Prerequisites	NIL	1	CC	30	0	0	30	60	3
Preamble	This course provides a comprehensive exploration of management principles and organizational design, encompassing historical perspectives, contemporary models, and decision-making processes. Students will delve into the intricacies of organizational structure, internal and external environmental factors, and the art of effective decision-making in the dynamic landscape of business management.								
Unit – I	Management								6
Management: Levels of Management – Management Functions–Mintzberg's Managerial Roles and a Contemporary Model of Managing. Management History Module: Classical Approach, Behavioral Approach, Quantitative Approach, Contemporary Approach									
Unit – II	Organizational Structural Design:								6
Designing Organizational Structure: Six elements of Organizational Design – Mechanistic & Organic Structures – Contingency factors affecting structural choice – Traditional Organizational Design Options – Organizing for Flexibility in 21 st century									
Unit – III	Internal Design Elements								6
Internal Design Elements: Organizational Size –Organizational Life Cycle – Bureaucracy and Control - Forms of Control - Organizational decline and downsizing.									
Unit – IV	External Environment								6
External Environment: Economic Environment – Demographic Environment – External Environmental factors affecting Managers – Managerial perspective for Competitive Intelligence. Global Environment: Understanding the Global Trade Environment – Doing Business Globally.									
Unit – V	Decision Making								6
Decision Making: Decision Making Process - Approaches to Decision Making –Types of Decisions &Decision Making Conditions - Decision Making Biases and Errors.

COURSE OUTCOMES: On completion of the course, the students will be able to						BT Mapped (Highest Level)	
CO1	examine the relationships between levels of management, identify and describe management functions, analyze Mintzberg's managerial roles, and summarize historical approaches to management.					Applying (K3)	
CO2	apply the six elements of organizational design, compare mechanistic and organic structures, and discuss factors influencing structural choice.					Applying (K3)	
CO3	analyze the impact of organizational size, life cycle stages, and forms of control on internal design.					Analyzing (K4)	
CO4	analyze knowledge of the global trade environment to devise strategies for doing business globally.					Analyzing (K4)	
CO5	evaluate the knowledge of decision-making approaches to analyze and improve decision-making processes in various contexts.					Evaluating (K5)	
Mapping of COs with POs							
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	
CO1	3			1			
CO2	3	1		1			
CO3	3	3		1			
CO4	3	2	3	1			
CO5	3	2	3	1			
1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy							
ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	--	17	50	33	--	--	100
CAT2	--	17	33	33	17	--	100
ETE	--	6	45	29	20	--	100
* ±3% may be varied (CAT 1 & 2 – 50 marks & ETE – 100 marks)

24MBT13 - MANAGERIAL ECONOMICS									
Programme & Branch	Master of Business Administration	Sem.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	1	CC	30	0	0	30	60	3
Preamble	This course offers the fundamentals of the economic principles, which helps to make decision on allocation of resources based on the economic scenario. This course helps to bring conceptual knowledge on demand and supply, production, cost, and market structures for managerial decisions in various business environments.								
Unit – I	Basic Concepts and Principles								6
Basic Concepts and Principles: Definition - Basic Assumptions - Types of Economic Analysis - Kinds of Economic Decision - Economic Principles. Theory of Firms: Forms of Ownership, Profit Maximization Theory.									
Unit – II	Demand and Supply Analysis								6
Demand and Supply Analysis: Definition - Demand Determinants - Law of Demand - Supply Determinants –Law of Supply - Market Equilibrium, Elasticity of Demand - Law of Diminishing Marginal Utility.									
Unit – III	Theory of Production								6
Theory of Production: Types of Inputs - Production Functions with one and two variable input – Isocost Line - Producer's Equilibrium - Return to Scale – Technical Progress.									
Unit – IV	Cost Concepts								6
Cost Concepts: Types - Average and Marginal Costs in the Short Run and Long run – Cost of Multi Product firm and Joint product - Economics of Scale – Economies of scope – Cost and Learning Curves.									
Unit – V	Market Structures								6
Market Structures: Market Morphology - Types of Market Structures and its Characteristics - Price Output Decisions for Perfect Competition, Monopoly, Monopolistic Competition and Oligopoly.

COURSE OUTCOMES: On completion of the course, the students will be able to						BT Mapped (Highest Level)	
CO1	understand the basic economic concepts and examine the principles in managerial decision-making contexts.					Applying (K3)	
CO2	appraise the knowledge of demand and supply under different business decisionsin dynamics market.					Analyzing (K4)	
CO3	experiment production function and show the role of technology to optimize resource allocation.					Applying (K3)	
CO4	assess various cost concepts and their implications on decision-making in different time frames.					Analyzing (K4)	
CO5	evaluate different market structures and formulate strategic pricing and output decisions, demonstrating advanced proficiency in understanding market behavior and competitiveness.					Evaluating (K5)	
Mapping of COs with POs							
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	
CO1	3					1	
CO2	2	3					
CO3	2	3					
CO4	2	3				1	
CO5	2	3				1	
1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy							
ASSESSMENT PATTERN - THEORY							
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %
CAT1	--	14	53	33	--	--	100
CAT2	--	14	33	33	20	--	100

24MBT14 - BUSINESS STATISTICS AND ANALYTICS									
Programme & Branch	Master of Business Administration	Sem.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	1	CC	30	0	0	30	60	3
Preamble	This course will introduce the application of statistics in the workplace for analyzing and interpreting data and drawing conclusions, and making predictions of the future. This course will begin with data description followed by probability analysis and distributions, sampling for estimation, hypothesis testing, and finally regression. This course also makes use of spreadsheets, an important tool for working with and making sense of numerical data.								
Unit – I	Descriptive Statistics								6
Descriptive Statistics: Introduction to Business Statistics –Analytics – types - Data - types - Measures of Central Tendency: Mean, Median, Mode, Quartiles and Percentiles - Measurement of Dispersion: Quartile Deviation - Standard Deviation - Coefficient of variation- Caselet discussion.									
Unit – II	Data Visualisation								6
Data Visualisation: Bar Chart – Histogram – Pie Chart – Scatter Plot – Pareto chart – Box plot – Stem and Leaf Plot – Examples from Business world.									
Unit – III	Probability								6
Probability: Meaning - events – types of events - Types of probability - Addition and Multiplication Rules - Bayes's Theorem – Business applications.									
Unit – IV	Probability Distribution								6
Probability Distribution: Discrete and Continuous distributions - Binomial, Poisson and Normal Distribution - Application in real life cases. Sampling distribution – Confidence interval.									
Unit – V	Predictive Analytics								6
Predictive Analytics: Correlation and regression – Hypothesis Framing – Non parametric analytics – Wilcoxon Rank sum test – Wilcoxon Signed rank test - Kruskal Wallis H Test.

*includes Term Work (TW) & Online / Certification course hours

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	classify and identify the measures of location and dispersion for managerial decision making	Applying (K3)
CO2	present data in tables and charts and make meaningful interpretation from charts comprehend probability concepts and apply probability concepts to various business problems	Applying (K3)
CO3	appraise the need of different probability concepts to various business problems	Analyzing (K4)
CO4	apply probability distributions to business situations	Applying (K3)
CO5	examine the pattern of relationship between variables and make a prediction about dependent variable and perform distribution – free tests.	Evaluating (K5)

Mapping of COs with POs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6
CO1	3			1		
CO2	3	3		1

24MBT15 - FINANCIAL STATEMENTS REPORTING AND ANALYSIS									
Programme & Branch	Master of Business Administration	Sem.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	1	CC	30	0	0	30	60	3
Preamble	The purpose of the financial accounting component of the course is to provide an understanding of how to communicate the results of these business transactions in the form of financial statements. The objectives of financial analysis is to provide an introduction to interpreting the accounting information for planning, control and decision making								
Unit – I	Introduction								6
Introduction: Financial, Cost and Management Accounting - Generally Accepted Accounting Principles, Conventions and Concepts an overview of Accounting Standards in India - Balance Sheet and Related concepts - Profit and Loss Account and Related Concepts.									
Unit – II	Preparation of Financial Statement								6
Preparation of Financial Statement: Preparation of Trading Account - Profit and Loss Account - Balance Sheet - Reading and Interpreting the Published Financial Statements.									
Unit – III	Financial Statement Analysis								6
Financial Statement Analysis: Financial Statement Analysis Features, Techniques - Ratio Analysis. Types: Profitability Ratios, Liquidity Ratios, Solvency Ratios and Activity Ratios - Merits and Demerits of Ratio Analysis.									
Unit – IV	Fund Flow Statement Analysis:								6
Fund Flow Statement Analysis: Preparation of Statement of Change in Working Capital – Computation of Fund From Operation and Preparation of Fund Flow Statement - Advantages of Fund Flow Statement.									
Unit – V	Cash flow Statement Analysis								6
Cash flow Statement Analysis: Computation of Cash from Operations - Preparation of Cash Flow Statement as Per AS 3- Distinction Between Fund Flow Statements and Cash Flow Statement.

24MBT16 - LEGAL ASPECTS OF BUSINESS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	1	CC	30	0	0	30	60	3
Preamble	This course is designed to help students to provide comprehensive knowledge on Indian contract act, sale of goods act, laws relating to business organization.								
Unit – I	Indian Contract Act 1872								6
Indian Contract Act: Meaning, Essential of a Valid Contract - Performance of Contract - Discharge of Contract - Modes - Breach of Contract - Remedies.									
Unit – II	The Sale of Goods Act 1930								6
Sale of Goods Act: Definition - Essentials - Sale and agreement to Sell - Goods: Classification - Price - Transfer of Title by Non Owners - Unpaid Seller: Rights.									
Unit – III	Partnership Act (1932) and Negotiable Instruments Act 188								6
Partnership Act: Meaning - Essential of Partnership – Formation - Kind - Dissolution of firm. Negotiable Instruments Act: Promissory Note - Bill of Exchange – Cheque - Holder for Value - Holder in Due Course - Forgery.									
Unit – IV	Companies Act 2013								6
Companies Act: Companies - Characteristics - Incorporation - Classification - Articles of Association - Memorandum of Association – Prospectus - Meetings.									
Unit – V	Consumer Protection Act 2019 and Information Technology Act 2000								6
Consumer Protection Act: Objectives - Rights of Consumers - Remedies Available to Consumers. Information Technology Act: Cyber Laws – Digital Signature, Electronic Governance.

24MBL11 - COMPUTER APPLICATIONS FOR BUSINESS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	1	CC	0	0	40	0	40	2
Preamble	This course enhances the students' knowledge in the application of business communication principles through creation of effective business documents and oral presentations. This allows the students to gain knowledge and apply them in team communication and also enables them in the use of technology to facilitate the communication process.								
LIST OF EXPERIMENTS / EXERCISES:									
1.	MS Word: Basic Text Manipulation and Formatting: Usages of spell check – Text Formatting – Picture Insertion and alignment – Inserting Graphics and Text Boxes								
2.	MS Word: Advanced Document Creation and Automation: Creation of documents using templates - Advanced Functions such as Mail Merge and Macro.								
3.	MS Power Point: Designing Presentations–Slide show controls–Making notes on Pages and Handouts–Printing Presentations–Customizing Presentations–Auto Content Wizard.								
4.	MS Excel: Excel Basics and Formulas: Worksheet Preparation – Constructing Excel Formulas - Using Excel's Built-in Functions – Creating and Modifying charts								
5.	MS Excel: Advanced Excel Features: Pivot Tables and Pivot Chart - Scenario Manager, Solver, V-Lookup.

