KONGU ENGINEERING COLLEGE PERUNDURAI ERODE – 638 060 (Autonomous)

INSTITUTE VISION

To be a centre of excellence for development and dissemination of knowledge in Applied Sciences, Technology, Engineering and Management for the Nation and beyond.

INSTITUTE MISSION

We are committed to value based Education, Research and Consultancy in Engineering and Management and to bring out technically competent, ethically strong and quality professionals to keep our Nation ahead in the competitive knowledge intensive world.

QUALITY POLICY

We are committed to

- Provide value based quality education for the development of students as competent and responsible citizens.
- Contribute to the nation and beyond through research and development
- Continuously improve our services

DEPARTMENT OF AUTOMOBILE ENGINEERING

VISION

To be a centre of excellence for development and dissemination of knowledge in Automobile Engineering for the Nation and beyond.

MISSION

Department of Automobile Engineering is committed to:

- MS1: Establish an academic center to develop quality automotive engineers through professional teaching learning process.
- MS2: Develop research interest among the graduates through state of the art facilities.
- MS3: Promote innovation and industrial consultancy to meet the societal needs.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

Graduates of Automobile Engineering will

- PEO1: Pursue successful career in the domain of design, analysis, testing and diagnostics that meets the needs of global industries
- PEO2: Habituate continuous learning to carry out research and development activities for solving real time multi-disciplinary problems
- PEO3: Demonstrate entrepreneurial skills and contribute to the society as an ethical and responsible citizen

MAPPING OF MISSION STATEMENTS (MS) WITH PEOS

1 – Slight, 2 – Moderate, 3 – Substantial

	PROGRAM OUTCOMES (POs)
Gradua	tes of Automobile Engineering will:
PO1	Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO2	Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3	Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
PO4	Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
PO6	The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
PO7	Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO8	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO9	Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO10	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
PO11	Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
PO12	Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM SPECIFIC OUTCOMES (PSOs)

Gradua	ttes of Automobile Engineering will:					
PSO1	PSO1 Analyze the functioning of automotive engine, transmission, chassis and other mechanical					
	Systems					
PSO2	Examine the electrical and electronic systems related to various automotive applications					

PEO\PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

REGULATIONS 2022

CHOICE BASED CREDIT SYSTEM AND OUTCOME BASED EDUCATION

BACHELOR OF ENGINEERING (BE) / BACHELOR OF TECHNOLOGY (BTech) DEGREE PROGRAMMES

These regulations are applicable to all candidates admitted into BE/BTech Degree programmes from the academic year 2022 – 2023 onwards.

1. DEFINITIONS AND NOMENCLATURE

In these Regulations, unless otherwise specified:

- i. "University" means ANNA UNIVERSITY, Chennai.
- ii. "College" means KONGU ENGINEERING COLLEGE.
- iii. "Programme" means Bachelor of Engineering (BE) / Bachelor of Technology (BTech) Degree programme
- iv. "Branch" means specialization or discipline of BE/BTech Degree programme, like Civil Engineering, Information Technology, etc.
- v. "Course" means a Theory / Theory cum Practical / Practical course that is normally studied in a semester like Mathematics, Physics etc.
- vi. "Credit" means a numerical value allocated to each course to describe the candidate's workload required per week.
- vii. "Grade" means the letter grade assigned to each course based on the marks range specified.
- viii. "Grade point" means a numerical value (0 to 10) allocated based on the grade assigned to each course.
- ix. "Principal" means Chairman, Academic Council of the College.
- x. "Controller of Examinations (COE)" means authorized person who is responsible for all examination related activities of the College.
- xi. "Head of the Department (HOD)" means Head of the Department concerned.

2. PROGRAMMES AND BRANCHES OF STUDY

The following programmes and branches of study approved by Anna University, Chennai and All India Council for Technical Education, New Delhi are offered by the College.

Programme	Branch				
	Civil Engineering				
	Mechanical Engineering				
	Electronics and Communication Engineering				
	Computer Science and Engineering				
BE	Electrical and Electronics Engineering				
	Electronics and Instrumentation Engineering				
	Mechatronics Engineering				
	Automobile Engineering				
	Computer Science and Design				
	Chemical Engineering				
	Information Technology				
BTech	Food Technology				
	Artificial Intelligence and Data Science				
	Artificial Intelligence and Machine Learning				

3. ADMISSION REQUIREMENTS

3.1 First Semester Admission

The candidates seeking admission to the first semester of the eight semester BE / BTech Degree Programme:

Should have passed the Higher Secondary Examination (10 + 2) in the academic stream with Mathematics, Physics and Chemistry as three of the four subjects of study under Part-III subjects of the study conducted by the Government of Tamil Nadu or any examination of any other University or authority accepted by the Anna University, Chennai as equivalent thereto.

(OR)

Should have passed the Higher Secondary Examination of Vocational stream (Vocational groups in Engineering / Technology) as prescribed by the Government of Tamil Nadu.

They should also satisfy other eligibility conditions as prescribed by the Anna University, Chennai and Directorate of Technical Education, Chennai from time to time.

3.2 Lateral Entry Admission

The candidates who hold a Diploma in Engineering / Technology awarded by the State Board of Technical Education, Tamilnadu or its equivalent are eligible to apply for Lateral entry admission to the third semester of BE / BTech.

(OR)

The candidates who hold a BSc degree in Science(10+2+3 stream) with mathematics as one of the subjects at the BSc level from a recognised University are eligible to apply for Lateral entry admission to the third semester of BE / BTech. Such candidates shall undergo two additional Engineering course(s) in the third and fourth semesters as prescribed by the College.

They should also satisfy other eligibility conditions prescribed by the Anna University, Chennai and Directorate of Technical Education, Chennai from time to time.

4. STRUCTURE OF PROGRAMMES

4.1 Categorisation of Courses

The BE / BTech programme shall have a curriculum with syllabi comprising of theory, theory cum practical, practical courses in each semester, professional skills training/industrial training, project work, internship, etc that have been approved by the respective Board of Studies and Academic Council of the College. All the programmes have well defined Programme Outcomes (PO), Programme Specific Outcomes (PSO) and Programme Educational Objectives (PEOs) as per Outcome Based Education (OBE). The content of each course is designed based on the Course Outcomes (CO). The courses shall be categorized as follows:

- i. Humanities and Social Sciences (HS) including Management Courses, English Communication Skills, Universal Human Values and Yoga & Values for Holistic Development.
- ii. Basic Science (BS) Courses
- iii. Engineering Science (ES) Courses
- iv. Professional Core (PC) Courses
- v. Professional Elective (PE) Courses
- vi. Open Elective (OE) Courses
- vii. Employability Enhancement Courses (EC) like Project work, Professional Skills/Industrial Training, Comprehensive Test & Viva, Entrepreneurships/Start ups and Internship / In-plant Training in Industry or elsewhere
- viii. Audit Courses (AC)
- ix. Mandatory Courses (MC) like Student Induction Program and Environmental Science.
- x. Honours Degree Courses (HC)

4.2 Credit Assignment and Honours Degree

4.2.1. Credit Assignment

Each course is assigned certain number of credits as follows:

Contact period per week	Credits
1 Lecture / Tutorial Period	1
2 Practical Periods	1
2 Project Work Periods	1
40 Training / Internship Periods	1

The minimum number of credits to complete the BE/BTech programme is 168.

4.2.2 Honours Degree

If a candidate earns 18 to 20 additional credits in an emerging area, then he/she can be awarded with Honours degree mentioning that emerging area as his/her specialization. The respective board of studies shall recommend the specializations for honours degree and appropriate additional courses to be studied by the candidate which shall get approval from Academic Council of the institution. A candidate shall have not less than 7.5 CGPA and no history of arrears to opt for the honours degree and has to maintain the same during the entire programme.

Various specializations for various branches recommended by the respective boards of studies are given below:

SNo	Specializations for Honours degree in emerging areas	To be offered as Honours, Only for the following branches mentioned against the specialization
1.	Construction Technology	BE – Civil Engineering
2.	Smart Cities	BE – Civil Engineering
3.	Smart Manufacturing *	BE – Mechanical Engineering
4.	Computational Product Design *	BE – Mechanical Engineering
5.	Intelligent Autonomous Systems *	BE – Mechatronics Engineering
6.	E-Mobility *	BE – Automobile Engineering
7.	Artificial Intelligence and Machine Learning	BE – Electronics and Communication Engineering
8.	System on Chip Design *	BE – Electronics and Communication Engineering
9.	Electric Vehicles	BE – Electrical and Electronics Engineering
10.	Microgrid Technologies	BE – Electrical and Electronics Engineering
11.	Intelligent Sensors Technology *	BE – Electronics and Instrumentation Engineering
12.	Smart Industrial Automation *	BE – Electronics and Instrumentation Engineering
13.	Data Science	BE – Computer Science and Engineering
14.	Cyber Security	BE – Computer Science and Engineering
15.	Data Science	BTech – Information Technology
16.	Cyber Security	BTech – Information Technology
17.	Petroleum and Petrochemical Engineering *	BTech – Chemical Engineering
18.	Waste Technology *	BTech – Chemical Engineering
19.	Food Processing and Management *	BTech – Food Technology
20.	Virtual and Augumented Reality	BE- Computer Science and Design
21.	Data Science	BE- Computer Science and Design
22.	Internet of Things (IoT)	BTech – Artificial Intelligence and Data Science
23.	Blockchain	BTech – Artificial Intelligence and Data Science

B.E.– Automobile Engineering, Regulation, Curriculum and Syllabus – R2022

Č,

Kongu Engineering College, Perundurai, Erode – 638060, India

24.	Internet of Things (IoT)	BTech – Artificial Intelligence and Machine Learning
25.	Blockchain	BTech – Artificial Intelligence and Machine Learning

*Title by KEC

The courses specified under Honours degree in the emerging area may include theory, theory cum practical, practical, project work, etc. under the particular specialization. A candidate can choose and study these specified courses from fourth semester onwards and he/she shall successfully complete the courses within the stipulated time vide clause 5. Total number of credits earned in each semester may vary from candidate to candidate based on the courses chosen. The registration, assessment & evaluation pattern and classification of grades of these courses shall be the same as that of the courses in the regular curriculum of the programme of the candidate vide clause 6, clause 7 and clause 15 respectively. A candidate can earn Honours degree in only one specialization during the entire duration of the programme.

