC31 - PROGRAMMING IN C
(Common to all BE/BTech Engineering & Technology branches except CSE, IT)

Programme & Branch	All BE/BTech Engineering & Technology branches except CSE, IT	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	3	ES	3	0	2	4

Preamble	The course is designed for use by freshmen students taking their first course in programming. It deals with the techniques needed to practice computational thinking, the art of using computers to solve problems and the ways the computers can be used to solve problems. This course also focuses on developing programming skills using C language.	
Unit - I	Introduction to Computer and Problem Solving:	9
Overview of computers : Types, Generations, Characteristics, Basic computer Organization – Problem solving techniques: Algorithms - Flowcharts – Pseudo codes – Structuring the logic: Sequential, selection and repetitive structure		
Unit - II	Introduction to C and Control Statements:	9
The structure of a C program – Compiling and executing C program – C Tokens – Character set in C – Keywords – identifiers- Basic data Types – Variables – constants – Input/Output statements – operators - decision making and looping statements		
Unit - III	Arrays and Functions:	9
Declaring, initializing and accessing arrays – operations on arrays – Two dimensional arrays and their operations. Functions : Introduction- Using functions, function declaration and definition – function call – return statement – passing parameters to functions: basic data types and arrays – storage classes – recursive functions		
Unit - IV	Strings and Pointers:	9
Strings :Introduction – operations on strings : finding length, concatenation, comparing and copying – string and character manipulation functions, Arrays of strings. Pointers : declaring pointer variables – pointer expression and arithmetic, passing arguments to function using pointers -pointers and 1D arrays –arrays vs pointers , pointers and strings,		
Unit - V	User-defined Data Types and File Handling:	9
User-defined data types: Structure: Introduction – nested structures– arrays of structure – structure and functions -unions – enumerated data type. File Handling : Introduction - opening and closing files – reading and writing data to files -Manipulating file position indicator : fseek(), ftell() and rewind()		

List of Exercises:

1.	Writing algorithms and drawing flowcharts using Raptor Tool for problems involving sequential, Selection and repetition structures
2.	Programs for demonstrating the use of different types of operators like arithmetic, logical, relational and ternary operators
3.	Programs using decision making and repetitive statements
4.	Programs for demonstrating one-dimensional and two-dimensional numeric array
5.	Programs to demonstrate modular programming concepts using functions and strings (Using built-in and user-defined functions)
6.	Programs to illustrate the use of structures and pointers
7.	Programs to implement file operations

Lecture:45, Practical : 30, Total:75

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1:	outline the basics of computers and apply problem solving techniques to express the solution for the given problem	Applying (K3)
CO2:	identify the appropriate looping and control statements in C and develop applications using these statements	Applying (K3)
CO3:	develop simple C programs using the concepts of arrays and modular programming	Applying (K3)
CO4:	apply the concepts of pointers and develop C programs using strings and pointers	Applying (K3)
CO5:	make use of user defined data types and file concept to solve given problems	Applying (K3)
CO6:	demonstrate the execution of flowcharts for the given problem using Raptor	Applying (K3), Precision (S3)
CO7:	demonstrate the application of sequential, selective and repetitive control structures	Applying (K3), Precision (S3)
CO8:	develop solutions to the given problem using derived /user defined data types and functions and also using file concepts	Applying (K3), Precision (S3)

**20FTT31 - PROCESS FLUID MECHANICS**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	3	ES	3	1	0	4

Preamble	This course provides an introduction to the properties and behaviour of fluids. It introduces dimensional analysis and equations of Fluid flow and enables the students to apply in mixing, pumping and metering.	
Unit - I	Fluid Statics and Flow phenomena:	9+3
Nature of fluids - Physical properties of fluids. Fluid statics -Hydrostatic equilibrium. Application of fluid statics: manometers - continuous gravity decanter- storage Tank. Types of fluids: Compressible and incompressible fluids, Newtonian and Non-Newtonian fluids. Flow of Fluids : Concept of flow rates, velocity and type of flows		
Unit - II	Equations of Fluid Flow:	9+3
Continuity equation - Reynolds number - Fluid flow regimes. Bernoulli equation-Correction of Bernoulli equation for fluid friction- Application of Bernoulli equation for pump work. Shear stress and skin friction in pipes - Laminar and turbulent flow of fluids through closed conduits - Velocity profiles and friction factor for smooth and rough pipes- Friction loss due to sudden enlargement and contraction- Friction loss in fittings, valves and coils.		
Unit - III	Flow Past Immersed Bodies:	9+3
Pressure drop for flow of liquids through porous media. Motion of particles through fluids: Equation for one dimensional motion of spherical particle through fluid, terminal velocity, Hindered settling. Agitation of Liquids and Basics of dimensional analysis: Agitation Vessels - Types of impellers - Flow pattern in agitated vessel - Estimation of Power consumption in agitated vessels. Dimensional analysis -Rayleigh's method and Buckingham's π method.		
Unit - IV	Transportation of Fluids:	9+3
Classification of Pumps. Positive displacement pumps: operation, capacity and characteristics. Centrifugal pump: Performance, losses and characteristics. Calculation of power and discharge. Working principle and applications of Gear pumps, Lobe pumps, Screw pumps, diaphragm pumps, progressive cavity pumps, vacuum pumps, metering pumps and peristaltic pumps. Fans, blowers and compressors – Selection, types and applications. Pipelines for the transportation – sanitary aspects and material of construction		
Unit - V	Metering of Fluids:	9+3
Variable head meters: Orifice meter, Venturimeter, Pitot tube. Variable areameters: Rotameter. Working Principle and applications of Doppler Ultrasonic flow meters, Transit time flow meters, Magnetic flow meters, Turbine flow meters, Thermal flow meters, Positive displacement flow meters, Coriolisflowmeter and Surface Acoustic Wave flow meters. Notches and Weirs. Valves – Types, selection and applications.

**20FTT32 - FOOD PROCESS CALCULATIONS**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	3	PC	3	1	0	4

Preamble	The course helps the student to understand fundamental and the stoichiometric calculations, material and energy balance associated with unit operations.	
Unit - I	Units and Dimensions, Fundamental Calculations:	9+3
Basic and derived units, unit conversions, use of model units in calculations, methods of expression, compositions of mixture and solutions, ideal and real gas laws – gas constant - calculations of pressure, volume and temperature using ideal and van der Waals equation, use of partial pressure and pure component volume in gas mixture calculations.		
Unit - II	Material Balance Calculation:	9+3
Stoichiometric principles, material balance without chemical reaction - application of material balance to unit operations: distillation, evaporation, crystallization, drying, blending of food ingredients and extraction.		
Unit - III	Recycle Operations and Humidity and Saturation:	9+3
Bypass and Recycle Operations: Bypass operation, recycle operations - block diagram, purging operations, purge ratio, recycle ratio and purge stream. Humidity and Saturation: Calculation of absolute humidity, molal humidity, relative humidity and percentage humidity, wet and dry bulb temperature, dew point - Humidity chart usage.		
Unit - IV	Energy Balance Calculation:	9+3
Heat capacity of solids, liquids, gases and solutions, use of mean heat capacity in heat calculations, problems involving sensible heat and latent heats, enthalpy changes in food. Standard heat of reaction, heats of formation, combustion, solution, mixing etc., calculation of standard heat of reaction - Effect of pressure and temperature on heat of reaction.		
Unit - V	Combustion and Process Flow Sheet Calculation:	9+3
Combustion: Combustion of solids, liquid and gas, determination of NHV and GHV. Determination of composition by Orsat analysis - Calculation of excess air, theoretical oxygen requirement. Process Flow Sheet Calculation: Material and Energy Balance for selected food Process.		

Lecture:45, Tutorial:15, Total:60**TEXT BOOK:**

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	make use of different systems of units and dimensions, estimate compositions of mixtures and solutions	Applying (K3)
CO2	outline the stoichiometry principles and apply material balance for different unit operations	Applying (K3)
CO3	apply material balance for bypass, recycle operations and perform humidification calculations	Applying (K3)
CO4	make use of energy balance for system without chemical reactions	Applying (K3)
CO5	make use of material and energy balance in various process and determine the GHV, NHV and composition of fuels	Analyzing (K4)

Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO3	3	3	2	2	1							1	3	3
CO4	3	3	2	2	1							1	2	1
CO5	3	3	2	2	1							1	2	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	20	60				100
CAT2	20	20	60				100
CAT3		20	50	30			100
ESE	10	20	40	30			100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20FTT33 - FOOD CHEMISTRY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	3	PC	3	0	0	3

Preamble	This course deals about the importance of micronutrients, food additives, modification of biomolecules and chemistry of muscle tissue.	
Unit - I	Minerals and Vitamins:	9
Minerals: Major minerals - Calcium, Potassium, Sodium, Phosphorus. Minor minerals - Iron, Zinc, Iodine, Copper, Selenium. Functional role and deficiency. Vitamins: Definition, water soluble and fat soluble vitamins, sources, functions and deficiency symptoms.		
Unit - II	Changes during Cooking:	9
Cooking: objectives - methods – moist heat, dry heat and combination. Loss of nutrients and prevention - biochemical changes in carbohydrates - Gelatinization and retrogradation of starch - proteins and lipids. Parboiling of rice. Enzymatic browning reaction, non enzymatic browning reactions - caramelization, Maillard reaction		
Unit - III	Modification of Biomolecules:	9
Modified starches, resistant starch. Starch hydrolysates – Maltodextrin, cyclodextrin and dextrin. Modification of proteins – chemical and enzymatic methods. Modification of fats - Hydrogenation - cis and trans isomers, interesterification, winterization. Biochemical changes during processing of foods – malting and baking.		
Unit - IV	Food Additives, Food colours and Flavours:	9
Food additives: classification and purpose - Role of thickeners, stabilizers, sweeteners, emulsifiers, leaveners, colours, flavoring agents, flour improvers, anticaking agents, sequestrants, humectants, preservatives - examples. Food colours and Flavours: Natural and synthetic colourants - chlorophyll, carotenoids, betalains, anthocyanins and other phenols. Flavours – sensory perception of flavors, Molecular Mechanisms of Flavour Perception, specific and synthetic flavours, Taste and Other Saporous Substances, Vegetable, Fruit, and Spice Flavours, Flavours from Lactic Acid–Ethanol Fermentations, Flavour Volatiles from Fats and Oils.		
Unit - V	Chemistry of edible muscle Tissues:	9
Structure of muscle-conversion of muscle to meat – natural and induced postmortem biochemical changes affecting meat quality. Chemistry of processed meats – curing, hydration and water retention, formation of gel matrix, fat immobilization and stabilization

**20FTT34 - REFRIGERATION AND COLD CHAIN MANAGEMENT**

Programme & Branch	B.TECH. – FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	3	PC	3	1	0	4

Preamble	The course imparts the basic concepts of thermodynamics, refrigeration systems, low temperature storage systems and theoretical knowledge on cold chain management.	
Unit - I	Introduction to Thermodynamics:	9+3
Fundamental concepts of thermodynamics- systems, properties, process, functions, heat and work. Zeroth and First Law of Thermodynamics. Statement of first law for flow and non - flow process. Internal energy, enthalpy, heat capacities (C_v and C_p). Second Law of thermodynamics: Kelvin-Planck, Clausius statements, Carnot cycle, Entropy changes during processes.		
Unit - II	Refrigeration Components:	9+3
Introduction to refrigeration, unit of refrigeration capacity , Refrigerants - classification and thermodynamic properties, Ozone depletion potential, Reversed Carnot cycle, Limitations of reversed Carnot systems. Evaporator- dry and flooded type, liquid cooling evaporator. Condenser- water cooled, air cooled and evaporative condenser. Compressor - Reciprocating type compressors. Expansion valve - thermostatic expansion valve.		
Unit - III	Refrigeration Systems:	9+3
Refrigeration cycle – simple vapour compression and absorption system. p-h and T-s diagrams, determination of COP. Energy ratios and Power consumption of a refrigerating machine. Standard rating cycle and effect of operating conditions. Air refrigeration system – reversed Brayton cycle.		
Unit - IV	Low Temperature Storage Systems:	9+3
Pre-cooling systems, Cold storage- construction, insulation and operation. Design of cold storage unit. Calculation of refrigeration load in cold store. Prefabricated systems, walk-in-coolers. Frozen storage, Freezer types, Cryogenics – Linde and Claude system for liquefaction of air.		
Unit - V	Cold Chain:	9+3
Introduction, Components of cold chain. Refrigerated distribution and transport systems, Cold chain in retail, Information systems- Time temperature management – Application of RFID. Role of refrigeration in candy manufacture, beverage processing, bakery products, meat products, poultry products, fish products, fruit /vegetables and dairy products.

**COURSE OUTCOMES:**

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	outline the concepts of thermodynamics	Understanding(K2)
CO2	summarize the components of refrigeration system	Understanding(K2)
CO3	classify various refrigeration system and assess its power consumption	Applying(K3)
CO4	select the appropriate low temperature storage systems	Applying(K3)
CO5	apply the concept of cold chain for storage and distribution of various food products	Applying(K3)

Mapping of COs with POs and PSOs

**20FTL31 - FLUID FLOW LABORATORY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	3	PC	0	0	2	1
Preamble	To impart practical knowledge required for handling Newtonian Fluids.						

List of Exercises / Experiments:

1.	Determination of discharge coefficient of Venturimeter
2.	Determination of discharge coefficient of Orificemeter
3.	Verifying relationship between friction factor and Reynolds number for flow through square ducts
4.	Verifying Darcy's equation for flow through circular pipes
5.	Determination of critical Reynolds number for flow through helical coils
6.	Determination of discharge coefficient of V- notch
7.	Verifying relationship between friction factor and Reynolds number for flow through annular pipes
8.	Determination of loss coefficient of valves and pipe fittings
9.	Estimation of performance characteristics of centrifugal pump
10.	Estimation of performance characteristics of reciprocating pump
11.	Virtual Lab : a. Demonstration and estimation of discharge coefficient of Venturimeter b. Demonstration and determination of energy loss in pipe

Total:30**REFERENCES/MANUAL/SOFTWARE:**

COURSE OUTCOMES:

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	estimate the discharge coefficient for variable area and head flow meters	Evaluating (K5), Precision (S3)
CO2	measure the flow of fluids through closed conduits, valves and pipe fittings	Evaluating (K5), Precision (S3)
CO3	select and evaluate the performance of pumps	Evaluating K5, Precision S3

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO3	3	3	3	3	1				3	2		1	3	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

**20FTL32 - FOOD CHEMISTRY LABORATORY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	3	PC	0	0	2	1
Preamble	To deal about analysis and estimation of biomolecules.						

List of Exercises / Experiments :

1.	Qualitative tests for monosaccharide, disaccharides, polysaccharides
2.	Estimation of starch by anthrone method
3.	Extraction and analysis of oil (iodine number, saponification number, acid number)
4.	Estimation of protein by Lowry's method
5.	Determination of dextrose equivalent in modified starches
6.	Extraction and estimation of carotenoids and lycopene in fruits/vegetables
7.	Estimation of polyphenols in fruits/vegetables
8.	Estimation of flavanoids in fruits/vegetables
9.	Estimation of Vitamin C in fruits/vegetables
10.	Estimation of Iron in food samples
11.	Virtual Laboratory Experiments: a. Isoelectric precipitation of protein from milk

**20MNT31 - ENVIRONMENTAL SCIENCE**

Programme Branch	& All BE/BTech Engineering & Technology branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	3 / 4	MC	2	0	0	0

Preamble	This course provides an approach to understand the various natural resources, ecosystem, bio-diversity, pollution control & monitoring methods for sustainable life and also to provide knowledge and to create awareness for engineering students on biological sciences.
----------	--

Unit - I	Environmental Studies and Natural Resources:	5
-----------------	---	----------

Introduction to Environmental Science – uses, over-exploitation and conservation of forest, water, mineral, food, energy and land resources–case studies

Unit - II	Ecosystem and Biodiversity:	5
------------------	------------------------------------	----------

Ecosystems: concept and components of an ecosystem -structural and functional features – Functional attributes (Food chain and Food web only). Biodiversity: Introduction – Classification – Bio geographical classification of India- Value of biodiversity – Threats and Conservation of biodiversity - case studies.

Unit - III	Environmental Pollution:	5
-------------------	---------------------------------	----------

Environmental Pollution: Definition – causes, effects and control measures of: (a) Air pollution - Climate change, global warming, acid rain, ozone layer depletion (b) Water pollution (c) Soil pollution - Role of an individual in prevention of pollution - case studies.

Unit - IV	Environmental Monitoring:	5
------------------	----------------------------------	----------

Sustainability -three pillars of sustainability- factors affecting environmental sustainability-approaches for sustainable development - Introduction to EIA - objectives of EIA - environment protection act – air (prevention and control of pollution) act – water (prevention and control of pollution) act.

Unit - V	Introduction to Biological Science:	5
-----------------	--	----------

Functions of Carbohydrates, lipids, proteins and nucleic acids - Cells and its organelles - plasma membrane, mitochondria and nucleus- Heredity and DNA - organization of DNA in cells - Genes and chromosomes- Cell division -Types of cell division- mitosis & meiosis - Cell cycle and molecules that control cell cycle.

COURSE OUTCOMES:		BT Mapped (Highest Level)
On completion of the course, the students will be able to		
CO1	illustrate the various natural resources and role of individual for its conservation	Understanding (K2)
CO2	elaborate the features of ecosystem and biodiversity to find the need for conservation.	Understanding (K2)
CO3	manipulate the sources, effects and control methods of various environmental pollution.	Applying (K3)
CO4	make use of the knowledge of EIA and environmental legislation laws towards sustainability.	Applying (K3)
CO5	explain the functions of carbohydrates, lipids, proteins, nucleic acids, Cells and its organelles	Understanding (K2)

20MAT41 - STATISTICS AND NUMERICAL METHODS
(Common to all Engineering and Technology Branches except ECE, CSE and IT)

Programme & Branch	All BE/BTech branches except ECE, CSE and IT branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	4	BS	3	1	0	4

Preamble	To impart knowledge in testing of samples, ANOVA and interpolation. Also develop skills to apply numerical algorithms to identify roots of algebraic and transcendental equations and solve linear and ordinary differential equations.	
Unit - I	Testing of Hypothesis:	9+3
Introduction – Critical region and level of significance – Types of Errors – Large sample tests: Z-test for single proportion and difference of two sample proportions – Z-test for single mean and difference of means – Small sample tests: Student's t-test for testing significance of single mean and difference of means – F-test for comparison of variances – Chi-square test: Test of goodness of fit – Test of independence of attributes.		
Unit - II	Design of Experiments:	9+3
Introduction – Analysis of variance – One way classification: Completely Randomized Design – Two way classification: Randomized Block Design – Three way classification: Latin Square Design.		
Unit - III	Solution to Algebraic and Transcendental Equations:	9+3
Method of false position – Newton-Raphson method – Solution of linear system of equations – Direct methods: Gauss elimination method and Gauss - Jordan method – Iterative methods: Gauss Jacobi and Gauss-Seidel methods.		
Unit - IV	Interpolation, Numerical Differentiation and Integration:	9+3
Interpolation: Interpolation with equal intervals: Newton's forward and backward difference formulae – Interpolation with unequal intervals: Lagrange's interpolation formula – Newton's divided difference formula. Numerical Differentiation and Integration: Differentiation using Newton's forward, backward and divided difference formulae – Numerical integration: Trapezoidal rule – Simpsons 1/3rd rule.		
Unit - V	Numerical Solution of First order Ordinary Differential Equations:	9+3
Single step methods: Taylor series method – Euler method – Modified Euler method – Fourth order Runge-Kutta method – Multi step methods: Milne's predictor corrector method – Adam's Bashforth method.		

Lecture: 45, Tutorial: 15, Total: 60

**20FTT41 - HEAT TRANSFER OPERATIONS**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	4	ES	3	1	0	4

Preamble	The course enable the students to study the phenomena of modes of heat transfer, heat exchangers, evaporators and its application in food processing operations .	
Unit - I	Heat transfer Operations and conductions:	9+3
Introduction to Heat transfer Operations: Introduction, Modes of Heat Transfer, role in food processing operations. Conduction: Fourier's law of heat conduction - One dimensional steady state heat conduction equation for flat plate, composite wall, hollow cylinder, composite cylinder, Thermal Conductivity - effect of temperature on thermal conductivity, Thermal Insulation.		
Unit - II	Convection:	9+3
Natural and forced convection– Application of dimensional analysis for convection - Equations for forced and natural convection under laminar, transition and turbulent conditions. Individual and overall heat transfer coefficients and its relationship between them. Unsteady state heat transfer. Introduction to Fins.		
Unit - III	Radiation:	9+3
Black body concept - Radiation Properties–Stefan Boltzmann's law, emissivity and absorptivity. Concept of grey body – radiation between non-black surfaces –parallel planes, radiation shields.		
Unit - IV	Heat Exchangers:	9+3
Parallel and counter flow heat exchangers - LMTD - Heat exchangers effectiveness; number of transfer unit – use of correction factor charts - Fouling factor. Types of heat exchanger- working principles and applications: Single pass, multi pass heat exchangers, shell and tube heat exchanger, plate heat exchangers.		
Unit - V	Evaporators:	9+3
Types of evaporators – working principle and applications: Single effect evaporators, multiple effect evaporators -Feed forward and feed backward operations, Open pan evaporator, horizontal tube evaporator, vertical tube evaporator, long tube evaporator, forced circulation evaporator.

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Food Process Calculations	4	PC	3	1	0	4

Preamble	This course provides an insight to the diffusion process and mechanisms of mass transfer. The students will apply the mass transfer concepts to humidification, crystallization, distillation, extraction and leaching.	
Unit - I	Mass Transfer Operations and Diffusion:	9+3
Introduction to Mass Transfer Operations: Introduction, Classification and role of mass transfer operations in food processing. Diffusion: Ficks law of diffusion. Steady state molecular and eddy diffusion in gases and liquids. Measurement and prediction of diffusivity of gas and liquids, diffusion in solids. Introduction to unsteady state diffusion. Individual and over all mass transfer co-efficients.		
Unit - II	Theories of Mass Transfer and Analogies, Humidification and Crystallization:	9+3
Theories of Mass Transfer and Analogies: Theories of mass transfer: Two Film, penetration- surface renewal. Analogy between heat, mass and momentum transfer: Reynolds, Chilton -Colburn, Taylor- Prandtl, Von-Karman Analogies. Humidification and Crystallization: Adiabatic saturation process and theory of wet bulb temperature - Measurement of humidity - Cooling towers and Spray Chambers. Principles of crystallization. Crystallizers - Types – Applications.		
Unit - III	Distillation:	9+3
Vapour-Liquid Equilibria - Raoult's law and deviations from ideality. Methods of distillation: Simple distillation- Rayleigh equation - Flash vaporization- steam distillation- vacuum distillation. Tray and Packed Towers. Design of multistage tray towers for binary systems using McCabe-Thiele method		
Unit - IV	Liquid-Liquid Extraction:	9+3
Equilibrium in ternary systems - Solvent selection criteria- equilibrium stage wise contact. Single stage extraction- Multi stage cross current and counter current operations. Extractors - working principle and applications: mixer settlers- packed towers - spray towers- perforated plate towers- rotating disc contactors - pulsed columns		
Unit - V	Leaching:	9+3
Solid-liquid equilibrium - single stage leaching - multi stage cross current and countercurrent leaching operations. Leaching equipments – working principle and applications: Bollman extractor- Rotocel extractor- Hildebrand Extractor-Kennedy Extractor - Pachuca tank - Dorr agitator.		

Lecture:45, Tutorial:15, Total:60**TEXT BOOK:**

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	classify, explain and model the diffusion in gas, liquid and solid	Understanding(K2)
CO2	explain and make use of the concepts of humidification and crystallization	Applying (K3)
CO3	summarize various distillation processes and determine equilibrium stages in distillation tower	Evaluating (K5)
CO4	select suitable solvent and extraction equipments	Applying (K3)
CO5	illustrate the principle and operation of leaching equipments and make use of leaching calculations	Applying (K3)

Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	3	2	2	1								1	1
CO2	3	3	2	2	1							1	2	2
CO3	3	3	3	3	3							1	3	2
CO4	3	3	3	3	2							1	3	2
CO5	3	3	3	3	2							1	3	2
1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy														

ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	20	50	10			100
CAT2	10	20	50	10	10		100
CAT3	20	30	40	10			100
ESE	15	25	45	10	5		100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20FTT43 - FOOD MICROBIOLOGY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	4	PC	3	0	0	3

Preamble	To get in depth knowledge in microbiology basics, identification and incidence of microbes in food, spoilage, diseases and its control.	
Unit - I	Introduction:	9
Introduction: Origin and Scope of Microbiology- History-Contribution by scientists. Three kingdom concept- Whitaker Five Kingdom concept-Classification of Microorganisms- Prokaryotes and Eukaryotes. Structure, reproduction and importance of bacteria, virus, fungi and algae in foods		
Unit - II	Classification and Identification:	9
Classification and Identification: Classification of microbes based on nutritional requirements. Staining techniques- Simple staining, Differential staining, Special Staining. Culture media- types of media. Pure culture techniques- Cultivation, maintenance and preservation of media. Growth curve.		
Unit - III	Incidence of Microorganisms:	9
Incidence of Microorganisms: Primary sources of microbes in food, Parameters influencing the growth of microorganisms in food- Intrinsic and Extrinsic. Microbial Load assessment: SPC, MPN, DMC, Dye Reduction test, ATP measurement. Immunological methods: PCR, Fluorescent Antibody, ELISA.		
Unit - IV	Microbial spoilage and its control:	9
Microbial spoilage and its control: Types of food spoilage, Microbial spoilage of different types of foods– fruits and vegetables, meat and meat products, bakery products, dairy products, fermented foods and canned foods. Control of microorganisms: Physical agents, Chemical agents and their mode of action. Role of antibiotics		
Unit - V	Food Borne Diseases and Quality Control:	9
Food Borne Diseases and Quality Control: Gastroenteritis, Listeriosis, Salmonellosis, Shigellosis, Vibriosis, Campylobacteriosis. Food toxins – Aflatoxin, Ochratoxin, Patulin, Botulin. Indicators of food product quality- Coliform bacteria- Indicators of food safety. Microbiological criteria for foods.

COURSE OUTCOMES:		BT Mapped (Highest Level)
On completion of the course, the students will be able to		
CO1	recall the historical developments in microbiology and to classify microorganisms	Remembering (K1)
CO2	outline the appropriate techniques to identify and cultivate microorganisms	Understanding(K2)
CO3	review the importance of microorganisms in foods and to assess microbial load	Understanding(K2)
CO4	identify microbial spoilage in different foods and recommend control measures	Applying (K3)
CO5	infer the food borne diseases and quality control of foods	Understanding(K2)

Mapping of COs with POs and PSOs

**20EGL31 - ENGLISH FOR WORKPLACE COMMUNICATION LABORATORY**

(Common to all BE/BTech Engineering and Technology branches)

Prog. & Branch	All BE/BTech Engineering & Technology branches	Sem.	Category	L	T	P	Credit
Prerequisite	Nil	3 /4	HS	0	0	2	1

Preamble:	This course is designed to impart required levels of fluency in using the English Language at B1/B2 level in the CEFR through activities, hands-on training and application.	
Unit -I	Listening:	6
Techniques for effective listening and note taking; listening to audio scripts, podcasts and TED talks; listening to discourse samples of native speakers and imitating; improving pronunciation; introduction to the basics of phonetics and understanding different accents.		
Unit -II	Reading:	6
Speed reading skills; reading to gain knowledge; reading newspaper articles to improve writing; academic journals to enrich vocabulary and word power; reading aloud with proper stress and intonation; reading to draw inferences.		
Unit -III	Soft Skills:	6
Importance of soft skills at workplace - understanding soft skills through case studies - developing positive attitude; goal setting; time management; team work; telephone etiquette; developing professionalism, interpersonal skills and work ethics.		
Unit -IV	Writing:	6
Introduction to pre-writing, style and mechanics of writing; mind mapping; creating content from an outline; paragraph and resume writing; nuances of academic writing; writing Statement of Purpose (SOP), editing, revising and proof reading for clarity and readability; structural and grammatical accuracy.		
Unit -V	Speaking:	6
Verbal and non-verbal communication; fluency and spoken English; introducing oneself and others; making presentations on topics using prepared material; mock interviews; dynamics of Group Discussion.		

List of Exercises / Experiments :

1. Mock Interview
2. Presentation
3. Reading Aloud
4. Group Discussion
5. Soft Skills through Case Studies
6. Listening Test

Total: 30**REFERENCES/MANUAL/SOFTWARE:**

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1:	acquire effective listening and reading skills	Understanding (K2), Imitation (S1)
CO2:	acquire and demonstrate appropriate professional skills for the workplace	Applying (K3), Naturalization (S5)
CO3:	speak fluently and write meaningfully in English in the given context	Applying (K3), Articulation (S4)

Mapping of COs with POs and PSOs

**20FTL41 – HEAT AND MASS TRANSFER LABORATORY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	4	PC	0	0	2	1
Preamble	To impart practical knowledge on heat and mass transfer that is required for process industries.						