24MBT21 - QUANTITATIVE TECHNIQUES									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	2	CC	30	0	0	30	60	3
Preamble	Decision making is a fundamental part of the management process and it pervades the activities of every business manager. This course aims at solving the decision making problems that confront managers in both the public and private sector by developing quantitative models of those problems.								
Unit – I	Linear Programming								6
Linear Programming: Introduction to Linear Programming (LP) - LP Formulations - Graphical Solution - Special Cases – Infeasibility - Unbounded - Simplex Method- Interpreting Simplex Table - Duality Concepts -Sensitivity Analysis.									
Unit – II	Transportation and Assignment Models								6
Transportation and Assignment Models: Finding an Initial Feasible Solutions using North - West Corner Method - Least Cost Method and Vogel's Approximation Method - Variations in Transportation Problem. Assignment Problems – Hungarian Method – Variations of the Assignment Problem.									
Unit – III	Network Optimization								6
Network Optimization: Introduction – Network Components - Shortest Path Problem - Maximum Flow Problem - Minimum Spanning Tree -Management Science Applications - Case problems.									
Unit – IV	Game Theory								6
Game Theory: Definition of Game - Payoff and Two Person Zero Sum Game – Maximin Principle - Minimax Principle - Saddle Point - 2 X 2 Games without Saddle Point – The Rules of Dominance - Graphical Method for 2 x n or m x 2 Games									
Unit – V	Decision Theory								6
Decision Theory: Decision making process- Types of Decision Making Environments- Payoff and Regret Table - Decision Making Under Uncertainty - Maximin Criterion - Maximax Criterion - Regret Criterion - Hurwicz Criterion – Laplace Criterion - Decision Making Under Risk - EMV.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	formulate and use linear programming techniques to solve and justify decisions in different operational functions of business.	Applying (K3)
CO2	understand and use transportation and assignment problems to implement the best routes and allocation of resources in matching supply and demand.	Applying (K3)
CO3	formulate and appraise the different network models for minimizing costs, distance and time in industrial and business projects.	Evaluating (K5)
CO4	examine the optimal strategies that are formulated for a conflicting business situation where two or more competitors are involved.	Analyzing (K4)
CO5	appraise the decision theory models and select the best outcome from the different alternatives in situation.	Evaluating (K5)

Mapping of COs with POs and PSOs

24MBT22 - MARKETING MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	2	CC	30	0	0	30	60	3
Preamble									
		The course has been designed to make acquaint students with marketing theories, concepts, contexts and practical application of marketing in real life corporate environment and to understand the business veracity through real life case studies and to have a better intellectual capacity to derive decisions in marketing functions.							
Unit – I	The Marketing Paradigm& Marketing Environment								6
The Marketing Paradigm – Global Marketing Evolution – Core Concepts, Needs, Wants, Demand, Products & Services and Markets – B2C, B2B and B2G - Technology Marketing. Marketing Environment : Global Micro and Macro Environment - Marketing Mix for Products and Services									
Unit – II	Understanding Consumer & Purpose and Methods								6
Understanding Consumer: Consumer vs Customer – Customer Buying Motives – Consumer Buying Process. Purpose and Methods: Market Segmentation - Targeting and Positioning – Managing STP Process.									
Unit – III	Product Planning & Branding and Packaging Strategy								6
Product Planning - Types of product – Product mix – New Product Development – Product life Cycle. Branding and Packaging Strategy- Types of branding – Brand strategy - Brand equity – Importance of Packaging – Types of Packaging – Indian Consumer Act.									
Unit – IV	Pricing Strategy: Role & Channel System								6
Pricing Strategy: Role of pricing in firm's profitability – Dynamics of Pricing – Value for the Product and Service. Channel System: Role of different channel members – Channel Management – Channel Behaviours – Channel Decisions.									
Unit – V	Integrated Marketing Communications								6
Integrated Marketing Communications: Promotion Mix Strategy, Promotion Vehicles - Digital & Social Media Marketing – Technology in Marketing - Public Relations –Word of mouth – Customer Delight, Personal Selling: Importance of Direct Marketing.

24MBT23 FINANCIAL MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	2	CC	30	0	0	30	60	3
Preamble	To acquaint students with various issues involved in management of finance in a firm and also equip them with advanced analytical tools and techniques that are used for making sound financial decisions and policies.								
Unit – I	Introduction to Financial Management:								6
Introduction to Financial Management: Objectives - Functions – Goals- Risk Return trade off - Role of Finance Manager - Agency Problem. Time Value of Money - Present Value and Future Value: Single Cash Flow, Annuity, Annuity Due, Perpetuity.									
Unit – II	Capital budgeting								6
Investment Decision: Principles and Nature of Capital Budgeting - Evaluation Techniques: Payback Period, Accounting Rate of Return, Net Present Value, Internal Rate of Return, Profitability Index - Comparison of DCF Techniques									
Unit – III	Cost of Capital								6
Finance Decision: Long Term Sources of Finance-Concept of Cost of Capital, Measurement of Specific Costs – Weighted Average Cost of Capital using Market Value and Book Value.									
Unit – IV	Capital Structure								6
Capital Structure: Financial and Operating Leverage, Indifference Point – EBIT- EPS Relationship, Factors Determining Capital Structure Decision.									
Unit – V	Dividend Decision								6
Dividend Decision: Forms of Dividend, Dividend Theory: Relevance Theory and Irrelevance Theory: Walter's Model, Gordon's Model, MM Hypothesis, Dividend Policy, Determinants of Dividend Policy.

24MBT24 - OPERATIONS MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	2	CC	30	0	0	30	60	3
Preamble	The course explores the art and science of overseeing processes, resources, and systems to efficiently deliver goods and services. It encompasses the design, execution, and optimization of operations to meet organizational objectives, enhance efficiency, and drive organizational success in a dynamic business environment.								
Unit – I	Introduction to Operations Management								6
Introduction to Operations Management: Production versus Service Operations - Production as a System - Scope – Evolution - Operations Decision Making. Product and Service Design: Factors - Legal and Ethical Considerations, Human Factors, Cultural Factors and Environmental Factors.									
Unit – II	Forecasting System								6
Forecasting System: Qualitative and Quantitative Methods - Time Series Forecasting - Associative Forecasting Methods.									
Unit – III	Facility Location and Layout Design & Process Selection								6
Facility Location and Layout Design: Factors Affecting Location - Layout Types - Designing Product Layout - Line Balancing. Process Selection - Job Shop, Batch, Repetitive and Continuous Production.									
Unit – IV	Aggregate Planning & Material Requirement Planning								6
Aggregate Planning: Strategies - Techniques for Aggregate Planning – Master Production Scheduling. Material Requirement Planning: Inputs, Processing and Outputs - MRP II and ERP.									
Unit – V	Inventory Management & Contemporary OM Techniques								6
Inventory Management: Types - Basic EOQ model - P System and Q System - ABC Analysis. Contemporary OM Techniques: Introduction to JIT and Lean systems, Six Sigma, Industry 4.0.

24MBT25 - HUMAN RESOURCE MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	2	CC	30	0	0	30	60	3
Preamble	This course aims at enabling the students to understand the broader spectrum of Human Resource management. This course helps the students to understand the primary and ancillary functions of human resource management.								
Unit – I	Introduction to HRM								6
Introduction to HRM: Scope of HRM- Objectives - Functions of HRM - Models of HRM - Strategic HRM - Factors Affecting HR Environment – HR Planning: Process.									
Unit – II	Recruitment& Selection								6
Recruitment: Job Analysis - Job Description - Job Specification - HR Planning: Process - Recruitment - Sources - Pros and Con's - Selection - Process - Selection Tests - Types of Interview - Concept of Induction and Placement.									
Unit – III	Employee Training & Compensation								6
Employee Training: Need –Training methods. Management Development: Programme – Methods - Job evaluation. Compensation: Pay for performance, competency-based pay, equity based rewards, team rewards – Executive compensation									
Unit – IV	Employee Performance								6
Employee Performance: Performance Appraisal - Process, Methods, Potential Appraisal. Morale- Importance - Employee Engagement, Employee Productivity. - Stress: Source, Individual and Organizational Coping Strategy.									
Unit – V	Enrichment in HRM								6
Enrichment in HRM: Terms and Conditions of Employment - HR Outsourcing – HRIS – Employee Turnover and Retention – Managing Separation. Employee Relations: Strategies for Building and Maintaining Positive Employee Relations.

24MBT26 - BUSINESS RESEARCH METHODS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	2	CC	30	0	0	30	60	3
Preamble	This course is designed to help students undertake research project and also intends to provide comprehensive knowledge on research process and introduces the concepts, tools and techniques that are used at each of these steps thereby honing the research skills of future managers.								
Unit – I	Introduction to Research								6
Introduction to Research: Definition of Research - Need for Business Research - Formulation of the Research Problem - The Process of Business Research. Literature Review - Identifying, Assessing and Managing Sources of Information - Steps in Literature Review - Research Ethics.									
Unit – II	Research Design and Data Collection								6
Research Design and Data Collection: Research Design - Research Data - Qualitative Scaling and Measurement Methods. The Nature and Types of Qualitative Research. Data Collection Methods – Primary and Secondary Data Resources - Questionnaire Design Procedure.									
Unit – III	Sampling Design								6
Sampling Design: Sampling Design Process - Sample vs Non Sampling Errors. Sampling Techniques - Choosing Probability vs Non-Probability Sampling. Sample Size Determination - Data Preparation Process - Data Entry - Data Editing, Coding, Classification and Tabulation of Data.									
Unit – IV	Data Analysis								6
Data Analysis: Types of Data Analysis - Univariate and Bivariate Analysis (Concepts) - Descriptive and Inferential Statistics. Hypothesis Testing - Chi Square Test - T Test - Reliability and Validity (Concepts).									
Unit – V	Report Writing and Preparation								6
Report Writing and Preparation: Report Writing - Types of Report - Report Structure and Layout - Guidelines for Effective Documentation and Presentation - Oral Presentation - Plagiarism Mechanics of Writing a Research Report.

**24MBL21 - DATA ANALYSIS LABORATORY**

Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	SEE	0	0	40	0	40	3

Preamble The objective of this course is to provide hands on experience in data preparation and basic statistical analysis using software such as SPSS.

LIST OF EXPERIMENTS / EXERCISES:

1.	Data preparation: Data entry - Dealing with Different Types of Data – Multiple Response Sets – Selecting - Sorting–Merging.
2.	Data Transformation : Case Summaries - Replacing - Missing Values – Identifying Duplicate Cases– Recoding – Ranking Cases – Compute New Variables.
3.	Descriptive - Frequency - Normal Distribution - Mean, Median, Mode, Variance and Standard Deviation - Skewness and Kurtosis - Cross Table - Chi - Square Analysis.
4.	Comparing Group means using parametric tests: t test, One Way ANOVA
5.	Comparing Group means using Non parametric tests: Mann Whitney Test - Kruskal - Wall's Test.

COURSE OUTCOMES:

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	use statistical software for data preparation and summarise the data(make better analysis and presentation of the data)	Understand (K2), Manipulation (S2)
CO2	perform data cleaning activities and make better analysis and presentation of the data.	Applying (K3), Manipulation (S2)
CO3	find group differences using parametric and non - parametric test for a given data set. .	Applying (K3), Manipulation (S2)

24MBT31 - ENTREPRENEURSHIP AND INNOVATION									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	3	CC	30	0	0	30	60	3
Preamble	The main aim of the course is to create awareness about Entrepreneurship, Business Plan, Financing New Venture, Managing the Business.								
Unit – I	Introduction to Entrepreneur								6
Introduction to Entrepreneur: Nature and development of Entrepreneurship – The Entrepreneurial decision process – Types of startups - Role of Entrepreneurship in Economic development – Entrepreneur characteristics.									
Unit – II	Innovation and IPR								6
Innovation and IPR: Innovation – Types of Innovation – Application of Innovation in Business - Sources of new ideas – Methods of Generating Ideas –Product planning and development process – Intellectual property – Patent Infringement.									
Unit – III	Business Plan								6
Business Plan: Contents of the Business Plan – Executive summary – Environmental and Industry Analysis – Description of venture – production plan – marketing plan – organization plan – financial plan – failure of business plan evaluation of business plan- Business Model Canvas.									
Unit – IV	Financing New Venture								6
Financing New Venture: Internal and external sources of funds – Commercial Banks – Types of Bank Loans – Cash flow financing – Long term Loans – Government grants and subsidy – venture capital funding – Institutional Finance to Entrepreneur – Institutional support to entrepreneur.									
Unit – V	Managing, Growing The New Venture								6
Managing, Growing The New Venture: Assessing the new entry opportunity – Entry strategy for new entry exploitation – Growth strategies – Penetration strategies – Market development strategies – Diversification strategies – Economic implication of growth.