4.3 Employability Enhancement Courses

A candidate shall be offered with the employability enhancement courses like project work, internship, professional skills training/industrial training, comprehensive test & viva, and entrepreneurships/start ups during the programme to gain/exhibit the knowledge/skills.

4.3.1 Professional Skills Training/ Indsutrial Training/Entrepreneurships/Start Ups/ Inplant Training

A candidate may be offered with appropriate training courses imparting programming skills, communication skills, problem solving skills, aptitude skills etc. It is offered in two phases as phase I in fourth semester and phase II in fifth semester including vacation periods and each phase can carry two credits.

(OR)

A candidate may be allowed to go for training at research organizations or industries for a required number of hours in fifth semester vacation period. Such candidate can earn two credits for this training course in place of Professional Skills Training course II in fifth semester. He/She shall attend Professional Skills Training Phase I in fourth semester and can earn two credits.

(OR)

A candidate may be allowed to set up a start up and working part-time for the start ups by applying his/her innovations and can become a student entrepreneur during BE/BTech programme. Candidates can set up their start up from fifth semester onwards either inside or outside of the college. Such student entrepreneurs may earn 2 credits in place of Professional Skills Training II. The area in which the candidate wants to initiate a start up may be interdisciplinary or multidisciplinary. The progress of the startup shall be evaluated by a panel of members constituted by the Principal through periodic reviews.

4.3.2 Comprehensive Test and Viva

The overall knowledge of the candidate in various courses he/she studied shall be evaluated by (i) conducting comprehensive tests with multiple choice questions generally with pattern similar to GATE and/or (ii) viva-voce examination conducted by a panel of experts assigned by the Head of the department. The members can examine the knowledge of the candidate by asking questions from various domains and the marks will be assigned based on their answers. This course shall carry two credits.

4.3.3 Full Time Project through Internships

The curriculum enables a candidate to go for full time project through internship during a part of seventh semester and/or entire final semester and can earn credits vide clause 7.6 and clause 7.11.

A candidate is permitted to go for full time projects through internship in seventh semester with the following condition: The candidate shall complete a part of the seventh semester courses with a total credit of about 50% of the total credits of seventh semester including Project Work-II Phase-I in the first two months from the commencement of the seventh semester under fast track mode. The balance credits required to complete the seventh semester shall be earned by the candidate through either approved One/Two Credit Courses /Online courses / Self Study Courses or Add/Drop courses as per clause 4.4 and clause 4.5 respectively.

A candidate is permitted to go for full time projects through internship during eighth semester. Such candidate shall earn the minimum number of credits required to complete eighth semester other than project through either approved One / Two Credit Courses /Online courses / Self Study Courses or Add/Drop courses as per clause 4.4 and clause 4.5 respectively.

Assessment procedure is to be followed as specified in the guidelines approved by the Academic Council.

4.3.4 A student shall go for in-plant training for duration of two weeks during the entire programme. It is mandatory for all the students.

4.4 One / Two Credit Courses / Online Courses / Self Study Courses

The candidates may optionally undergo One / Two Credit Courses / Online Courses / Self Study Courses as elective courses.

- **4.4.1 One / Two Credit Courses:** One / Two credit courses shall be offered by the college with the prior approval from respective Board of Studies. A candidate can earn a maximum of six credits through one / two credit courses during the entire duration of the programme.
- **4.4.2 Online Courses:** Candidates may be permitted to earn credits for online courses, offered by NPTEL / SWAYAM / a University / Other Agencies, approved by respective Board of Studies.
- **4.4.3** Self Study Courses: The Department may offer an elective course as a self study course. The syllabus of the course shall be approved by the respective Board of Studies. However, mode of assessment for a self study course will be the same as that used for other courses. The candidates shall study such courses on their own under the guidance of member of the faculty following due approval procedure. Self study course is limited to one per semester.
- **4.4.4** The elective courses in the final year may be exempted if a candidate earns the required credits vide clause 4.4.1, 4.4.2 and 4.4.3 by registering the required number of courses in advance.
- **4.4.5** A candidate can earn a maximum of 30 credits through all one / two credit courses, online courses and self study courses.

4.5 Flexibility to Add or Drop Courses

- **4.5.1** A candidate has to earn the total number of credits specified in the curriculum of the respective programme of study in order to be eligible to obtain the degree. However, if the candidate wishes, then the candidate is permitted to earn more than the total number of credits prescribed in the curriculum of the candidate's programme.
- **4.5.2** From the first to seventh semesters the candidates have the option of registering for additional elective/Honours courses or dropping of already registered additional elective/Honours courses within two weeks from the start of the semester. Add / Drop is only an option given to the candidates.
- **4.6** Maximum number of credits the candidate can enroll in a particular semester cannot exceed 30 credits.
- **4.7** The blend of different courses shall be so designed that the candidate at the end of the programme would have been trained not only in his / her relevant professional field but also would have developed to become a socially conscious human being.
- **4.8** The medium of instruction, examinations and project report shall be English.

5. DURATION OF THE PROGRAMME

- 5.1 A candidate is normally expected to complete the BE / BTech Degree programme in 8 consecutive semesters/4 Years (6 semesters/3 Years for lateral entry candidate), but in any case not more than 14 semesters/7 Years (12 semesters/6 Years for lateral entry candidate).
- **5.2** Each semester shall consist of a minimum of 90 working days including continuous assessment test period. The Head of the Department shall ensure that every teacher imparts instruction as per the number of periods specified in the syllabus for the course being taught.
- **5.3** The total duration for completion of the programme reckoned from the commencement of the first semester to which the candidate was admitted shall not exceed the maximum duration specified in clause 5.1 irrespective of the period of break of study (vide clause 11) or prevention (vide clause 9) in order that the candidate may be eligible for the award of the degree (vide clause 16). Extension beyond the prescribed period shall not be permitted.

6. COURSE REGISTRATION FOR THE EXAMINATION

- **6.1** Registration for the end semester examination is mandatory for courses in the current semester as well as for the arrear courses failing which the candidate will not be permitted to move on to the higher semester. This will not be applicable for the courses which do not have an end semester examination.
- **6.2** The candidates who need to reappear for the courses which have only continuous assessment shall enroll for the same in the subsequent semester, when offered next, and repeat the course. In this case, the candidate shall attend the classes, satisfy the attendance requirements (vide clause 8) and earn continuous assessment marks. This will be considered as an attempt for the purpose of classification.

B.E.– Automobile Engineering, Regulation, Curriculum and Syllabus – R2022

Kongu Engineering College, Perundurai, Erode – 638060, India

- **6.3** If a candidate is prevented from writing end semester examination of a course due to lack of attendance, the candidate has to attend the classes, when offered next, and fulfill the attendance requirements as per clause 8 and earn continuous assessment marks. If the course, in which the candidate has a lack of attendance, is an elective, the candidate may register for the same or any other elective course in the subsequent semesters and that will be considered as an attempt for the purpose of classification.
- 6.4 A candidate shall register for the chosen courses as well as arrear courses (if any vide clause 6.2 and 6.3) from the list of courses specified under Honours degree.

7. ASSESSMENT AND EXAMINATION PROCEDURE FOR AWARDING MARKS

7.1 The BE/BTech programmes consist of Theory Courses, Theory cum Practical courses, Practical courses, Comprehensive Test and Viva, Project Work, Industrial Training /Professional Skills Training, Internship/In-plant Training and Entrepreneurships/ Start ups. Performance in each course of study shall be evaluated based on (i) Continuous Assessments (CA) throughout the semester and (ii) End Semester Examination (ESE) at the end of the semester except for the courses which are evaluated based on continuous assessment only. Each course shall be evaluated for a maximum of 100 marks as shown below:

Sl. No.	Category of Course	Continuous Assessment Marks	End Semester Examination Marks		
1.	Theory	40	60		
2.	Theory cum Practical (The distribution of marks shall be decided based on the credit weightage assigned to theory and practical components.)	50	50		
3.	Practical	60	40		
4.	Professional Skills Training / Comprehensive Test & Viva / Entrepreneurships / Start ups / Project Work I / Mandatory Course/Industrial Training/ Universal Human Values / Yoga and Values for Holistic Development	100			
5.	Project Work II Phase I / Project Work II Phase II / Internships	50	50		
6.	One / Two credit Course	The distribution of marks shall be			
7.	All other Courses	decided based on the credit weightage assigned			

kongu Engineering College, Perundurai, Erode – 638060, India

7.2 Examiners for setting end semester examination question papers for theory courses, theory cum practical courses and practical courses and evaluating end semester examination answer scripts, project works, internships and entrepreneurships/start ups shall be appointed by the Controller of Examinations after obtaining approval from the Principal.

7.3 Theory Courses

For all theory courses out of 100 marks, the continuous assessment shall be 40 marks and the end semester examination shall be for 60 marks. However, the end semester examinations shall be conducted for 100 marks and the marks obtained shall be reduced to 60. The continuous assessment tests shall be conducted as per the schedule laid down in the academic schedule. The total of the continuous assessment marks and the end semester examination marks shall be rounded off to the nearest integer.

7.3.1 The assessment pattern for awarding continuous assessment marks shall be as follows:

Sl. No.	Туре	Max. Marks	Remarks
1.	Test - I	20	
1.	Test - II	20	Average of best 2 tests
	Test - III	20	(20 marks)
2.	Tutorial: (Tutorial/Problem Solving (or) Simulation (or) Simulation & Mini Project (or) Mini Project (or) Case Studies (or) Any other relevant to the course)	15	Type of assessment is to be chosen based on the nature of the course and to be approved by Principal
3.	Others: Assignment / Paper Presentation in Conference / Seminar / Comprehension / Activity based learning / Class notes	05	To be assessed by the Course Teacher based on any one type.
	Total	40	Rounded off to the one decimal place

However, the assessment pattern for awarding the continuous assessment marks may be changed based on the nature of the course and is to be approved by the Principal.

- **7.3.2** A reassessment test or tutorial covering the respective test or tutorial portions may be conducted for those candidates who were absent with valid reasons (Sports or any other reason approved by the Principal).
- **7.3.3** The end semester examination for theory courses shall be for a duration of three hours and shall be conducted between November and January during odd semesters and between April and June during even semesters of every year.

7.4 Theory cum Practical Courses

For courses involving theory and practical components, the evaluation pattern as per the clause 7.1 shall be followed. Depending on the nature of the course, the end semester examination shall be conducted for theory and the practical components. The apportionment of continuous assessment and end semester examination marks shall be decided based on the credit weightage assigned to theory and practical components approved by Principal.