List of Exercises / Experiments :

1.	Estimation of individual heat transfer coefficient under Natural/Forced convection heat transfer
2.	Determination of Stefan Boltzman constant for radiation heat transfer
3.	Estimation of individual and overall heat transfer coefficient for heat transfer in shell and tube heat exchanger
4.	Estimation of individual and overall heat transfer coefficient for heat transfer in agitated vessel
5.	Estimation of individual heat transfer coefficient for heat transfer through bare tube heat exchanger
6.	Verifying the Raleigh's equation for the given system using simple distillation setup
7.	Determination of vaporization efficiency (E_v) and thermal efficiency (E_t) of the given system using steam distillation setup
8.	Determination of the diffusivity of given liquid to air
9.	Studying the theoretical and actual recovery of solvent using leaching and Estimation of oil recovery using Expeller
10.	Determine % recovery of the overhead and bottom products of methanol water system under total reflux conditions of Packed column Distillation
11.	Virtual Lab: Demonstration of thermal Conductivity of a material

Total: 30**REFERENCES/MANUAL/SOFTWARE:**

1.	Laboratory Manual
2.	McCabe W.L., Smith J.C., and Harriot P. "Unit Operations of Chemical Engineering". 7th Edition, McGraw Hill, New York, 2005.

5.	Amirtha virtual lab tool : https://vlab.amrita.edu/

COURSE OUTCOMES:

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	estimate heat transfer coefficient for heat exchangers	Evaluating (K5), Precision (S3)
CO2	determine Stefan Boltzmann constant and diffusivity coefficient	Evaluating (K5), Precision (S3)
CO3	evaluate the process/performance parameters for distillation, extraction, and leaching	Evaluating (K5), Precision (S3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO ₈	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	3	2	2	2				3	2		1	3	2
CO2	3	3	3	3	2				3	2		1	3	2
CO3	3	3	3	3	2				3	2		1	3	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

**20FTL42 - FOOD MICROBIOLOGY LABORATORY**

Programme& Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	4	PC	0	0	2	1
Preamble	To identify and characterize microbes associated with foods and to enumerate it.						

List of Exercises / Experiments :

1.	Study experiments on microbiology lab equipment's and safety practices
2.	Identification of microorganisms by Simple staining technique
3.	Identification of microorganisms by Gram staining technique
4.	Preparation of different culture media and microbial isolation using serial dilution technique
5.	Cultivation and enumeration of microorganisms using different plating method(Pour/Spread/Streak)
6.	Enumeration of microorganisms in spoiled bakery and confectionery products
7.	Microbial examination of blanched / pasteurized / sterilized/refrigerated / frozen foods
8.	Assessing the load of coliform bacteria as an indicator microorganism using MPN method
9.	Biochemical characteristics of microorganisms using IMViC test
10.	Antibiotic sensitivity for microorganisms
11.	Virtual lab: simple staining, gram staining, serial dilution, plating techniques, IMViC test

4.	http://www.amrita.edu/create

COURSE OUTCOMES:

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	identify the morphology of microorganisms by different staining technique	Applying (K3), Precision (S3)
CO2	isolate the microorganisms from different food stuffs	Applying (K3), Manipulation (S2)
CO3	characterize the microorganisms using different methods	Analyzing(K4), Precision (S3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

20GET31 - UNIVERSAL HUMAN VALUES
(Common to All BE/BTech branches)

Programme & Branch	All BE/BTech Engineering & Technology branches	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	3 / 4	HS	2	0	0	2

Preamble	To make the student to know what they 'really want to be' in their life and profession, understand the meaning of happiness and prosperity for a human being. Also to facilitate the students to understanding of harmony at all the levels of human living, and live accordingly
----------	---

Unit - I	Introduction:	6
-----------------	----------------------	----------

Need and Basic Guidelines of Value Education – Content and Process of Value Education – Self Exploration – purpose of self-Exploration – Content and Process of Self exploration – Natural Acceptance – Realization and Understanding – Basic Human Aspirations – Continuous Happiness and Prosperity – Exploring Happiness and Prosperity – Basic Requirement for Fulfillment of Human Aspirations – Relationships – Physical Facilities – Right Understanding.

Unit - II	Harmony in the Self and Body:	6
------------------	--------------------------------------	----------

Human Being and Body – Understanding Myself as Co-existence of Self ('I') and Body, Needs of the Self and Body, Activities in the Self and Body, Self ('I') as the Conscious Entity, the Body as the Material Entity – Exercise – Body as an Instrument–Harmony in the Self ('I') – Understanding Myself – Harmony with Body.

Unit - III	Harmony in the Family and Society:	6
-------------------	---	----------

Harmony in the Family – Justice – Feelings (Values) in Human Relationships – Relationship from Family to Society – Identification of Human Goal – Five dimensions of Human Endeavour.

Unit - IV	Harmony in Nature and Existence:	6
------------------	---	----------

Order of Nature – Interconnectedness – Understanding the Four order – Innateness – Natural Characteristic – Basic Activity – Conformance – Introduction to Space – Co-existence of units of Space – Limited and unlimited – Active and No-activity – Existence is Co-existence.

Unit - V	Implications of the above Holistic Understanding of Harmony on Professional Ethics:	6
-----------------	--	----------

Values in different dimensions of Human Living – Definitiveness of Ethical Human Conduct –Implications of Value based Living – Identification of Comprehensive Human Goal – Humanistic Education – Universal Human Order – Competence and Issues in Professional Ethics.

Total: 30

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	restate the meaning of happiness and prosperity and do a correct appraisal of the current scenario in the society	Applying (K3)
CO2	distinguish between the Self and the Body, understand the meaning of Harmony in the Self, the Co-existence of Self and Body	Applying (K3)
CO3	infer the value of harmonious relationship based on trust, respect and other naturally acceptable feelings in human-human relationships and explore their role in ensuring a harmonious society	Applying (K3)
CO4	transform themselves to co-exist with nature by realising interconnectedness and four order of nature	Applying (K3)
CO5	distinguish between ethical and unethical practices, and extend ethical and moral practices for a better living	Applying (K3)

Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

**20FTT51 - FOOD PROCESS ENGINEERING – I**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	5	PC	3	1	0	4

Preamble	The course provides knowledge on basic unit operations such as post harvest processing, size reduction, mechanical separation, mixing and extrusion in food processing.	
Unit - I	Pre-Processing Operations:	9+3
Post-harvest losses in field crops – Cleaning - Peeling - Grading and Sorting - Principles, types and equipment's. Moisture content – free moisture, bound and unbound moisture. Equilibrium moisture content - determination methods, models - Hysteresis effect. Water activity.		
Unit - II	Size Reduction:	9+3
Fibrous foods, Dry foods and Liquid foods – Calculation of Energy Used in Grinding. New Surface Formed by Grinding. Grinding and Cutting equipment's - Crushers, Hammer mills, Fixed head mills, Ball mills, Plate mills and Roller mills. Cutters - Slicers, Dicers, Shredder and Pulper. Size reduction in liquids		
Unit - III	Mechanical Separation:	9+3
Sedimentation in liquids - Gravitational sedimentation – Floatation -Sedimentation of particles in gas. Centrifugal separation – Velocity of particles – Radius of neutral zone – Measurement- Equipment's. Filtration – Constant rate and Constant pressure filtration – Area calculation- Equipment's, Sieving effectiveness and Applications		
Unit - IV	Mixing:	9+3
Characteristics of mixtures. Measurement of mixing - sample size, sample composition. Particle mixing and Liquid Mixing - mixing index. Mixing of different quantities. Rate of Mixing and Energy Input in Mixing. Mixing equipment's - Liquid Mixers, Powder and Particle Mixers, Dough and Paste Mixers.		
Unit - V	Extrusion and Material Handling:	9+3
Theory - Rheological properties and Operating Characteristics. Single and Twin screw extruders - Ancillary Equipment's. Applications and Effects on Foods. Types of handling and conveying system for food products - Belt conveyor, screw conveyor, bucket elevator and pneumatic conveyor.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	identify appropriate pre-processing operations and determine the moisture characteristics of food products	Applying (K3)
CO2	select suitable size reduction equipment for food materials	Applying (K3)
CO3	examine the role of mechanical separation in food processing	Applying (K3)
CO4	identify the characteristics of the mixtures to select appropriate mixing equipment	Applying (K3)
CO5	explain the process of extrusion and select suitable material handling systems	Understanding (K2)

Mapping of COs with POs and PSOs

**20FTT52 - FOOD PROCESS ENGINEERING - II**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Heat Transfer Operations	5	PC	3	0	0	3

Preamble	To impart knowledge of drying, heating and cooling as preservation techniques in food processing.	
Unit - I	Drying:	9
Theory and mechanism of drying - Drying characteristics of materials. Psychrometric chart –applications. Thin layer and deep bed drying. Methods of drying agricultural materials - batch and continuous drying. Drying equipment design and performance of various drying equipment.		
Unit - II	Types of Dryers:	9
Tunnel Dryer, Belt Dryer, Drum Dryer, Spray Dryer, Fluidized Bed Dryer, Spouted bed dryer, Pneumatic Dryer, Rotary Dryer, Vacuum Drying, Freeze Drying. Dielectric drying, IR drying and Micro wave drying.		
Unit - III	Preservation by Heating:	9
Methods of applying heat to food - Blanching, Pasteurization, Sterilization. Thermal death time relationships (D, Z and F values). Process calculations: General method, Ball’s formula method. Sterilization – methods and equipments. UHT sterilization. Retort processing		
Unit - IV	Preservation by Cooling:	9
Chilling - Equipments, Cold storage. Freezing - Thermodynamics of food freezing, Phase diagrams, Ice crystals formation, Properties of frozen foods. Freezing time calculations, Freezing equipments. Freeze concentration.		
Unit - V	Non thermal Preservation:	9
High Pressure Processing – Principles & Equipments. Pulsed Electric Fields – Mechanism and treatment system. Ultrasound – Fundamentals, Preservation and processing tool. Irradiation – Fundamentals and Biological effects. Hurdle Technology. Ohmic Heating – Fundamentals and Generic configurations.

**20FTT53 - FRUITS AND VEGETABLES PROCESSING TECHNOLOGY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	PC	3	0	0	3

Preamble	To help the students to learn about the physiology, pre-processing, postharvest storage and various products of fruits and vegetables	
Unit - I	Physiology and Pre-processing of fruits and vegetables:	9
Scope of Fruits and Vegetables Processing Industry in India and World-present status – constraints-prospects Classification of fruits and vegetables. Composition and nutrition aspects. Pre harvest and post-harvest changes. Concept of maturity indices-Factors leading to deterioration of fruits and vegetables. Methods to reduce post-harvest losses. Pre-processing of fruits and vegetables: Precooling, Cleaning, washing, sorting, grading peeling, blanching.		
Unit - II	Post-harvest storage methods and Preservation Techniques:	9
Ambient conditions. Application of refrigeration concept in post-harvest storage, Freezing methods-Air Blast Freezer, Immersion Freezer, Cryogenic Freezer. Hypobaric Storage, CAS. Irradiation, Waxing. Trends in Packaging fresh produce-MAP, Inert and Vacuum Packaging. Concentration-freeze drying –osmotic dehydration, brining, syruping, canning.		
Unit - III	Processing Technology of fruits and fruit beverages:	9
Unit operations involved in Juice preparation-equipments-screw type juice extractor, pulper, pressing, Rack and cloth press, Hydraulic Press, Filters, clarification and concentration by membranes. Classification of fruit juices- Squash, cordial, nectar, RTS. IMF products -Jam, Jelly, marmalade, candied preserves.		
Unit - IV	Processing Technology of vegetable products:	9
Preparation and processing parameters of vegetable wafers, soup powders, pulp, puree, pastes, sauces, ketchups, chutneys. Preparation of various types of pickles. Dehydrated vegetable and leafy products. Processing parameters of mushroom and baby corn. Crystallized fruit, glazed fruit, fruit toffee, fruit powders, fruit leather and tutti-frutti.		
Unit - V	Hurdle Technology, Minimally Processed Fruits and Vegetables, Edible Coating:	9
Types of hurdle, aspects of hurdle technology, stress- effect on fresh produce , shelf stable products. Factors affecting the shelf life and the quality of the minimally processed fruits and vegetables, physiology and biochemistry of the fresh cut fruits and vegetables. Processing, quality parameters and biochemical changes in the final quality of the fresh produce.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	interpret physiological and biochemical changes in fruits and vegetables	Understanding (K2)
CO2	select suitable storage and preservation techniques for fruits and vegetables	Applying (K3)
CO3	apply different technology to process fruits into different fruit products	Applying (K3)
CO4	make use of techniques to process different vegetable products and other speciality products	Applying (K3)
CO5	interpret techniques involved in hurdle technology and minimal processing	Understanding (K2)

Mapping of COs with POs and PSOs

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20FTL51 - FOOD PROCESS ENGINEERING LABORATORY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Heat Transfer Operations	5	PC	0	0	2	1

Preamble	To impart knowledge on various properties of food materials involved in food processing
List of Exercises / Experiments :	
1.	Determination of size, roundness, sphericity and 1000 grain weight of food grains.
2.	Determination of bulk density, true density and porosity.
3.	Determination of angle of repose for grain sample.
4.	Determination of coefficient of friction for grain sample.
5.	Experiment on paddy dehusker to determine the shelling efficiency.
6.	Determination of conveying efficiency and power requirement of different conveyor.
7.	Determination of separation efficiency of inclined belt separator.
8.	Experiment on analysis of particle size distribution using hammer mill and ball mill.
9.	Experiment on sedimentation
10.	Experiment on drying characteristics of food material using different dryers.
11.	Experiment on different types of peeling
12.	Demonstration experiment on dry heating (Flaking,Puffing,Popping)

Total: 30**REFERENCES/MANUAL/SOFTWARE:**

**20FTL52 – FRUITS AND VEGETABLES PROCESSING TECHNOLOGY LABORATORY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	PC	0	0	2	1

Preamble	To impart knowledge about the equipments processing parameters and evaluating the parameters of packaging materials suitable for different fruits and vegetable products
List of Exercises / Experiments :	
1.	Study the effect of blanching treatment on the fruits and vegetables.
2.	Estimation of efficiency of screw press extractor and pulper.
3.	Development and analysis of squash and sauce
4.	Preparation of fruit bar and fruit toffee and study on its shelf life characteristics.
5.	Formulation of jams and comparison with commercial product.
6.	Formulation of jellies / marmalade and comparison with commercial product.
7.	Estimation of bursting strength of packaging materials
8.	Determination of tear resistance of packaging materials
9.	Determination of tensile strength of different packaging materials
10.	Estimation of water absorption capacity and water vapour permeability of different packaging materials
11.	Virtual Laboratory Experiments <ul style="list-style-type: none"> a. Osmotic Drying of foods – Experimentation b. Oxygen and carbon dioxide in modified atmospheric packed food

**20FTL53 - FOOD PROCESS EQUIPMENT DESIGN AND DRAWING LABORATORY**

Programme& Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	5	PC	0	0	2	1

Preamble To design and draw various equipments used in food process operations

List of Exercises / Experiments:

1.	Studies of symbols and materials used for design and drawing.
2.	Design and drawing of pipes and fittings.
3.	Design and drawing of storage vessel.
4.	Design and drawing of agitated vessel.
5.	Design and drawing of double pipe heat exchangers.
6.	Design and drawing of shell and tube heat exchangers.
7.	Design and drawing of plate heat exchanger.
8.	Design and drawing of single effect evaporator.
9.	Design and drawing of cyclone separators.
10.	Design and drawing of rotary drier/spray drier
11.	Demonstration experiment on design and drawing of a food plant layout

Total:30**REFERENCES/MANUAL/SOFTWARE:**

20GEL51 - PROFESSIONAL SKILLS TRAINING- I
(Common to all BE/ BTech / MSc / MCA /BSc Branches)

Programme & Branch	B.TECH- FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	5	EC	0	0	0	2

Preamble	This subject is to enhance the employability skills and to develop career competency	
Unit - I	Soft Skills – I	20
Soft skills and its importance: Pleasure and pains of transition from an academic environment to work environment-Need for change- Fear, stress and competition in the professional world-Importance of positive attitude- Self motivation and continuous knowledge upgradation-Self-confidence. Professional grooming and practices: Basics of corporate culture-Key pillars of business etiquette- Basics of etiquette-Introductions and greetings-Rules of the handshake, earning respect, business manners-Telephone etiquette- Body Language.		
Unit - II	Quantitative Aptitude & Logical Reasoning - I	30
Problem solving level I: Number System-LCM &HCF-Divisibility test-Surds and indices-Logarithms- Ratio-proportions and variation-Partnership-Time speed and distance-Data interpretation-data representation. Logical reasoning: Family tree-Deductions-Logical connectives-Binary logic Linear arrangements- Circular and complex arrangement		
Unit - III	Written Communication & Verbal Aptitude	30
Writing Skills: Writing strategies and formats – Importance of Résumés – Writing a Cover letter – Writing a fresher's CV / Résumés – Responding to Job Advertisements – Professional e-mail Writing – Responding to e-mails and business letters – Technical Report writing – Interpretation of Technical Data (Transcoding) – Writing One-page Essays. Verbal Aptitude – Synonyms – Antonyms – Homonyms – One word substitution – Idioms and Phrases – Paired words – Analogies – Spelling test – Cloze test – using suitable verb forms – using appropriate articles and prepositions; Spotting Errors – Sentence Correction and Formation – Grammar Based questions (Transformation : Active-Passive & Direct-Indirect); Rearranging Jumbled Sentences & Jumbled paragraphs, Identifying Facts, Inferences and Judgements statements.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	develop the soft skills of learners to support them work efficiently in an organization as an individual and as a team	Applying (K3), Precision (S3)
CO2	solve real time problems using numerical ability and logical reasoning	Applying (K3), Precision (S3)
CO3	apply communication skills effectively to understand and deliver information in various written discourses grammatically with accuracy	Applying (K3), Precision (S3)

**20FTT61 - DAIRY TECHNOLOGY**

Programme & Branch	B.TECH. – FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	Food Chemistry, Food Microbiology	6	PC	3	0	0	3

Preamble	To provide exposure to variety of technical operations in milk and milk product processing industry and helps students discover their own professional directions for future development in dairy sector.	
Unit - I	Physical chemistry of milk:	9
Milk - Definition, Types of market milk, Composition of milk, Factors affecting composition, Properties of milk: Colour, Flavour, Specific Gravity, Boiling point, Freezing point, Acidity and pH, Viscosity		
Unit - II	Collection, reception and pre-processing of raw milk:	9
Practices for collection of raw milk, Raw milk shelf life extension systems, Cooling and transportation of raw milk, Platform tests of raw milk, Reception of raw milk, Filtration and Clarification of raw milk, Bactofugation of raw milk, Cooling and storage of raw milk		
Unit - III	Unit operations of milk processing:	9
Milk Standardization, Cream Separation, Milk Homogenization, Milk Pasteurization: HTST and LTLT pasteurization, Milk Sterilization, UHT Processing of milk, Packaging systems of milk: pouch filling, bottle filling, aseptic filling systems, Good Hygiene Practices (GHP) during milk production operations.		
Unit - IV	Quality assurance of dairy products:	9
Adulterants in milk and their detection, Defects in market milks, Defects in fat-rich products, Defects in concentrated milks, Defects in frozen dairy products, Defects in coagulated products, Defects in fermented products. Legal standards for milk and milk products		
Unit - V	Cleaning and sanitization of dairy equipment:	9
Aspects of cleaning: Trade obligations, moral obligations, legal obligations, Cleaning agents and methods, CIP flow system, types of CIP system: Centralized CIP system and decentralized CIP system, CIP cycle of equipments: silo, tanker, pasteurizer, Sanitizing agents and methods, Assessment of effectiveness of cleaning and sanitization..

**20FTT62 - BAKING AND CONFECTIONERY TECHNOLOGY**

Programme & Branch	B.TECH. – FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	Food Chemistry	6	PC	3	0	0	3

Preamble	To provide insight knowledge about the different raw materials, equipment and products of bakery and confectionery sectors.	
Unit - I	Science Behind Baking:	9
Classification of bakery products. Bakery Ingredients-Testing of raw materials and functions - flour, yeast, sugar, fat, egg, water, salt, coloring agents, flavoring agents, milk, milk powder, emulsifiers, leaveners, antioxidants and improvers.		
Unit - II	Equipments in Bakery Industry and Rheology of dough:	9
Handling of ingredients- dough mixers, dividers, rounder, sheeter, laminating equipments, fermentation enclosures and brew equipment, ovens and slicers. Farinograph, Amylograph, Alveograph, and Extensograph.		
Unit - III	Bread Making Process and Cake making:	9
Chemistry of Dough Development. Bread making methods- Straight dough/bulk fermentation, Sponge and dough, Activated dough development, Chorleywood bread process, No time process. Characteristics of good bread- Internal and external characters. Bread defects/faults and remedies. Spoilage of bread. Cake making ingredients and their function. Methods for different types of cakes manufacture.		
Unit - IV	Biscuit making and Confectionery:	9
Ingredients and their functions. Types of biscuit dough – Developed dough, short dough's, semi-sweet, enzyme modified dough and batters. Biscuit manufacturing process, Wafers, puff pastry, chemically leavened bakery products. Classification of confectionery Products – Ingredients-Basic Technical considerations in sugar based confectionery		
Unit - V	Confectionery Products:	9
Composition and manufacturing process- Sugar boiled products-Candy, Toffees, fudge, caramel, aerated confectionery. Bubble gums and chewing gums. Chocolate Processing –chocolate shells, candy bars. Fruit confections. Confectionery product quality parameters, faults and corrective measures. Spoilage of confectionery products.

3. Samuel A. Matz, "Bakery Technology and Engineering", 3rd Edition, Springer, US, 2008.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	outline the role of ingredients in bakery industry	Understanding (K2)
CO2	select appropriate equipment for baking process and relate the rheological properties of dough	Applying (K3)
CO3	identify and apply processing techniques for bread and cake manufacturing process	Applying (K3)
CO4	illustrate the processing techniques for preparation of miscellaneous bakery products and summarize the role of confectionery ingredients	Understanding (K2)
CO5	apply the processing techniques to formulate different confectionery products	Applying (K3)

**20FTT63 - FOOD QUALITY AND SAFETY**

Programme & Branch	B.TECH. – FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	6	PC	3	0	0	3

Preamble	To give insight on food quality, safety and its regulatory standards.	
Unit - I	Food quality and safety:	9
Quality and Safety concepts. Characterization of food hazards – physical, chemical and biological. Food spoilage and food borne infection –sources of food spoilage- microbial aspects in food safety-food toxicants and food poisoning –prevention. Cross contamination.		
Unit - II	Quality Assurance and Safety operations in Food industry:	9
Objectives, importance and functions of quality control and quality assurance. Quality Control and Assurance procedures, HACCP, Good Manufacturing Practice, Good Laboratory Practices, Good Hygiene Practices.		
Unit - III	Sampling and Statistical Quality Control:	9
Sampling- concept, methods and importance. Statistical Process and Quality Control – concept, importance and tools. Control charts: importance, types, design process, Control limits and errors, Process Capability.		
Unit - IV	Quality and Safety Standards:	9
Quality Standards – mandatory and optional standards. Mechanism of developing and fixing food standards. Food Safety Systems – ISO 22000, FSSC 22000. National organizations: BIS, CCFS, AGMARK and APEDA. Standards of Weights and Measures. Organic food certification-POP, NPOP. International organizations: ISO, CAC, WTO, USFDA, EIC.		
Unit - V	Regulations for Food Business Operator:	9
Food adulteration and food safety, Food laws – Food Safety and Standards Act (FSSAI), Prevention of Food Adulteration Act, Packaged Commodities Rules, Functions of Food Business Operator, QA Audit, IPR and Patents, Issues affecting consumers and industry – Genetically Modified Foods, Fortification, Pesticide Residues, Organic Foods, Food Additives.

**20FTL61 - DAIRY TECHNOLOGY LABORATORY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Food Chemistry, Food Microbiology	6	PC	0	0	2	1

Preamble	To deal about analysis and estimation of physicochemical properties of milk
List of Exercises / Experiments :	
1.	Studies on titratable acidity and specific gravity of milk.
2.	Estimation of fat and solids-not-fat contents of milk and Analysis of thermal stability of milk.
3.	Detection of adulterants in milk.
4.	Studies on homogenization process of milk.
5.	Studies on standardization process of milk and Development of market milk.
6.	Development of flavoured and fortified milk.
7.	Development of coagulated milk product.
8.	Development of butter by power churn
9.	Development of spray dried milk powder
10.	Studies on Cream Separation from milk.
11.	Virtual lab : Heating milk in a tubular heat exchanger.

Total: 30**REFERENCES/MANUAL/SOFTWARE:**

**20FTL62 - BAKING AND CONFECTIONERY TECHNOLOGY LABORATORY**

Programme & Branch	B.TECH. – FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	Food Chemistry	6	PC	0	0	2	1

Preamble	To provide insight practical knowledge about the different raw materials and products of bakery and confectionery sectors
-----------------	---

List of Exercises / Experiments :

1.	Estimation of quality parameters of bakery ingredients.
2.	Estimation of wet and dry gluten content of wheat flour.
3.	Determination of dough rising capacity of yeast.
4.	Estimation of diastatic activity and maltose value of flour
5.	Estimation of water absorption power, alkaline water retention and sedimentation value of flour.
6.	Preparation and analysis of bread.
7.	Preparation and analysis of biscuits and cookies.
8.	Preparation and analysis of cake.
9.	Preparation of sugar boiled and cocoa based confectionery.
10.	Preparation of toffee and fudge.
11.	Virtual Lab: Demonstration on Yeast Fermentation.

4.	http://www.bch.cuhk.edu.hk/vlab2/animation/fermentation/index.html

COURSE OUTCOMES:

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	analyze the quality of flour and other ingredients used for preparation of bakery products	Analyzing (K4), Precision (S3)
CO2	prepare the bakery product and evaluate its properties	Evaluating (K5), Manipulation (S2)
CO3	formulate confectionery products and perform sensory properties	Evaluating (K5), Manipulation (S2)

20FTL63 - FOOD ANALYSIS LABORATORY

Programme & Branch	B.TECH. – FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	Food Chemistry	6	PC	0	0	2	1

Preamble	To impart knowledge on analysis of various food products
List of Exercises / Experiments :	
1.	Analysis of vegetable oils / Fats.
2.	Analysis of spices (Turmeric / Chilly).
3.	Analysis of Vinegar/ Tea/ Coffee.
4.	Analysis of Jam/Jelly/ Marmalade / Juices.
5.	Analysis of dehydrated vegetables and Fruits.
6.	Analysis of water.
7.	Analysis of salt/ sugar/ Jaggery.
8.	Detection of food Adulteration.
9.	Textural and Colour profile analysis of food material.
10.	Determination of energy value of foods.
11.	Virtual laboratory experiments a. Estimation of minerals by flame photometry – Demo. b. Determining water rehydration in pasta – Experimentation.

Total: 30**REFERENCES/MANUAL/SOFTWARE:**

1.	Laboratory manual
2.	Ministry of Health and Family Welfare, "Manual of Methods for the Analysis of Foods", Government of India, New Delhi, 2016.
3.	Sadasivam, S., and Manickam, A, "Biochemical Methods", 3rd Edition, New Age International, Delhi, 2018.