24MBT32 - MACRO ECONOMICS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	3	CC	30	0	0	30	60	3
Preamble	This course provides an overview of macroeconomic principles, policies, and challenges. Students will analyze economic indicators, evaluate policy effectiveness, and apply theoretical concepts to real-world economic scenarios.								
Unit – I	Introduction to Macroeconomics								6
Introduction to Macroeconomics: Overview of Macroeconomics: Definition, scope, and importance of macroeconomics - Macroeconomic Models: Classical, Keynesian, and Neoclassical perspectives - National Income Accounting: GDP, GNP, NDP, NNP, and their calculation methods - Economic Growth and Development: Factors influencing growth, measurement, and development indicators - Key Concepts: Circular flow of income, production possibilities frontier, and the business cycle.									
Unit – II	Fiscal Policy and Monetary Policy								6
Fiscal Policy and Monetary Policy: Fiscal Policy: Objectives, tools, and impact on aggregate demand - Monetary Policy: Objectives, tools, and impact on money supply and interest rates - Policy Evaluation: Effectiveness, limitations, and challenges in implementing fiscal and monetary policies - Policy Coordination: Interaction between fiscal and monetary policies, conflicts, and coordination mechanisms.									
Unit – III	Inflation and Deflation								6
Inflation and Deflation: Causes of Inflation: Demand-pull, cost-push, and structural factors - Effects of Inflation: Purchasing power, income distribution, and economic stability - Measurement of Inflation: Consumer Price Index (CPI), Producer Price Index (PPI), and inflation expectations - Policy Responses: Monetary and fiscal policy measures to address inflation and deflationary pressures.									
Unit – IV	Business Cycle and Economic Indicators								6
Business Cycle and Economic Indicators: Business Cycle Phases: Expansion, peak, contraction, trough, and their characteristics - Economic Indicators: Leading and lagging indicators, GDP revisions, and business cycle analysis - Policy Implications: Countercyclical policies, automatic stabilizers, and challenges in managing business cycle fluctuations.									
Unit – V	Global Macroeconomic Issues								6
Global Macroeconomic Issues: Income Inequality: Causes, consequences, and policy responses - Financial Globalization: Impacts on economies, risks, and regulatory challenges - Environmental Sustainability: Economic growth disparities, climate change, and sustainable development goals - International Policy Coordination: Challenges in achieving macroeconomic stability in a globalized economy.

24MBE01 - SECURITY ANALYSIS AND PORTFOLIO MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	The course is designed to deep in students comprehension of investment securities, risk return relationship and the portfolio construction. Through this course, students will gain the skills to assess investment alternatives, analyze the risk and return profile of securities, perform macroeconomic and fundamental analysis, employ technical analysis tools and construct well optimized portfolio.								
Unit – I	Introduction to Investment and Securities								6
Introduction to Investment and Securities: Investment Objectives- Investment Process- Speculation, Investment and Gambling- Investment Alternatives- Sources of Investment Information- Securities-Securities Markets in India.									
Unit – II	Capital Market& Risk and Return								6
Capital Market: Primary Market – Participants- Listing Formalities and Procedure- Secondary Market - Buying and Selling Mechanisms- Margin and Settlement of Shares- Regulating Framework, SEBI – Functions, Guidelines and Regulations- Stock Exchanges in India – Indices- Depositories in India. Risk and Return: Components- Elements-Measures of Risk-Capital Asset Pricing Model- Security Market Line.									
Unit – III	Fundamental Analysis								6
Fundamental Analysis: Economic Analysis – Forecasting Model, Industry Analysis, Company Analysis – Measuring Earnings.									
Unit – IV	Technical Analysis								6
Technical Analysis: Need and Importance-Fundamental Vs Technical-Tools of Technical Analysis – Charts, Indicators and Oscillators-Dow Theory-Efficient Market Theory.									
Unit – V	Portfolio Analysis								6
Portfolio Analysis: Approaches in Portfolio Construction-Portfolio Theory-Markowitz Model-Portfolio Performance Evaluation – Sharpe, Treynor's and Jensen's Measure-Portfolio Revision.

24MBE07 - FINTECH INNOVATION									
Programme& Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	Empower students to grasp the fintech landscape, exploring technologies and business models for financial inclusion. Equip them to drive impactful change through innovative fintech solutions for the unbanked and under banked.								
Unit – I	Introduction to Fin Tech								6
Overview of Fintech: Definition, scope, and evolution, Key Fintech Technologies, Fintech regulations and compliance, Fintech Ecosystem.									
Unit – II	Disruptive Technologies in Fintech								6
Impact of Block chain and Crypto currencies on financial services and transactions, Artificial Intelligence in Fintech, Big Data and Analytics: Data-driven insights for personalized financial services.									
Unit – III	Fintech Business Models								6
Peer-to-Peer (P2P) Lending, Digital Payments and Wallets, Insurtech: Innovations in the insurance industry, Wealthtech: Digital solutions for investment management and wealth advisory.									
Unit – IV	Innovation in Financial Inclusion								6
Fintech for the Unbanked and Under banked, Microfinance and Microloans: Impact on financial inclusion, Mobile Banking and Digital Financial Services: Empowering underserved populations.									
Unit – V	Future Trends and Challenges in Fintech								6
Open Banking and API Integration: Promoting collaboration and innovation, Cyber security in Fintech, Ethical and Regulatory Challenges, Future of Fintech and impact on traditional financial services.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	demonstrate the basic concepts and principles of Fintech and Gain insights into the scope and evolution of fintech.	Applying (K3)
CO2	recognize the impact of Block chain, Crypto currencies, Artificial Intelligence, and Big Data on financial services and evaluate their role in reshaping the financial industry.	Applying (K3)
CO3	evaluate the effectiveness of different Fintech business models such as Peer-to-Peer Lending, Digital Payments, Insurrect, and Wealth tech in transforming traditional financial services	Evaluating (K5)
CO4	assess the impact of Fintech solutions such as microfinance, microloans, mobile banking, and digital financial services on promoting financial inclusion and empowering underserved populations at the Evaluation	Evaluating (K5)
CO5	analyze the role of Open Banking and API Integration in fostering collaboration and innovation, evaluate cyber security measures in the Fintech sector, assess ethical and regulatory challenges, and predict the future of Fintech and its influence on traditional financial services	Analyzing (K4)

24MBE10 - CONSUMER BEHAVIOUR									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	This course is aimed at making the students understand the relationship between consumer behavior and the marketing concept. The students get familiarized about how theories and concepts are applied and combined to consumer issues in the marketing environment.								
Unit – I	Introduction to Consumer Behaviour								6
Introduction to Consumer Behaviour: Introduction to Consumer Behaviour- Definition - Consumer and Customers - Development of Marketing Concept and Models of CB - Marketing Segmentation and Positioning relevant to CB -Consumer Behaviour and its Applications in Marketing.									
Unit – II	Internal Influences on Consumer Behaviour								6
Internal Influences on Consumer Behaviour: Consumer Motivation - Personality - Perception - Learning - Attitude - Case Study.									
Unit – III	External / Group Influences on Consumer Behaviour								6
External / Group Influences on Consumer Behaviour: Class Categories - Family Life Cycle Stages -Personal Influence and Opinion Leadership - Reference Group Influences on Consumption - Culture Influence on Consumer Behaviour - Case Study.									
Unit – IV	Decision Making Process & Post Purchase								6
Decision Making Process & Post Purchase: Consumer Involvement and Consumer Decision Making Process - Post- Purchase Dissonance - Product Disposition - Purchase Evaluation and Consumer Satisfaction.									
Unit – V	Diffusion of Innovations & Research								6
Diffusion of Innovations & Research: Diffusion of Innovations - Consumer Research - Factors Affecting of Indian Consumer - Ethics in Marketing - Case Study.

24MBE21 - STRATEGIC HUMAN RESOURCE MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	FE	30	0	0	30	60	3
Preamble	The course help the students to develop the perspective of strategic human resource management, distinguish the strategic approach to human resources from the traditional functional approach and to understand the relationship of HR strategy with overall corporate strategy.								
Unit – I	Introduction								6
Introduction : Business - Corporate Strategies- Integrating HR Strategies With Business Strategies - Analyzing HR Practices Followed by Different Firms - Human Resource System. Business Strategy and Organizational Capability.									
Unit – II	HR Strategies								6
HR Strategies: Performance Management Strategies - Reward and Compensation- Retrenchment - Human Aspects of Strategy Implementation. Corporate Ethics- Values and SHRM. Case Study.									
Unit – III	Implementation of SHRM								6
Implementation of SHRM: Measurement – Challenges -HR as a Strategic Partner. Process Based Approach. Aligning HR with Corporate Strategy, Strategic HR Planning - Acquisition and Development. Case study.									
Unit – IV	Human Resource Environment								6
Human Resource Environment: Technology- Structure- Workforce Diversity- Demographic Changes-Temporary and Contract labour. Competencies of HR Professional in a SHRM Scenario.									
Unit – V	Strategies in Global Environment								6
Strategies in Global Environment: Recruitment - Retention Strategies - Training and Development Strategies. Corporate Strategy and Career Systems. Evaluating the Effectiveness of SHRM.

24MBE29 - PLANT LAYOUT AND LOCATION PLANNING									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	This course aims at making the student capable of locating suitable site for a business enterprise and to suggest an efficient layout for the production or service unit.								
Unit – I	Plant Location								6
Plant Location: Plant location analysis – factors, costs, location decisions – single facility location models, multi facility location models- set covering problems – warehouse location problems.									
Unit – II	Facilities Layout								6
Facilities Layout: Facilities requirement, need for layout study – types of layout, Designing product layout-Legal aspects in layout design.									
Unit – III	Layout Design								6
Layout Design: Design cycle – SLP procedure, computerized layout planning procedure – ALDEP, CORELAP, CRAFT.									
Unit – IV	Group Technology and Line Balancing								6
Group Technology and Line Balancing: Group technology – Production Flow analysis (PFA), ROC (Rank Order Clustering) – Line balancing.									
Unit – V	Materials Handling								6
Materials Handling: Principles, unit load concept, material handling system design, handling equipment types, selection and specification, containers and packaging.

*includes Term Work(TW) & Online / Certification course hours

COURSE OUTCOMES: On completion of the course, the students will be able to						BT Mapped (Highest Level)	
CO1	understand the key factors, costs, and decision models involved in plant location analysis to make informed location decisions.					Understanding (K2)	
CO2	design effective layouts by creating a layout diagram and conducting performance index analysis to optimize layout design.					Applying (K3)	
CO3	apply various layout design algorithms for different situations to effectively design facility layouts.					Applying (K3)	
CO4	perform group technology and line balancing techniques effectively to optimize production flow and achieve efficient resource utilization.					Applying (K3)	
CO5	identify suitable material handling equipment by applying the relevant principles.					Applying (K3)

24MBE34 - DATA MINING FOR BUSINESS DECISIONS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	FE	30	0	0	30	60	3
Preamble	The course brings out the fundamentals of data mining, data stream processing, and machine learning algorithms for analyzing very large amounts of data.								
Unit – I	Introduction								6
Introduction: Introduction to Data mining and value from data analytics- Types of Systems –Data Mart – OLAP – OLTP – Data Movement (ETL-Extract, Transform and Load) –Data Querying and Reporting.									
Unit – II	Conditional Processing								6
Conditional Processing: Conditional processing – Dropping and keeping variables – Reading Excel spreadsheets in R that contains Date Fields – Data Cleaning.									
Unit – III	Manipulation								6
Manipulation: Manipulating Character Values – Manipulating Numeric Values – Manipulating Numeric Values Based on Dates Converting Variable Type – Concatenating R Data Sets – Merging R Data Sets –Producing Summary Reports in R.									
Unit – IV	Array								6
Array: DO Loop Processing – Array Processing – Using arrays in R – Match-Merging Two or More R Data Sets – Simple joins using SQL – Data Integrity.									
Unit – V	Data Enrichment								6
Data Enrichment: Data Quality – Data Quality Assurance – Data access – Data Privacy and Ethics –Data security – Overview of BI and Data Mining Technology.

24MBE06 - BUSINESS VALUATION AND CORPORATE RESTRUCTURING									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	This course aids the student to have an understanding of corporate restructuring and to do corporate valuation by using different discounted cash flow techniques and able to differentiate the optimal mix.								
Unit – I	Introduction								6
Introduction: Merger, Amalgamation, Acquisition - Demerger, Reverse Mergers - Takeover - Cross Border Mergers - DCF and Other Models - Non - DCF Approaches.									
Unit – II	Valuation								6
Valuation: Determining the Value of Acquiring and Target Firms - Valuation of Intangible Assets - Valuation Techniques - Asset and Market based - Writing the Valuation Report - Case Study.									
Unit – III	Corporate Restructuring								6
Corporate Restructuring: Need and Objectives of Restructuring, Techniques – expansion, Financial Restructuring, Process of Restructuring, The Impact of Restructuring on the Value of the Firm.									
Unit – IV	M and A in companies Act, 2013								6
M and A in companies Act, 2013: Restrictions on insider trading - Approval process - issue of bonus shares - Due Diligence - SEBI Guidelines and Solvency Code.									
Unit – V	Gain Analysis of Mergers and Acquisitions								6
Gain Analysis of Mergers and Acquisitions: Funding of Mergers and Acquisitions - Various Sources of Financing Including Deferred Payment - Leveraged Buyouts - Case Study.

Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	FE	30	0	0	30	60	3
Preamble	The aim of this course is to learn the services marketing foundation, understanding customers, service design standards and managing service performance.								
Unit – I	Services Marketing Foundations								6
Services Marketing Foundations: Trends in the Service Sector - Characteristics – Classification of Services- Service Marketing Mix - Gaps Model of Services. Case Studies.									
Unit – II	Focus on the Customer								6
Focus on the Customer: Consumer Behaviour in Services – Customer Expectations and Perceptions of Service – Customer Satisfaction – Service Quality - Case Study.									
Unit – III	Understanding Customers and Customer Relation								6
Understanding Customers and Customer Relation: Listening to Customers through Research – Building Customer Relationship – Service Recovery and Guarantees. Case Study on Customer Relationship									
Unit – IV	Service Design and Standards								6
Service Design and Standards: Services Design and Standards – New Service Development – Developing Customer Defined Service Standards – Service Blueprint – Physical Evidence. Case Study on Service Design									
Unit – V	Service Performance and Managing Service Promises								6
Service Performance and Managing Service Promises: Service Intermediaries - Managing Demand and Capacity – Integrated Services Marketing Communications – Service Pricing– Financial and Economic Impact of Service - Case Study.

24MBE18 - INDUSTRIAL RELATIONS AND LABOUR WELFARE									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Fundamental knowledge on HRM	3/4/5/6	FE	30	0	0	30	60	3
Preamble	The aim of this course is to make the students, understand the issues involved in industrial relations and its components in order to create peaceful organizational environment. The students can gain knowledge to solve industrial disputes and use trade unions and welfare positively for betterment of organizational environment.								
Unit – I	Industrial Relations								6
Industrial Relations: Objectives, Factors Determining Industrial Relations, Approaches to Industrial Relations, Prerequisites for Harmonious Industrial Relations, Overcoming the Shortcomings of the Industrial Relations – Case Study on Industrial Relations									
Unit – II	Industrial Disputes								6
Industrial Disputes: Forms, Causes, Prevention, Machinery for settlement of Industrial Disputes, Conciliation, Arbitration, Adjudication-Case Study - Maruti Suzuki Conflict.									
Unit – III	Collective Bargaining								6
Collective Bargaining: Concepts, Significance and Levels of Collective Bargaining- Process of Collective Bargaining - Factors Contributing to the Collective Bargaining - Drafting an Agreement - Case Studies.									
Unit – IV	Trade Union								6
Trade Union: Objectives, Reasons for Workers Join TU, Functions, Registration and Recognition of Trade Union, Rights and Privileges of Registered Trade Unions, Penalties and Fines– Case Study on Trade Union Practices.									
Unit – V	Labour Welfare								6
Labour Welfare: Statutory and Non - Statutory Welfare Schemes - Concepts of Differently abled Labour Welfare, BPO and KPO Labour - Labour Welfare Officers: Functions and Duties - Industrial Health and Safety - Components of Safety Programme - Need for Safety Programme.

24MBE25 - SUPPLY CHAIN AND LOGISTICS MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	3/4/5/6	FE	30	0	0	30	60	3
Preamble	The aim of the course is to expose the role of supply chain management in enterprise productivity in terms of efficiency, responsiveness and improved profits. The course also helps the students to look at the business from supply chain perspective, that too in a dynamic business environment.								
Unit – I	Introduction								6
Introduction: Evolution – Importance – Enablers - Drivers – Logistics fundamentals – Mode of Transportation – Green logistics – Reverse logistics – Supply Chain Decisions.									
Unit – II	Managing Material Flow in Supply Chains								6
Managing Material Flow in Supply Chains: Inventory Management - Types and Cost of Inventory – Managing cycle Inventory, Safety inventory & Seasonal Inventory - Network Design and Operation model.									
Unit – III	Managing Information Flow in Supply Chains								6
Managing Information Flow in Supply Chains: Demand forecasting Methods – Qualitative and Quantitative method - IT in Supply Chain Management - Enabling SCM and Strategic Management Framework for IT Adoption.									
Unit – IV	Supply Chain Innovation & Supply Chain Restructuring								6
Supply Chain Innovation: Supply Chain Integration - Building Partnership and Trust in a Supply Chain. Supply Chain Restructuring: Supply Chain Mapping - Postpone the Point of Differentiation, Changing the Shape of the Value-Addition Curve, Advance the Customer Ordering Point - Case Study.									
Unit – V	Supply Chain Analytics								6
Supply Chain Analytics: Integrated Models for Facility Location Selection and Warehouse Location Selection - Application of Tools for Aggregate Production Planning and Control – Inventory Model for Supply Chain - Case Study.

*includes Term Work(TW) & Online / Certification course hours

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)					
CO1	identify the issues on supply chain and drivers of supply chains	Applying (K3)					
CO2	apply strategies for managing flow of material along the supply chain in order to deliver superior value to the end customer in an effective and efficient manner.	Applying (K3)					
CO3	analyze the issues and decisions on managing information flow in supply chain.	Analyzing (K4)					
CO4	appraise the supply chain innovation that help firms in improving the service level and minimizing costs simultaneously.	Evaluating (K5)					
CO5	analyze the model in improving Responsiveness and Efficiency through Supply Chain Analytics.	Analyzing (K4)					
Mapping of COs with POs							
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6

24MBE32 - MANAGEMENT OF INVENTORY SYSTEMS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	This course aims at enabling the students to understand the system and processes to manage the stock of organization with the involvement of Technology system. This course helps the students manage, control, track and plan inventory.								
Unit – I	Introduction to Inventory Management								6
Introduction to Inventory and Materials Management: Concepts and Issues, Types of inventory, Inventory costs and their measurement, Structure of inventory models, Importance and areas of materials management. Classification of inventory problems, Importance-based classification of inventory, selective inventory management techniques and their use.									
Unit – II	Dynamic Inventory Problems under Risk								6
Dynamic Inventory Problems under Risk: General characteristics, Types of inventory control systems with known stock-out costs and service levels, Approximate and exact methods for safety stock determination, Numerical problems.									
Unit – III	Inventory Control and Purchasing								6
MRP, MRP-II and ERP: Concepts and Issues of MRP, Design of MRP system and its variants (MRP-II and ERP), Cases. Basics of Purchasing Management: Fundamentals and importance of industrial purchasing, Types of purchasing, Measurement and evaluation of performance of suppliers and purchasing systems.									
Unit – IV	Theory of Constraints and Materials Management								6
Theory of Constraints and Materials Management: Concept and Issues, Bottleneck and non-bottleneck resources, Process and transfer batches, Capacity constraint resources, D-B-R scheduling and VAT plants, Effect on materials management. JIT-based Approaches for Materials Management: Concepts and Issues, Relationship with Lean Engineering practices, Cases.									
Unit – V	Value Engineering/Analysis and Stores Management								6
Value Engineering/Analysis and Stores Management: Objectives and issues of Value Engineering/Analysis(VE/VA), Steps in VE/VA, , Basics of and approaches for stores management, Cases.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	analyze the different inventory models in practice.	Analyzing (K4)
CO2	appraise the appropriate dynamic inventory models for business situations.	Evaluating (K5)
CO3	evaluate an MRP system and performance of suppliers.	Evaluating (K5)
CO4	examine and identify the different bottlenecks	Evaluating (K5)
CO5	investigate and analyse the issues involved in value engineering analysis.	Analyzing (K4)

Mapping of COs with POs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6

24MBF01 - MARKETING ANALYTICS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	SE	20	0	20	20	60	3
Preamble	Marketing analytics enables marketers to measure, manage and analyze marketing performance to maximize its effectiveness and optimize return on investment (ROI). This course exposes the students with the tools to measure customer value and apply analytic tools to various marketing decisions. The course also aims at providing knowledge on estimating marketing budget and systematically allocating resources.								
Unit – I	Marketing Segmentation & Customer Value Analysis								4
Marketing Segmentation: Segmentation - Targeting - Positioning. Customer Value Analysis: Life Time Customer Value Calculation - Simulation Technique - Model for Customer Retention and Acquisition Spending.									
Unit – II	Product Analytics								4
Product Analytics: Identifying New Product Features using Conjoint Analysis - Forecasting New Product Sales using S Curves - Copernican Principle to Predict Duration of Future Sales - SERP for Attribute Testing Google Analytics.									
Unit – III	Pricing Analytics								4
Pricing Analytics: Pricing Techniques - Estimating Demand Curve and Optimizing Price - Prince Bundling - Nonlinear Pricing.									
Unit – IV	Distribution Strategy								4
Distribution Strategy: Distribution Channel Characteristics - Retail Location Selection - Channel Evaluation and Selection - Multi Channel Distribution - Distribution Channel Metrics.									
Unit – V	Promotion Analytics								4
Promotion Analytics: Estimating Promotion Budgets - Promotion Budget Allocation - Metrics for Traditional Media - Metrics for Social Media.									
LIST OF EXPERIMENTS / EXERCISES:									
Students will have practice sessions to use spreadsheet, Mega stat and any one statistical software for the following topics.									
1.	Generate a Model For Customer Retention and Acquisition Spending Using Given Data.								
2.	Estimate Linear & Power Demand Curves.								
3.	Price Bundling.								
4.	Market Basket Analysis for Patterns.								
5.	RFM analysis.

*includes Term Work(TW) & Online / Certification course hours

COURSE OUTCOMES:		On completion of the course, the students will be able to					BT Mapped (Highest Level)
CO1	identify suitable analytic tools to target and retain profitable customers and avoid high-risk customers					Applying (K3) Manipulation (S2)	
CO2	perform the product sales using analytic tools					Analysing (K4) Manipulation (S2)	
CO3	evaluate analytic tools for various understanding demand and pricing decisions					Evaluating (K5) Manipulation (S2)	
CO4	justify the use of analytic tools like market basket analysis in real life scenarios					Evaluating (K5) Manipulation (S2)	
CO5	evaluate the implications of promotion analytic metrics for measuring effectiveness of traditional and social media promotion measures					Evaluating (K5) Manipulation (S2)

24MBE39 - INDIAN MODELS IN ENTREPRENEURSHIP									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	SE	30	0	0	30	60	3
Preamble	The course helps the students to develop an understanding of the concept, process and development of entrepreneurship and promote them towards developing entrepreneurship in Indian context.								
Unit – I	Introduction to Indian Business Models								6
Significance of Indian Business Models – Scope of Micro and Small Enterprises – Role of Micro Enterprise in Economic Development - Forms of Business- Family Business - First Generation Entrepreneurs – Clusters Development.									
Unit – II	India's start up revolution								6
Trends –Imperatives – Benefits- Players Involved in The Ecosystem – Case Studies of Successful Start-Ups.									
Unit – III	Business Incubators								6
Meaning – Definition- Services Offered-Stages of Business Incubation- Types-Importance.									
Unit – IV	Rural Entrepreneurship & Social Entrepreneurship								6
Rural Entrepreneurship : Policy Factors And Barriers to The Development – Rural Entrepreneurship and Socio-Economic Environment of Indian Market- Concept of Congenial Environment And Its Role in Promoting Rural Entrepreneurship. Social Entrepreneurship: Factors Impacting Transformation Into Social Entrepreneur, Characteristics of Social Entrepreneurs, Case Study.									
Unit – V	Women Entrepreneurs								6
Women Entrepreneurs: Functions - Evolution in India- Entrepreneurial skills – Competency requirements-Opportunities – Challenges - Role of Women entrepreneurship in economic development. - Case Studies.

Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	NFE	30	0	0	30	60	3
Preamble	The course intends to enhance the knowledge of the students in understanding various intellectual property.								
Unit – I	Innovation and Entrepreneurship								6
Invention and Creativity - Types of Innovation - Innovation, Market and IP - Open Innovation and IP - IP Strategy.									
Unit – II	IPR								6
Trade Mark and Entrepreneurship: Trade Mark - Types - Trade Mark Registration - Trade Mark Infringement - Case Study on Trade Mark.									
Unit – III	Copy right, Industrial Design and Entrepreneurship								6
Copyright - Copyright and Related Rights - Copyright Registration and Entrepreneurship - Copyright Infringement - Industrial Design - Industrial Design in Business - Case Study on Copyright and Industrial Design.									
Unit – IV	Patent and Entrepreneurship								6
Patent - Introduction - Patent Strategies - Patent Infringement - Case Study on Patent.									
Unit – V	IP Strategy and Entrepreneurship								6
IP Valuation - Bank Loan, Insurance - Incubators - Research Parks - Various Government Policies - Entrepreneurship and IP Strategy.