7.5 Practical Courses

For all practical courses out of 100 marks, the continuous assessment shall be for 60 marks and the end semester examination shall be for 40 marks. Every exercise / experiment shall be evaluated based on the candidate's performance during the practical class and the candidates' records shall be maintained.

- **7.5.1** The assessment pattern for awarding continuous assessment marks for each course shall be decided by the course coordinator based on rubrics of that particular course, and shall be based on rubrics for each experiment.
- **7.5.2** The end semester examination shall be conducted for a maximum of 100 marks for duration of 3 hours and reduced to 40 marks. The appointment of examiners and the schedule shall be decided by chairman of Board of Study of the relevant board.

7.6 Project Work II Phase I / Project Work II Phase II

- **7.6.1** Project work shall be assigned to a single candidate or to a group of candidates not exceeding 4 candidates in a group. The project work is mandatory for all the candidates.
- **7.6.2** The Head of the Department shall constitute review committee for project work. There shall be two assessments by the review committee during the semester. The candidate shall make presentation on the progress made by him/her before the committee.

7.6.3 The continuous assessment and end semester examination marks for Project Work II Phase I /Project Work II Phase II and the Viva-Voce Examination shall be distributed as below.

		End Semester Examination (Max. 50 Marks)							
Zeroth Review		Review I (Max 20 Marks)		Review II (Max. 30 Marks)		Report Evaluation (Max. 20 Marks)	Viva - Voce (Max. 30 Marks)		
Rv.	Super	Review	Super	Review	Super	Ext. Exr.	Super	Exr.1	Exr.2
Com	visor	Committee	visor	Committee	visor		visor		
		(excluding		(excluding					
		supervisor		supervisor)					
)							
0	0	10	10	15	15	20	10	10	10

- **7.6.4** The Project Report prepared according to approved guidelines and duly signed by the Supervisor shall be submitted to Head of the Department. The candidate(s) must submit the project report within the specified date as per the academic schedule of the semester. If the project report is not submitted within the specified date then the candidate is deemed to have failed in the Project Work and redo it in the subsequent semester.
- **7.6.5** If a candidate fails to secure 50% of the continuous assessment marks in the project work, he / she shall not be permitted to submit the report for that particular semester and shall have to redo it in the subsequent semester and satisfy attendance requirements.
- **7.6.6** The end semester examination of the project work shall be evaluated based on the project report submitted by the candidate in the respective semester and viva-voce examination by a committee consisting of two examiners and supervisor of the project work.
- **7.6.7** If a candidate fails to secure 50 % of the end semester examination marks in the project work, he / she shall be required to resubmit the project report within 30 days from the date of declaration of the results and a fresh viva-voce examination shall be conducted as per clause 7.6.6.
- **7.6.8** A copy of the approved project report after the successful completion of viva-voce examination shall be kept in the department library.

7.7 Project Work I / Industrial Training

The evaluation method shall be same as that of the Project Work II as per clause 7.6 excluding 7.6.3, 7.6.5, 7.6.6 and 7.6.7. The marks distribution is given below.

	Continuous Assessment (Max. 100 Marks)												
					Review III (Max. 50 Marks)								
Zeroth	Review	Review I (Max 20 M	larks)	Review II Max 30 Marks))	Report Evaluation (Max. 20 Marks)	Viva - V (Max.	/oce 30 Marks)					
Review Commi	Super visor	Review Committee	Super visor	Review Committee	Super visor	Review Committee	Super visor	Review Committee					
ttee	VISOI	(excluding supervisor)	VISOI	(excluding supervisor)	V150I	Committee	v150I	Committee					
0	0	10	10	15	15	20	10	20					

If a candidate fails to secure 50 % of the continuous assessment marks in this course, he / she shall be required to resubmit the project report within 30 days from the date of declaration of the results and a fresh viva-voce examination shall be conducted.

7.8 Professional Skills Training

Phase I training shall be conducted for minimum of 80 hours in 3rd semester vacation and during 4th semester. Phase II training shall be conducted for minimum of 80 hours in 4th semester vacation and during 5th semester. The evaluation procedure shall be approved by the board of the offering department and Principal.

7.9 Comprehensive Test and Viva

A candidate can earn 2 credits by successfully completing this course. The evaluation procedures shall be approved by the Principal.

7.10 Entrepreneurships/ Start ups

A start up/business model may be started by a candidate individually or by a group of maximum of three candidates during the programme vide clause 4.3.1. The head of the department concerned shall assign a faculty member as a mentor for each start up.

A review committee shall be formed by the Principal for reviewing the progress of the Start ups / Business models, innovativeness, etc. The review committee can recommend the appropriate grades for academic performance for the candidate(s) involved in the start ups. This course shall carry a maximum of two credits in fifth semester and shall be evaluated through continuous assessments for a maximum of 100 marks vide clause 7.1. A report about the start ups is to be submitted to the review committee for evaluation for each start up and the marks will be given to Controller of Examinations after getting approval from Principal.

7.11 In-Plant Training

Each candidate shall go for In-Plant training for a duration of minimum of two weeks during the entire programme of study and submit a brief report about the training undergone and a certificate issued from the organization concerned.

7.12 One / Twe Credit Courses

For all one/ two credit courses out of 100 marks, the continuous assessment shall be 50 marks and the model examination shall be for 50 marks. Minimum of two continuous assessments tests shall be conducted during the one / two credit course duration by the

Kongu Engineering College, Perundurai, Erode – 638060, India

offering department concerned. Model examination shall be conducted at the end of the course.

7.13 Online Course

The Board of Studies will provide methodology for the evaluation of the online courses. The Board can decide whether to evaluate the online courses through continuous assessment and end semester examination or through end semester examination only. In case of credits earned through online mode from NPTEL / SWAYAM / a University / Other Agencies approved by Chairman, Academic Council, the credits may be transferred and grades shall be assigned accordingly.

7.14 Self Study Course

The member of faculty approved by the Head of the Department shall be responsible for periodic monitoring and evaluation of the course. The course shall be evaluated through continuous assessment and end semester examination. The evaluation methodology shall be the same as that of a theory course.

7.15 Audit Course

A candidate may be permitted to register for specific course not listed in his/her programme curriculum and without undergoing the rigors of getting a 'good' grade, as an Audit course, subject to the following conditions.

The candidate can register only one Audit course in a semester starting from second semester subject to a maximum of two courses during the entire programme of study. Such courses shall be indicated as 'Audit' during the time of registration itself. Only courses currently offered for credit to the candidates of other branches can be audited.

A course appearing in the curriculum of a candidate cannot be considered as an audit course. However, if a candidate has already met the Professional Elective and Open Elective credit requirements as stipulated in the curriculum, then, a Professional Elective or an Open Elective course listed in the curriculum and not taken by the candidate for credit can be considered as an audit course.

Candidates registering for an audit course shall meet all the assessment and examination requirements (vide clause 7.3) applicable for a credit candidate of that course. Only if the candidate obtains a performance grade, the course will be listed in the semester Grade Sheet and in the Consolidated Grade Sheet along with the grade SC (Successfully Completed). Performance grade will not be shown for the audit course.

Since an audit course has no grade points assigned, it will not be counted for the purpose of GPA and CGPA calculations.

7.16 Mandatory Courses

A candidate joined in first semester shall attend and complete a mandatory course namely Student Induction Program of duration three weeks at the beginning of first semester. The candidates studying in second year shall attend and complete another one mandatory course namely Environmental Science. No credits shall be given for mandatory courses and shall be evaluated through continuous assessment tests only vide clause 7.1 for a maximum of 100 marks each. Upon the successful completion, these courses will be listed in the semester grade sheet and in the consolidated grade sheet with the grade "SC" (Successfully Completed). Since no grade points are assigned, these courses will not be counted for the purpose of GPA and CGPA calculations.

7.17 Universal Human Values (UHV) and Yoga and Values for Holistic Development (YVHD)

Courses YVHD shall be offered to all first year candidates of all BE/ BTech programmes to impart knowledge on yoga and human values. Course UHV shall be offered to all the second year BE/ BTech students. These courses shall carry a maximum of 100 marks each and shall be evaluated through continuous assessment tests only vide clause 7.1. The candidate(s) can earn 2 credits for UHV and 1 credit for YVHD by successfully completing these courses. Two continuous assessment tests will be conducted and the average marks will be taken for the calculation of grades.

8. **REQUIREMENTS FOR COMPLETION OF A SEMESTER**

- **8.1** A candidate who has fulfilled the following conditions shall be deemed to have satisfied the requirements for completion of a semester and permitted to appear for the examinations of that semester.
 - **8.1.1** Ideally, every candidate is expected to attend all classes and secure 100 % attendance. However, a candidate shall secure not less than 80 % (after rounding off to the nearest integer) of the overall attendance taking into account the total number of working days in a semester.
 - **8.1.2** A candidate who could not satisfy the attendance requirements as per clause 8.1.1 due to medical reasons (hospitalization / accident / specific illness) but has secured not less than 70 % in the current semester may be permitted to appear for the current semester examinations with the approval of the Principal on payment of a condonation fee as may be fixed by the authorities from time to time. The medical certificate needs to be submitted along with the leave application. A candidate can avail this provision only twice during the entire duration of the degree programme.

A candidate who could not satisfy the attendance requirements as per clause 8.1.1 due to his/her entrepreneurships/ start ups activities, but has secured not less than 60 % in the current semester can be permitted to appear for the current semester examinations with the recommendation of review committee and approval from the Principal.

- **8.1.3** In addition to clause 8.1.1 or 8.1.2, a candidate shall secure not less than 60 % attendance in each course.
- **8.1.4** A candidate shall be deemed to have completed the requirements of study of any semester only if he/she has satisfied the attendance requirements (vide clause 8.1.1 to 8.1.3) and has registered for examination by paying the prescribed fee.
- **8.1.5** Candidate's progress is satisfactory.
- **8.1.6** Candidate's conduct is satisfactory and he/she was not involved in any indisciplined activities in the current semester.
- **8.2.** The candidates who do not complete the semester as per clauses from 8.1.1 to 8.1.6 except 8.1.3 shall not be permitted to appear for the examinations at the end of the semester and not be permitted to go to the next semester. They have to repeat the incomplete semester in next academic year.