COURSE OUTCOMES:

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	analyze various food products	Analyzing (K4), Precision (S3)
CO2	detect adulteration in food samples	Evaluating (K5), Precision (S3)
CO3	determine the textural and color profile of food materials	Evaluating (K5), Precision (S3)

Mapping of COs with POs and PSOs

20GEL61 PROFESSIONAL SKILLS TRAINING - II
(Common to all BE/ BTech / MSc/ MCA /BSc Branches)

Programme & Branch	B.TECH- FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	6	EC	0	0	0	2

Preamble	This subject is to enhance the employability skills and to develop career competency	
Unit - I	Soft Skills – II	20
roup discussions: Advantages of group discussions-Structured GD- Team work: Value of team work in organizations- Definition of a team, why team-Elements of leadership, disadvantages of a team, stages of team formation- Group development activities. Facing an interview: Foundation in core subject- industry orientation / knowledge about the company- professional personality-Communication skills-Activities before Interview, upon entering interview room, during the interview and at the end Mock interviews.		
Unit - II	Quantitative Aptitude & Logical Reasoning - II	30
Problem solving level II: Money related problems-Mixtures-Symbol base problem-Clocks and calendars-Simple-linear-quadratic and polynomial equations-Special, equations-Inequalities-Sequence and series-Set theory-Permutations and combinations-Probability-Statistics-Data sufficiency- Geometry-Trigonometry-Heights and distances-Co-ordinate geometry-Mensuration. Logical reasoning: Conditionality and grouping-Sequencing and scheduling- Selections-Networks:-Codes; Cubes-Venn diagram in logical reasoning-Quant based reasoning-Flaw detection- Puzzles-Cryptarithms.		
Unit - III	Reading & Speaking Skills	30
Reading: Reading comprehension– Effective Reading strategies – Descriptive, Inferential, & Argumentative reading passages – Identifying and locating factual information within a text – global reading/skimmmg for general understanding – selective comprehension / scanning for specific information – detailed comprehension / intensive reading – understanding the development of an argument – identifying the writer's attitude and opinions – Reading news articles in business magazines, newspapers – Reading notices and book reviews –Interpreting graphic data & Advertisements. Speaking: Mock Interviews –Self-Introduction – Sharing of Real Time Experience; Conversational Practices –Role Play – Short Talks / TED Talks –Extempore; Giving a Presentation on Various Topics – Technical / Non-Technical Topics – Project Review Presentation – Oratory and Effective Public Speaking; Pair Discussion – Group Discussion – The process of Group Discussion – Strategies to be adopted – Skills Assessed – Telephonic Conversations & Skills – Negotiating Skills.

COURSE OUTCOMES:		BT Mapped (Highest Level)
On completion of the course, the students will be able to		
CO1	Develop the soft skills of learners to support them work efficiently in an organization as an individual and as a team	Applying (K3), Precision (S3)
CO2	Solve real time problems using numerical ability and logical reasoning	Applying (K3), Precision (S3)
CO3	Apply reading and speaking skills effectively for various academic and professional purposes	Applying (K3), Precision (S3)

Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CAT2		50	50				100
CAT3		50	50				100
ESE	NA						

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20GEP61 – COMPREHENSIVE TEST AND VIVA**

(Common to all BE/BTech branches)

Programme & Branch	All BE/BTech branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	6	EC	0	0	0	2

COURSE OUTCOMES:

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	demonstrate knowledge in their respective programme domain.	Applying (K3)
CO2	defend any type of interviews, viva-voce, and aptitude tests conducted for career progression	Applying (K3)
CO3	exhibit professional etiquette and solve related engineering problems	Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	3	2	2					1	2	2	3	3	2

**20GET71 – ENGINEERING ECONOMICS AND MANAGEMENT**

(Common to All BE/BTech Engineering And Technology Branches except Chemical Engineering)

Programme & Branch	B.Tech. & Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	7	HS	3	0	0	3

Preamble	The aim of the course is to create fundamental knowledge on management by introducing concepts like economics,national income, marketing, operations management, accounting principles etc.	
Unit - I	Micro Economics:	9
Economics – Basics Concepts and Principles – Demand and Supply – Law of demand and Supply – Determinants – Market Equilibrium – Circular Flow of Economic activities and Income.		
Unit - II	Macro Economics, Business Ownership and Management concepts:	9
National Income and its measurement techniques. Inflation - Causes of Inflation – Controlling Inflation – Business Cycle. Forms of business – Ownership types. Management concepts: Taylor and Fayol's Principles – Functions of Management - Managerial Skills -Levels of Management - Roles of manager.		
Unit - III	Marketing Management:	9
Marketing - Core Concepts of Marketing - Four P's of Marketing - New product development – Intellectual Property rights (IPR), ProductLife Cycle - Pricing Strategies and Decisions.		
Unit - IV	Operations Management:	9
Operations Management - Resources - Types of Production system - Site selection, Plant Layout, Steps in Production Planning andControl - Inventory - EOQ Determination.		
Unit - V	Financial Management:	9
Accounting Principles – Financial Statements and its uses – Depreciation: Straight Line and Diminishing Balance Method – Break EvenAnalysis – Capital Budgeting: Significance –Traditional and discounted cash flow methods.		

Total:45**TEXT BOOK:**

3.	William G. Nickels, James M. McHugh, Susan M. McHugh, "Understanding Business", 12th Edition, McGraw-Hill Education, New York, 2019.

**COURSE OUTCOMES:**

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	identify market equilibrium and interpret national income calculations and inflation issues	Applying (K3)
CO2	choose a suitable business ownership for their enterprise and illustrate managerial functions	Applying (K3)
CO3	infer marketing management decisions	Understanding (K2)
CO4	apply appropriate operation management concept in business situations	Applying (K3)
CO5	interpret financial and accounting statements and evaluate new proposals	Applying (K3)

Mapping of COs with POs and PSOs

**20FTT71 - FOOD PACKAGING TECHNOLOGY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	7	PC	3	0	0	3

Preamble	To impart knowledge about basics and recent advancements in food packaging materials, methods and food labeling	
Unit - I	Basics of Food Packaging:	9
Definitions and basic functions of a food package. Food package design and development. Physical and physico-chemical processes affecting product quality, migration from packaging to foods, predicting the shelf life of foods. Package standards and regulation. Labeling, bar coding.		
Unit - II	Paper and Paperboard Packaging:	9
Paper and paperboard- manufacture, properties analysis and packaging aspects. Package types – pouches, sacks, cartons, boxes, tubes, tubs, labels, sealing tapes, cap liners and diaphragm etc.		
Unit - III	Plastic Packaging:	9
Types of plastics used in packaging – PE, PP, PET, PVC, EVOH, PVA. Secondary conversion techniques – film, extrusion and thermal lamination. Printing of plastic films and rigid plastic containers. Natural extracts in plastic food packaging. Food contact and barrier properties. Sealability and closure.		
Unit - IV	Metal cans:	9
Raw materials for can making –steel, aluminum. Can making processes – three piece welded cans, DWI, DRD cans – end making processes, coating, film laminates and inks, corrosion and sulphur staining. Flash 18 process, retorting equipment. Definition and composition. Glass container manufacture – melting, forming, surface treatments. Closure selection. Glass bottle design and specification.		
Unit - V	Trends in Food Packaging:	9
Active and intelligent packaging, modified atmosphere packaging - vacuum and inert gas packaging, biodegradable and edible packaging, aseptic packaging, self-heating and cooling cans. Recycling of non-biodegradable packaging materials

**20FTE01 - FOOD SCIENCE AND NUTRITION**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Food Chemistry	5	PE	3	0	0	3

Preamble	This course will deal about the importance of nutrients and its assimilation, energy balance and nutrition for different age groups	
Unit - I	Food Groups and Nutrition:	9
Definition, six classes of nutrients, RDA, nutritional status and its assessment, nutritional requirement, malnutrition – over nutrition and under nutrition. Balanced diet: Diet planning principles, dietary guidelines; food groups; Anatomy and physiology of the digestive tract, mechanical and chemical digestion, absorption and transport of nutrients		
Unit - II	Carbohydrates - Sugars, Starch and Fiber:	9
Digestion and absorption of carbohydrates, lactose intolerance; Glycemic and Non-glycemic carbohydrates, recommendations of sugar intake for health, health effects of fiber and starch intake, artificial sweeteners; Nutrition and Diabetes, GTT		
Unit - III	Lipids and Proteins:	9
Food Sources, Lipid digestion, absorption and transport; Functions of the triglycerides; essential fatty acids - n-3 and n-6 fatty acids: trans fatty acids, Medium Chain Triglycerides, phospholipids and sterols; Health effects and recommended intakes of lipids. Digestion and absorption of proteins; Functions of proteins; amino acids; Protein quality, methods of assessing protein quality; Recommended intakes of proteins; protein and amino acid supplements; Protein Energy Malnutrition - Marasmus and Kwashiorkor.		
Unit - IV	Energy Value, Energy Balance and Body Composition:	9
Calorific value of foods; basal metabolism, specific dynamic action of foods, Protein efficiency ratio, Net protein utilization, physiological energy value of foods. Energy balance – components – energy intake, energy expenditure, energy requirement. Body composition – Five levels of body composition – body composition techniques. Obesity- BMR and BMI calculations.		
Unit - V	Nutrition for Different Age Groups:	9
Factors to be considered in meal/menu planning. Pregnancy - nutrition requirements and food selection. Lactation - nutritional requirements. Infancy - nutritional requirements, breast feeding, infant formula. Introduction of supplementary foods. Early childhood. (Toddlers and Preschoolers) - Growth and nutrient needs, nutritional related problems, Feeding Pattern. School children - Nutritional requirements, Importance of snacks, school lunch. Adolescence - Growth, Nutrient needs, food choice, eating habits, factors influencing. Geriatric Nutrition - Factors affecting food intake and nutrients use, nutrient needs, nutrition related problems.

**COURSE OUTCOMES:**

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	interpret the physiological and metabolic functions of nutrients	Understanding (K2)
CO2	select appropriate carbohydrate diet based on their health effects	Applying (K3)
CO3	identify the lipids and proteins based on their nutritional value	Applying (K3)
CO4	interpret the energy value of foods and body composition and explain the energy balance	Understanding (K2)
CO5	examine nutrition requirement based on different age groups	Analyzing (K4)

Mapping of COs with POs and PSOs

**20FTE02 - TECHNOLOGY OF SNACK AND EXTRUDED FOODS**

Programme & Branch	B.TECH. – FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	5	PE	3	0	0	3

Preamble	To have a knowledge on different categories of snack products including the process technology.	
Unit - I	Introduction:	9
Current status of snack food industry in India. Types of snack food – Raw Vegetable Snack, Formed dough products from potato and maize derivatives, Half Products, Directly expanded extruded snack, Puffed Snacks and other. Types and Functions of ingredients – structure forming materials, dispersed phase/filling materials, plasticizers/lubricants, soluble solids, nucleating substances, coloring and flavouring substances.		
Unit - II	Potato and Rice Based Snacks:	9
Potato Chip - Pre cleaning and peeling, slicing, drying/frying, salting and seasoning, quality control. Fabricated potato snacks – potato flakes, potato granules, potato starch, ground and crushed dehydrated potato. Rice based Snacks – Products using whole grains – Gun puffed rice. Products using flours.		
Unit - III	Corn Based Snacks:	9
Tortilla chip – Corn soaking and smoking, Grinding, Masa flour, Sheeting and Cutting, Baking and Frying. Popcorn – Popping methods, oil popping and dry popping. Commercial and industrial popcorn process. Flavorings and Applicators. Masa based snacks. Quality control for snack foods.		
Unit - IV	Extrusion Based Snacks:	9
Extruder types - single and twin screw, single and multiple die extruders. Pre-conditioning of raw materials used in extrusion process. Second generation and Third generation snacks, Co extruded snacks, Breakfast cereals - Type and processing. Texturized vegetable protein - Definition and processing.		
Unit - V	Pasta Products:	9
Pasta and Precooked pasta - Raw materials. Preparation of raw materials for extrusion and processing. Types of pasta products - Spaghetti, noodles, macaroni and similar products. Dry and frozen pasta products.

**20FTE03 - NANOTECHNOLOGY IN FOOD PROCESSING**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	PE	3	0	0	3

Preamble	To provide knowledge about the synthesis of nano materials, its characterization and applications of nano particles in food processing and food packaging.	
Unit - I	Introduction to Nanotechnology:	9
Introduction to Nanotechnology: Introduction to nano particles and nanotechnology, naturally occurring food nano substances, challenges for nutrient nano encapsulation, nano food particles and their bioavailability, designing food nano structures, public perception of nanotechnology food products		
Unit - II	Synthesis of Nano Materials:	9
Synthesis of Nano Materials: Introduction to synthesis of nanostructure materials, Bottom-up approach and Top-down approach. Physical methods - ball milling, sputtering, evaporation. Chemical methods - photochemical synthesis, electrochemical synthesis, co-precipitation method. Thermolysis route - spray pyrolysis. Biological methods – bacteria, fungi and actinomycetes.		
Unit - III	Nanotechnology in Food:	9
Nanotechnology in Food: Nanoparticles in functional foods, engineered nanoparticles in beverages, nanotechnology in meat processing, nanoemulsion formation, potential applications of milk nanotubes, nano engineered membranes, application of nanoparticles in delivery of flavors and aroma compounds.		
Unit - IV	Nanotechnology in Food Packaging:	9
Nanotechnology in Food Packaging: Bionano composites for food preservation, intelligent packaging, high barrier plastics, biodegradable food packaging nanocomposites, bioactive food packaging with nano diamond particles, nano materials incorporated flexible packaging materials for high pressure processing, new approaches in antibacterial food packaging, nano sensors for food quality.		
Unit - V	Nanotechnology in Food Safety and Challenges in Nanomaterials Analysis:	9
Nanotechnology in Food Safety and Challenges in Nanomaterials Analysis: Nano technology based rapid detection of chemical and biochemical contents in food, separation of food based pathogens using magnetic nanoparticles, challenges in nano materials analysis, sample pre-treatment methods, characterization of nano materials in food and biological matrices, nanomaterial detection and quantification methods.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	outline the fundamentals of nanotechnology and the challenges / public perception of nano particles in food	Understanding (K2)
CO2	make use of appropriate method for manufacturing nano particles	Applying (K3)
CO3	examine the food quality issues and recommend suitable nanotechnology based solutions	Applying (K3)
CO4	extend shelf life of food by making use of nano materials incorporated packaging	Analyzing (K4)
CO5	apply instrumental techniques for characterization of nano particles and make use of nanotechnology in rapid food analysis	Applying (K3)

Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2	1		2	1						2	3	2
CO2	3	2	1		2	1						2	3	2
CO3	3	3	1	1	2	1						2	3	2
CO4	3	3	1	1	2	1	1					2	3	2
CO5	3	3	1	1	2	1	1					2	3	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	60	20				100
CAT2	20	60	20				100
CAT3	20	50	20	10			100
ESE	20	50	20	10			100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20FTE04 - FERMENTATION TECHNOLOGY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Food microbiology, Food chemistry	5	PE	3	0	0	3

Preamble	To provide an insight about the concepts of fermentation process and products	
Unit - I	Introduction and Food Fermentation:	9
Introduction: Basic principles of food fermentation, Properties of fermented foods. Food Fermentation: Origin and history of food fermentation, Micro-organisms for fermentation, Starter Cultures and fermented products, Inoculum development for industrial fermentations, Criteria for transfer of Inoculums.		
Unit - II	Fermentation media:	9
Fermentation media: Natural and Synthetic media; Basic components of media -Role of buffers in media. Sterilization: Sterilization of media and air-Calculation of del factor, Calculation of holding time at constant temperature.		
Unit - III	Types of Fermentation & Design of fermenter:	9
Types of Fermentation & Design of fermenter: Types - submerged, solid state, batch, fed- batch and continuous fermentations. Design of Fermenter: Fermenter construction- construction material, Temperature controls, Aeration and agitation systems- Oxygen requirement, Oxygen supply, determination of KLa values & factors affecting the operation of fermenter.		
Unit - IV	Recovery and Purification of Fermentation products:	9
Recovery and Purification of Fermentation products: Removal of microbial cells and other solid matter, foam separation, precipitation, filtration, centrifugation, cell disruption, membrane process, chromatography, drying and crystallization.		
Unit - V	Production of Fermented Products:	9
Production of Fermented Food Products: Cultured dairy products- Yoghurt, sour cream, Kefir. Meat fermentation-Sausages. Asian fermented foods- Koji, Soy sauce, Natto, Tempeh, and Miso. Industrial production of beer, wine and spirits. Production of Metabolites: Production of vitamins, amino acids, organic acids, enzymes, baker's yeast, Nisin, Xylitol, xanthan gum.		

Total:45**TEXT BOOK:**

**COURSE OUTCOMES:**

On completion of the course, the students will be able to

**BT Mapped
(Highest Level)**

CO1	outline the principles and concepts of fermentation	Understanding (K2)
CO2	select suitable media component and sterilization methods	Applying (K3)
CO3	identify the suitable fermentation process and construction of fermenter	Applying (K3)
CO4	choose appropriate techniques for recovery of fermented products	Applying (K3)
CO5	illustrate the production of different fermented products	Understanding (K2)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

**20FTE05 - FOOD STORAGE AND INFESTATION CONTROL**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	PE	3	0	0	3

Preamble	To understand about the effect of insects and pest on stored products and to learn about the methods to control pest infestation	
Unit - I	Fundamentals of Storage Infestation:	9
Fundamentals of Storage Infestation: Introduction, history of storage entomology, concepts of storage entomology and significance of insect pests. Post-harvest losses - total production of food grains in India. Scientific and socio-economic factors responsible for grain losses. Important pests namely insects, mites, rodents, birds and microorganisms associated with stored grain and field conditions including agricultural products.		
Unit - II	Ecology of Insects and Storage Losses:	9
Ecology of Insects and Storage Losses: Ecology of insect pests of stored commodities/grains with special emphasis on role of moisture, temperature and humidity in safe storage of food grains and commodities. Stored grain deterioration process, physical and biochemical changes and consequences; traditional storage structures; association of stored grain insects with fungi and mites, their systematic position, identification, distribution, nature and extent of damage, role of field and cross infestations and natural enemies, type of losses in stored grains and their effect on quality including biochemical changes..		
Unit - III	Grain Storage and Management:	9
Grain Storage and Management: Grain storage, Types of storage structures - traditional, improved and modern storage structures in current usage. Ideal seeds and commodities storage conditions. Important rodent pests associated with stored grains and their non-chemical and chemical control. Pest Birds – role and its management. Control of infestation by insect pests, mites and microorganisms. Preventive measures- Hygiene/sanitation, disinfestations of stores/receptacles, legal methods.		
Unit - IV	Pest Control Measures:	9
Pest Control Measures: Non-chemical control measures- ecological, mechanical, physical, cultural, biological and engineering. Chemical control- prophylactic and curative. Pesticides – characteristics, uses and precautions in handling. Integrated approaches to stored grain pest management.		
Unit - V	Quality Control in Grains:	9
Quality Control in Grains: Detection of insect infestation in stored food grains, losses in stored food grains – weevilled and unweevilled grains, determination of moisture content in stored food grains, Quality control aspects in FCI godowns, central warehouse. Demonstration of preventive and curative measures including fumigation techniques; treatment of packing materials and their effect on seed quality.		

Total:45**TEXT BOOK:**

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	identify possible sources of pest infestation in storage	Applying (K3)
CO2	interpret ecology of region specific insects and analyze its impact on storage	Analyzing (K4)
CO3	choose appropriate storage structures and preventive measures for pests	Applying (K3)
CO4	select integrated pest management approach and curative measures in grain storage	Applying (K3)
CO5	adapt suitable quality control techniques in grain storage	Applying (K3)

**20FTE06 - MODERN SEPARATION PROCESS**

Programme & Branch	B.TECH. – FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	Food Process Engineering I , Food Process Engineering II	7	PE	3	0	0	3

Preamble	To learn about different separation techniques with its potential application.	
Unit - I	Mechanism of Separation and Filtration Processes:	9
Review of conventional processes. Recent advances in separation techniques based on size, surface properties, ionic properties and other special characteristics of substances. Process concept, theory and equipment used in cross flow filtration, cross flow electro filtration, dual functional filter, Surface based solid – liquid separations involving a second liquid, Sirofloc filter.		
Unit - II	Membrane based separation technique (MBSTs):	9
Physical and chemical properties of membranes, Techniques of membrane preparation, membrane characterization, various types of membranes and modules. Osmosis and osmotic pressure. Working principle, operation and design of reverse osmosis, ultrafiltration, microfiltration, electrodialysis and pervaporation. Gaseous separation by membranes, Membrane fouling – cleaning techniques.		
Unit - III	Adsorption and Chromatography:	9
Adsorption: Mechanism, Types and choice of adsorbents, Adsorption techniques–pressure swing and temperature swing cycles. Chromatography: Theory, paper chromatography, TLC, GC, HPLC, Affinity and Immuno-chromatography.		
Unit - IV	Ionic Separation and Permeation:	9
Controlling factors, Applications, Types of equipment employed for electrophoresis, Dielectrophoresis, Ion exchange chromatography and electrodialysis. Separations involving pervaporation and permeation techniques for solids, liquids and gases.		
Unit - V	Other Separation Processes:	9
Zone melting, Adductive crystallization, Supercritical fluid extraction, Oil spill Management, Application of modern separation techniques for industrial effluent treatment.		

Total:45**TEXT BOOK:**

ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category *	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	10	60	30				100
CAT2	10	60	30				100
CAT3	10	60	30				100
ESE	10	60	30				100

* $\pm 3\%$ may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20FTE07 - BIOPROCESS ENGINEERING**

Programme & Branch	B.TECH. – FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	Food Microbiology, Food Process calculations, Food Process Engineering II	7	PE	3	0	0	3

Preamble	To provide the concepts of bioreactors, sterilization kinetics and models, stoichiometry of cell growth and product formation, rheological properties of fermented fluids and bio-product recovery methods.	
Unit - I	Introduction and Design of Novel Bioreactors:	9
Role of a bioprocess engineer, Kinetics of microbial growth, substrate utilization and product formation. Packed bed bioreactors, Bubble-column bioreactors, fluidized bed bioreactors, trickle bed bioreactors, airlift loop bioreactors, photo bioreactors,- Batch, fed-batch and continuous fermentations- ideal reactors for kinetics measurements- Ideal batch reactor, fed-batch reactors.		
Unit - II	Sterilization Kinetics and Monod chemostat model:	9
Thermal death kinetics of microorganisms, batch and continuous heat sterilization of liquid media, filter sterilization of liquid media, air sterilization and design of sterilization equipment - batch and continuous. Kinetic modeling of cell growth. Models with growth inhibitors -substrate inhibition, product inhibition and inhibition by toxic compounds.		
Unit - III	Stoichiometry of Cell Growth and Product Formation:	9
Elemental balances, degrees of reduction of substrate and biomass, available electron balances, yield coefficients of biomass and product formation, maintenance coefficients, energetic analysis of microbial growth and product formation.		
Unit - IV	Rheology of fermentation fluids and Mass Transfer in Bio-processing operations:	9
Newtonian and Non -Newtonian fluids, Aeration and agitation, power requirement for gassed and ungassed systems, time calculation for mixing. Types of Mass transfer. Heat transfer in Bio-processing operations.		
Unit - V	Bio Product Recovery Methods and Applications in Food Industry:	9
Filtration, sedimentation, centrifugation, precipitation, cell disruption, chromatography, crystallization, lyophilisation, drying. Lactic Acid Production, Citric Acid Production, HFCS Production, Baker Yeast Production.

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	40	40				100
CAT2	20	40	40				100
CAT3	20	40	30	10			100
ESE	20	30	30	20			100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20FTE08 - EMERGING TECHNOLOGIES IN FOOD PROCESSING**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Food Process Engineering I, Food Process Engineering II	7	PE	3	0	0	3

Preamble	To impart knowledge effectively in various novel methods of food processing utilizing their advantages for food processing and preservation	
Unit - I	High Pressure Processing and Pulsed Electric Field:	9
High Pressure Processing of Foods: High Pressure Processing–Principle - Description, Packaging requirements, Uses and Effects on food quality. High Pressure Regulations. Other applications of high pressure - High pressure freezing, High Pressure thawing, High Pressure non-frozen storage. Application and limitations. Pulsed Electric Field Processing: Principle - Mechanism of action. PEF treatment systems – processing parameters. Applications. Safety aspects, Problems and challenges in PEF.		
Unit - II	High Intensity Pulsed Light Technology and Irradiation of Foods:	9
High Intensity Pulsed Light Technology: Principles of Pulsed Light Technology, Effect of Pulsed Light Technology on food products, enzymes and food properties. PLT systems. Irradiation of Foods: Fundamentals of food irradiation - Definition, Doses of Irradiation, Legal aspects. Biological effects of irradiation – effect on micro-organisms, parasites and insects, viruses, ripening and sprouting inhibition.		
Unit - III	Ultrasound and Ozonation:	9
Ultrasound: Fundamentals of ultrasound, ultrasonic processing equipment, Inactivation of micro-organisms and enzymes. Application- mixing and homogenization, foam formation and destruction, precipitation of airborne powders, filtration and drying, extraction. Ozonation: Solubility, stability and reactivity of ozone. Antimicrobial properties of ozone. Ozone Treatment System. Food applications.		
Unit - IV	Ohmic and Di-electric Heating:	9
Ohmic Heating - Fundamentals, electrical conductivity. Generic Configurations -Batch Configuration, Transverse Ohmic heating and Collinear Ohmic heating. Product suitability for thermal treatments. Di-electrical Heating: Dielectric properties of foods. Dielectric heating, difference between MW and RF. Microwave heating – working principle. Microwave processing of foods – baking, thawing, drying, pasteurization and sterilization. Radio-frequency heating – material properties, adopting RF technology, heating and drying application. Limitations of Dielectric and RF heating.		
Unit - V	Novel Hybrid Drying Technologies, Automation and Cold Plasma:	9
Novel Hybrid Drying Technologies: Need for hybrid drying systems. Hybrid systems - Heat pump drying, fluidized bed drying, combined microwave and vacuum drying, infra-red drying, superheated steam drying, pressure regulating drying, rotating jet spouted bed drying. Automation: Automation process control for food industry – Introduction. Recent trends in tools of automation in food processing – Computer vision systems, On-line sensors, Expert systems, Robot Technology, Computer Integrated manufacturing. Cold Plasma: Plasma-properties-chemistry-generation methods-application-effects-limitations and toxicology

**20FTE09 - PLANTATION AND SPICES PRODUCTS TECHNOLOGY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	7	PE	3	0	0	3

Preamble	To provide an idea about the plantation crop ,spices and their processing with special ingredients as flavouring material quality.	
Unit - I	Plantation Crops:	9
Plantation Crops: Description of various types of Plantation crops. Processing of tea – Manufacturing of black tea, CTC tea Green tea, Oolong tea, flavoured tea. Grading of Tea. Coffee– Occurrence, Manufacturing of coffee powder, instant coffee. Cocoa Processing – Cocoa liquor, cocoa powder manufacturing. Coconut– Processing and by products. Cashew nut and Oil palm Processing. Processing of tuber crops – tapioca. Processing of potatoes-processed potato products.		
Unit - II	Spices and Condiments:	9
Spices and Condiments: Description of various types of spices and condiments ,their composition, functional properties, flavouring agents. Nutritive value of major spices and their health benefits. Importance in culinary preparations.		
Unit - III	Processing of spices:	9
Processing of spices–Pepper, Chilli, Turmeric, Cardamom, Cinnamon, Clove ,Vanilla and Ginger. Spices Products–Liquid products and Solid Products. Spice Oils–Concept and importance. Extraction methods-Solvent extraction, Steam distillation. Oleoresins - Extraction, Quality and Application of oleoresins. Importance of Cryogenic grinding of spices		
Unit - IV	Herbs & Flavouring materials:	9
Herbs & Flavouring materials: Description of various types of herbs .Basil, Cilantro, Dill, Coriander, Mint, Oregano, Borage, Thyme, bilva leaves,Safflower. Nutritive value and health benefits. Processing and post-harvest handling.		
Unit - V	Flavouring materials of natural origin:	9
Flavouring materials of natural origin: Natural flavours, sources of natural flavouring materials – Herbs and spices .Microbiology of spices, gas sterilization of spices, gamma irradiation, Heat treatment. Encapsulation of spice based flavours – methods and recent trends, Seasoning blend duplication and tricks.

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Food chemistry	7	PE	3	0	0	3

Preamble	To learn about enzymes and their application in processing and development of food products.	
Unit - I	Enzyme kinetics and Production of industrial enzymes:	9
Enzyme kinetics: Enzyme-Classification and Nomenclature, Units of Activity, General Characteristics. Enzyme Kinetics - Michaelis Menden Equation, Linear Plots / Km and Vmax. Production of industrial enzymes: Sources of enzymes, microbial fermentation and downstream processing, Enzyme formulation.		
Unit - II	Enzymes in milk processing and brewing industry:	9
Milk Processing: Milk clotting enzymes, Lactoperoxidase, Cheese-ripening enzymes, Lysozyme, Lactase, Lipase, Transglutaminase. Brewing: Malting, Brewhouse processing, Enzyme applications and their role during fermentation, Beer stabilization.		
Unit - III	Enzymes in non alcoholic beverage:	9
Enzymes in non alcoholic beverage: Application of enzymes in tea and cocoa processing. Role of the enzymes in fruit juice production, factors affecting the enzymatic activity. Enzymatic clarification of apple and guava juices, factors affecting the clarification of fruit juices.		
Unit - IV	Enzymes in baking industry:	9
Enzymes in baking industry: Enzymes for baking industry, Use of the proteinases, lipases and pentosans in baking industry, Starch degrading enzymes: sources, analysis and application of starch degrading enzymes. Hemicellulase, xylanases: sources, analysis and application.		
Unit - V	Enzymes in meat processing:	9
Enzymes in meat processing: Enzymes used for meat processing: protease and peptidase, lipases, trans glutaminase, oxidative enzyme. Meat tenderization with added enzyme, Enzymatic generation of flavour in meat products, Restructuring of unheat meat.