24MBE45 - MANAGEMENT OF BANKS AND FINANCIAL INSTITUTIONS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	SE	30	0	0	30	60	3
Preamble	This course aims provide students with a comprehensive understanding of the Indian system, with a specific focus on banking operations. It helps students grasp both the case and supplementary functions of the bank in India and equips them then to recognize and effectively manage risks inherent in the banking sector.								
Unit – I	Indian Financial System								6
Indian Financial System: Overview of Indian Financial System - Segments of Financial Market- Liberalization of Financial System - Financial Intermediation. Central Bank's Role and Functions - Types of Banks - Commercial Banks and their Function - Products Dealt by Banks - Assets, Liabilities.									
Unit – II	Types of Banking								6
Types of Banking: Retail Banking – Definition and Significance - Retail banking products - Debit/Credit cards - Fund transfer - Marketing and Selling of Retail products - Cross selling opportunities. Trends in Retail Banking - Corporate Banking – Meaning and Importance - Corporate banking products - Current scenarios in Corporate Banking. International Banking – Foreign exchange rates - Case Studies in Retail Banking.									
Unit – III	Functions of Banks – I								6
Functions of Banks – I: Banker- Customer Relationship. Types of Collaterals and their Characteristics. Garnishee Order - Rights of a Banker. Banker's Lien - Pledge - Mortgage – Hypothecation - Know Your Customer (KYC) Guidelines - Mandate and Power of Attorney. Principles of Lending - Credit Appraisal Techniques.									
Unit – IV	Functions of Banks – II								6
Functions of Banks – II: Opening of Accounts for Various Types of Customers - Fund based and Non - Fund based credit facility. Fee Products Distribution and its Regulation - NPA Management – Provisioning - Ancillary Services. Priority Sector Lending - Agriculture Financing - Treasury Management - Financial inclusion.									
Unit – V	Risk Management in Banks								6
Risk Management in Banks: Concept of Risk - Types of Risk in Banks - Risk Management Process - Asset -Liability Management. Securitization – CIBIL - RBI Guidelines on Capital Adequacy Norms. Implementation of Basel norms - Basel II Basel III. Fund and Liquidity Management.

Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	SE	30	0	0	30	60	3
Preamble	This course aims to impart comprehensive knowledge of international marketing, including market dynamics, strategic entry methods, product management, pricing strategies, promotional tactics, distribution channels and integration of technology.								
Unit – I	Introduction to International Marketing								6
International Marketing: Scope of International Marketing – Importance of International Marketing – Globalization and Market Expansion - International Vs Domestic Marketing - Key Differences and Challenges in International Marketing - Benefits and Consideration - Advantages of Going Global - Cultural, Legal and Economic Consideration in International Marketing.									
Unit – II	International Marketing Environment								6
International Marketing Environment: Political Risk Analysis in International Marketing - Political Influences on Global Business Strategies - Legal Environment - Legal Frameworks and Regulations in International Trade - Socio Cultural Environment - Cultural Factors Impacting Marketing Decisions - Cross Cultural Communication in Global Marketing - Economic Trends and Market Opportunities - Implications of WTO on International Marketing.									
Unit – III	Marketing Strategies & Product Decisions								6
Product Planning for International Markets - Product Adaptation Vs Stanclaralisation - International Product Life Cycle and Product Development Strategies - Packaging and New Product Launch - Packaging Strategies for Global Markets. Launching Products in Diverse Cultural Settings.									
Unit – IV	International Pricing, Promotion and Distribution								6
International Pricing, Promotion and Distribution: International pricing strategies for Different Markets - Currency and Exchange Rate Consideration in Pricing - Promotion Strategies - Cultural Sensitivity in Advisement and Promotion - Global Branding - Positioning and Integrated Marketing Communication - International Distribution Planning.									
Unit – V	Technology Development in International Marketing								6
Technology Development in International Marketing: Technology and Competitiveness – Digital Transformation in Marketing Strategies - Big Data Analytics - e- Marketing and Global Supply Chain –Online Marketing Strategies and Digital Marketing Channels.

24MBG01 - TEXT ANALYTICS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	SEE	0	0	20	0	20	1
Preamble	The objective of this course is to provide an insight into the foundations of Text mining for qualitative data analysis.								
LIST OF EXPERIMENTS / EXERCISES:									
1.	Text Data Preprocessing a. Cleaning and normalizing text data. b. Tokenization and stemming.								
2.	Sentiment Analysis a. Using pre-trained sentiment analysis models. b. Analyzing sentiment from customer reviews or social media data.								
3.	Text Classification a. Building a text classifier using machine learning algorithms (e.g., Naive Bayes, SVM). b. Classifying documents into predefined categories (e.g., spam detection, topic classification).								
4.	Topic Modeling a. Implementing Latent Dirichlet Allocation (LDA) or Non-Negative Matrix Factorization (NMF) algorithms. b. Extracting topics from a corpus of documents and interpreting results.								
5.	Text Mining for Business Insights a. Analyzing text data from financial reports, customer feedback, or news articles. b. Extracting actionable insights for decision-making in business contexts.

COURSE OUTCOMES: On completion of the course, the students will be able to								BT Mapped (Highest Level)	
CO1	understand Natural language processing (NLP)							Applying (K3), Manipulation (S2)	
CO2	perform Informational retrieval							Applying (K3), Manipulation (S2)	
CO3	apply Document clustering and classification							Applying (K3), Manipulation (S2)

24MBG03 - MULTIVARIATE DATA ANALYTICS

Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	SEE	0	0	20	0	20	1
Preamble	The objective of this course is to provide an insight into the foundations of Multivariate Statistical Analysis in Business for better decision making.								

LIST OF EXPERIMENTS / EXERCISES:

1.	Multiple Regression: Estimating R^2 changes, Block analysis, model estimation, Logistic Regression.
2.	Factor Analysis – Data reduction: Data validation, Communalities, Factor Rotation.
3.	Cluster Analysis: Segmentation - Hierarchical cluster, K-means cluster.
4.	Discriminant Analysis: Eigen value, Wilks lambda, Discriminant function equation.
5.	Conjoint Analysis: Design conjoint analysis experiment, Segmentation, profitability analysis.

COURSE OUTCOMES:

On completion of the course, the students will be able to

**BT Mapped
(Highest Level)**

CO1	apply regression technique to predict outcome variable for decision making	Applying (K3), Manipulation (S2)
CO2	use data reduction techniques to reduce data and segment respondent	Applying (K3), Precision (S3)
CO3	formulate new product development using conjoint analysis and discriminate the difference.	Applying (K3), Manipulation (S2)

24MBG14 - INTERNATIONAL VISIT AND ENVIRONMENT STUDY										
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit	
Prerequisites	Nil	3/4/5/6	ACC	0	0	40	0	40	2	
Preamble	This course offers students authentic travel experiences aimed at enhancing their intellectual development. If provided hands on exposure to the corporate environment in foreign nations, understand macroeconomic indicators and evaluating career opportunities abroad. Additionally, it helps students overcome cultural barriers in preparation for future international work and living.									
LIST OF EXPERIMENTS / EXERCISES:										
1.	Experiencing/doing by visiting any foreign nation									
2.	Macro Environment study of the visited country.									
3.	Reviewing and reflecting on the cultural experiences.									
4.	Drawing learning from the reflections.									
REFERENCES/ MANUAL /SOFTWARE:										
1.	International Visit Guidelines									
COURSE OUTCOMES: On completion of the course, the students will be able to							BT Mapped (Highest Level)			
CO1	apply new experiences to challenge personal beliefs and expand capabilities.						Applying (K3) / Manipulation (S2)			
CO2	apply exposure to new countries to view challenges from a creative perspective.						Applying (K3) / Manipulation (S2)			
CO3	develop new study and careers pathways informed by international experiences.						Creating (K6) / Manipulation (S2)

24MBG17 - BUSINESS ETHICS AND CORPORATE SOCIAL RESPONSIBILITY (CSR)									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	ACC	0	0	40	0	40	2
Preamble	The course on Business Ethics and Corporate Social Responsibility (CSR) is designed to equip students with the knowledge and skills necessary to navigate ethical challenges in business environments and understand the importance of social responsibility in organizational practices. Through theoretical discussions, case studies, and interactive exercises, students will develop a deep understanding of ethical decision-making, CSR strategies, and their impact on stakeholders and society.								
LIST OF EXPERIMENTS / EXERCISES:									
1.	Ethical Dilemma Analysis: Students will analyze case studies presenting ethical dilemmas in business contexts. They will identify ethical issues, evaluate decision-making processes, and propose ethical solutions based on ethical frameworks and principles.								
2.	CSR Strategy Development: In groups, students will develop comprehensive Corporate Social Responsibility (CSR) strategies for fictional companies. They will consider environmental, social, and economic factors, set CSR objectives, and outline implementation plans to address societal needs and expectations.								
3.	Ethical Leadership Simulation: Through role-play simulations, students will step into the role of ethical leaders facing complex ethical challenges. They will practice ethical decision-making, communication skills, and conflict resolution techniques in leadership positions.								
4.	Stakeholder Engagement Workshop: Students will participate in a workshop focusing on stakeholder engagement strategies in ethical decision-making. They will analyze stakeholder perspectives, identify stakeholder needs and expectations, and develop communication strategies to foster trust and transparency.								
5.	Ethical Marketing Campaign Analysis: Students will evaluate real-world ethical marketing campaigns. They will assess the ethical implications of marketing strategies, analyze their impact on consumer behavior and perception, and discuss the role of ethics in marketing practices.								
REFERENCES/ MANUAL /SOFTWARE:									
1.	Business Ethics and CSR Manual.								
COURSE OUTCOMES: On completion of the course, the students will be able to							BT Mapped (Highest Level)		
CO1	understand ethical principles and frameworks, employing ethical reasoning to analyze and resolve ethical dilemmas in business contexts.						Understanding (K2), Imitation (S1)		
CO2	develop the ability to design and implement comprehensive Corporate Social Responsibility (CSR) strategies for organizations, emphasizing social responsibility and sustainability in business practices.						Applying (K3), Precision (S3)		
CO3	demonstrate ethical leadership skills, encompassing decision-making, communication, and conflict resolution, while upholding ethical principles and fostering a culture of integrity within organizations.						Applying (K3), Precision (S3)		
Mapping of COs with POs									
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6

24MBL31 - MANAGERIAL SKILL LABORATORY									
Programme& Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	4	CC	0	0	40	0	40	2
Preamble	This course enhances the students' knowledge in the application of business communication principles through creation of effective business documents and oral presentations. This allows the students to gain knowledge and apply them in team communication and also enables them in the use of technology to facilitate the communication process.								
LIST OF EXPERIMENTS / EXERCISES:									
1.	Negotiation skills: Involving multiparty-Sales Negotiation (eg. Closing a deal, handling challenging prospects, handling objections from a prospect etc)								
2.	Effective Communications : Planning, conducting, recording and reporting meetings								
3.	Verbal & Non Verbal Etiquettes : Role Play – various personal and business scenarios. (eg. Communication between teacher and student, superior and subordinate in office, aged junior and young senior etc)								
4.	Business Correspondence : Email writing and its etiquettes (Subject, content and attachment)								
5.	Communicating effectively in groups :Current trends / News Presentation& Questioning (eg. CGI Ads positives and negatives)								
6.	Decision making: Decision Tree analysis for a problem. (Eg. Choosing electives during II Tri)								
7.	Conflict Resolution: Role Play - Business scenarios (Eg. Arguing customers, handling dissatisfied customers etc.)								
8.	Listening Skills: Listening to a audio file, students should answer MCQs. (Eg. Jio Annual meet speech)								
9.	Types of Thinking: Idea generation for promoting a product / service (PPT) (eg. Diet hotel promotion)								
10.	Speaking: Just a minute & Business Telephonic conversation (eg. Cold call in promoting a product, Speaking to a vendor.).								
	*The examples given are illustrative and not exhaustive.