🥘 Kongu Engineering College, Perundurai, Erode – 638060, India

8.3 The candidates who satisfy the clause 8.1.1 or 8.1.2 but do not complete the course as per clause 8.1.3 shall not be permitted to appear for the end semester examination of that course alone. They have to repeat the incomplete course in the subsequent semester when it is offered next.

9. **REQUIREMENTS FOR APPEARING FOR END SEMESTER EXAMINATION**

- **9.1** A candidate shall normally be permitted to appear for end semester examination of the current semester if he/she has satisfied the semester completion requirements as per clause 8, and has registered for examination in all courses of that semester. Registration is mandatory for current semester examinations as well as for arrear examinations failing which the candidate shall not be permitted to move on to the higher semester.
- **9.2** When a candidate is deputed for a National / International Sports event during End Semester examination period, supplementary examination shall be conducted for such a candidate on return after participating in the event within a reasonable period of time. Such appearance shall be considered as first appearance.
- **9.3** A candidate who has already appeared for a course in a semester and passed the examination is not entitled to reappear in the same course for improvement of letter grades / marks.

10. PROVISION FOR WITHDRAWAL FROM EXAMINATIONS

- **10.1** A candidate may, for valid reasons, be granted permission to withdraw from appearing for the examination in any regular course or all regular courses registered in a particular semester. Application for withdrawal is permitted only once during the entire duration of the degree programme.
- **10.2** The withdrawal application shall be valid only if the candidate is otherwise eligible to write the examination (vide clause 9) and has applied to the Principal for permission prior to the last examination of that semester after duly recommended by the Head of the Department.
- **10.3** The withdrawal shall not be considered as an appearance for deciding the eligibility of a candidate for First Class with Distinction/First Class.
- **10.4** If a candidate withdraws a course or courses from writing end semester examinations, he/she shall register the same in the subsequent semester and write the end semester examinations. A final semester candidate who has withdrawn shall be permitted to appear for supplementary examination to be conducted within reasonable time as per clause 14.
- **10.5** The final semester candidate who has withdrawn from appearing for project viva-voce for genuine reasons shall be permitted to appear for supplementary viva-voce examination within reasonable time with proper application to Controller of Examinations and on payment of prescribed fee.

11. PROVISION FOR BREAK OF STUDY

- **11.1** A candidate is normally permitted to avail the authorised break of study under valid reasons (such as accident or hospitalization due to prolonged ill health or any other valid reasons) and to rejoin the programme in a later semester. He/She shall apply in advance to the Principal, through the Head of the Department, stating the reasons therefore, in any case, not later than the last date for registering for that semester examination. A candidate is permitted to avail the authorised break of study only once during the entire period of study for a maximum period of one year. However, in extraordinary situation the candidate may apply for additional break of study not exceeding another one year by paying prescribed fee for the break of study.
- **11.2** The candidates permitted to rejoin the programme after break of study / prevention due to lack of attendance shall be governed by the rules and regulations in force at the time of rejoining.
- **11.3** The candidates rejoining in new Regulations shall apply to the Principal in the prescribed format through Head of the Department at the beginning of the readmitted semester itself for prescribing additional/equivalent courses, if any, from any semester of the regulations in-force, so as to bridge the curriculum in-force and the old curriculum.
- **11.4** The total period of completion of the programme reckoned from the commencement of the semester to which the candidate was admitted shall not exceed the maximum period specified in clause 5 irrespective of the period of break of study in order to qualify for the award of the degree.
- **11.5** If any candidate is prevented for want of required attendance, the period of prevention shall not be considered as authorized break of study.
- 11.6 If a candidate has not reported to the college for a period of two consecutive semesters without any intimation, the name of the candidate shall be deleted permanently from the college enrollment. Such candidates are not entitled to seek readmission under any circumstances.

12. PASSING REQUIREMENTS

- **12.1** A candidate who secures not less than 50 % of total marks (continuous assessment and end semester examination put together) prescribed for the course with a minimum of 45 % of the marks prescribed for the end semester examination in all category of courses vide clause 7.1 except for the courses which are evaluated based on continuous assessment only shall be declared to have successfully passed the course in the examination.
- **12.2** A candidate who secures not less than 50 % in continuous assessment marks prescribed for the courses which are evaluated based on continuous assessment only shall be declared to have successfully passed the course. If a candidate secures less than 50% in the continuous assessment marks, he / she shall have to re-enroll for the same in the subsequent semester and satisfy the attendance requirements.

12.3 For a candidate who does not satisfy the clause 12.1, the continuous assessment marks secured by the candidate in the first attempt shall be retained and considered valid for subsequent attempts. However, from the fourth attempt onwards the marks scored in the end semester examinations alone shall be considered, in which case the candidate shall secure minimum 50 % marks in the end semester examinations to satisfy the passing requirements.

13. REVALUATION OF ANSWER SCRIPTS

A candidate shall apply for a photocopy of his / her semester examination answer script within a reasonable time from the declaration of results, on payment of a prescribed fee by submitting the proper application to the Controller of Examinations. The answer script shall be pursued and justified jointly by a faculty member who has handled the course and the course coordinator and recommended for revaluation. Based on the recommendation, the candidate can register for revaluation through proper application to the Controller of Examinations. The Controller of Examinations will arrange for revaluation and the results will be intimated to the candidate concerned. Revaluation is permitted only for Theory courses and Theory cum Practical courses where end semester examination is involved.

14. SUPPLEMENTARY EXAMINATION

If a candidate fails to clear all courses in the final semester after the announcement of final end semester examination results, he/she shall be allowed to take up supplementary examinations to be conducted within a reasonable time for the courses of final semester alone, so that he/she gets a chance to complete the programme.

15. AWARD OF LETTER GRADES:

For all the passed candidates, the relative grading principle is applied to assign the letter grades.

Marks / Examination Status	Letter Grade	Grade Point
	O (Outstanding)	10
	A+ (Excellent)	9
Based on the relative	A (Very Good)	8
grading	B+ (Good)	7
	B (Average)	6
	C (Satisfactory)	5
Less than 50	U (Reappearance)	0
Successfully Completed	SC	0
Withdrawal	W	-
Absent	AB	-
Shortage of Attendance in a	SA	-

🥸 Kongu Engineering College, Perundurai, Erode – 638060, India

course

The Grade Point Average (GPA) is calculated using the formula:

$$GPA = \frac{\sum [(course credits) \times (grade points)] \text{ for all courses in the specific semester}}{\sum (course credits) \text{ for all courses in the specific semester}}$$

The Cumulative Grade Point Average (CGPA) is calculated from first semester (third semester for lateral entry candidates) to final semester using the formula

$$CGPA = \frac{\sum [(course credits) \times (grade points)] \text{ for all courses in all the semesters so far}}{\sum (course credits) \text{ for all courses in all the semesters so far}}$$

The GPA and CGPA are computed only for the candidates with a pass in all the courses.

The GPA and CGPA indicate the academic performance of a candidate at the end of a semester and at the end of successive semesters respectively.

A grade sheet for each semester shall be issued containing Grade obtained in each course, GPA and CGPA.

A duplicate copy, if required can be obtained on payment of a prescribed fee and satisfying other procedure requirements.

Withholding of Grades: The grades of a candidate may be withheld if he/she has not cleared his/her dues or if there is a disciplinary case pending against him/her or for any other reason.

16. ELIGIBILITY FOR THE AWARD OF DEGREE

A candidate shall be declared to be eligible for the award of the BE / BTech Degree provided the candidate has

- i. Successfully completed all the courses under the different categories, as specified in the regulations.
- ii. Successfully gained the required number of total credits as specified in the curriculum corresponding to the candidate's programme within the stipulated time (vide clause 5).
- iii. Successfully passed any additional courses prescribed by the respective Board of Studies whenever readmitted under regulations other than R-2022 (vide clause 11.3)
- iv. No disciplinary action pending against him / her.

17. CLASSIFICATION OF THE DEGREE AWARDED

17.1 First Class with Distinction:

- 17.1.1. A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have passed the examination in First class with Distinction:
 - Should have passed the examination in all the courses of all the eight semesters (six semesters for lateral entry candidates) in the First Appearance within eight consecutive semesters (six consecutive semesters for lateral entry candidates) excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
 - Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
 - Should have secured a CGPA of not less than 8.50

(OR)

- 17.1.2 A candidate who joins from other institutions on transfer or a candidate who gets readmitted and has to move from one regulations to another regulations and who qualifies for the award of the degree (vide clause 16) and satisfies the following conditions shall be declared to have passed the examination in First class with Distinction:
 - Should have passed the examination in all the courses of all the eight semesters (six semesters for lateral entry candidates) in the First Appearance within eight consecutive semesters (six consecutive semesters for lateral entry candidates) excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
 - Submission of equivalent course list approved by the respective Board of studies.
 - Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
 - Should have secured a CGPA of not less than 9.00

17.2 First Class:

A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have passed the examination in First class:

- Should have passed the examination in all the courses of all eight semesters (six semesters for lateral entry candidates) within ten consecutive semesters (eight consecutive semesters for lateral entry candidates) excluding authorized break of study (vide clause 11) after the commencement of his / her study.
- Withdrawal from the examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 6.50

🛞 Kongu Engineering College, Perundurai, Erode – 638060, India

17.3 Second Class:

All other candidates (not covered in clauses 17.1 and 17.2) who qualify for the award of the degree (vide clause 16) shall be declared to have passed the examination in Second Class.

17.4 A candidate who is absent for end semester examination in a course / project work after having registered for the same shall be considered to have appeared for that examination for the purpose of classification.

17.5 Honors Degree:

A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have earned the BE/BTech degree with Honours (vide clause 16 and clause 4.2.2):

- Should have passed the examination in all the courses of all the eight semesters (six semesters for lateral entry candidates) in the **First Appearance** within eight consecutive semesters (six consecutive semesters for lateral entry candidates) excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
- Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 7.50

18. MALPRACTICES IN TESTS AND EXAMINATIONS

If a candidate indulges in malpractice in any of the tests or end semester examinations, he/she shall be liable for punitive action as per the examination rules prescribed by the college from time to time.

19. AMENDMENTS

Notwithstanding anything contained in this manual, the Kongu Engineering College through the Academic council of the College, reserves the right to modify/amend without notice, the Regulations, Curricula, Syllabi, Scheme of Examinations, procedures, requirements, and rules pertaining to its BE / BTech programme.