2. Robert Rastall, "Novel Enzyme Technology for Food Applications", 1st Edition, Wood head Publications, USA, 2007.

**COURSE OUTCOMES:**

On completion of the course, the students will be able to

**BT Mapped
(Highest Level)**

CO1	infer the enzyme kinetics and production of industrial enzymes	Understanding (K2)
CO2	select suitable enzymes for milk processing and brewing	Applying (K3)
CO3	choose appropriate enzymes for non alcoholic beverage production	Applying (K3)
CO4	apply and relate the effect of enzymes in baking process	Applying (K3)
CO5	make use of enzymes in processing of meat and meat products	Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2	2	1								2	2	1
CO2	3	2	3	1								2	3	2
CO3	3	2	3	1								2	3	2
CO4	3	2	3	1								2	3	2
CO5	3	2	3	1								2	3	2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	60	20				100
CAT2	20	40	40				100
CAT3	20	40	40				100
ESE	30	40	30				100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20GEE01 - FUNDAMENTALS OF RESEARCH**

(Common to All BE/BTech Engineering & Technology Branches)

Programme & Branch	B.Tech. & Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	7	PE	3	0	0	3
Preamble	This course familiarize the fundamental concepts/techniques adopted in research, problem formulation and also disseminate the process involved in collection, consolidation of published literature and rewriting them in a presentable form using latest tools.						
Unit - I	Introduction to Research:						9
Introduction to Research: Types and Process of Research - Outcome of Research - Sources of Research Problem - Characteristics of a Good Research Problem - Errors in Selecting a Research Problem - Importance of Keywords.							
Unit - II	Literature Review:						9
Literature Review: Literature Collection - Methods - Analysis - Citation Study - Gap Analysis - Problem Formulation Techniques.							
Unit - III	Research Methodology:						9
Research Methodology: Appropriate Choice of Algorithms/Methodologies/Methods - Measurement and Result Analysis - Investigation of Solutions for Research Problem - Interpretation - Research Limitations.							
Unit - IV	Journals and Papers:						9
Journals and Papers: Journals in Science/Engineering - Indexing and Impact factor of Journals. Plagiarism and Research Ethics. Types of Research Papers - Original Article/Review Paper/Short Communication/Case Study.							
Unit - V	Reports and Presentations:						9
Reports and Presentations: How to Write a Report - Language and Style - Format of Project Report - Title Page - Abstract - Table of Contents - Headings and Sub-Headings - Footnotes - Tables and Figures - Appendix - Bibliography etc - Different Reference Formats. Presentation using PPTs. Research Tools.

**COURSE OUTCOMES:**

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	list the various stages in research and categorize the quality of journals.	Analyzing (K4)
CO2	formulate a research problem from published literature/journal papers	Evaluating (K5)
CO3	write, present a journal paper/ project report in proper format	Creating (K6)
CO4	select suitable journal and submit a research paper.	Applying (K3)
CO5	compile a research report and the presentation	Applying (K3)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

**20FTE11 - DAIRY PRODUCTS TECHNOLOGY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Dairy Technology	7	PE	3	0	0	3

Preamble	To explore the technology of variety of products and by-products developed from milk.	
Unit - I	Coagulated Milk Products and Fermented Milk Products:	9
Coagulated Milk Products: Definitions, Classification, Paneer: Types of paneer, Basic operations in Paneer Production; Cheese: Types of cheese, Basic operations in Cheese Production. Fermented Milk Products: Definitions; Classification; Yoghurt: Types, Yoghurt Production- significance of each processing steps; Dahi: Types of dahi, Dahi Production; Preparation of Cultured Butter Milk.		
Unit - II	Traditional dairy products:	9
Classification of traditional dairy products, Khoa: Definition, varieties and standards, Methods of preparation of khoa, Gulab jamun: Product Description, Method of Preparation, Quality; Peda: Product Description, Method of Preparation, Quality; Burfi: Product Description, Method of Preparation, Quality; Shrikhand: Product Description, Method of Preparation, Quality.		
Unit - III	Condensed Milk and Dried Milk:	9
Condensed Milk: Definition, Classification, Legal Standards for Evaporated and Condensed Milks, Manufacture of Sweetened Condensed Milk, Manufacture of Evaporated Milk. Dried Milk: Definition, Classification, Legal Standards for dried milks, Manufacture of Non Fat Dry Milk, Manufacture of Whole Milk Powder, Manufacture of Instant Dried Milks.		
Unit - IV	Fat Rich Dairy Products:	9
Principles and methods of cream separation, Processing of cream, Consumer cream products; Composition and classification of butter, Process outlines of butter making, Continuous Butter Making; Methods of ghee preparation, Butter oil.		
Unit - V	Frozen dairy products and Dairy By-products:	9
Frozen dairy products: Definition, Classification, Composition of Ice cream, Other frozen desserts, Technological aspects of ice cream manufacture, Dried ice cream mix: Composition, Technology, Uses Dairy By-products: Definition, Types; Caseinates: Composition, Process of manufacture, Whey Protein products: Classification, Process of manufacture.		

Total:45**TEXT BOOK:**

2. Pieter Walstra, Jan T. M. Wouters, Tom J. Geurts, "Dairy Science and Technology", Taylor & Francis, UK, 2006.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	explain the technology of coagulated milk products and fermented milk products	Understanding (K2)
CO2	summarize the manufacturing of frozen dairy products and dairy by-products	Understanding (K2)
CO3	select suitable thermal methods for extension of shelf life of milk	Applying (K3)
CO4	outline the technology of fat-rich dairy products	Understanding (K2)
CO5	explain the production and examine the quality of different traditional dairy products	Understanding (K2)

Mapping of COs with POs and PSOs

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	40	60					100
CAT2	40	40	20				100
CAT3	40	60					100
ESE	20	40	40				100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20FTE12 - TECHNOLOGY OF FATS AND OILS**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Food Chemistry	7	PE	3	0	0	3

Preamble	To provide insight of the basic chemistry, properties and processing of fats and oils.	
Unit - I	Properties of Oils and Fats:	9
Properties of Oils and Fats: Oils and fats – sources, composition. Nutritional importance of fats and oils. Physical properties of fats and oils - color, odour, consistency, melting point, flash point, smoke point and refractive index. Chemical properties of fats and oils - iodine value, saponification value, free fatty acids, peroxide value.		
Unit - II	Vegetable Oil and Animal Fat Production:	9
Vegetable Oil and Animal Fat Production: Industrial production of oils- seed handling and storage. Preparation of seed for extraction of oil. Processing- peanut oil, rice bran oil, sunflower oil and soy bean oil. Production of cod liver oil. Method of extraction- cold pressing and hot pressing, Equipments- Filter press, hydraulic press. Production of margarine. Production of Lard.		
Unit - III	Solvent Extraction and Refining of Oils:	9
Solvent Extraction and Refining of Oils: Solvent extraction – prepress and direct extraction, removal and recovery of solvent from miscella and extracted residue. Physical and Chemical Refining: Degumming - types, Neutralization, dewaxing/winterization, bleaching, deodorizing.		
Unit - IV	Modification of Oils and Modified Fat Products:	9
Modification of Oils: Methods- Fractionation, Blending, Hydrogenation, Interesterification. Modified Fat products: Margarines, spreads, mayonnaise. Shortenings in bakery products and confectionery lipids. Fat substitutes and its types, Non edible fat/ oil products. Design and Application of Fat-Based Surfactants: Introduction to Surface and Interfacial Activity - Emulsion Formation and Stabilization - Surface Activity - Applications of Surface Active Materials. Micro and nano emulsion formation methods and applications		
Unit - V	Frying and Storage of Oil:	9
Frying and Storage of Oil: Changes during storage of oil. Role of fat or oil in frying. Selection of frying oil. Applications of frying oil. Rancidity - atmospheric oxidation and enzyme action, Prevention of rancidity. Quality standards of oil, Packaging of oils and fats.

3. O'Brien, Richard D, Walter E. Farr, and Peter J. Wan. "Introduction to Fats and Oils Technology", 2nd Edition, Champaign, Ill: AOCS Press, 2000

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	interpret the physical and chemical properties of fats and oils	Understanding (K2)
CO2	recommend suitable mechanical methods for oil extraction	Applying (K3)
CO3	apply solvent extraction and refining techniques to improve the quality of oil	Applying (K3)
CO4	develop modified fat/ oil products	Applying (K3)
CO5	analyze the changes occurred during frying and storage of fats/oils	Analyzing (K4)

Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy														

ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	60	20				100
CAT2	20	40	40				100
CAT3	16	44	20	20			100
ESE	20	30	30	20			100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20FTE13 – TECHNOLOGY OF CEREALS, PULSES AND OIL SEEDS**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	7	PE	3	0	0	3

Preamble	To learn the techniques involved in milling of various cereals, pulses, and oil seeds along with the recent advancements			
Unit - I	Grain Properties:			9
Grain Properties: Grains - Definition. Importance. Physical properties of grains. Structure, Composition and Nutritional value – paddy, wheat, maize, millet, oat, sorghum. Anti-nutritional factors and its methods of reduction. Grain storage systems - farm level storage, bagged storage, bulk storage, hermetic storage, outdoor storage. Losses during storage, Grain protection methods – physical and chemical methods. Integrated stored grain pest management				
Unit - II	Milling of Paddy:			9
Milling of Paddy: Rice milling flow sheet. Cleaning. Parboiling- traditional and improved methods, Physio–chemical changes during parboiling, Effect of parboiling on rice quality. Husking- Methods of husking, Huskers/Shellers – impact type, centrifugal dehusker, under runner disc huller, rubber roll Sheller. Separation – indented tray and compartment type separator. Whitening – friction type and abrasive type whiteners. Color sorter. New quality control instruments. Byproducts from rice milling.				
Unit - III	Milling of Wheat:			9
Milling of Wheat: Types of wheat. Wheat milling – Simple and detailed flow sheet. Cleaning, Entoleter. Preparation of Wheat for Milling – wheat blending, tempering or conditioning, Chakki milling, Roller milling – break rolls and reduction rolls, operation and corrugation specification, Sifting – Plan sifters, Purifying - purifier. Milling performance evaluation. Functional properties of flour. Flour treatment – Enrichment, Enhancement of flour appearance, Improvement of functional properties. By products from wheat milling.				
Unit - IV	Processing of Corn, Millet and Sorghum:			9
Processing of Corn: Types of corn. Dry milling – Tempering, dehulling, degermination and milling. Wet milling – Steeping, Germ, fiber, starch and gluten separation, starch refinement. By products from corn milling. Millet and Sorghum Processing: Types of millets. Sorghum and millet processing - cleaning, decortication, milling and classification, dry milled fractions. Food and Feed uses.				
Unit - V	Milling of Pulses and Oil Seeds:			9
Milling of Pulses: Legumes – Structure, Types, Nutritional and Anti-nutritional factors. Pulse Milling – Conditioning, Pitting, Oil/water treatment, drying, dehulling – TADD, CIAE design, Schule design, CFTRI design, Husk separation and grading, Splitting – Equipments. Milling - Dry and wet milling, Modern milling. Dehulling efficiency. Milling of Oil Seeds: Types of Oil seeds. Oil seed processing - Mechanical extraction – Hydraulic press, Screw press, Filter press. Mechanical extraction of coconut oil and palm oil. Cold pressing and Hot Pressing. Solvent extraction, Factors influencing extraction. Refining of oil. Hydrogenation. Winterization. Byproducts of oil extraction.

**20FTE14 - MEAT, FISH AND POULTRY PROCESSING**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Food Chemistry, Food Microbiology, Food Process Engineering I	7	PE	3	0	0	3

Preamble	To educate the students about processing, preservation, product development from meat, fish, poultry meat and egg and also ensuring quality	
Unit - I	Meat Processing:	9
Types of meat and its sources, composition, structure of meat. Ante mortem handling, types of stunning, slaughtering of animals, inspection and grading of meat. Post-mortem changes of meat. Meat - tenderization, aging. Meat quality evaluation. Preservation of meat- curing, drying. Processed meat products - hamburgers, sausages and meat balls		
Unit - II	Fish Processing:	9
Types of fish, composition and nutritive value of fish. Harvesting of fish. Spoilage factors of fish. Post-mortem changes in fish. Preservation - freezing and individual quick freezing. Canning and smoking operations. Salting, drying of fish and pickling.		
Unit - III	Poultry Processing:	9
Types and characteristics of poultry products. Unit operation in poultry processing. Pre-slaughter factors affecting poultry meat quality. Factors affecting the shelf-life of poultry meat. Sensory quality of poultry meat- colour, texture and flavour. Preservation techniques: chemical treatments, heating-microwave & IR, freeze drying and irradiation.		
Unit - IV	Egg Processing:	9
Structure, composition, nutritive value of egg. Functional properties of eggs, Factors affecting egg quality and measures of egg quality. Preservation of egg by different methods. Egg powder processing-spray drying, foam mat drying.		
Unit – V	Hygiene and Sanitation:	9
Modern abattoirs, slaughterhouse and its features. Handling and maintenance of tools and core equipment. Cleaning and sanitation in meat plants. Food safety measures – GMP, GHP and HACCP in meat industries.		

Total:45**TEXT BOOK:**

**20FTE15 - WASTE MANAGEMENT AND BY-PRODUCT UTILIZATION IN FOOD INDUSTRIES**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	7	PE	3	0	0	3

Preamble	To provide an insight on utilization of food industrial waste for developing valuable products	
Unit – I	Introduction on Waste and disposal strategies:	9
Introduction : Different Sources of waste from Food Industries and their availability in India, nature of different waste, potentials and prospects of developing by products in India. Characteristics of Industrial Waste and disposal strategies : Classification of waste, characterization of waste, magnitude of waste generation in different food processing industries, importance of waste management, Economical aspects of waste treatment and disposal, Strategies for minimizing waste, Application of 3R's and Life Cycle Assessment (LCA).		
Unit – II	Waste utilization in Cereal Food Industries:	9
Waste utilization in Cereal Food Industries: Waste utilization from rice mill – thermal and biotechnological uses of rice husk- pyrolysis and gasification of rice husk- cement preparation and different thermal applications- utilization of rice bran- stabilization – defatted bran utilization.		
Unit – III	By Products from Oil Seed and Tuber Processing Industries:	9
By Products from Oil Seed and Tuber Processing Industries: Oil processing industries – Introduction, De-oiled cake, animal feed, fertilizer, bio sorbents, waxes, soap stock, cocoa butter replacer. Tuber processing industries- Introduction, enzyme production, biogas, bakers yeast, bio-ethanol, animal feed, corn syrup, organic acids, nutraceuticals.		
Unit - IV	By Products from Animal Product based Industries:	9
By Products from Animal Product based Industries: Dairy industry - Introduction- opportunities – whey, bio surfactants, bacteriocin. Meat, fish, poultry processing industries- bio active peptide, protein extract, gelatin, heparin, pepsin, bio molecule from bone and blood, keratin form animal hair, bone meal, meat meal, chondroitinsulfate, squalene, fish oil, micro nutrients- vitamins and minerals, pigments.		
Unit - V	Utilization of Fruits, Vegetables and Food Packaging Waste:	9
Utilization of Fruits and Vegetables waste: processes for waste utilization from fruits and vegetable industries –Pectin, essential oils, antioxidants, and organic acids. Distillation for production of alcohol, SCP production, by products of sugar industry. Handling of Food Packaging Waste: Handling and treatment, far waste, incineration of solid food waste and its disposal.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	classify food waste and explain the strategies for waste minimization	Understanding (K2)
CO2	utilize the wastes from cereal industries for developing byproducts	Applying (K3)
CO3	make use of wastes from oilseeds and tuber processing industries for developing byproducts	Applying (K3)
CO4	utilize the animal processing industries waste for developing byproducts	Applying (K3)
CO5	apply the concept of waste utilization of fruit and vegetable, sugar and packaging industries	Applying (K3)

**20FTE16 - ENERGY MANAGEMENT IN PROCESS INDUSTRIES**

Programme & Branch	B.TECH. – FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	Heat transfer operations	7	PE	3	0	0	3

Preamble	To provide the knowledge on energy management, audit and conservation in many systems.	
Unit - I	Energy Basics:	9
Energy Scenario: Commercial and Non Commercial Energy, Primary Energy Resources, Commercial Energy Production, Energy Needs of Growing Economy, Energy and Environment. Basics of Energy and its various forms: Electricity basics: DC & AC currents, Electricity tariff, Load management and Maximum demand control, Power factor. Thermal basics: Thermal energy contents of fuel, Temperature & Pressure, Heat capacity, Sensible and Latent heat, Evaporation, Condensation, Steam, Moist air and Humidity & Heat transfer. Global Environmental Concerns: United Nations Framework Convention on Climate Change (UNFCCC), Kyoto Protocol, Conference of Parties (COP), Clean Development Mechanism (CDM), Prototype Carbon Fund (PCF), Sustainable Development.		
Unit - II	Energy Management and audits:	9
Definition, Energy audit- need, Types of energy audit. Material and Energy balance: Facility as an energy system, Methods for preparing Process flow, Material and energy balance diagrams. Energy Monitoring and Targeting. Financial Management: Investment-need, Appraisal and criteria, Financial analysis techniques-Simple payback period, Return on investment, Net present value, Internal rate of return ; Cash flows, Risk and sensitivity analysis.		
Unit - III	Energy conservation in Electrical Systems and Compressed air system:	9
Basics of Electrical System: Electricity billing, Electrical load management and maximum demand control, Power factor improvement and its benefit. Electric motors: Types, Losses in induction motors, Motor efficiency, Factors affecting motor performance, Rewinding and motor replacement issues, Energy saving opportunities with energy. Types of air compressors, Compressor efficiency, efficient compressor operation, Compressed air system components, Capacity assessment, Leakage test, Factors affecting the performance and efficiency.		
Unit - IV	Energy conservation in Thermal systems and Waste Heat Recovery:	9
Boilers: Types, Combustion in boilers, Performances evaluation, Analysis of losses, Feed water treatment, Blow down, Energy conservation opportunities. Steam System: Properties of steam, Assessment of steam distribution losses, Steam leak-ages, Steam trapping, Condensate and flash steam recovery system, Identifying opportunities for energy savings. Classification, Advantages and applications, commercially viable waste heat recovery devices, saving potential.		
Unit - V	Energy conservation in Food Process Industries:	9
Dairy Processing - Potential Energy Conservation measures in pasteurization, cooling, concentration and drying. Fruit and Vegetable Processing –energy flow in canned products, energy conservation measures in blanching, pasteurization, sterilization. Energy conservation in Baking and confectionery units. Thermo chemical Conversion of Food Processing Wastes for Energy Utilization – pyrolysis, gasification and liquefaction. .

CO4	3	2	3	2	2							1	1	2
CO5	3			2	2							1	1	2
1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy														

ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	40	40				100
CAT2	30	40	30				100
CAT3	20	30	30	10	10		100
ESE	30	40	10	10	10		100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20FTE17 - PROCESS INSTRUMENTATION AND CONTROL**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	7	PE	3	0	0	3

Preamble	To impart knowledge on Laplace transformation for first and second order system, controllers, computer based automation and instrumentation in process industries.	
Unit - I	Laplace Transform and First Order System:	9
Laplace transformation, application. Open-loop systems, first order systems and their transient response for standard input functions, Linearization and its application in process control.		
Unit - II	Second Order System:	9
Second order systems - Interacting system and non-interacting system, manometer, damped oscillator, dynamic response of second order system, Closed loop control systems, development of block diagram for feed-back control systems, servo and regulator problems.		
Unit - III	Controllers, Dynamic Response and its Stability:	9
Controllers - Proportional, Proportional Integral, Proportional Derivative and Proportional Integral Derivative (PID). Dynamic behavior of feedback controlled processes. Effect of proportional, Integral, Derivative and composite control actions on the response of controlled processes. Stability for linear systems, Routh stability criterion and its limitations. Introduction to control system design by frequency, Bode diagram		
Unit - IV	Automation:	9
Control components of SCADA, working of SCADA, comparison of SCADA with DCS, comparison of PLC with RTU, Application and advantages of SCADA, Sensors and its classification.		
Unit - V	Process Instruments:	9
Principles of measurements - Static and dynamic response of instruments, Temperature measurements – Expansion Thermometer, filled system thermometers, thermocouple, optical pyrometers, radiation pyrometers. Pressure measurements - Manometers, bourdon gauge and bellows gauge, pressure measurement by vacuum. – Mcleod guage, Piraniguage. Level measurement – sight glass level indicator, float and tape liquid level gauge.

**20FTE18 - FUNDAMENTALS OF COMPUTATION FLUID DYNAMICS**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Heat transfer operations, Mass transfer in food processing operations	7	PE	3	0	0	3

Preamble	To impart knowledge about application of computational fluid dynamics in various fields of food processing.	
Unit - I	Introduction to CFD:	9
Introduction to CFD : Theory of CFD modeling - Conservation of mass, Momentum Equation, Energy Equation, Navier Stokes Equation. Classification of simple PDEs and fluid flow equations		
Unit - II	Turbulence and Modeling:	9
Turbulence and Modeling: Transition from laminar to turbulent flow, Effect of turbulence on time-averaged Navier-Stokes equations, Characteristics of simple turbulent flows - Free turbulence models, turbulent flow calculations, Direct numerical simulation.		
Unit - III	The Finite Volume Method for Diffusion Problems:	9
The Finite Volume Method for Diffusion Problems: Introduction - One dimensional steady state diffusion, two dimensional and three dimensional diffusions. The central differencing scheme, The upwind differencing scheme, the hybrid differencing scheme, the power-law scheme, higher order differencing schemes.		
Unit - IV	CFD Analysis:	9
CFD software packages and tools, CFD analysis – Preprocessing, solving and post processing, CFD Applications in Food Processing, Spray Drying-Air Flow Pattern, Atomization, air-particle interaction, Residence time of the particle, Modeling in Bread Baking Process		
Unit - V	Applications of CFD:	9
Applications of CFD: Canning of foods, Canned solid liquid food mixtures, Bacterial Deactivation kinetics, analysis of fluid flow pattern during sterilization, Thermal processing of canned foods, Other applications in food processing.

**COURSE OUTCOMES:**

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	explain the equations involved in CFD modelling	Understanding (K2)
CO2	apply the turbulence model in fluid flow operations	Applying (K3)
CO3	make use of finite volume method for developing solution of steady state diffusion processes	Applying (K3)
CO4	infer the application of CFD in spray drying and bread baking processes	Analyzing (K4)
CO5	interpret the various applications of CFD in food processing	Evaluating (K5)

Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

ASSESSMENT PATTERN - THEORY

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	40	40				100
CAT2	20	40	40				100
CAT3	10	10	30	30	20		100
ESE	10	20	30	30	10		100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20FTE19 - REACTION ENGINEERING**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	7	PE	3	0	0	3

Preamble	To give knowledge on reaction kinetic principles and different type of reactors.	
Unit - I	Kinetics of Homogeneous reactions:	9
Kinetics of Homogeneous reactions: Reaction Kinetics, Classification of reaction systems, Rate equation, Rate constant, Reaction Mechanism, Order of the reaction, Kinetic models for non-elementary reaction, Testing kinetic model. Temperature dependent term of a rate equation: Arrhenius law, collision theory and transition theory.		
Unit - II	Analysis of Batch Reactor Data:	9
Analysis of Batch Reactor Data: Analysis of experimental reactor data, Integral and differential method, constant volume batch reactor, and varying volume batch reactor, Integral method analysis of rate data, Integral rate equation for different order reactions: constant and variable volume systems, Temperature and reaction rate..		
Unit - III	Ideal Reaction for a Single Reactor:	9
Ideal Reaction for a Single Reactor: Ideal reactors: Batch, Semi-batch, Steady state plug flow reactor, Steady state mixed flow reactor.		
Unit - IV	Design for Single and Multiple Reactions:	9
Design for Single Reactions: Size comparison of Single reactors, multiple reactor system, Recycle reactor Design for Multiple Reactions: Reactions in Parallel, Reactions in Series, Yield and Selectivity, Qualitative treatment: Plug flow, Batch and Mixed flow reactor, Product distribution.		
Unit - V	Non Ideal Flow:	9
Non-ideal flow: The residence time distribution as a factor performance; residence time functions and relationship between them in reactor. Models for non-ideal flow: Dispersion model and Tank in series model.

**20FTE20 - MODELING, SIMULATION AND SOFT TOOLS FOR FOOD TECHNOLOGISTS**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	7	PE	3	0	0	3

Preamble	To impart knowledge on modeling and simulation of different food processing operations	
Unit - I	Introduction to Modeling:	9
Introduction to Modeling: Definition of terms: System, Entity, attributes, activity, state of systems. Physical, Mathematical and Chemical Systems. Modeling - Principles of model formulation, Representation of Model, Fundamental Laws, Types of Modeling Equations, Black Box Principles, Boundary Condition, Validation of model. Benefits of modeling in food processing.		
Unit - II	Models in Fermentation and Modified Atmospheric Packaging:	9
Models in Fermentation: Introduction, Biological models - Genetic models, growth models, killing-off models and productions models. Technological models - heat transfer models, oxygen transfer models and mixing models. Economic models and mixed models. Models in Modified Atmospheric Packaging: Principle and methods, macro, micro and meso level models.		
Unit - III	Modeling of Cooling and Freezing Processes:	9
Modeling of Cooling and Freezing Processes: Introduction, modeling product heat load during cooling - single tank model and tank network model. Modeling product heat load during freezing. Numerical solution of heat conduction equation with phase change. Finite different models and element model. Modeling of combined heat and mass transfer - porous, non-porous foods, foods with impermeable skin and frozen foods.		
Unit - IV	Modeling of Thermal Process:	9
Modeling of Thermal Process: Types, basic equations - Microbiological and quality kinetics, thermal transport equations. Conduction equations, complex models for non-uniformity and convective flows, sterilization of liquids foods and foods containing particulates. Models for microwave and ohmic heating. Models for heat transfer equipments – evaporators, heat exchangers.		
Unit - V	Soft Tools for Modeling of Food Processes:	9
Soft Tools for Modeling of Food Processes: Soft tools for Sensory analysis, Mathematical analysis, data treatment tools, design tools and software.

**20FTE21 - PRODUCTION OF FIELD AND HORTICULTURE CROPS**

Programme & Branch	B.TECH. – FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	7	PE	3	0	0	3

Preamble	To provides an insight on role of agricultural practices on production of field and horticultural crops.	
Unit - I	Agronomy:	9
Definition of agriculture and agronomy – Factors affecting crop growth – climate and weather parameters – Soil fertility and productivity. Crops – Classification, Crop adaptation and Distribution – Principles of plant distribution, Theories governing adaptation, Major Crops. Intensive cropping – Multiple cropping, Intercropping, Multistoried cropping. Crop Rotation, Cropping Patterns & Systems, Crop Production. Seasons and System of Farming		
Unit - II	Soils:	9
Soil Phases – Liquid, Solid, Gaseous. Properties of soils – Physical Properties, Soil / Irrigability, Soil Water. Major soils in India – Alluvial, Black Soils, Red soils, Desert soils, Tarai soils, Saline and acid soils. Major soils in southern India		
Unit - III	Tillage and Seeds Sowing:	9
Characteristics of good tillage – Types of tillage – Modern Concepts of tillage – Tillage implements – Primary, Secondary, inter cultural and special purpose. Seeds - Seed rate - Sowing methods - Germination - Crop stand establishment - Planting geometry		
Unit - IV	Irrigation and water management:	9
Source of water – Surface and sub- surface. Crop water requirement, Irrigation requirement. Methods of irrigation – Gravity, Tank and Lift irrigation. Irrigation schedule and management. Measurement of irrigation. Soil moisture constants.		
Unit - V	Nutrient Management:	9
Classification of Essential Elements - Based on the Relative Quantity, Chemical Nature, General Function, Mobility in Plants. Nutrients–Role, Deficiency, Method of Control and Toxicity - Organic Manures - Green Manure and Green Leaf Manure - Fertilizers - Classification - Bio Fertilizers - Factors Affecting Manures and Fertilizers Use - Time of Application - Method of Application - Integrated Nutrient Management.