24MBT41 - CORPORATE STRATEGY									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	4	CC	30	0	0	30	60	3
Preamble	This course enlightens the learners with the concepts of strategic analysis, strategy formulation and strategy implementation. The students can equip themselves with strategic management tools and trends, and develop functional strategies to respond to business situations.								
Unit – I	Strategic Management &Strategy Analysis I								6
Strategic Management - Process - Values, Vision, and Mission Statement - Types of Strategy - Framework. General Environment – Scanning and Monitoring - PEST Analysis. Competitive Environment: Porter's Five Forces Framework-Value Net-Strategic Groups.									
Unit – II	Strategy Analysis II								6
Internal Environment: Value Chain Analysis - SWOT Analysis. Resource Based View Strategy: Resources - Core Competencies- Distinctive Capabilities - Competitive Advantage – Assessing Organization Performance.									
Unit – III	Business and Corporate Level Strategy								6
Business Level Strategy: Cost Leadership, Differentiation and Focus Strategies – Resource-Based Approach - Industry Life Cycle. Corporate Level Strategy: Growth Strategies - Related and Unrelated Diversification - Portfolio Analysis - BCG Matrix – GE McKinsey Matrix.									
Unit – IV	International Strategy and Globalization								6
International Strategy-MNC Goals – Factors – Types-Entry Mode Strategies-Porter's Diamond of Competitive Advantage- Myths of Global Strategy - Challenge of Globalization.									
Unit – V	Strategy Implementation								6
Organizational Structures-Organizational Processes – Strategic Control System - Strategic Change. Strategic Leadership - Leadership Organization-Impact of Leadership on Vision, Valueand Culture – Leading Strategic Change.

24MBE03 - MERCHANT BANKING AND FINANCIAL SERVICES									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	This course provides a comprehensive understanding of merchant banking and financial services focusing on their operational components and recent development in the Indian financial system.								
Unit – I	Merchant Banking								6
Merchant Banking: Functions - Regulatory Framework - SEBI Regulations on Merchant Bankers - SEBI Guidelines on Capital Markets - Merchant Banking in India.									
Unit – II	Public Issue Management								6
Public Issue Management – Mechanism - Categories of Securities Issue - Green Shoe Option – E-IPO, Role of Issue Manager - Marketing of New Issues – Pre Issue Activities - Post Issue Activities – Pricing - Laws Relating to Issue Management.									
Unit – III	Role of Merchant Banker								6
Role of Merchant Banker: Prospectus Preparation – Underwriting of Securities - Capital Structure Decisions - Dealing with Registrar - Brokers and Advertising Consultant.									
Unit – IV	Fee Based Management Services								6
Fee Based Management Services – Merger and Acquisition Advisory Services - Corporate Restructuring -Portfolio Management Services - Credit Syndication - Credit Rating - Mutual Funds.									
Unit – V	Fund Based Financial Services								6
Fund Based Financial Services – Leasing and Hire Purchasing - Financial Evaluation and Implications- Consumer Credit - Credit Cards - Real Estate Financing - Bills Discounting - Factoring and Forfeiting - Venture Capital - Ethical Consideration in Fund based Service.

24MBE11 - RETAIL MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	The objective of this course is to introduce the students to the domain of organized retailing. This course is planned to provide a strategic perspective of the retailing industry and explore how managers can use the framework of Retail mix and each of its elements to optimize decision making.								
Unit – I	Introduction to Retailing								6
Introduction to Retailing - Definition - Scope and Evolution of Retailing - Types of Retail Formats - Trends in Indian Retailing Industry - Benefits of Retailing - Global Retailing Environment									
Unit – II	Retail Location & Retail Financing								6
Retail Location: Techniques to Evaluate Potential Site for Store Location - Retail Store Layout, Design and Visual Merchandising. Retail Financing: Financial Analysis for Retailer - Evaluation of Retailer's Financial Strategic Profit Models.									
Unit – III	Retail Merchandising & Retail Logistics								6
Retail Merchandising - Introduction to Merchandising - merchandising plans - Category Management – Managing Private labels - Inventory Management Retail Logistics - Physical Flow of Merchandise – Reverse Logistics									
Unit – IV	Retail CRM								6
Retail CRM : Domestic and International Customer Attitudes towards Shopping – Buying Process - Retail Service Quality Techniques - E-Commerce Shopping Behavior Retail Pricing: Pricing Objectives - Pricing Strategies – Framework to Develop Retail Pricing Mechanism									
Unit – V	Retail Promotion & Retail Management System								6
Retail Promotion : Aspects of Retail Promotion - Major Types of Retail Promotions - Effectiveness of Retail Promotion - Retail Sales Force – Public Relations Retail Management System : Introduction – Purpose of Retail Information system – Tools and Technology in Gathering Data – Big Data in Retailing

24MBE19 - COMPENSATION AND BENEFITS MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Fundamental Knowledge on HRM	3/4/5/6	FE	30	0	0	30	60	3
Preamble	The course helps the students in determining the wage, pay structures, design benefits and incentives for individuals and team in an organization.								
Unit – I	Wages								6
Wages: Concept-Determination Process-Influencing Factors. Wage Plans: Types- Time Wages- Piece Wages- Balance or Debt Method.									
Unit – II	Pay Structures								6
Pay Structures: Pay Surveys- Grades. Variable Pay: Types. Salary: Components – Scale of Pay- Allowances- Fringe Benefits-Perquisite - Wage and Salary Structure.									
Unit – III	Pay Determining								6
Pay Determining: Pay for Performance- Team Based Incentives- Organization Based Profit Sharing- Bonus Plans- Gain Sharing Plans- ESOPs – Case Study.									
Unit – IV	Compensation								6
Compensation: Designing a Compensation System: Approaches- Principles- Perception of Fairness. Compensation and Benefits to gain Competitive Advantage - Compensation Design Exercise.									
Unit – V	Compensation Administration & Flexible Workforce								6
Compensation Administration: Monitoring - Audit - Review of the System – Matching to Market Force. Flexible Workforce: Contingent Employees - Flexible Work Schedules. – Case Study.

24MBE36 - SOFTWARE PROJECT MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	FE	30	0	0	30	60	3
Preamble	This course provides practical approaches for managing, planning, organizing and implementing Information Systems projects using modern management techniques. Complete hands-on projects requiring management of project resources, scope, time-line, cost, scheduling, human and other resource.								
Unit – I	Introduction to SPM								6
Introduction to SPM: Definition-components of SPM-challenges and opportunities-tools and techniques-managing human resource and technical resource-costing and pricing of projects-training and development-project management techniques									
Unit – II	Software Development								6
Software Development: Monitoring and measuring of SW development –cost, size and time metrics-methods and tools for metrics –issues of metrics in multiple projects.									
Unit – III	Quality measurement								6
Quality measurement :Quality in SW development –quality assurance-quality standards and certifications-the process and issues in obtaining certification-the benefits and implications for the organization and its customers-change management									
Unit – IV	Risks in SPM								6
Risks in SPM: The risk issues in SW development and implementation-identification of risks-resolving and avoiding risks-tools and methods for identifying risk management.									
Unit – V	Project implementation								6
Project implementation: Multiple projects-off-shore development issues-managing human resources-pricing and payments across countries –remote development and implementation.

24MBE02 - WORKING CAPITAL MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	This course aims to provide a conceptual foundation for analyzing working capital in the context of corporate value creation. It focuses on developing skills in evaluating corporate policies related to credit granting, inventory management and acquiring working capital finance.								
Unit – I	Working Capital Management								6
Working Capital Management: Assessment of Average Requirement of Working Capital - Working Capital Controls and Banking Policy: Tandon Committee, Chore Committee - Digital Transformation and its Impact on Streaming Working Capital.									
Unit – II	Receivables Management								6
Receivables Management: Objectives- Credit Policy - Nature and Goals - Optimum Credit Policy - Credit Policy Variables- Credit Evaluation-Monitoring Receivables.									
Unit – III	Inventory Management								6
Inventory Management: Nature of Inventories- Need to Hold Inventories- Objectives of Inventory Management- Inventory Management Techniques- Analysis of Investment in Inventory- Inventory Control Systems-Aging Schedule of Inventory.									
Unit – IV	Cash Management:								6
Cash Management: Digital Payment System and their Role in Cash Management - Facets of Cash Management-Managing Cash Collections and Disbursements- Optimal Cash Balance Model.									
Unit – V	Working Capital Finance								6
Working Capital Finance: Accruals-Trade Credit and other current liabilities-Working Capital Advance by Commercial Banks: Certificate of Deposits, Public Deposits, Inter-corporate Deposits, Commercial Paper.

24MBE20 - PERFORMANCE MANAGEMENT SYSTEMS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Fundamental Knowledge on HRM	3/4/5/6	FE	30	0	0	30	60	3
Preamble	Performance Management Systems would help the students to use objectives and measurable criteria for assessing employee performance in organizations. Students will understand that the organization's goal become part of the requirements for individual employees.								
Unit – I	Performance Management								6
Performance Management: Definition - Objectives - Characteristics, Functions - Principles of Management Plan - Process : Steps in Performance Management Process - Case Study.									
Unit – II	Performance Appraisal								6
Performance Appraisal: Definition - Approaches - Objectives of Performance Appraisal - Factors Distorting Appraisal - Essential Conditions for Effective Appraisal - Steps to Performance Appraisal - Characteristics of a Sound Appraisal Plan - Limitations of Performance Appraisal.									
Unit – III	Performance Appraisal Process								6
Performance Appraisal Process: Purpose of Performance Appraisal -- Performance Appraisal Design - Methods of Performance Appraisal - MBO, 360 Degree Feedback Appraisal - Assessment Centre: Techniques - Case Study.									
Unit – IV	Team Performance Management								6
Team Performance Management: Principles - Work Wheel and Team Performance - Measuring and Managing Team Performance - Case Study.									
Unit – V	Performance Audit								6
Performance Audit: Steps - Methods and Techniques. Methods of Valuating Human Resources – Scope, HR audit Objectives, Purpose, Benefits - Legal and Ethical Aspects of Performance Management.

24MBE31 - INDUSTRY 4.0									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	In the current scenario, the manufacturing, services and logistics are intelligently linked together, allowing for big data mining that will optimize everything. This course on Industry 4.0 will expose the students on how developments such as machine-to-machine communication and the internet of things (IoT) are integrated for increased automation, improved communication and self-monitoring, and production of smart machines that can analyze and diagnose issues without the need for human intervention.								
Unit – I									6
Introduction to Industry 4.0: The Various Industrial Revolutions-Digitalization and the Networked Economy-Drivers, Enablers, Compelling Forces and Challenges for Industry 4.0-The Journey so far: Developments in USA, Europe, India and other countries-Comparison of Industry 4.0 Factory and Today's Factory-Trends of Industrial Big Data and Predictive Analytics for Smart Business Transformation.									
Unit – II									6
Road to Industry 4.0: Internet of Things (IoT) - Industrial Internet of Things (IIoT) - Internet of Services-Smart Manufacturing-Smart Devices and Products-Smart Logistics-Smart Cities-Predictive Analytics									
Unit – III									6
Related Disciplines, System, Technologies for enabling Industry 4.0: Cyber physical Systems-Robotic Automation and Collaborative Robots-Support System for Industry 4.0-3D printing- Mobile Computing-Related Disciplines-Virtual/Augmented Reality-Cyber Security									
Unit – IV									6
Role of data, information, knowledge and collaboration in future organizations: Resource-based view of a firm-Data as a new resource for organizations-Harnessing and sharing knowledge in organizations-Cloud Computing Basics-Cloud Computing and Industry 4.0- Bit coin and Block chain.									
Unit – V									6
Business issues in Industry 4.0 and Case Studies: Case studies on IIoT and Industry 4.0 - Opportunities and Challenges - Future of Works and Skills for Workers in the Industry 4.0 Era - Strategies for competing in an Industry 4.0 world.

24MBE37 - SOFTWARE QUALITY MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	FE	30	0	0	30	60	3
Preamble	The course provides an introduction to software quality assurance. It discusses the issues, processes and techniques in software quality assurance. The course will train students to apply quality assurance in different activities of software development and maintenance.								
Unit – I	Software Quality								6
Software Quality: Definition of Software Quality, Quality Planning, Quality system –Quality Control Vs Quality Assurance –Product life cycle –Project life cycle models.									
Unit – II	Software Engineering Activities								6
Software Engineering Activities: Estimation, Software requirements gathering, Analysis, Architecture, Design, development, Testing and Maintenance.									
Unit – III	Supporting Activities								6
Supporting Activities: Metrics, Reviews –SCM –Software quality assurance and risk management.									
Unit – IV	Software Quality Management Tools								6
Software Quality Management Tools: Seven basic Quality tools –Checklist –Pareto diagram –Cause and effect diagram –Run chart –Histogram –Control chart –Scatter diagram –Poka Yoke –Statistical process control –Failure Mode and Effect Analysis –Quality Function deployment –Continuous improvement tools –Case study.									
Unit – V	Quality Assurance Models								6
Quality Assurance Models: Software Quality Standards, ISO 9000 series –CMM, CMMI –P-CMM –Case study.