Semester – VIII											
Elective – VI											
31. 22AUE30 Road Transport Management	3	0	0	3	AUTO						
32. 22AUE31 Advanced Theory of IC Engines	3	0	0	3	TF						
33. 22AUE32 Automotive Product Life Cycle Management	3	0	0	3	DSN						
34. 22AUE33 Process Planning and Cost Estimation	3	0	0	3	MFG						
35. 22AUE34 Lean Methods for Automobile Engineers	3	0	0	3	MFG						
36. 22AUE35 Automotive Styling and Modeling	3	0	0	3	AUTO						
37. 22AUE36 Non-Traditional Machining Processes	3	0	0	3	MFG						
Total Credits to be earned				18							

* Domain/Stream Abbreviations: AUTO - Automobile, DSN - Design, EE – Electrical and Electronics, TF – Thermal and Fluid, MFG-Manufacturing, GE – General Engineering

22PHT14 - PHYSICS FOR AUTOMOBILE ENGINEERING

Programme & Branch	BE-Automobile Engineering	Sem.	Category	L	т	Р	Credit
Prerequisites	Nil	1	BS	3	0	0	3
Preamble	This course aims to impart the knowledge semiconductors and also select materials charact aforementioned topics in Automobile Engineering a	terization technique	s. It also des	cribe	es the	e appl	
Unit – I	Crystal Physics:	1					9
materials - Lat	Classification of solids – Space lattice – Crystal structur tice planes – Miller indices – Indices of crystal direction structure and c/a ratio – Symmetry – Symmetry eler	- Interplanar spaci	ng in cubic s	/ster	m – H	lexag	jonal close
Unit – II	Phase Diagram:						9
phase diagram	Phase rule – Phase equilibrium – Phase Diagram – Ty – Iron-Carbon phase diagram – Time-temperature-transf d relative amounts of phases present – Invariant reactio	formation diagrams	(TTT) – Lever				
Unit – III	Conducting Materials:						9
	Classical free electron theory of metals – Electrical cond r – Draw backs of classical free electron theory – Qu						
	tion and Effect of temperature on Fermi function – Dens						
distribution fund	ction and Effect of temperature on Fermi function – Dens Semiconducting Materials:	sity of energy states	- Carrier cor	ncen	tratio	n in m	netals. 9
distribution fund Unit – IV Intrinsic semico with temperatu	tion and Effect of temperature on Fermi function – Dens	sity of energy states n intrinsic semiconductors: Carrier	– Carrier cor uctor, Variatic concentratio	ncen on of n in	tratio intrir N-ty	n in m nsic c /pe a	netals. 9 onductivity
distribution fund Unit – IV Intrinsic semico with temperatu	tion and Effect of temperature on Fermi function – Dens Semiconducting Materials: onductor: Intrinsic carrier concentration, Fermi level in ar ire and determination of band gap – Extrinsic semic	sity of energy states n intrinsic semiconductors: Carrier	– Carrier cor uctor, Variatic concentratio	ncen on of n in	tratio intrir N-ty	n in m nsic c /pe a	netals. 9 onductivity
distribution fund Unit – IV Intrinsic semico with temperatu semiconductors Unit – V Importance of r working – Tra	tion and Effect of temperature on Fermi function – Dens Semiconducting Materials: Inductor: Intrinsic carrier concentration, Fermi level in ar are and determination of band gap – Extrinsic semic – Hall effect: Theory and experimental determination of	sity of energy states in intrinsic semiconductors: Carrier Hall coefficient and Scanning electron m	- Carrier cor uctor, Variatic concentratio Applications - icroscopes: p	ncen on of n in - Sol	tratio intrir N-ty ar Ce	n in m nsic c /pe a ell.	netals. 9 onductivity nd P-type 9 uction and

	SE OUTCOMES: mpletion of the course, the students will be able to	BT Mapped (Highest Level)
CO1	explain seven crystal systems, interplanar spacing in cubic lattice, c/a ratio of HCP crystal structure, symmetry elements, reciprocal lattice and the types of crystal imperfections and their impacts.	Applying (K3)
CO2	apply phase rules to realize the concepts of unary and binary phase diagrams and also time- temperature-transformation diagrams.	Applying (K3)
CO3	apply the concepts of classical and quantum free electron theory of metals to compute the electrical and thermal conductivity of metals and to comprehend the effect of temperature on Fermi function and to compute the expressions for density of states and carrier concentration in metals.	Applying (K3)
CO4	use the concept of density of states to compute the carrier concentration, electrical conductivity and band gap of intrinsic semiconductors and to compute the carrier concentration of extrinsic semiconductors, and also to explain the phenomenon related to Hall Effect and the working of solar cell.	Applying (K3)
CO5	apply the concepts of X-ray diffraction, SEM, TEM, FTIR and Raman effect to analyze the properties of materials using the aforementioned appropriate characterization techniques.	Applying (K3)

Prerequisites	Nil	1/2	PC	3	0	0	3
Preamble	This course provides knowledge to represent engequilibrium under static and dynamic conditions	gineering system as a	force system	and	solve	the s	system for
Unit – I	Statics of Particles:						9
Resultant of force	laws of mechanics - System of forces - Principle of t es in plane and space - Equilibrium of a particle in pla tant force acting on various automotive components.						
Unit – II	Statics of Rigid Bodies:						9
- Resultant mom hinges in doors a loads - Better pos	ple - Vectorial representation of moment and couple - ent and couple in plane and space - Equilibrium of ri and bonnet - Moment about fixed joint in foot rest - Lo sition to hold a spanner - Best position to mount hydra	gid bodies in plane ar ocation of door locks -	nd space. App Overturning	olicat	ions	- Mon	nent abou ifting large
Unit – III	Friction:						9
Introduction and friction - Belt frid Horizontal force r	laws of dry friction - Coefficient of friction - Angle of f ction - Wheel friction and rolling resistance. Applica required to overcome rolling resistance of a vehicle - N	tions - Coefficient of	friction requ	ired	to m	ove a	vehicle
Introduction and friction - Belt frid Horizontal force in torque in disc and Unit – IV First moment of theorem - Polar r	laws of dry friction - Coefficient of friction - Angle of f ction - Wheel friction and rolling resistance. Applica required to overcome rolling resistance of a vehicle - N	tions - Coefficient of Maximum load a vehic plane areas - Paralle	friction requ le can pull - 1 el axis theore	ired Tensi m ar	to m ion in nd pe	ove a V bel	t vehicle t - Braking 9 icular axis
Introduction and friction - Belt frid Horizontal force in torque in disc and Unit – IV First moment of theorem - Polar r	laws of dry friction - Coefficient of friction - Angle of f ction - Wheel friction and rolling resistance. Applica required to overcome rolling resistance of a vehicle - N d drum brakes. Properties of Surfaces and Solids: area and centroid of sections - Moment of inertia of noment of inertia and product of inertia - Principal mod	tions - Coefficient of Maximum load a vehic plane areas - Paralle	friction requ le can pull - 1 el axis theore	ired Tensi m ar	to m ion in nd pe	ove a V bel	t vehicle t - Braking 9 icular axis

Pream	ble	The course aims to provide exposure to problem-solvir fundamental concepts of C Programming. This course provid C	ng through des adequi	n programmir ate knowledge	ng. I e to s	t int solve	roduc probl	es all the ems using
Unit –	I	Introduction to C and Operators:						9
		C program – Compiling and executing C program – C Token Variables – constants – Input / Output statements – Operators		cter set in C	– Ke	eywo	rds –	identifiers
Unit –	II	Control Statements and Arrays:						9
		d looping statements, Arrays: Declaring, initializing and a and their operations.	ccessing a	rrays – oper	atior	ns or	arra	ys – Two
Unit –		Functions:						9
		on- Using functions, function declaration and definition – func	tion call –	return statem	ent -	- pas	sing p	arameter
		ata types and arrays – storage classes – recursive functions						
Unit –		Strings and Pointers:						9
manip		 operations on strings: finding length, concatenation, cons, Arrays of strings. Pointers : declaring pointer variables – p strings 						
Unit –	V	User-defined Data Types and File Handling:						9
enume	erated data type	ypes: Structure: Introduction – nested structures– arrays c be. File Handling : Introduction - opening and closing files – r seek(), ftell() and rewind()						
		ENTS / EXERCISES:

22CYT26 – CHEMISTRY FOR AUTOMOBILE ENGINEERING

Programme & Branch	B.E & Automobile Engineering	Sem.	Category	L	т	Ρ	Credi
Prerequisites	Nil	2	BS	3	0	0	3
Preamble	This course aims to emphasize the engineering s & batteries, fuel cells, fuels & combustion and the					hemis	try, cells
Unit – I	ELECTROCHEMISTRY						9
calculation of cell hydrogen electroc	s - types - representation of galvanic cell – electrode p EMF from single electrode potential – reference elec de, standard calomel electrode, glass electrode – EMF ometric titrations – mixture of weak and strong acid vs	trodes: construction, series and its applic	working and a	appli	catior	ns of s	standard
Unit – II	CELLS AND BATTERIES						9
series/ parallel co battery: lithium ior ion batteries by di	rging and charging of battery - characteristics of batter nnection of batteries – primary battery: silver button c n - advantages of Li-ion battery as an electrochemical irect cycling method - brief introduction of Na- ion batt ric vehicle applications.	ell - secondary batter energy system for el	y: Lead-acid, ectric vehicles	Ni-C s - re	d bat cyclii	ttery - ng of I	modern _ithium-
Unit – III	FUELS AND COMBUSTION						9
varieties – proxim petroleum – manu number, compres Bharat Stage Emi	ation of calorific value by Dulong's formula - flue gas a ate analysis – significance – metallurgical coke - Otto ufacture of synthetic petrol - hydrogenation of coal - be sion ignition engine - cetane number - power alcohol ission Standard (BSES) system.	-Hoffman byproduct r ergius process - knoc	method - liquio king: spark ig	d fue nitio	el - re [:] n eng	fining jine - (of octane stion of
Unit – IV	HYDROGEN FUEL AND FUEL CELLS						9
splitting), Biologica absorbing materia Fuel Cell: Introdu principle, compon	ntroduction - Hydrogen - technology for hydrogen gen al hydrogen - Hydrogen utilization - Hydrogen storage - als, Liquid storage, Underground storage - applications iction - Role of fuel, oxidant, electrolyte with example ents and applications of fuel cells: alkaline fuel cell, pi cid fuel cell, molten carbonate fuel cell, solid oxide fue	Compressed gas in s in hydrogen fuel cel - Importance and clas roton exchange mem	pressure vess lls. ssification of f brane fuel cel	sels, uel c I, dir	Hydr ells - ect m	ogen descr nethar	iption, iol fuel
Unit – V	CORROSION AND ITS CONTROL METHODS			3			9
 differential aera (wt. loss method c Control methods metallic coating 	duction - chemical corrosion – Pilling-Bedworth rule - e tion corrosion with examples - galvanic series - factor only). s – sacrificial anodic protection method - corrosion inh : electroplating, electroless plating and hot dipping (tir ic coating: paints, constituents and functions - cerami	s influencing rate of c ibitors - protective co nning and galvanizing	corrosion – me atings - pretre	easu eatm	reme ent o	nt of c f meta	corrosion