**20FTE22 - CANE SUGAR TECHNOLOGY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Heat transfer operations, Food Process Engineering I, Food Process Engineering II	7	PE	3	0	0	3

Preamble	To provides the knowledge on various unit operations involved in the sugar cane processing and its by-products	
Unit - I	Introduction and Pre-processing Operation:	9
Introduction and Pre-processing Operation: Overview of sugar industry - composition of sugarcane, sugarcane parts and growth phase, manufacturing process of sugarcane juice, types of cane sugar, terminology. Harvesting indices, Cane cutting – Manual and Mechanical, Transportation, Cane conveyor, Washing, Shredding.		
Unit - II	Juice Extraction:	9
Juice Extraction: Crushing –Types of crushers, crushing efficiency. Extraction of juice – methods. Accumulators – types. Maceration. Theory of cane diffusivity. Types of diffusers. Factors influencing Extraction of cane juice. Operating conditions and their influence on sucrose extraction, Weighing of juice - Maxwell Boulogne Scale and Magnetic Flow Meters.		
Unit - III	Juice Clarification and Concentration:	9
Juice Clarification: Importance, methods, clarifying agent, bleaching agent. Role of pH, non-sugars, colloids and gums in cane juice clarification. Lime - specification, storage. Preparation of Milk of Lime (MOL), clarifier types, MOL tanks, lime pumps, use of hydrated lime powder. Sulphur -specification and storage, production of sulphur dioxide gas. Juice Concentration: Importance- types of heaters- construction and working of tubular heater, Direct Contact Heater (DCH), Plate Heater (PHE), advantages and disadvantages. Evaporator- types- performance measures.		
Unit - IV	Crystallization and Refining:	9
Crystallization and Refining: Sugar boiling, Nucleation and crystal growth, super saturation and meta stable stage, seeding – shock seeding, true seeding. Crystallizers. Refining - Brown sugar, importance of refining, Affination, clarification, carbonation, sulphitation, phosphitation, decolorization, centrifugation - dewatering of sugar. Drying. Bagging and storage. Factors affecting sugar refining process.		
Unit - V	Manufacturing of Jaggery/ Gur and other by products:	9
Manufacturing of Jaggery/ Gur and other by products: Extraction of Juice, Clarification of Gur, Concentration of Juice, Drying and grading of Gur, Storage of Gur. Byproducts - Drying and uses of Bagasse - Back strap Molasses - Characteristics of Molasses. Direct Utilization of Molasses - Distilling Industries - Applications in animal feed – Biogas – Biofertilizers production- Inverted syrup.

**20FTE23 - BEVERAGE TECHNOLOGY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Food Process Engineering I, Food Chemistry	7	PE	3	0	0	3

Preamble	To gain knowledge on process involved in development of different beverages and quality assessment.	
Unit - I	Introduction:	9
Current status of beverage industry in India- Types of beverages- Non-Alcoholic and Alcoholic. Nutritional and therapeutic benefits. Raw materials - Water, Sweeteners, Bulking agents, Acidulants, Emulsifiers, Stabilizers, Flavoring and Coloring agents.		
Unit - II	Non Alcoholic Beverages:	9
Natural Fruit based beverages, Fermented non alcoholic beverages (kombucha, kefir), Synthetic/Artificial beverages. Carbonated beverages- Properties of carbon dioxide, carbonation – carbonators. Preparation of syrup, filling and packaging. Measurement of carbonation. Dairy based beverages – whey based beverages and flavored milk.		
Unit - III	Alcoholic Beverages:	9
Types of alcoholic beverages. Wine – types – production and defects. Beer – Types – Production and defects. Distilled beverages – Brandy, Whiskey, Rum, Gin – Production and defects.		
Unit - IV	Specialty Beverages:	9
Coffee and Instant Coffee production. Recent trends in coffee based beverages – Cappuccino, Mocha, Espresso and Latte. Production of Tea based beverages – Instant Tea, Tea Concentrates, RTD Tea beverages. Malt beverages– Branded malt beverages in market. Cocoa Based Beverages. Traditional Beverages – Neeri, Sugar cane juice, Tender coconut water and Herbal water. Sport beverages – Physiological needs and formulation.		
Unit - V	Quality Assurance in Beverage Industry:	9
Effective application of quality controls- Sanitation and Hygiene in Beverage industries. Quality of water in beverages. Threshold limits of ingredients according to FSSAI, EFSA & FDA. Packaging standards for beverages and recent trends.

CO4	3	2	2		1							1	3	2
CO5	3	2	3			2		2				2	3	3
1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy														

ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	60	20				100
CAT2	20	40	40				100
CAT3	20	40	40				100
ESE	20	40	40				100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20FTE24 - TRADITIONAL FOODS**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	7	PE	3	0	0	3

Preamble	To learn about the popular indigenous foods of India and other countries and also improvisation of such foods.	
Unit - I	Introduction about Traditional Foods	9
Introduction, Definitions of traditional foods, History of Indian Foods, Traditional classification of Indian Foods. Concepts of Ayurveda in health foods. Role of traditional foods in meeting macro and micronutrients, role in dietary patterns. Traditional foods versus Junk foods. Benefits of traditional foods. List of traditional foods of India and around the world. Fermented and unfermented traditional foods.		
Unit - II	Grain Based Traditional Foods	9
Traditional cereal and legume based foods - Idli, Dosa, Dhokla, Selroti, Sez, Khaman, Bhattejaanr, Anarshe, Balam, Kishk, Soy sauce, Kinema, Tarhana, Hawaijar, Ogi, Kenkey, Pozol, Injera, Kisera. Traditional millet based foods. Traditional cereal-based fermented beverages - Beer, sake, Koozhu, Bouza, Chicha, Mahewu, Boza, Kunu-zaki.		
Unit - III	Fruits, Vegetables, Dairy, Meat and fish based Traditional Foods	9
Sauerkraut, Fermented or Pickled cucumber, Kimchi, Traditional cassava foods - Fufu, Mingao, Farinha, Cassava rice, Sago wafers, Macroni, Gari. Traditional Dairy Foods: Traditional and improved methods of Khoa, Chhana, Paneer, Shrikhand, Ghee. meat, fish based traditional and fermented foods.		
Unit - IV	Minimal Processing and Health aspects of Traditional Foods	9
Minimal Processing of Traditional Foods - Photochemical and non-photochemical processes Health Aspects of Traditional Foods: Comparison of traditional foods with typical fast foods / junk foods – cost, food safety, nutrient composition, bioactive components; energy and environmental costs of traditional foods; traditional foods used for specific ailments /illnesses		
Unit - V	Laws and Regulations of Traditional Foods: Past, Present and Future	9
Introduction, Development of Food Regulations and Food Law, From Past to Present: A Global Perspective, Current Frameworks and Issues-Food safety and international standards, Trade standards and regulation of Middle east, Africa, China and south east Asia and Latin America, Intellectual Property: Geographical Indications (GIs),The Future: Traditional Foods in a Global Marketplace.

**20FTE25 - AGRI BUSINESS MANAGEMENT AND RETAIL MARKETING**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	7	PE	3	0	0	3

Preamble	To understand the management aspects of agricultural business and retail operations.	
Unit - I	Introduction on Agribusiness and Marketing:	9
Definition, Structure, Features of agribusiness, Importance of agribusiness, Role of agriculture in Indian economy, Linkages among sub Marketing and distribution in Agribusiness: Marketing of agriculture inputs, models and theories of agricultural marketing, Characteristics of production, consumption and marketable surplus of agribusiness in India. Distribution management – storage, warehousing and transportation management of agricultural products; marketing agencies/intermediaries		
Unit - II	Export and Financial in Agribusiness:	9
objectives of pricing policies, Marketing policies and practice for agribusiness - determinants of price, Export of Agro products: legal requirements, steps and issues, Selection of market and channels of Export. Financial in Agribusiness: Assessment of financial requirement of agribusiness unit, Working capital management - concept and components of working capital, need for working capital in agribusiness, inventory for agribusiness. agribusiness financing systems - functioning of cooperative credit institutions, commercial banks, regional rural banks, NABARD		
Unit - III	Small scale Agribusiness and Retailing:	9
Small Scale Industry in Indian Economy, Development: definition, importance, growth stages, and entrepreneurial opportunities in modern agriculture. Overview of retailing: Concept of retailing, importance of developing and applying retail strategy, strategic options for retailers, types of retail markets, Forms of retailing: direct marketing, electronic retailing, Retailing implications of consumer demographics and lifestyles, consumer decision making process.		
Unit - IV	Retail Management and Planning:	9
Retail management: definition, importance and elements, functions of retail manager, Retail planning: definition, characteristics, importance, classification of retail planning, steps in planning, identification of consumer characteristics and needs, Considerations in planning retail strategy mix, food-oriented retailers. Managing retail business: Setting up retail organization, Strategic Profit model of asset management, blueprint of retail business operation.		
Unit - V	Retail Organization and Directing:	9
Organization- definition, characteristics, importance, steps in retail organization process, Directing: Supervision, leadership, functions of leader, types of communication, Nature of communication.

**20FTE26 - FOOD ADDITIVES AND NUTRACEUTICALS**

Programme & Branch	B.TECH. – FOOD TECHNOLOGY	Sem.	Category	L	T	P	Credit
Prerequisites	Food Chemistry	8	PE	3	0	0	3

Preamble	To provide deeper insight to students on role of food additives and nutraceuticals on food Product Development.	
Unit - I	Food Additives Introduction:	9
Definition; Types and their function in food processing; Preservatives –definition; natural preservatives; chemical preservatives; acidulants and low pH –organic acids and esters; sulphur dioxide and its salts; nitrites; antibiotics; surface preservation; Permitted preservatives in foods –Antioxidants; natural and synthetic antioxidants; mechanism of antioxidant function; primary and secondary antioxidants; selection and application of antioxidants in foods; evaluation of antioxidant effectiveness –permitted antioxidants in foods. Sequestarants and its functions.		
Unit - II	Food Colorants, Flavors, Emulsifiers and Stabilizers:	9
Natural and synthetic colorants; inorganic pigments; application of colors in food industry; Non permitted colorants restriction on the use of colors in foods. Flavoring agents –concept of flavors in foods; natural flavors; nature identical flavors; artificial flavoring substances; restrictions on the use of flavoring agents in Foods. Emulsifiers and Stabilizers - Definition, properties of HLB value; function of emulsifiers and stabilizers in foods; permitted emulsifiers and stabilizers used in foods; - polyols –physical and chemical properties of polyols, application in food industry, permitted polyols in foods.		
Unit - III	Safety, Regulation and Quality Standards:	9
Safety limits of Food additives; FSSAI regulations And GRAS additives Risk assessment and risk benefit Indices of human exposure, acute toxicity, mutagenicity and carcinogenicity, reproductive and developmental toxicity, teratogenicity, neurotoxicity and behavioral effect, immune toxicity. Determination of the limit for addition – NOEL – Method of determining toxicity – LD50. FSSAI regulations and GRAS additives.		
Unit - IV	Functional Foods and Nutraceuticals:	9
Introduction, definition. Difference between functional foods and nutraceuticals. Examples for fortified functional foods. Plant and animal based nutraceuticals. Health benefits of Polyphenols, Flavonoids, Omega-3 Fatty Acids, Carotenoids. Technologies to recover Nutraceuticals compounds: Distillation, ultrahydrostatic pressure treatment, dense carbon-di-oxide treatment, encapsulation of nutraceuticals – materials, mechanical processes and chemical based processes, nano encapsulation.		
Unit - V	Role in Health Promotion and Disease Prevention:	9
Nutraceuticals in prevention and treatment of gastrointestinal disorder, Probiotics Cardiovascular and Chronic Diseases. End User Market Products with current product updates - supplements forms- tablets, capsules, powders, soft gels, gel caps, liquids; Nutraceuticals currently available in the market, regulation for nutraceuticals.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	select appropriate preservatives and antioxidants.	Understanding (K2)
CO2	choose suitable food colours, flavours, emulsifiers and stabilizers	Applying (K3)
CO3	relate the safety, regulations and quality standards to food additives in food processing	Understanding (K2)
CO4	identify technology to recover nutraceuticals.	Applying (K3)
CO5	identify the effect of nutraceuticals in health promotion and disease prevention	Applying (K3)

Mapping of COs with POs and PSOs

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20FTE27 - FOOD ALLERGENS AND TOXICOLOGY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Food Chemistry , Food microbiology	8	PE	3	0	0	3

Preamble	To provide knowledge on toxicology related to food and the human food chain.	
Unit - I	Introduction to Food Toxicology:	9
Definition and need for understanding food toxicology; Hazards -Microbiological, nutritional and environmental. Basics of immune response - humoral and cell mediated response. Allergen and mechanism of allergic response.		
Unit - II	Natural Toxins, Food Allergy and Sensitivity:	9
Toxins–Natural toxin in animal and plant foods. Microbial toxins- toxin characteristics. Chemistry of food allergens, celiac disease, asthma, food disorders associated with metabolism- lactose intolerance, favism. Antitoxin in foods and their functions		
Unit - III	Toxicants Formed During Food Processing:	9
Intentional direct additives: preservatives, nitrite and N- nitroso compounds, flavour enhancers, food colours . Indirect additives: residues and contaminants, heavy metals, other organic residues and packaging materials. Toxicity of heated and processed foods, food carcinogens and mutagens - Polycyclic aromatic hydrocarbons, N - nitrosamines, Acrylamide and their mode of action		
Unit - IV	Assessment of Toxicants in Food Sampling:	9
Quantitative and qualitative analysis of toxicants in foods; Biological determination of toxicants. Assessment of food safety – Risk assessment and risk benefit indices of human exposure, acute toxicity, mutagenicity and carcinogenicity, reproductive and developmental toxicity, neurotoxicity and behavioural effect, immunotoxicity.		
Unit - V	Instrumentation Techniques to Detect Toxins:	9
Chromatography, Principles, procedure and applications of Thin layer chromatography, Gas chromatography column chromatography, Ion exchange chromatography and High performance liquid chromatography. Spectrophotometry, Principles, Instrumentation and applications of Atomic Absorption Spectrophotometry (AAS) and Atomic Emission Spectrophotometry (AES).

**20FTE28 - FOOD PROCESS PLANT LAYOUT AND SAFETY**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	8	PE	3	0	0	3

Preamble	To give the knowledge about the plant layout and design considerations, different hazards and Industrial safety	
Unit - I	Introduction and Plant Location:	9
Introduction: Classifications of food industries - Plant design concepts - situations giving rise to plant design problems - general design considerations - differences in design of food processing and non-food processing plants. Feasibility study: Steps involved including planning of the study - collection of information - information flow diagrams – market analysis, technical analysis and preparation of feasibility report. Plant location: Factors affecting plant location, their interaction with plant location, theory models for evaluation of alternate locations. Plant size: Economic plant size - factors affecting the plant size - raw materials availability, market demand, competition in the market - return on investments. Procedures for estimation of economic plant size - break even analysis and optimization techniques		
Unit - II	Plant Layout, Equipment selection and Utilities:	9
Plant Layout: considerations involved in planning an efficient layout. Types of layouts. Preparation and development of layout for different food processing Industries. Equipment symbols-flow sheet symbols - electrical symbols - graphic symbols for piping systems including pipe fitting and valves. Standards for space requirements - distances between critical plant areas and for setting different plant facilities. Development of the pilot layout: Size and structure of the pilot plant, minimum and maximum size, types and applications. Equipment selection and Utilities: Process equipment - material handling equipment – service equipment- valves and fittings - instruments and controls- considerations involved in equipment selection. Services and Utilities: Estimation of Services such as Cafeteria, locker rooms, water closets, sinks, parking lots, exercise area. Office Layout. Line Balancing and Line balancing techniques		
Unit - III	Food Plant Building and Construction:	9
Food Plant Building: General requirements and considerations for construction, materials and floors. Drains and drain layout. Ventilation, fly control, mould prevention, illumination in food plants. Requirements of the steam, refrigeration, water, electricity, Cleaning , sanitization, CIP system, dust removal and fire protection. Materials of construction and colour coding: Characteristics of suitable construction material: Stainless steel, Aluminum, Nickel and Monel, Plastic Materials. Maintenance of Food Plant Building: Safety Colour Code, Roof Inspection, Care of Concrete floors. Colour Coding: Colour – Code System - Specific Hazards Colour codes for buried pipes and cables. Colour Scheme for pipes.		
Unit - IV	Industrial Safety and Safety Performance:	9
Industrial Safety: Process industries, potential hazards, toxic chemicals and physical safety analysis, high pressure, high temperature operation, radioactive materials, safe handling and operation of machineries. Safety Performance: Safety Appraisal, effective steps to implement safety procedures, periodic inspection and safety procedures; proper selection and replacement of handling equipment, personal protective equipments.		
Unit - V	Accidents, Health Hazards and Legal Aspects:	9
Accidents: Industrial accidents–accident costs–identification of accident spots, remedial measures, identification and analysis of causes of injury to men and machines – accident prevention – accident proneness – vocational guidance, fire prevention and fire protection. Health Hazards And Legal Aspects: Health hazards – occupational – industrial health hazards – health standards, and rules – safe working environments – parliamentary legislations – factories act – Labour welfare act – ESI Act – Workmen Compensation Act.		

TEXT BOOK:**Total:45**

**20FTE29 - INDUSTRIAL WASTE WATER TREATMENT**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	8	PE	3	0	0	3

Preamble	To provide knowledge on treatment of different industrial effluents	
Unit - I	Physical Methods:	9
Introduction: Classification and characterization of wastes from different industries. Need for treating wastes, COD, BOD content Physical Methods: Principles of Screening – Mixing, Equalization – Sedimentation - Filtration, back washing – Accelerated gravity separation – Evaporation- Adsorption– Principles, - Membrane separation - Reverse Osmosis, nanofiltration, ultrafiltration – electrodialysis.		
Unit - II	Chemical Methods:	9
Chemical Methods: Principles of Chemical treatment – Coagulation, flocculation, Precipitation, floatation. Ion exchange, Electrolytic methods, Solvent extraction, ozonation, advances oxidation/reduction –disinfection.		
Unit - III	Aerobic Biological Treatment:	9
Biological Treatment - Aerobic: Objectives of biological treatment – significance – kinetics of biological growth. Biological treatment process: aerobic suspended growth treatment process-activated sludge process, aerated lagoons, stabilization ponds, oxidation ditch - aerobic attached growth treatment process-trickling filters.		
Unit - IV	Anaerobic Biological Treatment:	9
Biological Treatment- Anaerobic: Suspended growth treatment process-anaerobic digestion, USAB reactors Anaerobic attached growth treatment process-Rotating biological contactors anaerobic, filter process expanded bed.		
Unit - V	Solid Waste Management and Design of Wastewater Plant:	9
Solid Waste Management: Sludge treatment process- sludge thickening, sludge digestion, sludge conditioning, sludge dewatering, thermal reduction and disposal of sludge. Composting, incineration, Pyrolysis, Briquetting. Design Aspects: Selection of unit operations and processes - Design of water treatment plant units – aerators, flocculation, clarifier, filters, chlorinators and thickeners.

**20FTE30 - ANALYTICAL INSTRUMENTS IN FOOD INDUSTRIES**

Programme & Branch	B.TECH. – Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Food chemistry	8	PE	3	0	0	3

Preamble	To provide knowledge on role of analytical instruments in food industries.	
Unit - I	Spectrometry:	9
Spectrometry: Classification of Instrumental methods– Electromagnetic radiation – electromagnetic spectrum, Interaction of electromagnetic radiation with matter. Colorimetry and Visible spectrometry – Theory, Block diagram aspects of Instrumentation and applications. Ultra violet spectroscopy – Theory, instrumentation - Single and Double beam, applications. Infrared spectroscopy – Theory, Fundamental Vibrations, Instrumentation, Applications.		
Unit - II	NMR spectroscopy, Flame photometry and Thermal methods:	9
NMR spectroscopy &Flame photometry: NMR spectroscopy - Principle, Chemical shift, Instrumentation, applications. Flame photometer: Principle, Instrumentation and applications. Thermal methods – Thermogravimetry, Differential thermal analysis, Differential Scanning Calorimetry, Instrumentation and Applications..		
Unit - III	XRD, Atomic Absorption Spectroscopy, Polarimetry and Refractometry:	9
X-Ray &Atomic Absorption Spectroscopy: X-ray diffraction Principle, Instrumentation, various methods of diffraction and applications. Atomic Absorption Spectroscopy: Theory, Instrumentation, applications. Polarimetry and Refractometry: Introduction on specific rotation, optical activity, refractive index, Principle and instrumentation. Saccharimetry- Analysis of Sugar.		
Unit - IV	Conductance, Potential measurements and Electrophoresis:	9
Conductance, Potential measurements and Electrophoresis: Definitions, conductance measurements, applications, Types, advantages and disadvantages of Conductometric titrations. Potential measurements: pH determination, Potentiometric Titrations. Electrophoresis: Basic principles of electrophoresis, theory and application of paper, starch gel, agarose, PAGE and SDS –PAGE.		
Unit - V	Chromatographic Techniques:	9
Chromatographic Techniques: Paper chromatography, Thin Layer Chromatography, Column Chromatography - Gel permeation chromatography, Gas chromatography, HPLC- Principle, Reverse and Normal Phase, Instrumentation and Applications.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	summarize the interaction of electromagnetic radiation with matter and UV-Visible, IR usage	Understanding (K2)
CO2	apply AAS, NMR & Thermal techniques to analyze different food materials.	Applying (K3)
CO3	utilize X- ray diffraction, flame photometry and Polarimetry techniques to analyse food materials	Applying (K3)
CO4	make use of conductance, potential measurement and electrophoresis for analysis and separation of components.	Applying (K3)
CO5	separate and analyse food materials by different chromatographic techniques	Analyzing (K4)

Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO2	3	3		2	2							1	1	3
CO3	3	3		3	2							2	2	3
CO4	3	3		2	2							2	1	3
CO5	3	3		3	2							2	2	3
1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy														

ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	40	40	20				100
CAT2	40	40	20				100
CAT3	30	40	20	10			100
ESE	20	30	30	20			100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

20FTO01 - BAKING TECHNOLOGY
(Offered by Department of Food Technology)

Programme & Branch	All BE/BTech Engineering & Technology branches except Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	4	OE	3	0	2	4

Preamble	To gain knowledge on science and technology of various bakery products		
Unit - I	Science Behind Baking:		9
Science Behind Baking: Current status of Bakery Industry in India, Classification of bakery products. Bakery ingredients and their functions-flour, yeast, sugar, fat, egg, water, salt, coloring agents, flavoring agents, milk, milk powder, emulsifiers, leaveners, antioxidants and improver.			
Unit - II	Bakery Equipment:		9
Equipment: Handling of ingredients- dough mixers, dividers, rounder, sheeter, laminating equipment, fermentation enclosures and brew equipment, ovens and slicers. Rheology of dough-Farinograph, Amylograph, Alveograph, and Extensograph.			
Unit - III	Bread Making Process:		9
Bread Making Process: Chemistry of dough development. Bread making methods - Straight dough/Bulk Fermentation, sponge and dough, activated dough development, Chorley wood bread process. No time process Characteristics of good bread- Internal and external characters. Bread defects/faults and remedies. Spoilage of bread-Causes, detection and prevention.			
Unit - IV	Biscuit and cookies:		9
Biscuit and cookies: Comparison of Biscuits and Cookies, Types of Dough - Developed dough, short dough's, semi-sweet, enzyme modified dough and batters. Methods of biscuit and cookie manufacture. Stability of biscuit and cookie products. Quality attributes in cookies and biscuits.			
Unit - V	Cakes and other bakery products:		9
Cakes and other bakery products: Cake – Types, Cake making- Ingredients and their function, Methods for different types of cakes manufacture, Faults in cake manufacture, Miscellaneous bakery products production - Wafers, puff pastry, and chemically leavened bakery products, Quality attributes of bakery products.			

List of Exercises / Experiments :

1.	Estimation of quality parameters of bakery ingredients.
2.	Estimation of wet and dry gluten content of wheat flour.
3.	Determination of dough rising capacity of yeast.
4.	Estimation of diastatic activity and maltose value of flour
5.	Estimation of water absorption power, alkaline water retention and sedimentation value of flour.
6.	Preparation and analysis of bread.
7.	Preparation and analysis of biscuits.
8.	Preparation and analysis of cake.
9.	Preparation and analysis of cookies.
10.	Preparation and analysis of puff pastry.

Lecture: 45, Practical:30, Total:75

TEXT BOOK:

1.	Samuel A. Matz, "Bakery Technology and Engineering", 3rd Edition, Chapman and Hall, London, 2005.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	outline the role of ingredients for production of bakery products	Understanding (K2)
CO2	select appropriate equipment for baking process	Applying (K3)
CO3	identify and apply processing techniques for bread manufacturing process	Applying (K3)
CO4	choose suitable processing techniques for preparation of biscuits and cookies	Applying (K3)
CO5	make use of various methods for cakes, wafers and pastry	Applying (K3)
CO6	analyze the quality of ingredients used for in preparation of bakery products	Analyzing (K4), Precision (S3)
CO7	evaluate the quality of flour based on gluten content, sedimentation value and diastatic activity	Evaluating (K5), Precision (S3)
CO8	prepare bakery product and evaluate its sensory characteristics	Evaluating (K5), Precision (S3)

Mapping of COs with POs and PSOs

ESE	30	35	35				100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

20FT002 - FOOD PROCESSING TECHNOLOGY
(Offered by Department of Food Technology)

Programme & Branch	All BE/BTech Engineering & Technology branches except Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	4	OE	3	1	0	4

Preamble	To provide insight about the processing and preservation methods used for various food materials.		
Unit - I	Introduction:		9+3
Scope of food science and technology, Food - Definitions and functions, Sources of food, scope and benefit of industrial food preservation, Constituents of foods, RDA, malnutrition and balanced diet. perishable, non-perishable food commodities, Food as source of energy.			
Unit - II	Ambient Temperature Processing:		9+3
Size reduction of solids, size reduction of liquids, mixing, forming, separation- centrifugation, filtration, extraction, concentration - theory and equipments.			
Unit - III	High Temperature preservation:		9+3
Introduction, Principles and methods - Canning& retorting, – flowsheet, blanching, pasteurization - packed and unpacked foods, Sterilization - in-container and UHT sterilization, evaporation and distillation - theory and equipments, drying and dehydration - mechanism and types.			
Unit - IV	Low Temperature preservation:		9+3
Introduction-need &methods - Chilling and Freezing - theory and equipments, principle and effect on food quality, refrigerated and cold storage. Controlled atmosphere and modified atmosphere storage, Freeze concentration.			
Unit - V	Food Fermentation and Irradiation		9+3
Theory of fermentation, Types of Fermentation, equipments, effect on foods, fermented food products - soy sauce, curd, sauerkraut, vinegar - role in human health.			
Theory and mechanism of action, sources of irradiation, equipments, applications in foods, effect on food materials.			

Lecture: 45, Tutorial :15, Total:60

TEXT BOOK:

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	classify different sources and types of food products	Understanding (K2)
CO2	explain various ambient temperature processing of foods	Understanding(K2)
CO3	select suitable high temperature preservation techniques	Applying (K3)
CO4	make use of various low temperature food preservation techniques	Applying (K3)
CO5	classify the types of fermentation, irradiation and interpret their role on food quality	Analyzing (K4)

Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

20FTO03 - PROCESSING OF MILK AND MILK PRODUCTS
(Offered by Department of Food Technology)

Programme & Branch	All BE/BTech Engineering & Technology branches except Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	OE	3	0	2	4

Preamble	To impart the knowledge on milk processing and to exploit new uses for milk and its components	
Unit - I	Processing of market milk:	9
Practices for reception, chilling, clarification, and storage of raw milk. Homogenization of milk: Definition, pretreatment of milk, theories of homogenization, synchronization of homogenization with HTST; Pasteurization of milk: Definition, Classification and Process flow		
Unit - II	Manufacture of special milks:	9
Reconstituted and recombined milks, Flavoured milks, homogenized/ vitaminized milks. Lactose-hydrolysed milk. Aseptic packaging: Types of packaging approaches for sterilization of packages. Filling systems.		
Unit - III	Manufacture of Coagulated products:	9
Channa and paneer: Preparation and preservation; Prospects for mechanization of paneer manufacturing/packaging process, innovative approaches and integration with emerging technologies, Physico-chemical changes during manufacture and storage of paneer and channa		
Unit - IV	Technology of fat-rich dairy products:	9
Technology of Butter manufacturing, over-run in butter, control of fat loss, defects in butter, rheology of butter. Technology of ghee manufacturing, innovations in ghee manufacturing process, packaging of ghee; Manufacture of butter oil		
Unit - V	Manufacture of Cheese:	9
Cheddar, Gouda, Swiss, Mozzarella, Cottage cheese, Changes during manufacture and ripening of Cheddar Cheese, factors leading to losses during processing and handling; Manufacture of processed Cheese, Cheese spread and Processed Cheese foods.		

List of Exercises / Experiments :

1.	Preparation of homogenized market milk.
2.	Preparation of sterilized milk.
3.	Preparation of flavoured milk.
4.	Preparation of channa.
5.	Preparation of paneer.
6.	Preparation of butter.
7.	Preparation of ghee.
8.	Preparation of yoghurt.
9.	Preparation of milk khoa.
10.	Preparation of fermented milk.