24MBF02 - HUMAN RESOURCE ANALYTICS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	TW*	Total	Credit
Prerequisites		3/4/5/6	SE	20	0	40	60	120	3
Preamble	The aim of this course is to make the students to understand and measure different components of Human Resource function in a quantifiable manner and analyse them with analytical tools.								
Unit – I	Understanding HR Analytics & Analysis Strategies								4
Understanding HR Analytics: HR Analytics Defined - Predictors, Prediction and Predictive Modelling - Seven Pillars of People Analytics. Analysis Strategies: LAMP Framework - Descriptive Reports to Predictive Analytics - Statistical Significance.									
Unit – II	Talent Acquisition& Workforce Planning Analytics								4
Talent Acquisition: Pre-interview Assessment Criteria – On boarding and Cultural fit - Stages, OPEN Analytical Framework for Effective on boarding. Workforce Planning Analytics: Key components - Dos and Don'ts – Workforce metrics.									
Unit – III	Performance Analytics &Employee Engagement								4
Performance Analytics: Performance Measures – Benefits Employee Engagement: Meaning- Measuring Employee Engagement - Employee Engagement Surveys & Measures.									
Unit – IV	Talent Retention Analytics & Employee Absenteeism								4
Talent Retention Analytics: Retention Analytics - Protecting Most Valuable Asset - Implementing Proactive Talent Retention Models - Data for Talent Attrition Predictive Modeling. Employee Absenteeism: Analytics and Measures - Employee Health and Wellness Measures.									
Unit – V	Leveraging People Analytics & Big Data and People Analytics								4
Leveraging People Analytics: Future of People Analytics - Rise of Employee Behavioral Data - People Analytics as a Specialized Department - Employee Data Privacy Backlash. Big Data and People Analytics: Big Data and People Analytics.									
LIST OF EXPERIMENTS / EXERCISES:									
1.	Recruitment Analysis								
2.	Talent Acquisition Analysis								
3.	Employee Performance Analysis								
4.	Employee Engagement Analysis								
5.	Employee Turnover Analysis

24MBE46 - BANKING TECHNOLOGY MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	SE	30	0	0	30	60	3
Preamble	This course familiarize the students about banking in a digitalized environment with prime focus on the need for digitalization of banking industry and banking management in a technological environment. This course aims to provide the students with a comprehensive knowledge and application of new technologies that are used to innovate and streamline financial systems.								
Unit – I	Branch Operations and Core Banking								6
Branch Operations and Core Banking: Introduction and Evolution of Banking Management – Technological Impact in Banking Operations –Rangarajan Committee Reports and Reforms in Banking Industry - Total Branch Computerization and Branch Technology – Electronic Banking and its Products - Core Banking - Challenges and Implementation.									
Unit – II	Delivery Channels								6
Delivery Channels: Overview – Automated Teller Machines – Anywhere Anytime Banking – Internet Banking – Mobile Banking – Phone Banking – Call centers - Payment Gateways – Card Technologies – MICR Electronic Clearing - Digital Money.									
Unit – III	Inter Bank Payment and Settlement System								6
Inter Bank Payment and Settlement System: Structured Financial Messaging System – National Electronic Fund Transfer System (NEFT) – Electronic Clearing System (ECS) – SWIFT – Real Time Gross Settlement (RTGS) – Negotiated Dealing Systems (NDS) and Securities Settlement System – Information System Security and Disaster Management –RuPay: India's Card Payment Network - Plastic Wallet Technology - Forex Operations, Knowledge Management (MIS/DSS/EIS).									
Unit – IV	Back Office Operations								6
Back Office Operations: Bank Back Office Management – Inter Branch Reconciliation – Treasury Management – Risk Management – Data Centre Management – Network Management – Customer Relationship Management (CRM) - Case Study.									
Unit – V	Contemporary Issues in Banking Techniques								6
Contemporary Issues in Banking Techniques: Analysis of Digital Lending (including lending through online platforms and mobile apps) Reports – Banking Softwares – Licensing Small banks and Payment Banks – case studies on banking technology.

24MBG10 - ACADEMIC RESEARCH PAPER WRITING

Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil		SEE	0	0	20	0	20	1

Preamble This course is designed to foster advanced competencies in data analysis, interpretation of research findings, discussion of implications, conclusion drawing, addressing managerial implications, and result publication within academic writing contexts. Students will acquire skills in designing data analysis plans, presenting results objectively, proposing future research directions, and effectively publishing research outcomes.

LIST OF EXPERIMENTS / EXERCISES:

- Plan Data Analysis:** Design a data analysis plan specifying the statistical techniques or qualitative methods to be used for analyzing research data.
- Write About Results:** Interpret and present research findings clearly and objectively, including tables, charts, and graphs where applicable.
- Discussion of Findings:** Analyze and discuss the implications of research results, comparing them with existing literature and addressing any unexpected outcomes.
- Conclusions:** Draw conclusions based on the research findings, highlighting key insights and contributions to the field.
- Managerial Implications, Limitations, and Future Study Scope:** Discuss the practical implications of the research for managerial decision-making, acknowledge study limitations, and propose avenues for future research.

COURSE OUTCOMES:

On completion of the course, the students will be able to

**BT Mapped
(Highest Level)**

CO1	interpret research findings clearly and objectively, using appropriate visual aids like tables, charts, and graphs	Apply (K3), Imitation (S1)
CO2	acknowledge study limitations and propose potential areas for future research to address gaps identified during analysis.	Analyzing (K4), Manipulation (S2)
CO3	synthesize research outcomes effectively, offering valuable insights and making substantial contributions to both academic discourse and professional practice within the field.	Evaluating(K5), Manipulation (S2)

Mapping of COs with POs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6
CO1	2	3		2		1
CO2	2	3		2		1
CO3	2	3		2		1

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

24MBG12 - NATIONAL / GLOBAL VIRTUAL TEAM PROJECT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	ACC	0	0	40	0	40	1
Preamble	This course aims to build persuasion and communication skills that influence virtual team members to do the project designated. The course will also help the students to increase the level of trust, accountability and knowledge sharing among team members.								
LIST OF EXPERIMENTS / EXERCISES:									
1.	Identifying Virtual Teams								
2.	Building Trust among team members								
3.	Communication among team members								
4.	Formulating research problem								
5.	Data collection								
6.	Analysis and Finding								
7.	Report writing and Presentation								
REFERENCES/ MANUAL /SOFTWARE:									
1.	Virtual Team Project Guidelines								
COURSE OUTCOMES: On completion of the course, the students will be able to							BT Mapped (Highest Level)		
CO1	Analyse the variance in awareness among virtual team members.						Analyzing (K4), Manipulate (S2)		
CO2	Evaluate and implement strategies for successful virtual team work.						Evaluating (K5), Precision (S3)		
CO3	Facilitate effective communication foster trust across cultures and locations.						Evaluating (K5), Precision (S3)		
Mapping of COs with POs									
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6

24MBG16 - SOCIAL SENSITIZATION PROJECT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	ACC	0	0	40	0	40	2
Preamble	This Course makes aims to equip students with the skills and knowledge necessary to understand and contribute to social justice, fostering safe, healthy, equitable and thriving communities through self awareness, leadership and advocacy.								
LIST OF EXPERIMENTS / EXERCISES:									
1.	Identify the needs of the society								
2.	Forming teams with shared interest.								
3.	Developing awareness of social issues.								
4.	Designing activities to achieve team goals.								
5.	Engaging community activities.								
6.	Demonstrating effective resource utilization.								
7.	Preparing and presenting reports on activities.								
REFERENCES/ MANUAL /SOFTWARE:									
1.	Social Project Guidelines								
COURSE OUTCOMES: On completion of the course, the students will be able to							BT Mapped (Highest Level)		
CO1	understand the principles of social justice and their application in creating safe, healthy and equitable communities.						Understanding (K2), Imitation (S1)		
CO2	apply critical thinking skills to comprehend the concept of social sensitization and its implications on society.						Applying (K3), Precision (S3)		
CO3	identify and categorize instances of social sensitization innovation with communities.						Applying (K3), Precision (S3)		
Mapping of COs with POs									
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6

24MBP41 - SUMMER INTERNSHIP									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	4	FW	0	0	40	0	40	2
Preamble	The course facilitates the students with practical experience and comprehensive understanding of key business function, within a real - world organizational setting.								
LIST OF EXPERIMENTS / EXERCISES:									
1.	Introduction about The Company								
2.	Organizational Profile								
3.	Marketing Functions and Activities								
4.	Finance Functions and Activities								
5.	HRM Functions and Activities								
6.	Production Function and Product Layout and Location								
7.	Relevant Activity, Charts, Tables, Graphs, Diagrams etc.								
REFERENCES/ MANUAL /SOFTWARE:									
1.	Summer Internship Guidelines.								
COURSE OUTCOMES: On completion of the course, the students will be able to							BT Mapped (Highest Level)		
CO1	apply the management concepts in functional areas to real - world business scenarios.						Applying (K3), Manipulation (S2)		
CO2	demonstrate the understanding of professional and ethical practice followed within organization						Understanding (K2), Manipulation (S2)		
CO3	acquire skills to communicate efficiently and gain management skills related to organization						Applying (K3), Precision (S3)		
Mapping of COs with POs									
COs/POs	PO1	PO2	PO3	PO4	PO5		PO6		
CO1	3			2			2		
CO2	2		2	2			3

24MBT51 - SUSTAINABILITY MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	C	30	0	0	30	60	3
Preamble	To provide knowledge and insight into Fundamentals of ESG, Environment and Green Initiatives, the best Governance and ethical Practices and sustainability reporting.								
Unit – I	Environment & Green Initiative								6
Environment Protections - Need - Policies - Environmental Permits - Environmental Impact - Indian Corporate Experiences - Energy Consumption - Successful Indian Cases - Features of Energy Conservation Act - Green Initiatives - Pollution Abatement - Reduction in Carbon emission - Resource Efficiency - Renewably Energy - Water Management - Waste Management.									
Unit – II	Corporate Social Responsibility								6
Meaning - Sustainability and CSR - CSR Under Companies Act - CSR Committee - CSR Polices - CSR Implementation - Specific CSR Activities - Mapping SDCs with CSR Programmes - CSR Reporting - ESG Investment - Characteristics - Benefits - Challenges.									
Unit – III	Corporate Governance								6
Meaning - Need - Elements - Governing Mechanism for Listed Companies, Unlisted Companies and Financial Institutions, Base Committee Guidelines - Gender Diversity in Boards in India - Disclosures in Corporate - Website Disclosures - Employees and Corporate Governance - Posh Act Features.									
Unit – IV	Business Ethics								6
Business Ethics: Meaning and Features - Fundamental Principles - Ethical Dilemma - Steps to Resolve Ethical Dilemma - Code of Ethics and Code of Conduct - Common Business Ethical Issues - Case lets.									
Unit – V	Environment & Sustainability Reporting								6
Sustainability Audit - ESG Reporting - Emerging Mandates from Government and Regulations - Integrated Reporting Framework GRI Framework - Business Responsibility and Sustainability Reporting.

24MBE09 - TIME SERIES ECONOMETRICS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	The purpose of this course is to equip students with advanced knowledge and practical skills in time series analysis, focusing on its application in economics and finance. By probing into classical and modern techniques, students will gain a deep understanding of trend identification, volatility modelling and strategic forecasting, enabling them to make informed decisions in complex, dynamic environments.								
Unit – I									6
Classical Time Series Analysis – Utility of Time Series Analysis – Components of Time Series Data – Measurement of Trend, Seasonality and Cycles – Moving Averages and Smoothing Techniques to Time Series Analysis - Classical Time Series Decomposition Models – Additive and Multiplicative Models – Forecasting Using Smoothing Techniques and Time Series Decomposition Methods – Applications in Finance .									
Unit – II									6
Tools of Modern Time Series Analysis – Stochastic and Stationary Process – Tests of Stationary – Trend Vs Difference Stationery Process – Dickey-Fuller and Augmented Dickey-Fuller Tests – Spurious Regression and Co-Integration of Time Series – Engle-Granger Test – CRDW Test – Error Correction Mechanism.									
Unit – III									6
Univariate Time Series Analysis and Forecasting – Linear Time Series Analysis – Autocorrelation Function and Partial Auto-Correlation Function – Auto-Regressive (AR) Models, Moving Average (MA) Models, Box-Jenkins (BJ) ARMA and ARIMA Models – Identification – Estimation and Forecasting With ARIMA Models – Economic Applications.									
Unit – IV									6
Multivariate Time Series Analysis and Forecasting – Vector Autoregressive (VAR) Models – Advantages and Problems – Estimation and Forecasting With VAR – Impulse Response Function – Johansen Co-Integration Test on VAR – Granger Causality Test – Applications in Finance.									
Unit – V									6
Modeling Volatility and Auto-Correlation in Time Series – Motivation and Test for Non-Linearity – Historical And Implied Volatility – Auto-Regressive Conditional Hetroscdasticity (ARCH) Model – Generalised ARCH Model – Applications in Finance.