	SE OUTCOMES: mpletion of the course, the students will be able to	BT Mapped (Highest Level)
CO1	apply the principles of electrochemistry for various applications	Applying (K3)
CO2	employ the concepts of cells, batteries and its applications in automobiles.	Applying (K3)
CO3	apply the concepts of fuels and combustion for engineering applications	Applying (K3)
CO4	use the concepts of hydrogen fuel, fuel cells and its applications in automobiles.	Applying (K3)
CO5	make use of corrosion control methods to solve corrosion related issues.	Applying (K3)

Programme & B.E - MECH, MTS & Automobile Sem. Category L T P Cree Branch NI 2 BS 0 0 2 1 Prerequisites NII space BS 0 0 2 1 Preamble This course aims to impart the basic concepts of volumetric, conductometric, complexometric apability to engineering students. It also aims to impart the knowledge on the estimation any term any term capability to engineering students. It also aims to impart the knowledge on the estimation of strength of an unknown solution using pH meter. 2. Analysis and comparison of the strength of acids in the given mixture using conductivity meter.				(Common to MI	ECH. MTS and		IOBILE	Branch	es)					
Preamble This course aims to impart the basic concepts of volumetric, conductometric, complexometric, adorimetric, pathentiometric, spectrophotometric experiments and thereby to improve analytical capability to engineering students. It also aims to impart the knowledge on the estimator Fe, Ni, S, Ca & Mg, DO, COD in mechanical applications. LIST OF EXPERIMENTS / EXERCISES:										L	т	Ρ	Credit	
calorimetric, p1 meteric, potentiometric, spectrophotometric experiments and thereby to improve analytical capability to engineering students. It also a ims to impart the knowledge on the estimation Fe, Ni, S, Ca & Mg, DO, COD in mechanical applications. LIST OF EXPERIMENTS / EXERCISES: 1. Determination of strength of an unknown solution using pH meter. 2. Analysis and comparison of the strength of acids in the given mixture using conductivity meter. 3. Potentiometric approach using a calomel electrode for the estimation of iron in the given sample. 4. Spectrophotometric method for the determination of Iron in steel. 5. Determination of molecular weight of a polymer / liquid by Ostwald viscometer. 6. Quantitative analysis of nickel in steel by complexometric method. 7. Estimation of the given water sample for the suitability of drinking / industrial purpose by estimating the calcium magnesium and total hardness by EDTA method. 9. Determination of COD of the given wastewater sample. 10. Determination of COD of the given wastewater sample. 11. Flectroplating process (Demonstration). 12. Proximate analysis of Coal - determine moisture, volatile matter and ash content of a given sample coal. Total REFERENCES/ MANUAL /SOFTWARE: 1. Preamble	This course deals with the basic knowledge of automoti	ive Electricals a	nd Electronic	s coi	mnon	ents	
reamble				5 001	npon		
Jnit – I	DC Circuits:						9
	ve devices - Examples –Resistor – Capacitor – Inductor – O k Reduction -Voltage and Current Division Rule - Mesh Ar						
Unit – II	AC Circuits:						9
	soidal) Voltage and Current, R.M.S and Average Value, Pov & RLC. Introduction to three phase Systems (Qualitative only					ctor -	AC Serie
Unit – III	Semi-Conductor Devices:						9
Diode - LED– P	niconductors and Insulators - Properties of Semiconductors noto diode - LDR- Transistors: Principle of Operation - Stat ction Linear IC - Opamp – IC555 Timer						
Unit – IV	Boolean Algebra and Logic gates :						9
3oolean Algebr 3oolean expres	 a - Number systems - Complements - Boolean postulates ions - Canonical forms - Logic Gates -Implementations of Lo 	and laws - De ogic Functions u	-Morgan"s Tl sing universa	neor I Ga	em - tes -	Minir Karna	nization c lugh map
Jnit – V	Combinational and Sequential circuits:						9
	ombinational circuits - Half adder – Full adder – Half subt der – Parity generator and checker - Magnitude comparator						
	Flip-flops – SR, JK, D, T Flip-flops			CIIC	uns –		162 – 1 11
	IMENTS / EXERCISES:						
1. Design	and implementation of voltage divider circuit for automotive a	pplications					
2. Charac	eristics of PN junction diode						
3. Charac	eristics of Zener diode						
4. Charac	eristics of LDR						
5. Linear (p-Amp circuits - Inverting and Non inverting Amplifiers						
6. Input ar	d output characteristics of transistor under CE configuration						
7. Verifica	ion of Boolean theorems using digital logic gates						
8. Design	and implementation of half adder and full adder using digital I	logic gates					
9. Design	and implementation of Multiplexer and demultiplexer using di	igital logic gate	S				
10. Design	and implementation of Flip-flop using digital logic gates

22AUT31 - MECHANICS OF DEFORMABLE BODIES

Programme & Branch	B.E. – Automobile Engineering	Sem.	Category	L	т	Р	Credit
Prerequisites	Statics and Dynamics	3/4	PC	3	1	0	4
Preamble	This course provides knowledge to evaluate performance loads by analyzing stresses, strains and deformate		ng structure de	ue to	vario	ous ex	ternal
Unit – I	Stress, Strain and Deformation of Solids:						9+3
	aterial properties – Stress-strain curve for ductile and nstants and their relationship. Stresses and strains du rs. Strain energy.						
Unit – II	Analysis of Stresses in Two Dimensions:						9+3
shear stress - M	at a point - Normal and shear stresses on inclined p lohr's circle for biaxial stress with shear stress. Hoop in dimensions and volume.						
Unit – III	Loads and Stresses in Beams:	n Manant in haam	Cantilaus	:	an a la c		9+3
Unit – III Types of beams overhanging bea							orted and along the
Unit – III Types of beams overhanging bea length and section Unit – IV	Loads and Stresses in Beams: - Supports and Loads - Shear force and Bendin ms - Point of contraflexure. Theory of simple bendin n of the beam - Section modulus. Deflection of Beams and Columns:	ng - Bending and she	ear stress - S	Stres	s var	iation	orted and along the 9+3
Unit – III Types of beams overhanging bea length and section Unit – IV Slope and Deflec	Loads and Stresses in Beams: - Supports and Loads - Shear force and Bendin ms - Point of contraflexure. Theory of simple bendin n of the beam - Section modulus.	beams - Double integ	ear stress - S ration method	Stres and	s var	iation aulay	orted and along the 9+3 's method

	SE OUTCOMES: mpletion of the course, the students will be able to	BT Mapped (Highest Level)
CO1	analyze mechanical behavior of materials under simple tension or compression for varying cross sections.	Analyzing (K4)
CO2	calculate principal stresses and strains to analyze automotive components.	Analyzing (K4)
CO3	examine the theory of simple bending to design automotive chassis frame.	Analyzing (K4)
CO4	inspect beam and column strength with help of slope and deflection for various loads.	Analyzing (K4)
CO5	analyze shafts and springs based on torsional behavior.	Analyzing (K4)

Preamble	This course deals with core python programming. It gives a constructs and libraries.	comprehensive in	troduction to p	oroble	m sol	ving usi	ng python
Unit – I	Introduction:						9
types – input opera	rategies – program design tools – Types of errors – Testing and I tion – comments – reserved words – indentation – Operators and action – conditional statement – iterative statements – Nested Lo	Expressions – De	cision Control				
Unit – II	Lists, Tuples and Dictionary:						9
assignments, return	ate, nested, cloning, operations, methods, comprehensions, loc ning multiple values, nested tuples, index and count method -1 shods -1 st vs tuple vs dictionary.						
Unit – III	Strings and Regular Expressions:						9
	tion, append, multiply on strings – Immutable – formatting op ors – comparing – iterating – string module – Regular Expres						
Unit – IV	Functions and Modules:						9
	ction – definition – call – variable scope and lifetime – return sta ing practices recursive function- Modules: Modules – packages						uocumentati
Unit – V	Object Orientation:				1:		9
	Class and objects – class methods and self – constructor – class a NumPy Arrays – Computation on NumPy Arrays. Matplotlib : L			– pub	lic an	a privai	e data
	IMENTS / EXERCISES:						
	using conditional and looping statements						
2. Implemen	tation of list and tuple operations						
3. Implemen	atation of dictionary operations						
4. Perform v	arious string operations						
5. Use regul	ar expressions for validating inputs						
6. Demonstr	ation of different types of functions and parameter passing						
7. Develop j	programs using classes and objects						
Q Doutours	omputation on Numpy arrays						
8. Perform c	omputation on rampy analys						
	erent types of plots using Matplotlib

	SE OUTCOMES: mpletion of the course, the students will be able to	BT Mapped (Highest Level)
CO1	design and implement electrical circuits for automotive applications	Applying (K3), Precision (S3)
CO2	illustrate the circuit diagram for the starting and charging systems with the characteristics of the starter motor and alternator.	Understanding (K2), Precision (S3)
CO3	explain the various ignition systems with advance and retard mechanisms.	Understanding (K2), Precision (S3)
CO4	describe various power electronic devices with their characteristics and functions.	Understanding (K2), Precision (S3)
CO5	demonstrate different types of electric motors with different control strategies.	Applying (K3), Precision (S3)