Lecture: 45, Practical: 30, Total: 75

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	understand various aspects of milk process operations and physico-chemical properties of milk	Understanding (K2)
CO2	make use of technical knowledge in manufacture of special milks.	Applying (K3)
CO3	utilize technical knowledge in manufacture of coagulated milk products.	Applying (K3)
CO4	apply the technical knowledge in manufacture of fat rich dairy products.	Applying (K3)
CO5	make use of technical knowledge in manufacture of cheese and cheese products.	Applying (K3)
CO6	utilize the technical knowledge in preparation of homogenized milk	Applying (K3)
CO7	utilize the technical knowledge in preparation of paneer.	Applying (K3)
CO8	utilize the technical knowledge in preparation of butter.	Applying (K3)

Mapping of COs with POs and PSOs

CAT1	40	40	20				100
CAT2	40	40	20				100
CAT3	40	40	20				100
ESE	40	40	20				100

* ±3% may be varied (CAT 1, 2, 3 – 50 marks & ESE – 100 marks)

20FTO04 - PROCESSING OF FRUITS AND VEGETABLES
(Offered by Department of Food Technology)

Programme & Branch	All BE/BTech Engineering & Technology branches except Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	OE	3	0	2	4

Preamble	To provide the outline about physiology, post harvest changes, preservation and processing of various fruits and vegetables products	
Unit - I	Physiology and post harvest changes of fruits and vegetables:	9
Scope of Fruits and Vegetables Processing Industry in India and World-present status. Classification of Fruits and Vegetables, Physiological Development, Harvesting methods, Postharvest changes of fruits and vegetables, Methods of reducing post harvest changes.		
Unit - II	Preprocessing Operations and Storage Methods:	9
Precooling, Evaporative Cooling, Washing, Peeling, Grading, Blanching. Storage methods: Storage of fruit and vegetables - under ambient conditions, low temperature storage.		
Unit - III	Preservation of Fruits and Vegetables products:	9
Chilling, Freezing, Pasteurization, Sterilization, Irradiation, Waxing, Edible coating, Controlled Atmospheric Storage (CAS), Modified Atmospheric Storage (MAS).		
Unit - IV	Fruit beverages:	9
Classification of fruit beverages, Juice, Squash, cordial, Juice concentrate, nectar, Ready to Serve (RTS). Fermented fruit beverages – Wine, vinegar production. Juice making equipment.		
Unit - V	Processing of fruits and vegetables products:	9
Production of Intermediate Moisture Foods (IMF) - jam, jellies and marmalades, Defects in Jam and Jelly. Candied preserve, fruit bar, tutti fruity, fruit powder, Fermented vegetables products – Pickle, sauerkraut.		

List of Exercises / Experiments:

1.	Studies on blanching treatment on the fruits and vegetables
2.	Determination and comparison of peeling efficiency of different peeling methods
3.	Studies on waxing /edible coating of fruits and vegetables
4.	Preparation and analysis of squash
5.	Determination of juice extraction efficiency of screw press and pulper
6.	Preparation of jam and comparison with commercial product
7.	Preparation of jelly
8.	Preparation of fruit bar
9.	Preparation and study on characteristics of sauce.
10.	Preparation and analysis of fruit powder

Lecture: 45, Practical:30, Total:75

TEXT BOOK:

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	interpret physiological and post harvest changes in fruits and vegetables	Understanding (K2)
CO2	select suitable storage and pre processing for fruits and vegetables	Applying (K3)
CO3	choose suitable preservation techniques employed for fruits and vegetables	Applying (K3)
CO4	make use of techniques to process different fruit beverages	Applying (K3)
CO5	develop various fruits and vegetable products	Applying (K3)
CO6	interpret the changes of fruits and vegetables upon blanching	Analyzing (K4), Manipulation (S2)
CO7	assess the performance of fruit processing equipments	Evaluating (K5), Precision (S3)
CO8	prepare and evaluate the characteristics of fruit/ vegetable based products	Evaluating (K5), Precision (S3)

Mapping of COs with POs and PSOs

20FTO05 - PRINCIPLES OF FOOD SAFETY
(Offered by Department of Food Technology)

Programme & Branch	All BE/BTech Engineering & Technology branches except Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	6	OE	3	0	0	3

Preamble	To give insight on food hazards, safety aspect in food processing and regulations on food safety.	
Unit - I	Introduction:	9
Food safety- Definition; General principles of food safety. Need for food safety; Characterization of food hazards - physical, chemical and biological. Food spoilage and food borne infection hazards-sources of food spoilage and microorganisms- microbial problems in food safety-food toxicants and food poisoning – prevention. Cross contamination.		
Unit - II	Physical and Chemical food hazard :	9
Metals, mineral (soil, engine oil, stones), plant (leaves, twigs, pods and skins), animal (hair, bone, excreta, blood, insects, larvae).Major pathways by which chemical residues and contaminants enter the food chain, Agrochemicals and veterinary drugs, packaging materials, process equipment and ingredient impurities. Food Adulterants, Food additives- permissible limits, concept of safe food.		
Unit - III	Safety operations in Food processing :	9
Plant Sanitation- Sanitizers, Cleaning chemistry CIP, Sanitation equipment. Personal hygiene, Good Manufacturing Practices: Prerequisites for Food Safety. HACCP-Concepts, implementation. Safety and Innovative Food Packaging. The Principles of Modern Food Hygiene.		
Unit - IV	Safety Aspects of Water:	9
Safety aspects of drinking water (microbiological and chemical) - the epidemiological triangle diseases caused by drinking of contaminated water , risks and advantages of chlorination of water ,bottled water - origin of water- nutritional and physiological aspect – setting of guideline values (microbiological and chemical), Regulations for bottled water.		
Unit - V	Food Safety Regulations:	9
History of Food Safety Regulation. Food safety and Standards Act (FSSAI) – organizational chart – role of individual authority – principles to be followed - Enforcement of the act – Licensing and registration of food business – Food safety officer and their powers. Food safety Management Systems.

20FTO06 - FUNDAMENTALS OF FOOD PACKAGING AND STORAGE
(Offered by Department of Food Technology)

Programme & Branch	All BE/BTech Engineering & Technology branches except Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	6	OE	3	0	0	3

Preamble	To provide the knowledge about food packaging materials, methods and food storage practices	
Unit - I	Food Packaging Materials:	9
Definitions and basic functions of a food package. Role of packaging. Packaging materials and their types - Paper-based packaging, Metal packaging, Glass containers, Plastics, Natural materials. Food package design and development.		
Unit - II	Food Packaging Closures and sealing systems:	9
Closures – functions, construction, types. Heat Sealing – Conductance, Impulse, Dielectric, Induction, Ultrasonic, Hot-Wire and Hot-Knife Sealing. Peelable Seals - Adhesive, Cohesive and Delamination Peels, Heat Seal Coatings, Nano composite Heat Sealants. Cold Seals. Packaging operations - bottling, canning, wrapping, cartooning, form fill sealing.		
Unit - III	Packaging materials performance:	9
Physical and physico-chemical processes affecting product quality, migration from packaging to foods. Logistics activity - specific and integration issues. Distribution performance testing. Package standards and regulation. Printing Processes, Inks, Adhesives and Labeling of Packaging Materials. Bar coding.		
Unit - IV	Grain storage engineering:	9
Storage of grains – biochemical changes during storage – production, distribution and storage capacity – ecology, storage factors affecting losses, storage requirements, bag and bulk storage – rat proof godowns and rodent control –method of stacking – preventive method, bio-engineering properties of stored products – function		
Unit - V	Cold, MA & CA Storages:	9
Cold storage, Controlled and Modified atmosphere storage Cold storage, Controlled and Modified atmosphere storage – effects of nitrogen, oxygen, and carbon dioxide on storage of durable and perishable commodities Determination of cooling load.

20FTO07 - FOOD INGREDIENTS
(Offered by Department of Food Technology)

Programme & Branch	All BE/BTech Engineering & Technology branches except Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	8	OE	3	0	0	3

Preamble	To provide the knowledge about the different types of food ingredients used in food products	
Unit - I	Macro Nutrients:	9
Introduction to Macronutrients: Carbohydrates: classification - chemical composition and structure properties, nutritive roles – Important carbohydrates as ingredients in food application. Protein and Amino acids: classification, essential amino acids- protein structure, properties and application. Lipids: Classification – Nutritive importance- properties and food applications.		
Unit - II	Food: Additives-I:	9
Food: Additives-I: Definition, need and classification of food additives. Sweeteners: Classification- Artificial sweeteners & Non-nutritive sweeteners; Health implications; Role in food processing. Stabilizers, Thickeners and Emulsifiers: Introduction; types; applications in food processing; leavening agents, flour improving agents. Anti-caking agents and Humectants: Introduction; Types; Role in food processing.		
Unit - III	Food Additives-II:	9
Food Additives-II: Acidulants - Introduction; types; Role in food processing. Preservatives: Introduction; Classification- Natural & chemical preservatives; Mode of action; Role in Food processing. Antioxidants: Introduction; Types of antioxidants -natural & synthetic; Mode of action in foods; Chelating agents- Naturally & synthetic; Mode of action in foods; Applications of antioxidants and chelating agents. Antimicrobial Agents: Classification- Role- application in foods.		
Unit - IV	Food Colorant and Flavorant:	9
Food colorants: Introduction; Natural & Synthetic food colorants; classification- Chemical nature; Impact on health- legal aspects- application in foods processing. Flavoring agents: Introduction; Classification of flavors- natural & synthetic; flavor enhancer/potentiator; Importance of taste and flavours; Role of flavoring agents in food processing.		
Unit - V	Nutraceuticals and phytochemicals:	9
Nutraceuticals and phytochemicals: Definition, Classification. Dietary supplements, Functional foods - their legislation and health claims, Natural occurrence of certain phytochemicals. Antioxidants, flavonoids, omega –3 fatty acids, carotenoids, dietary fiber, phytoestrogens; Nutraceuticals for effective control of disease. Role of nutraceuticals on health. Safety, adverse effect and interactions of nutraceuticals.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	classify macro nutrients and infer their nature	Understanding (K2)
CO2	apply the food additives to improve the quality of food product	Applying (K3)
CO3	choose the food additives to improve the shelf life of food product	Applying (K3)
CO4	select the food colors and flavors to improve the acceptability of the food product	Applying (K3)
CO5	summarize various functional foods and nutraceuticals	Understanding (K2)

Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO3	3	2	1			1						1		
CO4	3	2	2			1						1		
CO5	3	2	2			2						2		
1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy														

ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	20	50	30				100
CAT2	20	30	50				100
CAT3	20	40	40				100
ESE	25	35	40				100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

20FTO08 - FOOD AND NUTRITION
(Offered by Department of Food Technology)

Programme & Branch	All BE/BTech Engineering & Technology branches except Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	8	OE	3	0	0	3

Preamble	To impart knowledge on importance of nutrients and its assimilation, energy in human nutrition and nutrition during life cycle.	
Unit - I	Introduction to Food and Nutrition:	9
Definition, six classes of nutrients, RDA-General Principles of Deriving RDA, Reference Body Weights of Indians, Reference Person, Recommended Dietary Allowances for Indians, Uses and limitations of RDA. Nutritional status and its assessment, Malnutrition – over nutrition and under nutrition, deficiency disease. Functions of food, Functions of Nutrients, Balanced diet.		
Unit - II	Digestion, absorption and Transport of Carbohydrates :	9
Basic concept: Digestion in mouth, stomach, pancreas, bile, intestine. Digestion, absorption and transport of carbohydrates, lactose intolerance; Glycemic and Non-glycemic carbohydrates, recommendations of sugar intake for health, health effects of dietary fiber, artificial sweeteners.		
Unit - III	Digestion, absorption and Transport of Lipids and Proteins:	9
Food Sources, Lipid digestion, absorption and transport; Functions of the triglycerides; essential fatty acids - ω -3 and ω -6 fatty acids; trans fatty acids, Health effects and recommended intakes of lipids. Digestion and absorption of proteins; Functions of proteins; amino acids; Protein quality, methods of assessing protein quality; Recommended intakes of proteins.		
Unit - IV	Energy in Human nutrition:	9
Energy and its unit, Energy Balance, Assessment of Energy Requirements—deficiency and excess, Determination of Energy in food, BMR. and its regulation, specific dynamic action of foods, Obesity and BMI calculations..		
Unit - V	Nutrition during life cycle:	9
Factors to be considered in meal/menu planning. Pregnancy -Nutritional requirements and modification of existing diet and supplementation, Lactation - nutritional requirements, breast feeding, infant formula, Infancy - nutritional requirements. Introduction of supplementary foods. Nutritional needs of toddlers, preschool, school going children- and adolescents - Dietary management. Geriatric Nutrition - Factors affecting food intake and nutrients use, nutrient needs.

**20GEO01 – GERMAN LANGUAGE LEVEL 1**

(Offered by Department of Electronics and Communication Engineering)

Programme& Branch	All BE/BTech Engineering and Technology Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Basics of Language	4,5,6,8	HS	4	0	0	4

Preamble	To acquire the vocabulary as per the Common European framework of German language A1 level competence. This course will help to assimilate the basic grammar structures and gain vocabulary to understand and reciprocate in daily life situations on a broader sense. A thorough learner will be able to gain a comprehensive understanding of the German grammar and confidently articulate in day today situations.						
----------	--	--	--	--	--	--	--

Unit - I	Contacts (Kontakte):	12
----------	----------------------	----

Understanding Letters, simple instructions, speaking about language learning, finding specific information in text, Acknowledging the theme and understanding conversations, Making appointments. Grammar – Preposition with Dative, Articles in Dative and Accusative possessive articles.

Unit - II	Accommodation (Die Wohnung):	12
-----------	------------------------------	----

Understanding Accommodation advertisements, describing accommodation and directions, responding to an invitation, Expressing feelings, Colours. Grammar – Adjective with to be verb, Adjective with *sehr/zu*, Adjective with Accusative, prepositions with Dative

Unit - III	Working Environment Communication (ArbeitenSie):	12
------------	--	----

Daily Schedule, speaking about past, understanding Job openings advertisements, Opinions, Telephonic conversations, Speaking about Jobs. Grammar – Perfect tense, Participle II – regular and irregular verbs, Conjunctions – *und, oder, aber*.

Unit - IV	Clothes and Style (Kleidung und mode) :	12
-----------	---	----

Clothes, Chats on shopping clothes, reporting on past, Orienting oneself in Supermarkets, Information and research about Berlin. Grammar – Interrogative articles and Demonstrative articles, Partizip II – separable and non-separable verbs, Personal pronouns in Dative, Verbs with Dative.

Unit - V	Health and Vacation (Gesundheit und Urlaub):	12
----------	--	----

Personal information, Human Body parts, Sports, Understanding instructions and prompts, health tips. Grammar – Imperative with *du/Ihr*, Modal verbs – *sollen, müssen, nichtdürfen, dürfen*. Suggestions for travel, Path, Postcards, weather, Travel reports, Problems in hotel, Tourist destinations. Grammar – Pronoun: *man*, Question words – *Wer, Wen, Was, Wem*, Adverbs – *Zuerst, dann, Später, ZumSchl*

**20GEO02 – JAPANESE LANGUAGE LEVEL 1**

(Offered by Department of Electronics and Communication Engineering)

Programme& Branch	All BE/BTech Engineering & Technology Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Basics of Language	4/5/6/8	HS	4	0	0	4

Preamble	To understand the basics of Japanese language which provides understanding of Hiragana, Katakana and 110 Kanjis and provides the ability to understand basic conversations and also enables one to request other person and also understand Casual form	
Unit - I	Introduction to groups of verbs:	12
tai form-Verb groups-te form-Give and ask permission to do an action-Present continuous form-Restrict other person from doing an action-nouns-Basic Questions		
Unit - II	Introduction to Casual Form:	12
nai form-Dictionary form-ta form-Polite style and Casual style differences-Conversation in plain style-Place of usage of Polite style and Casual style		
Unit - III	Express opinions and thoughts:	12
Introduction to new particle-Express someone one's thought-Convey the message of one person to another-Ask someone if something is right -Noun modifications		
Unit - IV	Introduction to If clause and Kanjis:	12
If clause tara form-Express gratitude for an action done by other person-Hypothetical situation-Particles to use in case of Motion verbs-110 Kanjis		
Unit - V	Introduction to Counters:	12
How to use numbers-How to use quantifiers-Past form of adjectives and Nouns-Way to say preference-Way of expression degrees of an action-Other necessary particles-How to use numbers-How to use quantifiers-Past form of adjectives

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

Programme & Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Problem Solving and Programming	6	OE	3	0	0	3

Preamble	In this course, systematic process of thinking which empowers even the most traditional thinker to develop new, innovative solutions to the problem at hand are studied with an emphasis on bringing ideas to life based on how real users think, feel and behave.	
Unit - I	Introduction::	9
Introduction – Need for design thinking – Design and Business – The Design Process – Design Brief –Visualization – Four Questions, Ten Tools – Explore – STEEP Analysis – Strategic Priorities – Activity System – Stakeholder Mapping – Opportunity Framing.		
Unit - II	Visualization:	9
Introduction – Visualization – Journey Mapping – Value Chain Analysis – Mind Mapping – Empathize –Observations – Need Finding – User Personas.		
Unit - III	Brainstorming:	9
Introduction – Brainstorming – Concept Development – Experiment – Ideation – Prototyping – Idea Refinement.		
Unit - IV	Assumption Testing:	9
Introduction – Assumption Testing – Rapid Prototyping – Engage – Storyboarding.		
Unit - V	Customer Co-Creation Learning Launch:	9
Introduction – Customer Co-Creation Learning Launch – Leading Growth and Innovation – Evolve– Concept Synthesis – Strategic Requirements – Evolved Activity Systems – Quick Wins.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	outline the basic concepts of design thinking	Understanding (K2)
CO2	make use of the mind mapping process for designing any system	Applying (K3)
CO3	develop many creative ideas through structured brainstorming sessions.	Applying (K3)
CO4	develop rapid prototypes to bring the ideas into reality	Applying (K3)
CO5	plan the implementation of the any system considering the real time feedback	Applying (K3)

**20GEO04 - INNOVATION AND BUSINESS MODEL DEVELOPMENT**

(Offered by Department of Mechatronics Engineering)

Programme & Branch	All BE/BTech Engineering and Technology Branches	Sem.	Category	L	T	P	Credit
Prerequisites	NIL	8	OE	3	0	0	3

Preamble	This course will inspire the students to think innovation concepts and ideas for business model developments.	
Unit - I	Innovation and Design Thinking:	9
Innovation and Creativity– Types of innovation – challenges in innovation- steps in innovation management- 7 concerns of design. Design Thinking and Entrepreneurship – Design Thinking Stages: Empathize – Define – Ideate – Prototype – Test. Design thinking tools: Analogies – Brainstorming – Mind mapping		
Unit - II	User Study and Contextual Enquiry:	9
Explanatory research – primary and secondary data – classification of secondary data – sources of secondary data – qualitative research – focus groups – depth interviews – analysis of qualitative data – survey methods – observations- Process of identifying customer needs – organize needs into a hierarchy –establish relative importance of the needs- Establish target specifications		
Unit - III	Product Design:	9
Techniques and tools for concept generation, concept evaluation – Product architecture –Minimum Viable Product (MVP)- Product prototyping – tools and techniques– overview of processes and materials – evaluation tools and techniques for user-product interaction		
Unit - IV	Business Model Canvas (BMC):	9
Lean Canvas and BMC - difference and building blocks- BMC: Patterns – Design – Strategy – Process–Business model failures: Reasons and remedies		
Unit - V	IPR and Commercialization:	9
Need for Intellectual Property- Basic concepts - Different Types of IPs: Copy Rights, Trademarks, Patents, Geographical Indications, Trade Secrets and Industrial Design– Patent Licensing - Technology Commercialization – Innovation Marketing

ESE	25	75					100

* $\pm 3\%$ may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

Programme & Branch	All BE/BTech Engineering and Technology Branches	Sem.	Category	L	T	P	Credit
Prerequisites	German Language Level 2	4/5/6/8	HS	3	0	0	3

Preamble	This course provides enriching information about various everyday situations in personal and professional life and enhances the vocabulary and speaking ability to respond to and also seek information in those situations. It also equips one to express opinions and negotiate appointments. With diligent learning one can capture all basic grammatical structure to answer confidently in everyday situations.	
Unit - I	All about food (Rund Ums Essen):	9
Understand information about person, Speak about food, Introduce self and others, Understand and explain a picture base story, To justify something, To speak about feelings, To express opinions, To answer questions on a text, To describe a restaurant. Grammar: Possessive Articles in Dative, Yes/No questions, Reflexive verbs, Sentence with 'weil'		
Unit - II	School days (Nach der Schulzeit):	9
Understand School reports, Speak and write comments about schooldays, To speak about habits, Understand and provide City-Tipps, To Understand School types in Germany and speak about it. Grammar: Modal verbs in Past tense, Positional Verbs, Two-way prepositions in Dativ and Akkusativ.		
Unit - III	Media in everyday life (Medien in Alltag):	9
To speak about advantages and disadvantages of Media, formulate comparisons, Express your own opinion, Talk about Movies, Understand and Write Movie reviews. Grammar: Comparative degree, Comparative Sentences with 'Als' and 'Wie', Subordinate clause with 'dass', Superlative degree.		
Unit - IV	Feelings and expressions (Gefühle):	9
Express thanks and congratulations, Talk about feelings, To understand information about festivals and speak about it, To describe a city, Express joy and regrets, Understand and write Blog entries, Write appropriate heading. Grammar: Subordinate Clause with 'Wenn', Adjectives to be used along with definite articles.		
Unit - V	Profession and Travel (Beruf und Reisen):	9
To have a conversation at ticket counter, To talk about leisure activities, To gather information from Texts, Introduce people, Express career preferences, Ideate the dream job, To prepare and make telephone calls, To understand text about Workplace. Ask for information, Express uncertainty, Understand and give directions, Understand a newspaper article, Say your own opinion, Talk about the way to work, Describe a statistic, Understand information about a trip, Talk about travel. Grammar: Adjective to be used along with indefinite articles, Prepositions, verb – 'werden', Subordinate clause – indirect questions, All units will include elements for reading, writing, speaking and listening.

Prerequisites	Fundamentals of French Language	5/6/7/8	HS	3	1	0	4

Preamble	This course is designed to assist students in developing vocabulary in accordance with the Common European Framework of Reference for Languages at the A2 level. This course will aid in the integration of basic grammar structures as well as the acquisition of vocabulary necessary to comprehend and respond in everyday circumstances. The learner will be able to develop a thorough comprehension of French grammar and confidently express themselves in everyday circumstances.						
----------	---	--	--	--	--	--	--

Unit - I	French and You:	12
-----------------	------------------------	-----------

Habits, Strengths & Weakness, Recommendations, Sentiments, Motivations, about favorite films and Types of screens in the movie world, Verbs (Regulars and irregulars), Reflexive Verbs, Prepositions

Unit - II	Eat and Repeat:	12
------------------	------------------------	-----------

Favorite foods, Recopies, Types of meals, Describing House and Kitchen, Presentation of the recipe, Comparatives, Possessive pronouns, Present continuous tense, Simple conditional form

Unit - III	Vacation:	12
-------------------	------------------	-----------

Invitations, presentation, Greetings, Goodbyes, Activities on vacation, past experiences, Describing favorite place, Recommendations on various tours, Past perfect, Past imperfect tense

Unit - IV	Likes and Views:	12
------------------	-------------------------	-----------

Favorite persons & things, Giving advice, Experience, Moods, Illness, Discomforts, Symptoms, Roleplay (Doctor & Patient, Guide & Tourist, Pharmacist & Patient), Past perfect, Past indefinite, Imperative

Unit - V	Then and Now:	12
-----------------	----------------------	-----------

Habits, customs, circumstances of the past and present, Debates on past and present situations and feelings. Past imperfect tense, Past perfect and Present comparatives.

ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	75	25					100
CAT2	25	75					100
CAT3	25	75					100
ESE	25	75					100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

20GEO15 - FRENCH LANGUAGE LEVEL 3

Programme& Branch	All Engineering courses	Sem.	Category	L	T	P	Credit
Prerequisites	Fundamentals of French Language	5/6/7/8	HS	3	0	0	3

Preamble	This course gives knowledge regarding a variety of personal and professional circumstances, as well as improving vocabulary and speaking abilities to reply to and seek information in those settings. It also gives you the ability to articulate yourself and arrange appointments. With perseverance, one can master all of the essential grammatical structures needed to respond confidently in everyday circumstances. It almost gives you an idea of how Natives communicate.	
Unit - I	Start Over:	9
Use of periphrases, Discuss a day in life, work, problems in the world, Predictions about the future (actions and situations), Hypothetical situations, Imperfect and future tense.		
Unit - II	Prohibitions and More:	9
Prohibitions, Obligations, Habits to change, social customs, Use of the subjunctive, Describe synopsis of Movie and its relation to real life, Debate on books vs movies, usage of connectors, Object Direct and Indirect.		
Unit - III	Let's be Creative:	9
Write a letter by describing the problem, talk about desires and Necessities, propose solutions, Recommendations and Suggestions, Create an Advertisement, Give Instructions, Imperative negative, Use of Object Direct, and Indirect.		
Unit - IV	Travel and Communication:	9
Talk about Tours, Types of tourism and communication, Send messages, petitions, Talk to people on the telephone, Roleplay (Tourists and Guide, Tourists and Travel agents), Past Pluscumperfect, All Past tenses.		
Unit - V	Let's Talk:	9
Expression of Interests, Sentiments, Feelings, Sensations, Manias etc. Certain suggestions to make a better future, the use of superlatives, Exclamatory phrases, subjunctives.

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

Programme & Branch	All Engineering and Technology Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Fundamentals of Spanish Language	5/6/7/8	HS	3	1	0	4

Preamble	This course provides a foundation of the Spanish language as well as an understanding of the Spanish culture and lifestyle of Spain and other Spanish-speaking nations. The student will be learning how to introduce him/herself and acquire basic everyday vocabulary. By following the structured curriculum and practicing the same as per the learning process, one can comprehend the structure of sentences and respond to basic communications.	
Unit - I	Greetings and Good byes (Los Saludos y Despedirse):	12
Greetings,Self-Introduction , Formal and Informal ways of introducing oneself and others, Alphabets& Numbers, Countries and Languages Spoken, Parts of Grammar – Noun, Personal Pronoun, Describe surroundings and its vocabulary		
Unit - II	Vida Cotidiana (Daily Life):	12
Time of the day, Days of the week, Months of the year, Seasons, Verb (To be, To Have), Adverbs, Likes and Dislikes, Personality and physical description, simple sentences		
Unit - III	Friends and Family (Amigos y La Familia):	12
Vocabulary of family, Animals, Professions, Parts of the body, Opinions on family cultures, Articles – Definite and Indefinite, Hobbies, Regular and Irregular verbs.		
Unit - IV	In the City (En la Ciudad):	12
Buildings in the city, Name of the places, asking for directions, Helping each other, Description of house and its components, Modes of Transport, Grammar - Possessive articles, prepositions		
Unit - V	Food and Culture(La comida y cultura):	12
Food (types and varieties) , shopping, ordering at a restaurant, inviting to parties, Roleplay (as diner and customer, salesman and customer...etc.) Past tense (all three tenses-Past Participle, Indefinite past and past imperfect- (to be and to have)

20GEO17 - SPANISH LANGUAGE LEVEL 2

Programme & Branch	All Engineering and Technology Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Fundamentals of Spanish Language	5/6/7/8	HS	3	1	0	4

Preamble	This course aims to help the Learner to acquire the vocabulary as per the framework of Spanish language A2 level competence. This course will help to assimilate the basic grammar structures and gain vocabulary to understand and reciprocate in daily life situations on a broader sense. A thorough learner will be able to gain a comprehensive understanding of the Spanish grammar and confidently articulate in day today situations.	
Unit - I	Spanish and You (El Español y tú):	12
Habits, Strengths & Weakness, Recommendations, Sentiments, Motivations, About favorite films and Types of screens in the movie world, Verbs(Regulars and irregulars), Reflexive Verbs, Prepositions		
Unit - II	Eat and Repeat (Comer y repetir):	12
Favorite foods, Recipies, Types of meals, Describing House and Kitchen, Presentation of recipe, Comparatives, Possessive pronouns, Present continuous tense, Simple conditional form		
Unit - III	Its Vacation Time (Tiempo de vacaciones):	12
Invitations, presentation, Greetings, Goodbyes, Activities on vacation, past experiences, Describing favorite place, Recommendations on various tours, Past perfect, Past imperfect tense, Usage of Todavía or No		
Unit - IV	Likes and Views (Gustasyvistas):	12
Favorite persons & things, Giving advices, Experience, Moods, Illness, Discomforts, Symptoms, Roleplay (Doctor & Patient, Guide & Tourist, Pharmacist & Patient), Past perfect, Past indefinite, Imperative		
Unit - V	Then and Now(Antes y Ahora):	12
Habits, customs, circumstances of the past and present, Debates on past and present situations and feelings. Past imperfect tense, Past perfect and Present comparatives.