22AUC51 - VEHICLE DYNAMICS

Programme Branch	B.E. & Automobile Engineering	Sem.	Category	L	т	Ρ	Credit
Prerequisite	Statics and Dynamics	5	PC	3	0	2	4
Preamble	This course provides knowledge on dynamic, hand	ing and ride perform	nance charac	torie	tice o	fvobi	cles
rieanible	This course provides knowledge on dynamic, hand	ing and nue perion		10113	105 0	i vern	0105
Unit – I	Acceleration Performance:						9
Dynamic axle	Fundamental approach to modeling - Vehicle fixed coordi loads - Level roads and grades. Acceleration performance active force, acceleration and gradeability.						
Unit – II	Braking Performance:						9
	gram of decelerating vehicle, brake force distribution, maxir	num decelerating r	ates, maximu	m bi	aking	force	e, stoppin
Unit – III	raking efficiency. Consequence of wheel lock up. Tire Dynamics:						9
	d moments - Tire axis system - Rolling resistance of a tire	e - Tire soil interact	ion - Conicity	anc	l ply :	steer.	
	res and camber thrust. Various tire Models - Brush model,	Magic formula mod	el.				
Unit – IV	Handling Characteristics:	Standy state com	oring otoori	a fa	otoro	Vahi	9
parameters -	rnering and static steering - Ackerman steering geometry. under steer, neutral steer, over steer, roll steer, complia ral acceleration gain, characteristic speed, yaw velocity gain	nce steer, ride ste	er and slip a	angle	e stee	er. Ste	eady stat
Unit – V	Ride Characteristics:						9
	nse to vibration, Ride models - Quarter car, Half car mping, and tire stiffness. Control law for LQR, H-infinite an			of	suspe	ension	stiffness
LIST OF EXP	ERIMENTS / EXERCISES:						
1. Calci	late static and dynamic axle loads of a vehicle						
2. Evalu	ate tractive force and acceleration parameters of a car						
3. Estin	ate braking torque of disc and drum brakes						
4. Analy	ze braking performance of a car						
5. Com	are stiffness of car tire and truck tire for different payload						
6. Com	ute tire forces, offset and self-aligning torque						
7. Calci	late cornering resistance of a four axled truck for various st	eering angles					
8. Evalu	ate steady state cornering characteristics of a vehicle						
9. Estin	ate ride comfort using quarter car model at constant velocit	y on a random road	ł				
10. Analy	ze dynamics of a quarter car model with non-linear spring a	and sky hook damp	er crossing ar	n obs	stacle

	SE OUTCOMES: mpletion of the course, the students will be able to	BT Mapped (Highest Level)
CO1	illustrate the power unit and its subsystems on a two-wheeler.	Understanding (K2)
CO2	explain the two-wheeler chassis and transmission systems.	Understanding (K2)
CO3	describe the types of brakes and wheels used in two-wheelers.	Understanding (K2)
CO4	outline the construction and working concepts of an electric two-wheeler.	Understanding (K2)
CO5	summarize the types of three-wheelers and their systems.	Understanding (K2)

## 22AUE14 - COMPUTATIONAL FLUID DYNAMICS

Programme & Branch	B.E. – Automobile Engineering	Sem.	Category	L	т	Ρ	Credit
Prerequisites	Mechanics of Fluids and Hydraulic Machines	7	PE	3	0	0	3
Preamble	This course involves on the application of numerical method In addition, the course also provides an introduction into tu of CFD in vortices and eddies.						
Unit – I	Governing Equations and Boundary Conditions:						9
Momentum and E	ons and Boundary Conditions: Basics of Computational Fluid nergy Equations – General Transport Equation – Physical Bour on CFD –Elliptic - Parabolic - Hyperbolic Equations.	Dynamics ndary Con	<ul> <li>Governing</li> <li>ditions – Disc</li> </ul>	Equ retiz	ation ation	s – C – Ma	ontinuity thematica
Unit - II	Finite Difference Method:						9
- Implicit Method -	Method: Finite Difference Method – Taylors Series – Forward - ( – Tridiagonal Matrix-Application of the TDMA to Two-Dimension Elliptic Equations – Errors.						
Finite Volume Me	Finite Volume Method: thod: Finite Volume Formulation for Steady-State - One - Two						
Finite Volume Me Parabolic Equation One-Dimensional Properties of Disci	thod: Finite Volume Formulation for Steady-State - One - Two ns – Explicit - Implicit Schemes - Unsteady Heat Conduction of Convection and Diffusion – Central - Upwind Differencing Sch retization Schemes.	n Elliptic a	nd Parabolic	Equa	ations	s - Ste	roblems eady State chemes

	SE OUTCOMES: mpletion of the course, the students will be able to	BT Mapped (Highest Level)
CO1	explain the basic concepts of vehicle safety.	Understanding (K2)
CO2	illustrate about the biomechanics and occupation simulation process.	Understanding (K2)
CO3	summarize the vehicle body and simulation tests requirement.	Understanding (K2)
CO4	describe about the occupant protection and interrelationships of various parameters.	Applying (K3)
CO5	discuss the pedestrian protection and computer simulations in safety tests.	Applying (K3)

COUR	SE OUTCOMES:	BT Mapped						
On co	mpletion of the course, the students will be able to	(Highest Level)						
CO1	illustrate interviewing and training procedures for drivers and conductors.	Understanding (K2)						
CO2	exemplify public & vehicle issues with the help of motor vehicle act.	Understanding (K2)						
CO3	identify appropriate tax and insurance policies for their own vehicle.	Applying (K3)						
CO4	analyze the operation costs and revenues of transport operations.	Applying (K3)						
CO5	explain the management principles involved in maintenance.	Understanding (K2)						
Mapping of COs with POs and PSOs								

## Mapping of COs with POs and PSOs

	SE OUTCOMES: mpletion of the course, the students will be able to	BT Mapped (Highest Level)
CO1	explain the importance of combustion principles with various characteristics.	Understanding (K2)
CO2	examine the Performance of the homogenous charge compression ignition combustion with various injection techniques.	Applying (K3)
CO3	Interpret the performance of the HCCI engine with alternate fuels used for novel combustion.	Applying (K3)
CO4	Determine the performance and possible outcomes of low temperature and premixed combustion technology.	Applying (K3)
CO5	illustrate the performance of RCCI engine with alternative fuels.	Applying (K3)

	OURSE OUTCOMES: n completion of the course, the students will be able to						
CO1	describe the importance of lean manufacturing and its elements.	Understanding (K2)					
CO2	identify appropriate lean methods to solve the problem.	Applying (K3)					
CO3	apply suitable algorithms and primary LMS tools to solve the problems.	Applying (K3)					
CO4	solve the given problem using secondary LMS tools.	Applying (K3)					
CO5	explain the various rules of the LMS.	Understanding (K2)

Preamble	This course serves as an introduction to the German languag cultural aspects of Germany and German speaking countries the basic day to day vocabulary. On keen learning one would be able to reciprocate to basic questions	. One can lea	arn to introduc	e one	self a	ind ab	le to gai
Unit – I	Good Day (Guten Tag)						12
	introduction and introducing others, Numbers, Alphabets, Countrie es, Verb conjugation and personal pronoun.	es and langua	ages spoken.	Gram	mar	– W (	questions
Unit – II	Friends & Colleague (Freund und Kollegen):						12
Hobbies, Profequestions.	ssion, Week, Months, Season and Generate Profile. Grammar –	Articles, Plu	ural, Verbs -	have	and	to be	e, Yes/N
Unit – III	n the City (In der Stadt):						12
	/buildings in the city, asking for directions, Understanding means of s and Imperative	transport. G	rammar – defi	nite a	nd in	definit	e articles
Unit – IV	Food and Appointment (Essen und Termin):						12
Understanding	g, initiate conversations to understand and do shopping. Gran time and reciprocating, Appointments, Asking excuse, Family. Gran lein, Modal verbs- <i>müssen, können, wollen</i>						
Unit – V	Socializing (Zeit mit Freunden):						12
	er, Birthday, Invitation, Restaurant, looking for specific information case, Past tense of have and to be, Personal pronoun with Accusat		ammar – Sepa	arable	verb	os, Pre	eposition

	SE OUTCOMES: npletion of the course, the students will be able to	BT Mapped (Highest Level)
CO1	utilize the appropriate theory and models to comprehend the thin film growth process.	Applying (K3)
CO2	apply the principle of vacuum pump to explain select methods to create vacuum and to make use of the principle of vacuum gauge to explain the measurement of vacuum by select methods.	Applying (K3)
CO3	describe the deposition of thin films by select physical methods using the principle of working of respective methods.	Applying (K3)
CO4	explain the deposition of thin films by select chemical methods using the principle of working of respective methods.	Applying (K3)
CO5	make use of select characterization techniques to comprehend the properties of thin films and also to illustrate the various device applications of thin films.	Applying (K3)

# 22PHO02 - HIGH ENERGY STORAGE DEVICES (Offered by Department of Physics)

Programme& Branch	All BE/BTech Branches	Sem.	Category	L	Т	Ρ	Credit
Prerequisites	Nil	5	OE	3	1	0	4
Preamble	This course aims to impart the essential knowledge on the fund technologies and materials for energy storage solutions, togeth engineering field.						
Unit – I	Introduction to Energy Storage:						9+3
electrical energ storage – Gene	energy storage systems (qualitative): Thermal energy storage, me y storage, electrochemical energy storage, electrostatic energy sto eral criteria of energy storage systems – Conventional batteries: fu storage systems and requirements.	orage, ma	gnetic energy	stora	ge ar	nd op	ical energy
Unit – II	Thermal storage and Mechanical Storage:						9+3
operations - M	ge: Thermal properties of materials, principle of operations, e erits and demerits of thermal storage system – Recent developmer anical storage systems, principle of operations, emerging advance	nt in therm	al storage sys	tems	. Mec	hanic	al Storage:
Unit – III	Magnetic storage, Electro-optic, Optical and Chemical Stora	age:					9+3
storage: Emerg	ge: Principle of operation, emerging challenges and a review on ging devices and upcoming technologies (qualitative). Chemical s – Bio fuels – Aluminum-Boron, silicon, and zinc.					-	-
Unit – IV	Electrochemical Storage:						9+3
operation, batte	ciple of operation, positive electrode materials, negative electrode ery components, design of electrodes, cell and battery fabrications tteries – Applications – Future developments: Sodium-battery, r	– Building	block cells -	Batte	ry mo	dules	and packs
Unit – V	Fuel Cells, Hydrogen storage and Super capacitors:						9+3
fuel cells and stanks, cryogen	oduction to fuel cells, PEM (polymer electrolyte membrane), Hydrog solid oxide fuel cells. Hydrogen storage systems: Solid state hydr c hydrogen storage tanks and liquid phase hydrogen storage tank of operation, performance and technologies of super capacitors.	ogen stor	age tanks, ga	s pha	ase h	ydrog	en storage

# 22CYO03 – ORGANIC CHEMISTRY FOR INDUSTRY

# (Offered by Department of Chemistry)

Programme & Branch	All BE / BTech Branches	Sem.	Category	L	т	Р	Credit
Prerequisites	Nil	5	OE	3	1	0	4
Preamble	Organic Chemistry for Industry aims to equip the student chemistry in order to meet the industrial needs.	ts to ha	ve wide-rang	ge k	nowl	edge	on organic
Unit – I	Basic aspects of Organic Chemistry						9+3
Organic intermedia synthetic applicatio Saytzeff's rule).	tes: carbocations, carbanions, free radicals, carbenes and nit ns- Nucleophilic uni- and bimolecular reactions (SN1 and SN2	trenes, t 2)- Elimi	heir method nation reaction	of fo ons	ormat (E1 &	ion, s & E2;	stability and Hoffman 8
Unit – II	Molecular Rearrangements						9+3
Migration of carbon	g electron deficient, carbon, nitrogen, oxygen centers, emphas : Wagner-Meerwein, Pinacol-pinacolone, benzyl-benzilic acid re imann, Curtius, Lossen rearrangements- Migration of oxygen: Ba	arrangei	nent – Migra	tion o			
Unit – III	Synthetic Reagents & Applications						9+3

Pream	ble	This course aims to provide knowledge on chemistry of cosmetic	s for eng	ineering stud	ents			
Unit - I		Formulation of Cosmetic Product						9+3
and for	am (foam fo	c sciences of cleansing – surfactant and adsorption, surfactant r prmation, stability, drainage, rupture and collapse and defoamin faces and barriers – basics of emulsion (stability, Ostwald ripening	ig) - bas	sics of disper	sion	s - e	lectric	al charges
Unit - I		Structuring Materials and Regulation for Cosmetics						9+3
function and pe india -	ns and effec rsonal care future challe	r/hydrophilic base materials, oleaginous/hydrophobic base materia ts - materials that add or improve functional value, emotional value product safety – potential contaminants in cosmetics – regulations inges in cosmetics material development.	e and ma	iterials for qua	ality	contr	ol – co	osmetic Ilation in
Unit - I	II	Polymers in Cosmetic Products						9+3
polyme control	ers in cosme led release r	etics - polymer solubility and compatibility, polymer conformation tics and personal care products - hair-conditioning polymers - po- matrices - dendritic polymers - polymeric antimicrobials and bacter	olymers	ners that moo for the treatm	lify s nent	of sk	es - f in - p	ilm-forming olymers as
Unit - I		Natural Products and Fragrance in Cosmetics						9+3
	ns - aroma	ral products – extraction methods - encapsulation and controlled chemicals - fragrance creation and duplication - fragrance app						
Unit - V	/	Preparation of Cosmetics						9+3
		o day life – characteristics, types, formulation, preparation and eva s, toothpaste and hair dye.	luation n	nethods of lip	stick	, sha	mpoo	, powder,

#### 22CYO06 – NANOCOMPOSITE MATERIALS (Offered by Department of Chemistry)

Programme& Branch	All BE / BTech Branches	Sem.	Category	L	т	Р	Credit
Prerequisites	Nil	6	OE	3	1	0	4
Preamble	This course aims to equip the students to have knowle features and applications of nanocomposites.	dge on p	processing, c	hara	cteriz	ation	, properties,
Unit – I	Introduction of nanocomposites						9+3
	composites – nanocomposites past and present – nomencla lar solids – role of statistics in materials – primary, secondary						on to solids -
Unit - II	Properties and features of nanocomposites						9+3
and nanocomposite	of modulus – continuum measurements – yield – fracture – es – surface mechanical properties –diffusion and permeabilit nano reinforcements – matrix materials – hazards of particles.						
Unit - III	Processing of nanocomposites						9+3
kinetic processes. Unit - IV Introduction to cha	h small shears or low-shear rates flow, meltprocesses with Characterization of nanocomposites aracterization – experiment design – sample preparation – texture – electromagnetic energy –visualization – physico	imaging	-structural c	hara	cteriz	ation	<b>9+3</b> - scales in
properties. Unit - V	Applications of nanocomposites						9+3
Nanocomposites – protein nanocompo	optical, structural applications – nanoparticulate systems wit osites – applications-polypropylene nanocomposites – applic terials – application for corrosion protection.		exterior autor	natic	com	ipone	
			Lecture.	чэ,	Tuto		J, 10tal. 00

### 22CYO08 - CHEMISTRY IN EVERY DAY LIFE (Offered by Department of Chemistry)

Programme& Branch	All BE / BTech Branches	Sem.	Category	L	т	Р	Credit
Prerequisites	Nil	7	OE	3	0	0	3
Preamble	This course aims to prepare the students to have the k creams, milk powder, soil, fertilizer, pesticides, insecticid chemistry in our everyday activities.						
Unit – I	Oils, Fats and Sugar						9
	en oils and fats – properties – classification – edible oils – v – refining of crude vegetable oils – processing of animal fa root.						
Unit – II	Adulterants in food						9
	and prevention – common food adulterants – food additives - vsis of adulterants in edible oils, coffee powder, chilli powd food adulterants						
Unit – III	Creams and Milk powder						9
	ition-chemistry of creaming process- Factors influencing creat lilk powder: Need for making powder-drying process- spraying						
Unit – IV	Soil and Fertilizers	aidite but			i la	. 1	9
Soil analysis: Cor Fertilizers: primar fertilizers and its o	mposition of soil - Organic and Inorganic constituents-Soil a y nutrients –role of Nitrogen, potassium and phosphorous composition - Secondary nutrients – micronutrients and their	on plant	growth –Com	plex	ferti	lizers	ing of soil and mixe

# DEGREE & PROGRAMME : B.E & AUTOMOBILE ENGINEERING

### HONOURS DEGREE TITLE: E-Mobility

The following courses are identified to earn additional 18 credits to get a Honours degree with specialization in **E-Mobility** 

S.No	Course Code	Course Title	Credits	Prerequisites	Semester
1.	22AUH01	Automotive Communication Protocols	4	Nil	5
2.	22AUJ01	Power Electronics and Drives	4	Basics of Electrical and Electronic Circuits	5
3.	22AUH02	Automotive IOT Technologies	4	Nil	6
4.	22AUH03	Advanced Energy Storage Management	3	Nil	6
5.	22AUH04	Advanced Vehicle Technologies	3	Automotive Electrical Systems and Drives, Automotive Sensors and Controllers	7
		TOTAL	18		

Programme &	22AUH01 - AUTOMOTIVE COMMUNI					_	
Branch	B.E. – Automobile Engineering	Sem.	Category	L	Т	Р	Credit
Prerequisites	Nil	5/6/7	HN	3	1	0	4
Preamble	This course provides knowledge on data communica diagnostic protocols.	tion, networking, a	automotive co	mmı	unicat	ion ar	nd
Unit – I	Controller Area Network:						9+3
bit stuffing - da CAN 2.0B.	bcol - ISO/OSI layers –Properties of CAN - CAN 2.0A stan a frame - Errors - Error detection - The rest of the frame -C						12.0A an
Unit – II	CAN Physical Layer:						9+3
Estimating the	AN bit - Nominal bit time - CAN and signal propagation – N alue - Precise - Corollaries: relations between the medium ation -Network speed –Bit rate - Latency.						
Unit – III	Time-Triggered protocols:						9+3
	communication on CAN – high-speed - X-by-Wire and frame - Architecture of a FlexRay node - Electronic compo						nandling
Unit – IV	Multiplexed Bus Concepts:						9+3
Vehicle - Wire Conformity of L	l and wireless communication - Basic concept of the LI N - Fail-safe SBC approach - Safe-by-Wire Plus - Audio–V	N 2.0 protocol - 0 'ideo Buses - I2C	Operating pri Bus - MOST E	ncipl Bus.	e - C	Data li	nk layer
Unit – V	Wireless Communication:						9+3
	y Communication – Internal - External - Control of opening I - Bluetooth -IEEE 802.11x – NFC.	g parts - Passive k	eyless entry a	and p	bassiv	ve go	- Wireles

### 22AUH03 - ADVANCED ENERGY STORAGE MANAGEMENT

Programme & Branch	B.E Automobile Engineering	Sem.	Category	L	Т	Ρ	Credit
Prerequisites	Nil	5/6/7	HN	3	0	0	3
Preamble	This course aims to impart the essential knowledge or advanced energy storage management.	n the fundamenta	I principles ar	nd ap	oplica	ation i	า
Unit – I	Introduction to Energy Storage:						9
Electrical Energy Energy Storage	energy storage systems: Thermal Energy Storage, Me v Storage, Electrochemical Energy Storage, Electrostatic – General criteria of energy storage systems - Conven off grid energy storage systems and requirements.	Energy Storage,	Magnetic En	ergy	Stor	age a	nd Optica
Unit – II	Thermal storage and Mechanical Storage:						9
	rits and demerits of thermal storage system - Recent of mechanical storage systems, Principle of operations, - Flywheel.  Magnetic storage, Electro-optic and Optical storage	Emerging adva		-	-		
	<ul> <li>Principle of operation, Emerging challenges and a review</li> </ul>						-
					rtro_c	ntic s	nd ()ntic
storage: Principle	es of operation, Device fabrication, Emerging devices and l			Eleo	ctro-c	ptic a	ind Optica
				Elec	ctro-c	ptic a	nd Optica
Unit – IV	es of operation, Device fabrication, Emerging devices and l	Jpcoming techno	logies.				9
<b>Unit – IV</b> Materials, Princip	es of operation, Device fabrication, Emerging devices and L Electrochemical Storage:	Jpcoming techno	logies. electrolytes.	Li-ic	on ba	tteries	9 S: Princip
<b>Unit – IV</b> Materials, Princip of operation, Batt	es of operation, Device fabrication, Emerging devices and L Electrochemical Storage: Dele of Operation, Positive electrode materials, negative ele	Upcoming techno ectrode materials, abrications - Buil	logies. electrolytes. ding block ce	Li-io	on ba Batte	tteries	<b>9</b> s: Princip odules an