**20GEO18 - SPANISH LANGUAGE LEVEL 3**

Programme & Branch	All Engineering and Technology Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Fundamentals of Spanish Language	5/6/7/8	HS	3	0	0	3

Preamble	This course provides enriching information about various everyday situations in personal and professional life and enhances the vocabulary and speaking ability to respond to and also seek information in those situations. It also equips one to express opinions and negotiate appointments. With diligent learning one can capture all basic grammatical structure to answer confidently in everyday situations. It almost gives a basic idea on how Natives speak.	
Unit - I	Start Over(Volver a Empezar):	9
Use of periphrases, Discuss a day in life, work, problems in the world, Predictions about future (actions and situations),Hypothetical situations, Imperfect and future tense.		
Unit - II	Prohibitions and More(Prohibiciones y mas):	9
Prohibitions, Obligations, Habits to change, social customs, Use of subjunctive, Describe synopsis of Movie and its relation to real life, Debate on books vs movies, usage of connectors, Object Direct and Indirect.		
Unit - III	Let's be Creative (Seamos creatives):	9
Write a letter by describing the problem,talk about desires and Necessities, propose solutions, Recommendations and Suggestions, Create an Advertisement, Give Instructions, Imperative negative, Use of Object Direct and Indirect.		
Unit - IV	Travel and Communication (Viajar y comunicar):	9
Talk about Tours, Types of tourism and communication, Send messages, petitions, Talk to people on telephone, Role play(Tourists and Guide, Tourists and Travel agents), Past Pluscumperfect, All Past tenses.		
Unit - V	Let's Talk(Hablemos):	9
Expression of Interests, Sentiments, Feelings, Sensations, Manias etc. Certain suggestions to make a better future, use of superlatives, Exclamatory phrases, subjunctive.

Programme & Branch	All BE/BTech Engineering and Technology Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Economics and Management for Engineers	6	EC	3	0	0	3

Preamble	The purpose of this course to create entrepreneurial awareness among engineering students.	
Unit - I	Entrepreneurship Concepts:	9
Entrepreneurship & Entrepreneur- Role in Economic Development - Factors affecting Entrepreneurship- Creativity and Innovation - Entrepreneurship vs Intrapreneurship- Entrepreneurial Motivation factors – Types of Entrepreneurship & Entrepreneurs - Characteristics of Entrepreneurs - Entrepreneurship Development in India		
Unit - II	Entrepreneurial Ventures and opportunity assessment:	9
New venture creation – Bootstrapping, Minipreneurship, Start-ups, Acquiring, Franchising & Social venturing - Venture development stages - Models of market opportunity- Opportunity assessment: Critical Factors In Opportunity Assessment, Idea vs Opportunity, Evaluation process, Global opportunities for entrepreneurs.		
Unit - III	Business Plan:	9
Designing Business Model- Business Model Canvas- Objectives of a Business Plan - Business Planning Process – Structure of a Business Plan – Technical, Marketing, Financial Feasibility assessment - Competitive analysis - Common errors in Business Plan formulation - Presentation of the Business Plan: The ‘Pitch’- case studies		
Unit - IV	Financing and accounting:	9
Forms of entrepreneurial capital – Sources of Financial capital: debt financing- Commercial banks and other sources, equity financing: Initial Public offering (IPO), Private placement - Venture capitalists - Angel investors-New forms of financing: Impact investors, Micro-financing, Peer-to-Peer Lending, Crowd funding - Natural capital. Preparing Financial Budget, Break even analysis, Taxation-Direct and indirect taxes, Insolvency and Bankruptcy.		
Unit - V	Small Business Management:	9
Definition of Small Scale Industries: Strengths and Weaknesses, Sickness in Small Enterprises: Symptoms -Causes and remedies- Indian Startup Ecosystem – Institutions supporting small business enterprises, Business Incubators – Government Policy for Small Scale Enterprises - Growth Strategies in small industry – Expansion, Diversification, Joint Venture, Merger, FDI and Sub-Contracting

20MAO01 - MATHEMATICAL FOUNDATIONS FOR MACHINE LEARNING
(Common to all Engineering and Technology Branches)

Programme & Branch	All Engineering and Technology branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	4	OE	3	1	0	4

Preamble	To impart the basic knowledge in linear algebra, decomposition of matrices, continuous optimization, linear regression and support vector machines which provide the foundations for machine learning and deep learning.	
Unit - I	Vector Spaces:	9+3
Definition – Subspaces – Linear dependence and independence – Basis and dimension – Row space, Column space and Null Space – Rank and nullity.		
Unit - II	Linear Transformations:	9+3
Introduction – Kernel and range – Matrices of linear transformations – Change of basis – Rank and nullity.		
Unit - III	Inner Product Spaces:	9+3
Norms – Inner products – Length and Distance – Angle and Orthogonality – Orthonormal Basis – Gram-Schmidt Process – QR-Decomposition – Orthogonal Projection – Rotations.		
Unit - IV	Matrix Decomposition and Continuous Optimization:	9+3
Matrix Decomposition: Cholesky decomposition – Singular Value Decomposition. Continuous Optimization: Introduction – Unconstrained Optimization – Gradient Descent method – Constrained Optimization – Lagrange Multipliers method – Convex Optimization.		
Unit - V	Linear regression and Support Vector Machines:	9+3
Linear Regression: Parameter Estimation – Maximum Likelihood estimation – Bayesian linear regression. Support Vector Machines: Introduction – Linear and Non-linear Support vector machine – Margin and support vectors – Hard and Soft margins in Support vector machines – Kernels – Primal support vector machine – Dual support vector machine.

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

20MAO02 - GRAPH THEORY AND ITS APPLICATIONS
(Common to all Engineering and Technology branches)

Programme & Branch	All Engineering and Technology branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	4	OE	3	1	0	4

Preamble	To develop rigorous logical thinking and analytical skills by graph theoretic concepts which helps for solving real time engineering problems in networks, computer architecture, compiling techniques, model checking, artificial intelligence, software engineering, expert systems, software/hardware correctness problem.	
Unit - I	Graphs:	9+3
Introduction – Definition – Types of graphs – Degree of vertex – Walk, path and cycle – Isomorphism – Connected graph – Hamiltonian graph – Euler graph – Digraph – Representations of graphs: Adjacency matrix – Incidence matrix.		
Unit - II	Trees:	9+3
Introduction – Properties of trees – Pendant vertices in a tree – Distances and centers in a tree – Rooted and binary trees – Spanning tree – Construction of spanning tree: BFS algorithm – DFS algorithm – Finding all spanning trees of a graph – Fundamental circuits.		
Unit - III	Graph Coloring:	9+3
Introduction – Properties of trees – Pendant vertices in a tree – Distances and centers in a tree – Rooted and binary trees – Spanning tree – Construction of spanning tree: BFS algorithm – DFS algorithm – Finding all spanning trees of a graph – Fundamental circuits.		
Unit - IV	Network Flows and Applications:	9+3
Flows and cuts in networks - Max-flow Min-cut Theorem – Transport networks –Residual capacity and Residual network – Ford-Fulkerson Algorithm – Edmonds-Karp Algorithm – Maximal Flow Applications: Multiple sources and sinks – Maximum Bipartite matching.		
Unit - V	Graph Theoretic Algorithms:	9+3
Shortest paths – Shortest path algorithms: Dijkstra's algorithm – Warshall's algorithm – The Chinese Postman Problem – Fleury's Algorithm – Travelling salesman problem – Minimum Spanning tree – Minimal spanning tree algorithms: Prim's algorithm – Krushkal's algorithm – Optimal assignment – Kuhn and Munkres algorithm.

3.	J.A.Bondy and U.S.R. Murty, "Graph Theory and Applications", 5 th Edition, Elsevier Science Publishing Co., Inc., New York, 1982.

COURSE OUTCOMES:		BT Mapped (Highest Level)
On completion of the course, the students will be able to		
CO1	understand basic graph theoretic concepts.	Understanding (K2)
CO2	intrepret the concepts the concepts of tress and its types.	Applying (K3)
CO3	compute the Chromatic partition, Chromatic polynomial and Matching of a given graph.	Applying (K3)
CO4	identify the maximal flow in network by means of algorithms.	Applying (K3)
CO5	apply various graph theoretic algorithms to communication and network problems	Applying (K3)

**20MAO03 - DATA ANALYTICS USING R PROGRAMMING**

(Common to all Engineering and Technology Branches)

Programme & Branch	All Engineering and Technology branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	6	OE	3	0	0	3

Preamble	To impart the basic knowledge in R and develop skills to apply the knowledge of R programming to statistical measures, data handling, probability, testing of hypothesis and design of experiments.	
Unit - I	Introduction to R:	9
Overview of R programming – Need for R – Installing R – Environment setup with R Studio – Packages: Installing packages – Running and manipulating packages – Basic objects: Vectors – Matrix – Array – Lists – Factors – Data frames.		
Unit - II	R Programming Structures and Functions:	9
Basic expressions: Arithmetic expressions – Control Statements: if and if-else statements — switch statement – Loops: for loop – while loop – Function: Creating a function – calling a function – Default value for function arguments – Logical functions – Math functions – Statistical functions – Apply-family functions – Getting started with strings – Formatting data and time.		
Unit - III	Descriptive Statistics:	9
Summary command – Summarizing samples – cumulative statistics – summary statistics for data frames – summary tables – Linear Modeling: Simple linear regression – Multiple regression – Curvilinear regression – Plotting linear models and curve fitting.		
Unit - IV	Working with data:	9
Reading and writing data: Text-format in a file – Excel worksheets – Native data files – built-in datasets. Visualizing data: Scatter plots – line plots – bar charts – pie charts – Cleveland dot charts –Histogram and density plots – Box-whisker plots.		
Unit - V	Probability Distributions, Testing of hypothesis and ANOVA:	9
Probability Distributions: Binomial Distribution – Poisson Distribution – Normal Distribution. Testing of Hypothesis and ANOVA: Student's t-test – Non-Parametric tests: Wilcoxon U-test – Paired t and U-tests – Correlation and covariance – Tests for association – Analysis of variance: One-way ANOVA – Two-way ANOVA.		

Total: 45**TEXT BOOK:**

1.	Kun Ren, "Learning R Programming", 1 st Edition, Packt Publishing Ltd, UK, 2016, for Units I, II.

3.	Paul Teetor, "R Cookbook", 1 st Edition, O'Reilly Media, USA, 2011.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	understand the basics of fundamentals of R.	Understanding (K2)
CO2	understand the concepts of decision, looping structures and functions.	Understanding (K2)
CO3	apply R programming to descriptive statistics.	Applying (K3)
CO4	apply the libraries for data manipulation and data visualization in R.	Applying (K3)
CO5	use R studio to identify the probability and test statistical hypothesis.	Applying (K3)

20MA004 - NUMBER THEORY AND CRYPTOGRAPHY
(Common to all Engineering and Technology branches)

Programme & Branch	All Engineering and Technology branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	6	OE	3	0	0	3

Preamble	To provide the skills for applying various number theoretic algorithms, congruences, primality tests in cryptography and network security and impart knowledge of basic cryptographic techniques.	
Unit - I	Divisibility Theory and Canonical Decompositions:	9
Division algorithm- Base-b representations – number patterns – Prime and composite numbers – Fibonacci and Lucas numbers – Fermat numbers – GCD – Euclidean Algorithm – Fundamental theorem of Arithmetic – LCM.		
Unit - II	Theory of Congruences:	9
Basic concepts – Properties of congruences – Linear congruences – Solution of congruences – Fermat's Little theorem – Euler's theorem – Chinese remainder theorem.		
Unit - III	Number Theoretic Functions:	9
Introduction – Functions τ and σ – Mobius function – Greatest integer function – Euler's Phi function – Euler's theorem – Properties of Euler's function – Applications to Cryptography.		
Unit - IV	Primality testing and Factorization:	9
Primality testing: Fermat's pseudo primality test – Solvay-Strassen test – Miller-Rabin test – Fibonacci test – Lucas test – Integer factorization: Trial division – Pollard's Rho method – Quadratic sieve method.		
Unit - V	Classical Cryptographic Techniques:	9
Introduction – Substitution techniques – Transposition techniques – Encryption and decryption – Symmetric and asymmetric key cryptography – Steganography.		

Total: 45

TEXT BOOK:

1.	Thomas Koshy, "Elementary Number Theory with Applications", 2 nd Edition, Academic Press, Elsevier, USA, 2007, for Units I,II,III.
2.	William Stallings, "Cryptography and Network Security: Principles and Practice", 7 th Edition, Pearson Education, New Delhi, 2019, for Units IV,V.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	understand the concepts of divisibility and canonical decompositions	Understanding (K2)
CO2	obtain the knowledge in theory of congruences and solution of linear congruences.	Understanding (K2)
CO3	use different number theoretic function suitably in cryptography.	Applying (K3)
CO4	apply Primality test and factorisation algorithms to network security problems.	Applying (K3)
CO5	apply the suitable cryptographic techniques to handle real time security issues.	Applying (K3)

Mapping of COs with POs and PSOs

20MA005 -ADVANCED LINEAR ALGEBRA
(Common to all Engineering and Technology branches)

Programme & Branch	All Engineering and Technology branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	8	OE	3	0	0	3

Preamble	To provide the skills for solving linear equations, decomposition of matrices and linear transformations in real time engineering problems and impart knowledge of vector spaces.	
Unit - I	Linear Equations:	9
System of linear equations – Row reduction and echelon forms – Vector equations – Matrix equations – Solution sets of linear systems – Applications of Linear systems: Matrix operations – inverse of a matrix, Matrix factorization – Applications to computer graphics.		
Unit - II	Vector Spaces:	9
Definition – Subspaces – Linear independence – Basis and dimension – Row space, Column space and Null Space – Rank and nullity.		
Unit - III	Inner Product Spaces:	9
Inner products – Angle and Orthogonality in inner product spaces – Orthonormal Bases – Gram-Schmidt Process – QR-Decomposition – Orthogonal Projection – Least square technique.		
Unit - IV	Linear Transformations:	9
General linear transformation – Kernel and range – Matrices of linear transformations – Change of basis – Rank and nullity.		
Unit - V	Quadratic form and Matrix Decomposition:	9
Quadratic forms – Quadratic surfaces – Hermitian, Unitary and Normal matrices – LU decomposition – Singular value decomposition.		

Total: 45

20MAO06 - OPTIMIZATION TECHNIQUES
(Common to all Engineering and Technology branches)

Programme & Branch	All Engineering and Technology branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	8	OE	3	0	0	3

Preamble	To provide the skills for solving the real time engineering problems involving linear and non-linear problems and also impart knowledge in project management and game theoretic concepts.	
Unit - I	Linear Programming:	9
Introduction – Formulation of Linear Programming Problem – Basic assumptions – Limitations of Linear Programming models – Standard form of LPP – Graphical Method – Simplex Method – Artificial variable techniques – Big M Method.		
Unit - II	Transportation and Assignment problems:	9
Transportation problem: Mathematical Formulation of Transportation Problem – Initial basic feasible solution – North West Corner Method – Least Cost Method – Vogel's approximation method – Optimal solution – MODI Method – Degeneracy – Unbalanced transportation problem – Maximization transportation problem. Assignment Problem: Mathematical model of Assignment problem – Hungarian Method – Unbalanced assignment problem.		
Unit - III	Theory of Games:	9
Two-person zero-sum game – Pure strategies - Game with mixed strategies – Rules of Dominance – Solution methods: Algebraic method – Matrix method – Graphical method.		
Unit - IV	Network Scheduling:	9
Basic Concept of network Scheduling – Construction of network diagram – Critical path method – Programme evaluation and review technique – Project crashing – Time-cost trade-off procedure.		
Unit - V	Non-Linear Programming:	9
Formulation of non-linear programming problem – Constrained optimization with equality constraints – Kuhn-Tucker conditions – Constrained optimization with inequality constraints.

20PHO01 - THIN FILM TECHNOLOGY
(Common to all Engineering and Technology branches)

Programme & Branch	All BE / BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	4	OE	3	1	0	4

Preamble	This course aims to impart the essential knowledge on deposition, characterization and application of thin films in various engineering fields, and also provides motivation towards innovations.	
Unit - I	Theories and models of thin film growth:	9+3
Introduction - Theories of thin film nucleation: Impingement, Adsorption and Thermal accommodation - The capillarity model - The atomistic models - Structural consequences of thin film nucleation - The four stages of film Growth - The incorporation of defects during growth.		
Unit - II	Vacuum technology:	9+3
Principle and working of vacuum pumps: Roots vacuum pump, Rotary pump, Diffusion pump, Turbo molecular pump, Cryogenic pump, Ion pump, Ti-sublimation pump - Measurement of Pressure: Bayet-Albert gauge, Pirani and Penning gauge - Cold cathode and hot cathode ionization gauges - Pressure controlling system (qualitative).		
Unit - III	Deposition of thin films - Physical methods:	9+3
Thermal evaporation – Electron beam evaporation – Pulsed laser deposition – Ion plating – DC sputtering – RF sputtering – Magnetron sputtering – Reactive sputtering - Molecular beam epitaxy - Demonstration of deposition of thin films by RF sputtering.		
Unit - IV	Deposition of thin films – Chemical methods:	9+3
Chemical vapor deposition – Sol-gel method - Chemical bath deposition - Hydro thermal methods – Electroplating deposition - Electroless deposition - Spray Pyrolysis - Spin coating.		
Unit - V	Characterization and Applications of thin films:	9+3
Characterization: X-ray diffraction, Energy dispersive X-ray analysis, Atomic probe microscopy, Scanning Tunneling Microscope, X-ray Photoemission Spectroscopy, UV-vis spectroscopy and Four probe resistivity – Applications (qualitative): Thin film solar cells, Thin film gas sensors, Thin films for information storage and Optical coatings.		

Lecture: 45, Tutorial: 15, Total: 60

TEXT BOOK:

3.	Chopra K. L, Thin Film Phenomena, Illustrated, McGraw Hill Inc., New York, 1969

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	Utilize the appropriate theory and models to comprehend the thin film growth process.	Applying (K3)
CO2	Apply the principle of vacuum pump to explain select methods to create vacuum and to make use of the principle of vacuum gauge to explain the measurement of vacuum by select methods.	Applying (K3)
CO3	Describe the deposition of thin films by select physical methods using the principle of working of respective methods.	Applying (K3)
CO4	Explain the deposition of thin films by select chemical methods using the principle of working of respective methods.	Applying (K3)
CO5	Make use of select characterization techniques to comprehend the properties of thin films and also to illustrate the various device applications of thin films.	Applying (K3)

20PH002- HIGH ENERGY STORAGE DEVICES
(Common to all Engineering and Technology branches)

Programme & Branch	All BE / BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	OE	3	1	0	4

Preamble	This course aims to impart the essential knowledge on the fundamental principles and application areas of proven technologies and materials for energy storage solutions, together with an overview of development trends in this engineering field.
----------	--

Unit - I	Introduction to Energy Storage:	9+3
-----------------	--	------------

An overview of energy storage systems (qualitative): Thermal Energy Storage, Mechanical Energy Storage, Chemical Energy Storage, Electrical Energy Storage, Electrochemical Energy Storage, Electrostatic Energy Storage, Magnetic Energy Storage and Optical Energy Storage – General criteria of energy storage systems - Conventional batteries: fundamentals and applications - Grid connected and Off grid energy storage systems and requirements.

Unit - II	Thermal storage and Mechanical Storage:	9+3
------------------	--	------------

Thermal storage: Thermal properties of materials, Principle of operations, Efficiency factors, Large scale and Medium scale operations - Merits and demerits of thermal storage system - Recent development in thermal storage systems. Mechanical Storage: Types of mechanical storage systems, Principle of operations, Emerging advances and technologies in mechanical storage systems - Flywheel.

Unit - III	Magnetic storage, Electro-optic and Optical storage:	9+3
-------------------	---	------------

Magnetic storage: Principle of operation, Emerging challenges and a review on devices and technology. Electro-optic and Optical storage: Principles of operation, Device fabrication, Emerging devices and Upcoming technologies.

Unit - IV	Electrochemical Storage:	9+3
------------------	---------------------------------	------------

Materials, Principle of Operation, Positive electrode materials, negative electrode materials, electrolytes. Li-ion batteries: Principle of operation, Battery components, design of Electrodes, Cell and battery fabrications - Building block cells - Battery modules and packs - Li-polymer batteries – Applications - Future developments: Sodium-battery, Magnesium battery, Aluminum battery and Silicon battery.

Unit - V	Fuel Cells, Hydrogen storage and Super capacitors:	9+3
-----------------	---	------------

Fuel Cells: Introduction to fuel cells, PEM (polymer electrolyte membrane), Hydrogen PEM fuel cell, Direct Methanol fuel cell, Alkaline fuel cells and Solid oxide fuel cells. Hydrogen storage systems: Solid state hydrogen storage tanks, Gas phase hydrogen storage tanks, Cryogenic hydrogen storage tanks, and Liquid phase hydrogen storage tanks. Super capacitors: Features of super capacitors, Basic principle of operation, Performance and technologies of super capacitors.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	Utilize the appropriate concepts and models to comprehend the basics of energy storage systems.	Applying (K3)
CO2	Apply the principle of thermal and mechanical storage systems to explain the working and the recent advancements in thermal and mechanical storage systems.	Applying (K3)
CO3	Utilize the principle of operation of magnetic storage systems, electro-optic and optical storage systems to illustrate the respective device fabrication techniques.	Applying (K3)
CO4	Explain the principle of operation of electrochemical storage device and materials used, and to elucidate the construction and working of various types of high energy storage batteries.	Applying (K3)
CO5	Make use of various techniques to construct different types of fuel cells and to explain the advanced techniques involved in hydrogen storage systems and also to explain the principle and working of super capacitors.	Applying (K3)

**20PH003 - STRUCTURAL AND OPTICAL CHARACTERIZATION OF MATERIALS**

(Common to all Engineering and Technology branches)

Programme & Branch	All BE / BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	6	OE	3	0	0	3

Preamble	This course aims to impart the essential knowledge on the characterization of materials using X-ray diffraction, Raman spectroscopy, UV-visible spectroscopy, Electron microscopy and Scanning tunneling microscopy and their application in various engineering fields, and also provides motivation towards innovations.	
Unit - I	Introduction to Characterization Techniques and X-Ray Diffraction:	9
Importance of materials characterization - Classification of characterization techniques - Crystalline materials - Reciprocal lattice - Theory of X-ray diffraction - Powder and Single crystal X-ray diffraction: Instrumentation (qualitative), XRD pattern, Systematic procedure for structure determination (qualitative), Crystallite size determination, Strain calculation - Applications of X ray diffraction measurements.		
Unit - II	Electron Microscopy:	9
Need of electron microscopy - Electron specimen interaction: Emission of secondary electrons, Backscattered electrons, Characteristic X-rays, Transmitted electrons, Specimen interaction volume - Resolution - Scanning electron microscope and Transmission electron microscope: Schematic diagram, Short details of each component and working – Field emission scanning electron microscope – Different types of filaments - Wavelength dispersive x-ray analysis – Three parameter equation for quantitative composition analysis.		
Unit - III	Scanning Tunneling Microscopy:	9
Introduction to quantum mechanical tunneling - Basic principles of scanning tunneling microscopy - Two modes of scanning - Interpreting scanning tunneling microscopic images -Applications of scanning tunneling microscopy.		
Unit - IV	Raman Spectroscopy:	9
Introduction – Pure rotational Raman spectra – Vibrational Raman spectra – Polarization of light and Raman effect – Structure determination – Instrumentation – Near-Infra-Red FT Raman Spectroscopy.		
Unit - V	Ultra Violet &Visible Spectroscopy:	9
Regions of UV-Visible radiation - Colour and light absorption - The chromophore concept - Beer's and Lambert's laws – Theory of electronic transition - Frank Condon principle – Instrumentation and Working of UV vis spectrometer - Applications of UV visible spectroscopy.

20CYO01 - INSTRUMENTAL METHODS OF ANALYSIS
(Common to all Engineering and Technology branches)

Programme & Branch	All BE / BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	4	OE	3	1	0	4

Preamble	Instrumental methods of analysis aim to prepare the students to have all-encompassing knowledge of spectral methods in order to identify the molecules and reaction mechanism for the process to enhance application towards the industries.	
Unit - I	Absorption and Emission Spectroscopy:	9+3
Basic concepts of Absorption and Emission Spectroscopy – representation of spectra – basic elements of practical spectroscopy – signal to noise ratio - techniques for signal to noise enhancement – resolving power – Fourier transform spectroscopy – evaluation of results – basic principles, instrumentation and applications of Atomic Absorption, Atomic Fluorescence and Atomic Emission Spectroscopy.		
Unit - II	IR, Raman, and NMR Spectroscopy:	9+3
Infrared spectroscopy – correlation of IR Spectra with molecular structure, instrumentation, samplings technique and quantitative analysis. Raman Spectroscopy – Classical and Quantum theory instrumentation, Structural analysis and quantitative analysis. Nuclear magnetic resonance spectroscopy – basic principles – pulsed Fourier transform NMR spectrometer – elucidation of NMR spectra and quantitative analysis.		
Unit - III	Surface Studies:	9+3
Surface Study – X-Ray Emission Spectroscopy (XES), X- Ray Photo Electron Spectroscopy (XPS) - Auger Emission Spectroscopy (AES) - Transmission Electron Microscopy (TEM) - Scanning Electron Microscopy (SEM) - Surface Tunneling Microscopy (STEM) - Atomic Force Microscopy (AFM).		
Unit - IV	Mass spectroscopy:	9+3
Mass spectroscopy – Ionization methods in mass spectroscopy – mass analyzer – ion collection systems - correlation of molecular spectra with molecular structure. Instrumentation design and application of Fourier transform mass spectroscopy (FT-MS) and Ion microprobe mass analyzer (IMMA).		
Unit - V	Thermal analysis:	9+3
Thermal analysis: principles and instrumentations and applications of thermogravimetry (TGA), Differential Thermal Analysis (DTA), Differential Scanning Calorimetry (DSC), evolved gas detection, thermo mechanical analysis and Thermometric titration.		

Lecture: 45, Tutorial: 15, Total: 60

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	illustrate the basics of spectroscopy to understand the instrumentation of various spectral techniques	Understanding (K2)
CO2	apply the IR, Raman and NMR for quantitative analysis of the sample.	Applying (K3)
CO3	apply the various techniques for the better understanding of surface morphology	Applying (K3)
CO4	explain the principle, instrumentation of mass spectroscopy for the analysis of organic sample	Understanding (K2)
CO5	illustrate the thermal analysis for the identification of thermal stability of the compounds	Understanding (K2)

Mapping of COs with POs and PSOs														
COs/Pos	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	1												
CO2	3	2	1	1										
CO3	3	2	1	1										
CO4	3	1												
CO5	3	1												
1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy														

ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	25	35	40				100
CAT2	25	35	40				100
CAT3	25	35	40				100
ESE	25	35	40				100

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20CYO02 - CORROSION SCIENCE AND ENGINEERING**

(Common to all Engineering and Technology branches)

Programme & Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	OE	3	1	0	4

Preamble	Corrosion science and engineering aims to equip the students to have a wide-range knowledge of corrosion and prevention methods in order to meet the industrial needs.	
Unit – I	Corrosion and its Units	9+3
Localized corrosion: electro chemical mechanism Vs. chemical mechanism - emf Series and Galvanic series – Galvanic Corrosion – Area effect in anodic and cathodic metal coatings – prediction using emf Series and Galvanic series - pilling Bedworth's ratio and its consequences (Problems) – units corrosion rate – mdd (milligrams per square decimeter per day), mmpy (Millie miles per year) and mpy (Mils per year) – Importance of corrosion prevention in various industries: direct and indirect effects of corrosion		
Unit - II	Thermodynamics of corrosion	9+3
Electrode Potentials, Electrical Double Layer, Gouy–Chapman Model, Stern Model, Bockris – Devanathan–Müller Model - Free energy and oxidation potential criterion of corrosion (Problems) - Basis of Pourbaix Diagrams - Pourbaix diagrams of Water, Magnesium, Aluminium and Iron – Their and limitations–Methods of Determining Corrosion Rates - Weight Loss Method, Weight Gain Method and Chemical Analysis of Solution.		
Unit - III	Types of Corrosion	9+3
Introduction - (i) Crevice - differential aeration corrosion, (ii) pitting – mechanism, factors (iii) intergranular- chromium depletion theory, weld decay and knife line attack, (iv) stress - SCC mechanism, and fatigue- Cavitation damage – Fretting damage, (v) stray current corrosion - causes and its control.		
Unit - IV	Kinetics of Corrosion	9+3
Electrochemical Polarization – Evan's diagram – Activation polarization – Concentration polarization - Mixed potential theory(Wagner and Traud) – application of mixed potential theory – effect of Metal in acid solution – Cathodic protection of iron in acid solution – effect of cathodic reaction – effect of cathodic area – Passivity – Flade potential – Theories of Passivity - Adsorption theory – Oxide film theory – Film sequence theory.		
Unit – V	Prevention of Corrosion	9+3
Inhibitors – types of inhibitors, chemisorption of inhibitors, effect of concentration, effect of molecular structure, V.P. inhibitors – Prevention of corrosion at the design stage and in service conditions – control of catastrophic oxidation and Hydrogen disease – Langelier saturation Index and its uses - Corrosion prevention by surface coatings – Phosphating and its uses -Principles and procedures of cathodic protection: Sacrificial anodes and external cathodic current impression

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	illustrate the mechanism, expression of rate of corrosion and importance of corrosion studies to familiarize for industrial needs.	Understanding (K2)
CO2	demonstrate the thermodynamics and kinetics of different models of corrosion with respect to the environment	Applying (K3)
CO3	organize the various types of corrosion to understand the corrosion problems	Applying (K3)
CO4	utilize the theories corrosion to interpret with the real time applications	Applying (K3)
CO5	summarize the corrosion prevention methods to avoid corrosion related issues	Understanding (K2)

**20CYO03 - CHEMISTRY OF COSMETICS IN DAILY LIFE**

(Common to all Engineering and Technology branches)

Programme& Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	OE	3	1	0	4

Preamble	This course aims to provide knowledge for engineering students on chemistry of cosmetics.	
Unit 1	Formulation of Cosmetic Product	9+3
Introduction - basic sciences of cleansing – Surfactant and adsorption, Surfactant Micelles, Surfactants and Cleansing, Surfactants and Foam (foam formation, stability, drainage, Rupture and Collapse and defoaming) - Polymers in Cosmetics - Polymer Solubility and Compatibility, polymer conformation - Basics of Dispersions - Electrical Charges Associated With Surfaces and Barriers – Basics of emulsion (stability, Ostwald Ripening, Prevention of Creaming and Sedimentation).		
Unit 2	Structuring Materials for cosmetics	9+3
Introduction - Water/Hydrophilic Base Materials, Oleaginous/Hydrophobic Base Materials and Amphiphilic Substances - Adding Functions and Effects - Materials That Add or Improve Functional Value, Emotional Value and Materials for Quality Control - Precautions on Cosmetic Ingredients - Future Challenges in Cosmetics Material Development.		
Unit 3	Polymers in Cosmetic Products	9+3
Polymers that modify surfaces - Film-forming polymers in cosmetics and personal care products - Hair-conditioning polymers - Polymers for the treatment of skin - Polymers as controlled release matrices - Dendritic polymers - Polymeric antimicrobials and bacteriostats.		
Unit 4	Powders and Fragrance in Cosmetics	9+3
Inorganic Pigments – extender pigment, coloured pigment, white pigment, pearlescent Pigments – organic pigments - extender pigment, coloured pigment. Fragrance – Introduction – natural products – aroma chemicals - fragrance creation and duplication - fragrance applications - encapsulation and controlled release – malodor - natural, green, organic, and sustainable fragrances.		
Unit 5	Preparation of Cosmetics	9+3
Brief introduction of the following cosmetic preparation and a detailed study on their quality control: shampoo, tooth paste, skin powder, skin creams, hair creams, nail polish, after shave lotion, bath and toiletries, lipstick and hair dyes, perfumes, depilatories.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	outline the formulation of cosmetics products	Understanding (K2)
CO2	identify the structuring materials form cosmetics	Applying (K3)
CO3	interpret the polymers in cosmetics	Understanding (K2)
CO4	develop knowledge about Powders and Fragrance in Cosmetics	Applying (K3)
CO5	apply the preparation methodology of cosmetics to explain the preparation and quality control of different cosmetic products used in day to day life.	Applying (K3)

10CYO04 - CHEMISTRY OF NUTRITION FOR WOMEN HEALTH
(Common to all Engineering and Technology branches)

Programme& Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5	OE	3	1	0	4

Preamble	This course aims to provide knowledge for engineering students on components of health and fitness and the role of nutrition for women health.	
Unit - I	Nutrition	9+3
Energy- Functions, sources and concept of energy balance, Functions, Recommended Dietary Allowances, dietary sources, effects of deficiency and/ or excess consumption on health of the following nutrients: • Carbohydrates and dietary fibre, Lipids, Proteins, Fat soluble vitamins-A, D,E and K, Water soluble vitamins – Thiamin, Riboflavin, Niacin, Pyridoxine, Folate, Vitamin B12 and Vitamin C, Minerals – Calcium, Iron, Zinc and Iodine		
Unit - II	Role of women in national development	9+3
Women in family and community: Demographic changes menarche, marriage, fertility, morbidity, mortality, life expectancy, sex ratio, aging, widowhood. Women in society: Women's role, their resources, and contribution to family, and effect of nutritional status.		
Unit - III	Women and health	9+3
Disease pattern and reproductive health- Menopause – Hypothyroid- PCOD-Diabetes - Policies and programs for promoting maternal and child nutrition and health - Concept of small family - Methods of family planning - Merits and demerits.		
Unit - IV	Nutrition during Lactation and for Infants	9+3
Physiology and psychology of lactation, hormonal control, composition of colostrums and breast milk, nutritional requirements of a nursing mother, advantages of breast feeding, food and nutritional requirements for infants, weaning and supplementary foods for infants and immunization.		
Unit - V	Physical fitness and nutrition	9+3
Significance of physical fitness and nutrition in the prevention and management of weight control, obesity, diabetes mellitus, CV disorders, bone health and cancer - Nutrition and exercise regimes for pre and postnatal fitness - Nutritional and exercise regimes for management of obesity - Critical review of various dietary regimes for weight and fat reduction. Prevention of weight cycling.

COURSE OUTCOMES:		BT Mapped (Highest Level)
On completion of the course, the students will be able to		
CO1	Make use of the knowledge of dietary sources in day to day life	Applying (K3)
CO2	Interpret the various role of women in society	Understanding (K2)
CO3	Explain the disease pattern and policies towards women health	Understanding (K2)
CO4	Develop knowledge about nutrition during lactation and for infants	Applying (K3)
CO5	Utilize the knowledge of physical fitness and nutrition towards achieving a good health	Applying (K3)

Mapping of COs with POs and PSOs

* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)

**20CYO05 - CHEMISTRY CONCEPTS FOR COMPETITIVE EXAMINATIONS**

(Common to all Engineering and Technology branches)

Programme & Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	6	OE	3	0	0	3

Preamble	This course aims to refresh the knowledge of chemistry required for competitive examinations and equip the students with a capacity to solve the problems in chemistry while participating various competitive examinations including TNFUSRC-FORESTER (paper-II: General science-chemistry), UPSC-IAS (prelims: General science-chemistry), GATE (thermodynamics concept for chemical & mechanical engineering).
----------	---

Unit – I	Periodic Classification of Elements:	9
-----------------	---	----------

Mendeleev's periodic table-Law and classification of elements- Modern periodic law-Modern periodic table and its characteristics - Periodic properties – important aspects of s, p & d block elements -Reactivity series and Uses - Alloys-Uses of Alloys- Properties of nano metals and oxides.

Unit – II	Chemical Equations and Bonding:	9
------------------	--	----------

Chemical Equations: Types of ions and radicals- oxidation and reduction-redox reactions - Balancing ionic equations.

Chemical Bonding: Octet rule -Types of Chemical bond -Formation of Ionic and Covalent bond- Common Properties of ionic and covalent compounds- Differences between Ionic and covalent Compounds-Coordinate covalent bond- Coordination compounds – nomenclature and isomerism. Application in analytical chemistry.

Unit – III	Acids, Bases, Salts and Metallurgy:	9
-------------------	--	----------

Acid- base theory – Bronsted- Lowry theory- conjugate acid-base- Lewis concept- HSAB- applications- pH scale- Importance of pH in everyday life-Salts-Classification of salts-Uses of salts.

Metallurgy: Introduction-Terminologies in metallurgy-Differences between Minerals and Ores-Occurrence of metals- Metallurgy of Aluminum, Copper and Iron.

Unit – IV	Carbon and its Compounds:	9
------------------	----------------------------------	----------

Introduction-Compounds of carbon-Modern definition of organic chemistry- Bonding in carbon and its compounds-Allotropy-Physical nature of carbon and its compounds-Chemical properties of carbon compounds-Homologous Series-Hydrocarbons and their Types- Functional groups- Classification of organic compounds based on functional group-Ethanol-Ethanoic acid.

Unit – V	Thermodynamics:	9
-----------------	------------------------	----------

Introduction- Some important terms in thermodynamics-thermodynamic system, process, properties and energy- First law of thermodynamics: Mathematical expression and interpretation- Applications of First law of thermodynamics-Molar heat capacity-Reversible isothermal expansion/compression of an ideal gas-Adiabatic expansion of an ideal gas-Isobaric and Isochoric Processes in Ideal Gases-Second laws of thermodynamics: Entropy- Entropy change for isolated system (system and surroundings)- Entropy change for system only (Ideal Gas)- Entropy change for mixing of ideal gases-Entropy of physical changes- Entropy of chemical changes-Maxwell Relations.

**20CYO06 - WASTE AND HAZARDOUS WASTE MANAGEMENT**

(Common to all Engineering and Technology branches)

Programme & Branch	All BE/BTech Branches	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	6	OE	3	0	0	3

Preamble	Waste and Hazardous waste management aims to equip the students to have a wide-range of knowledge on waste management.						
----------	--	--	--	--	--	--	--

Unit - I	SOLID WASTE MANAGEMENT						9
----------	-------------------------------	--	--	--	--	--	----------

Solid wastes: definition, sources, types, composition of solid waste- Solid waste management system: collection, separation, processing and transformation of solid waste – combustion, aerobic composting, vermicomposting, pyrolysis, landfill-classification, types, methods and control of leachate in landfills. Recycling of material found in municipal solid waste- recycling of paper and cardboard, recycling of plastics, recycling of glass.

Unit - II	HAZARDOUS WASTE MANAGEMENT						9
-----------	-----------------------------------	--	--	--	--	--	----------

Hazardous wastes: definition, nature and sources of hazardous waste, classification and characteristics of hazardous waste-chemical class of hazardous waste, segregation of waste-generation, treatment and disposal-waste reduction, waste minimization-recycling-chemical treatment: acid base neutralization, chemical precipitation, oxidation/reduction, hydrolysis, electrolysis, chemical extraction and leaching, ion exchange, photolytic reaction- thermal treatment methods: incineration – biodegradation of hazardous waste: aerobic, anaerobic, reductive dehalogenations-land treatment and composting.

Unit - III	E- WASTE & BIOMEDICAL WASTE MANAGEMENT						9
------------	---	--	--	--	--	--	----------

E-Waste Management: Definition, sources, classification, collection, segregation, treatment and disposal.

Biomedical Waste Management : Introduction-definition –components of biomedical waste-waste generation –waste identification and waste control-waste storage-labeling and color coding-handling and transportation-waste treatment and disposal- autoclave, hydroclave , microwave treatments- chemical disinfection – sanitary and secure landfill.

Unit - IV	POLLUTION FROM MAJOR INDUSTRIES AND MANAGEMENT						9
-----------	---	--	--	--	--	--	----------

Introduction- sources and characteristics - waste treatment flow sheets for selected industries such as Textiles, Tanneries, Pharmaceuticals, Sugar, Petroleum refinery, fertilizer, dairy industries.

Unit - V	SOLID WASTE MANAGEMENT LEGISLATION						9
----------	---	--	--	--	--	--	----------

Solid waste management plan - Solid Waste (Management and Handling) Rules - Biomedical Waste (Management and Handling) Rules- Plastic Waste Management Rules - E-Waste Management Rules - Hazardous and Other Wastes (Management and Transboundary Movement) Rules - Construction and Demolition Waste Management Rules..

BOARD OF FOOD TECHNOLOGY

DEGREE & PROGRAMME : BTECH & FOOD TECHNOLOGY

HONOURS DEGREE TITLE: FOOD PROCESSING AND MANAGEMENT

The following courses are identified to earn additional 18 credits to get a Honours degree with specialization in **Food Processing and Management**

S.No	Course Code	Course Title	Credits	Prerequisites	Semester
1.	20FTH01	Food Supply Chain Management	4	Nil	5
2.	20FTH02	Entrepreneurship	3	Nil	5
3.	20FTH03	International Food Safety Regulations	4	Nil	6
4.	20FTH04	Project Management	3	Nil	6
5.	20FTH05	Food Safety Management System	4	Nil	7
		TOTAL	18		

20FTH01- FOOD SUPPLY CHAIN MANAGEMENT								
Programme & Branch	B.Tech & Food Technology	Sem.	Category	L	T	P	Credit	
Prerequisites	Nil	5/6/7	HN	3	1	0	4	
Preamble	This course addresses the theory and practices of supply chain management within the context of the food system.							
Unit – I	Introduction and overview of Food Supply Chain Management							9+3
Introduction and overview of Food Supply Chain Management, present status of Food Supply Chains in India and challenges thereof, Inbound and Out bound logistics, Supply Chain as a source of competitive advantage. Buyer-Vendor co-ordination, Procurement, Vendor development and evaluation, Reduced sourcing and supplier partnership - benefits, Risks and critical success factors, Multilevel supply control, Inventory control systems of stock replenishment, Cost elements, EOQ and its derivative models, Use of computers for materials function.								
Unit – II	System view of logistics, Coordination and management of transportation							9+3
System view of logistics, Coordination and management of transportation, Inter model transportation and third party transportation services, Characteristics of different transportation services, Carrier selection, contracting and evaluation methods, inventory order processing, Purchasing warehousing materials handling, Packaging and customer service standards, Physical distribution planning, Channel considerations, Inventory strategies and management, Transportation infrastructure and management, Facility location, Materials handling								
Unit – III	Logistics/Supply Chain (SC) Strategy and Planning							9+3
Corporate Strategy, Logistics/SC Strategy, Logistics/SC Planning, Levels of Planning, Major Planning Areas, Conceptualizing the Logistics/SC Planning Problems, Guidelines for Strategy Formulation, Selecting the Proper Channel Strategy, Measuring Strategy Performance. The Logistics/Supply Chain Product: Nature and Classification of Products, The Product Life Cycle, Product Characteristics, Weight-Bulk Ratio, Value-Weight Ratio, Substitutability, Risk Characteristics, Product Packaging, Product Pricing, Geographic Pricing Methods, Legal Concerns.								
Unit – IV	Order Processing and Information Systems							9+3
Defining Order Processing, Order Preparation, Order Transmittal, Order Entry, Order Filling, Order Status Reporting, Order-Processing Examples, Industrial Order Processing, Retail Order Processing, Customer Order Processing, Web-Based Channel Order Planning, Other Factors Affecting Order- processing Time, Processing Priorities, Parallel versus Sequential Processing, Order-Filling Accuracy, Order Batching.								
Unit – V	Strategic considerations for supply chain							9+3
Strategic considerations for supply chain, Porter's industry analysis and value-chain models, Concept of total cost of ownership Supply stream strategies, Classification and development guidelines, Measuring effectiveness of supply management, Logistics engineering. Operations Research Models for operational and strategic issues in supply chain management, The Bullwhip Effect and supply-chain management game.								
Lecture:45, Tutorial:15, Total:60								
TEXT BOOK:								
1.	Chopra, S, and P. Meindl, "Supply Chain Management – Strategy, Planning and Operation", 6th edition, Pearson Education, 2016.

COURSE OUTCOMES: On completion of the course, the students will be able to													BT Mapped (Highest Level)	
CO1	outline Food Supply Chain Management in India.												Understanding (K2)	
CO2	classify the Coordination and management of transportation services.												Understanding (K2)	
CO3	infer suitable Logistics/Supply Chain (SC) Strategy and Planning for products.												Understanding (K2)	
CO4	utilize the Order Processing and factors affecting order processing.												Applying (K3)	
CO5	Summarize the supply chain strategies												Understanding (K2)	
Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2				2						1	1	2
CO2	3	2		1		2						2	2	3
CO3	3	3		2		3						2	2	3
CO4	3	2		1		2						2	2	3
CO5	3	3		3		3						2	2	3
1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy														
ASSESSMENT PATTERN – THEORY														
Test / Bloom's Category*		Remembering (K1) %		Understanding (K2) %		Applying (K3) %		Analyzing (K4) %		Evaluating (K5) %		Creating (K6) %		Total %
CAT1		40		60										100
CAT2		40		60										100
CAT3		30		50		20								100
ESE		30		50		20								100
* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)														

**20FTH02 - ENTREPRENEURSHIP**

Programme & Branch	B.Tech & Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5/6/7	HN	3	0	0	3

Preamble	This course provides a detailed overview of entrepreneurship as the foundation of business growth and value creation in the national economy.
-----------------	---

Unit – I	Entrepreneurship Journey and Discovery	9
-----------------	---	----------

Introduction- Entrepreneurial Journey-Different types of entrepreneurs- Innovative, replicative, Opportunity, Necessity, entrepreneurial origins, entrepreneurial and start up firms, stages of start up journey at corporate and Product levels, Incubators and accelerators. Entrepreneurial Discovery- Triggers for entrepreneurial quest- case studies.

Unit – II	Ideathon and prototyping	9
------------------	---------------------------------	----------

Ideathon and Prototyping Difference between entrepreneurship and start up, risk of innovation, Product development for optimal business impact, Broad stages of product development, Stages from ideathon to commercialization, Theme thread -passion Cube of start up, Demand supply match, Design thinking as an Interconnected iterative process, Impact of design thinking on design, manufacture and delivery, Emotional drivers of design thinking, design thinking importance in entrepreneurship, stages of ideathon and prototyping in the entrepreneurial journey, Different ideathon approaches, Technology drivers for ideathon, Characteristics of ideathon , Prototype, Common prototyping problems and solutions.

Unit – III	Technological Innovation and Entrepreneurship	9
-------------------	--	----------

The technology pyramid, types of technological innovation, unique role of start ups, Technology driven Industries, Navigating the next Industrial Revolution, Pioneering Leadership Model, Technology Competence framework, Innovator Strategies, Model of five Technology forces, Elements of customised product design, Facets of Technological behaviour, Three steps of De-commoditisation, trends of technological development, framework of customised product design.

Unit – IV	Financial resources , Education and Entrepreneurship	9
------------------	---	----------

Financial resources- Financing Staircase, Startup funding and investment trends, Startup canvas- Micro, Nano , small scale , medium scale enterprises, Financial strategy, role of finance management, Financial ratio analysis. Education and Entrepreneurship- India's development pathway-Innovation, efficiency, competitiveness and collaborative framework, global benchmarks in student educational proficiency ,role of India's science and technology, Education and Management, STEM at Industrial revolution, Beyond founders and founder families- Entrepreneurs and leaders, Co-founding as a powerful leader, Challenges of cofounders/management,Issues in founder, co-founders and family firms, Transition challenges for founders / family controlled firms

Unit – V	Entrepreneurial culture and Employment	9
-----------------	---	----------

India as a Start-up Nation, National Entrepreneurial Culture, Entrepreneurial Thermodynamics, Entrepreneurship and Employment, Start-up Case Studies.

Total:45**TEXT BOOK:**

1.	Donald F. Kuratko,"Entrepreneurship: Theory, Process, Practice", 11th Edition, Cengage Learning, Boston, 2020.

3.	Barringer and Ireland, "Entrepreneurship", 3rd Edition, Pearson Education, 2012.

COURSE OUTCOMES: On completion of the course, the students will be able to													BT Mapped (Highest Level)	
CO1:	outline the importance of entrepreneurship journey and discovery												Understanding (K2)	
CO2:	make use of ideathon and prototyping												Applying (K3)	
CO3:	identify suitable technological innovation and entrepreneurship												Applying (K3)	
CO4:	Infer the importance of financial resources and entrepreneurship												Understanding (K2)	
CO5:	Utilize the entrepreneurial culture and employment												Applying (K3)	
Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1					2		2	1	1	1	3	2		1
CO2	1	2	2		2		2	1	1	1	3	2		2

ASSESSMENT PATTERN – THEORY														
Test / Bloom's Category*		Remembering (K1) %		Understanding (K2) %		Applying (K3) %		Analyzing (K4) %		Evaluating (K5) %		Creating (K6) %		Total %
CAT1		20		60		20								100
CAT2		20		40		40								100
CAT3		20		40		40								100
ESE		20		40		40								100
* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)														

20FTH03 - INTERNATIONAL FOOD SAFETY REGULATIONS							
Programme & Branch	B.Tech & Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5/6/7	HN	3	1	0	4
Preamble	This course deals about international agencies and international food laws and regulations on food safety						
Unit – I	Regulations on Food Import and Export						9+3
Food categorization system, Product/Ingredient Approval, Export & Import Laws and Regulations, FTDR Act, 1992 and Foreign Trade Policy, Food Import Clearance System (FICS).							
Unit – II	World Trade Organization (WTO)						9+3
The Role of the WTO - The WTO Framework - Introduction to OIE and IPPC, other International Food Standards (e.g. European Commission, USFDA etc). Introduction to WTO agreement: SPS and TBT Agreement- Negotiation of the SPS Agreement - WTO Dispute Settlement - Functioning of the SPS Agreement							
Unit – III	Codex Alimentarius Commission (CAC)						9+3
The Work of Codex – development and use – Standard setting and Advisory mechanisms: JECFA, JEMRA, JMPR - Standards in effect - Implications on trade in light of SPS and TBT, Other International Standards Setting Bodies, Harmonisation Of India's Food Standards with Codex Standards and Other International Best Practices, Country Specific Standards - European Committee for Standardization (CEN), PAN American Standards Commission (COPANT), Euro-Asian Council for Standardization, FDA, EPA, EU, ASEAN, EFSA (European Food Safety Authority)							
Unit – IV	Regulation of Food Additives, Contaminants And Pesticides						9+3
Regulation Of Food Additives Contaminants And Pesticides In The United States: The Food Additive Approval Process - Regulation Of Contaminants And Pesticides European Community Legislation on Limits for Additives and Contaminants in Food: Scientific Advisory Committees - Pesticide Residues - Veterinary Drug Residues - Other Contaminants Development Of Australia New Zealand Standards: Food Regulation in New Zealand – WTO Obligations – The Regulation of Food Additives – The Regulation of Contaminants and Other Restricted Substances							
Unit – V	Development Of The Codex Standard For Contaminants And Toxins In Food						9+3
Development Of The GSCTF – Scope, Purpose and Principles of the General Standard on Contaminants and Toxins In Food - The Content of The General Standard Status and Future Codex Standards For Pesticide Residues: Need for International Standards For Pesticide Residues - Selection of Pesticides for Elaboration of Codex MRLS - Joint FAO/WHO Meeting on Pesticide Residues - Safety of Pesticide Residues - Good Agricultural Practice - Codex Extraneous Residue Limits - International Regulatory Practices Involving Pesticide Residues Development of Radiological Standards: Radioactivity And Radiation Protection - International Commission on Radiological Protection. Establishment of Codex Microbiological Criteria for Foods							
Lecture:45, Tutorial:15, Total:60							
TEXT BOOK:							
1.	Naomi Rees., David Watson, “International standards for food safety”, 1st Edition, Springer US, 2000.						
REFERENCES:

3.	Christine Boisrobert, Aleksandra Stjepanovic, Sangsuk Oh, Huub Lelieveld (eds), “Ensuring Global Food Safety”, 1st Edition, Academic Press, 2009.						

COURSE OUTCOMES: On completion of the course, the students will be able to												BT Mapped (Highest Level)			
CO1	infer the regulations on Food Import and Export												Understanding (K2)		
CO2	explain the role of World Trade Organization in food law and policies												Understanding (K2)		
CO3	outline about codex and global perspectives on the challenges and opportunities in the international food trade, including the steps being taken towards international harmonization												Understanding (K2)		
CO4	apply the Regulation of Food Additives, Contaminants and Pesticides in various countries while involving in international trade												Applying (K3)		
CO5	make use of the Codex Standards for Contaminants and Toxin Evaluation in Food												Applying (K3)		
Mapping of COs with POs and PSOs															
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

**20FTH04 - PROJECT MANAGEMENT**

Programme & Branch	B.Tech & Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5/6/7	HN	3	0	0	3

Preamble	This course deals about the general and advanced concepts of Project Management to meet the demand in the market from a variety of fields	
Unit – I	Project Management Fundamentals	9
Introduction to Project Management, Project success, Types of structure organizations, Project management office, stakeholders management.		
Unit – II	Project Life cycle and selection methods	9
Types of project and Project life cycle, Project life cycle phases and Project appraisal , Methods of project selection , market and demand analysis, Financial analysis, capital budgeting techniques.		
Unit – III	Risk Management and technical analysis	9
Risk Management , Stand alone risk analysis , Hillier model, simulation analysis ,Decision analysis, abandonment analysis, technical analysis, Product mix and Plant capacity analysis.		
Unit – IV	Resources management and Probability models	9
Project team building , Conflict and Negotiation, HRM Issues and time management, Project time management- PERT networks , CPM, Probability model in networks, simulation of networks, Slacks and floats, Crashing of networks		
Unit – V	Cost management and procurement management	9
Introduction to project cost management, Cost control-tools and techniques, cost estimation, Introduction to quality management- Source of variability, Six Sigma , Six sigma tools, Procurement Management and Project Termination.		
Total:45		

TEXT BOOK:

1. Banga, T.R., Agarwal, N.K., Sharma, S.C., "Industrial Engineering and Management Science", 5th Edition, Khanna Publishers, New Delhi 2007.

3. Leender, Johnson, Flynn, Fearon, Purchasing Supply Chain Management, 14th Edition, McGraw-Hil, 2011

COURSE OUTCOMES: On completion of the course, the students will be able to													BT Mapped (Highest Level)	
CO1:	summarize the Project management fundamentals												Understanding (K2)	
CO2:	identify the project life cycle and selection methods												Applying (K3)	
CO3:	Identify the risk management and technical analysis												Applying (K3)	
CO4:	Infer the role resources management and probability models												Understanding (K2)	
CO5:	Make use of cost management technique and procurement management												Applying (K3)	
Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CAT2		40		60										100
CAT3		20		40		40								100
ESE		20		40		40								100
* ±3% may be varied (CAT 1,2,3 – 50 marks & ESE – 100 marks)														

20FTH05 - FOOD SAFETY MANAGEMENT SYSTEM							
Programme & Branch	B.Tech & Food Technology	Sem.	Category	L	T	P	Credit
Prerequisites	Nil	5/6/7	HN	3	1	0	4
Preamble	This course will provide students with an understanding of the principles and practices of food safety management systems						
Unit – I	Introduction and PRP						9+3
Introduction, Food safety, Food safety importance, History of food safety management system, Principles of food safety management system. Introduction to PRPs, The different types of PRPs, Implementing and maintaining PRPs, The importance of PRPs in a HACCP system, Challenges to PRPs							
Unit – II	GMP and HACCP						9+3
Good Manufacturing Practices (GMPs), Principles of GMPs, Implementing GMPs in a food business. Introduction to HACCP, seven principles of HACCP, developing a HACCP plan, Implementing and maintaining a HACCP plan, Validating and verifying a HACCP plan, Challenges to HACCP.							
Unit – III	ISO22000 and FSSC 22000						9+3
ISO 22000, requirements of ISO 22000, Implementation of ISO 22000-compliant food safety management system, benefits of ISO22000 certification, Challenges to ISO 22000. FSSC 22000, requirements of FSSC 22000, Implementing and maintaining FSSC 22000, benefits of FSSC 22000 certification, Challenges to FSSC 22000 certification.							
Unit – IV	BRCGS						9+3
Introduction to BRCGS, The requirements of BRCGS, Implementing and maintaining BRCGS, The benefits of BRCGS certification, Challenges to BRCGS certification.							
Unit – V	Training, Documentation, and Management Commitment						9+3
The importance of training in food safety, different types of food safety training, Developing and maintaining food safety documentation, importance of management commitment to food safety, Challenges to food safety training, documentation, and management commitment							
Lecture:45, Tutorial:15, Total:60							
TEXT BOOK:							
1.	David A. Bell and David A. Barach, “Food Safety Management Systems: Principles and Practices”, Wiley, 2019						
REFERENCES:

2.	David A. Bell and David A, “HACCP: A Practical Guide for Food and Beverage Manufacturers”, Wiley, 2017						

COURSE OUTCOMES: On completion of the course, the students will be able to													BT Mapped (Highest Level)	
CO1	outline the basics of food safety importance and PRP												Understanding (K2)	
CO2	apply the GMP and HACCP in the food industry												Applying (K3)	
CO3	develop ISO22000 and FSSC 22000 in the food industry												Applying (K3)	
CO4	make use of BRCGS in the food sector												Applying (K3)	
CO5	Summarize the different types of food safety training												Applying (K3)	
Mapping of COs with POs and PSOs														
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