*includes Term Work(TW) & Online / Certification course hours

COURSE OUTCOMES: On completion of the course, the students will be able to					BT Mapped (Highest Level)		
CO1	apply the components of time series data and apply moving averages and smoothing techniques for trend measurement and seasonality detection.				Applying (K3)		
CO2	compare and contrast stationary and non-stationary processes, conduct Dickey-Fuller tests, and evaluate co-integration in time series data.				Applying (K3)		
CO3	interpret autocorrelation and partial autocorrelation functions, estimate ARIMA models, and assess their forecasting accuracy in economic applications.				Evaluating (K5)		
CO4	analyze VAR models, perform Johansen Co-integration tests, and evaluate Granger causality in multivariate time series data for financial applications.				Analyzing (K4)		
CO5	analyse ARCH and GARCH models to model volatility in financial time series data.				Analyzing (K4)

24MBE14 - PRODUCT AND BRAND MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	FE	30	0	0	30	60	3
Preamble									
The course provides students with valuable perspectives and a common denominator to interpret the potential effects and trade-offs of various strategies and tactics for product and brand management.									
Unit – I	Foundations in New Product Development								6
Foundations in New Product Development: The Product and Product Life Cycle in Theory and Practice, Product Portfolios, New Product Strategy, Idea Management, Screening New Product Ideas, Concept Development and Testing, Business Analysis, Product Testing.									
Unit – II	Product Management and Elimination								6
Product Management and Elimination: Commercialization, Managing Growth and Mature Products, Controlling the Product Line, Reaching the Decision to Delete a Product and Implementing the Deletion Decision.									
Unit – III	Design and Implementation of Brand strategy								6
Design and Implementation of Brand strategy: Developing a Brand Strategy – Customer-based Brand Equity and Brand Positioning, Brand Resonance - Brand Marketing Programs – Choosing Brand Elements, Designing Marketing Programs, Leverage Secondary Brand Association.									
Unit – IV	Measure and Interpret Brand Performance								6
Measure and Interpret Brand Performance: Developing Brand Equity Measurement and Management System, Measuring Sources and outcomes of Brand Equity.									
Unit – V	Growing and Sustaining Brand Equity								6
Growing and Sustaining Brand Equity: Design and Implement Branding Architecture Strategies, Introducing and Naming New Products and Brand Extensions, Managing Brands over Time and over Geographic Boundaries and Market Segments.

24MBE22 - ORGANIZATIONAL DEVELOPMENT AND CHANGE MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	FE	30	0	0	30	60	3
Preamble	The course helps the students to learn the concepts of organization development and change management. Inputs are given on various models, interventions and to manage OD and change management processes in business organization.								
Unit – I	Organization Development								6
Introduction to OD: Growth and Relevance of OD - Theories of Planned Change - General Models of Planned Change - Manage OD Practitioner: Skills & Role of OD Practitioner. Entering & Contracting: Entering in to OD Relationship - Develop a Contract - Interpersonal Issues in Entering and Contracting.									
Unit – II	Process of OD								6
Process of OD: OD Diagnosis - Need Open System Model - Level of Diagnosis - Group, Individual and Organizational. Diagnostic info: Collecting Data Sampling, Analyzing Data - Feedback - Case Study.									
Unit – III	OD Interventions								6
OD Interventions: HR Process Intervention: Interpersonal and Group Process Approaches - Organizational Process Approaches - Techno Structural Intervention: Restructuring - Employee Involvement - Work Design - Case Study.									
Unit – IV	HR Intervention and Strategic Change Interventions								6
HR Intervention: HR Performance Management - Talent Management - Work force Diversity and Wellness. - Strategic Change Intervention: Transformational Change - Continuous Change - Trane Organizational Change.									
Unit – V	Change Management								6
Change Management: Change Management Process - Models of Change: Process, Content - Resistance to Change - Role and Skill Sets Change Agent - Organizational Culture and Change - Case Study.

24MBE27 - LEAN MANUFACTURING									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	This course is designed to help students understand how factory operates with the minimum possible resources and yet maximizing the productivity that is accomplished with these resources. Lean production works by eliminating the wasteful activities so that only the value adding and auxiliary activities are performed.								
Unit – I	Systems Approach								6
Systems Approach: Lean Manufacturing through waste elimination – 7 Wastes – Takt Time – Takt time calculation -Continuous Flow –Liker's Toyota Way –The TPS House- The Goals of TPS.									
Unit – II	Primary Tools used in Lean Systems								6
Primary Tools used in Lean Systems: Meaning and Purpose of 5S Work place organization - Meaning and purpose of TPM - Pillars of TPM – OEE -Process Mapping and Value Stream Mapping (VSM) – Need for process maps- advantages- types.and its construction - steps in preparing VSM.									
Unit – III	Secondary Tools used in Lean Systems								6
Secondary Tools used in Lean Systems: Cause and effect diagram- Pareto chart- Radar chart- Poke Yoke –Kanban- SMED- DFMA- JIT problems on Pareto analysis and Computation of Number of Kanban - Case Studies.									
Unit – IV	LMS Rules								6
LMS Rules: Stability – Management- Standardized Work -Pull system - Continuous Improvement- Implementing LMS for Higher Productivity –Operator - Process Machinery and Equipment - Workplace Organization- Inventory.									
Unit – V	Toyota Production System (TPS)								6
Toyota Production System (TPS): Lean Manufacturing Company Application- Building a Lean Learning Enterprise- Importance of Leadership- Changing the Culture- Tips for Transition to Lean Enterprise.

24MBE35 - E-COMMERCE AND DIGITAL MARKETS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	FE	30	0	0	30	60	3
Preamble	The course aims to provide an understanding of the increasing significance of e-commerce and digital markets and its applications in real time business scenario. The course gives a clear understanding of the strategic impacts on use of electronic tools and their effects on the way business and business activities are conducted today.								
Unit – I	E-Business Foundation and Framework								6
E-Business Foundation and Framework: Introduction to E-Business, Traditional Commerce Vs E-Commerce, E –Commerce Environmental Factors, Business dimension and technological dimension of E-Commerce, E-Commerce frame work, Factors responsible for the growth of E-Commerce, Issues in Implementing E-Commerce, Trends in E-Commerce in Various Sectors.									
Unit – II	Launching an E-Business								6
Launching an E-Business: Different phases of Launching an E-Business. Important Concepts in E-Business. Bricks and Clicks business models in E-Business.									
Unit – III	E-Business Applications								6
E-Business Applications: E-Procurement, E-Communication, E-Delivery, E-Auction, E-Trading.									
Unit – IV	Website Design and Development								6
Website Design and Development: Advantages of Website, Principles of Web Design, Life Cycle Approach for Building a Website, Different Ways of Building a Website.									
Unit – V	Technology for Online Business								6
Technology for Online Business: Mechanism of Making Payment Through Internet, Online Payment Mechanism, Electronic Payment Systems, Payment Gateways, Visitors to Website, Tools for Promoting Website, Plastic Money, Debit Card, Credit Card etc.

*includes Term Work(TW) & Online / Certification course hours

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)
CO1	point out the awareness and understanding of the importance e-commerce as a tool for creating social and business processes	Analyzing (K4)
CO2	build basic business models on the web with examples and their implementation with basic marketing techniques and strategies on the internet	Applying (K3)
CO3	compare the different applications of E-commerce to make informed decisions in marketing and business management	Evaluating (K5)
CO4	evolve basic personalization mechanisms for websites by means of designing and developing web platform for business processes	Analyzing (K4)
CO5	assess the mechanism and issues in E-commerce technologies, and its related risks and security.	Analyzing (K4)

Mapping of COs with POs

24MBE04 - FINANCIAL DERIVATIVES									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	This course is designed to know about various financial derivatives product. By studying this course students will be able to understand the concept of derivatives and various products in India. They also able to know about the hedging techniques and option trading mechanism.								
Unit – I	Financial Derivatives								6
Financial Derivatives: Introduction – Types of financial derivatives – Features of derivatives market – Factors contributing to the growth of derivatives – functions of derivatives markets – Exchange traded Versus OTC derivatives – Traders in derivatives market – Derivative market in India - Derivatives Trading at NSE / BSE Base and Products.									
Unit – II	Futures & Forwards								6
Futures & Forwards: Futures & Forward Contract Differences - Forward and Future Trading Mechanism - Valuation of Futures - Valuation of Long and Short Forward Contract, Mark to Margin, Open Interest – Hedging Through Futures - Continuo and Backwardation – Basis Risk.									
Unit – III	Options								6
Options: Types Of Option - Basic Principles of Option Trading - Payoff of Long and Short Call - Payoff of Long and Short Put - European Call/Put : Upper Bound Price, Lower Bound Price									
Unit – IV	Option Strategies and Valuation								6
Option Pricing : Factors affecting Option Pricing - Option pricing models: Binomial model, Black – Scholes- Merton model – Basic option strategies: Covered Calls ,Protective Puts , Straddle , Strips , Straps , Strangles , Bear Spread , Butterfly Strategy , Calendar Spreads.									
Unit – V	Swaps								6
Swaps: Concept And Nature, Evolution of Swap Market, Features of Swaps, Major Types of Swaps, Managing Risk Using Swaps, Pricing and Valuation Swaps.

24MBE05 - REPORTING AND ANALYSIS OF MANAGEMENT DECISIONS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	NFE	30	0	0	30	60	3
Preamble	This course aims to provide students with a comprehensive understanding of Cost Accounting principles, standards, and techniques. By the end of this course, students will be able to apply cost accounting concepts effectively in real-world scenarios, analyze cost data for decision-making, and contribute to cost control and performance improvement within organizations.								
Unit – I	Introduction to Cost Accounting								6
Introduction to Cost Accounting: Definition, Scope, and Objectives of Cost Accounting - Significance of Cost Accounting - Relationship with Financial Accounting and Management Accounting - Cost Objects, Cost Centers, and Cost Units - Elements of Cost and Classification of Costs - Role of Cost Accountants in Organizations.									
Unit – II	Cost Ascertainment – Elements of Cost								6
Elements of Cost: Material Costs: Procurement of materials, Inventory management, and control - Labour Costs: Timekeeping, Time booking, and payroll procedures; Labour turnover, Remuneration, and Incentive schemes - Overheads: Collection, Classification, Apportionment, and Allocation of overheads									
Unit – III	Basic Costing Methods								6
Basic Costing Methods: Operating Costing: Meaning and Preparation of Operating Cost Sheet; Costing methods for Transport, Power Supply, and Hospital sectors. Budget and Budgetary Control: Budgetary control as a management tool; Installation of Budgetary control systems, classification of budgets, Fixed and Flexible Budgeting.									
Unit – IV	Advanced Costing Methods								6
Advanced Costing Methods: Features of Job Costing and Batch Costing: Preparation of Cost Sheet under Job Costing and Batch Costing Process Costing: Process Loss, Normal, and Abnormal Loss; Analysis of process variances.									
Unit – V	Cost Accounting Techniques								6
Cost Accounting Techniques: Standard Costing and Variance Analysis: Suitability of standard costing as a management tool; Analysis of Direct material, Direct labor, and Overhead variances Sales Variance Analysis: Interpretation of sales variances for decision-making

24MBE16 - SALES AND DISTRIBUTION MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	The course is aimed at developing an understanding of the sales and distribution processes in organizations. The students gain insights on the approaches, strategic aspects and trends in sales force and distribution channel management.								
	Sales Management								6
Sales Management: Introduction, Nature and Scope, Role and Skill of Sales Manager, Types of Sales Management Positions, Theories of Personnel Selling, Sales Forecasting and Budgeting Decisions.									
Unit – II	Personal Selling Process								6
Personal Selling Process: The Personnel Selling Process, Designing and Managing Sales Territories, Sales Quotas - Case Studies.									
Unit – III	Sales Force Management								6
Sales Force Management: Recruitment and Selection of Sales Force, Training, Motivating and Compensating the Sales Force - Case Studies									
Unit – IV	Distribution Management								6
Distribution Management: Introduction, Need and Scope of Distribution Management, Marketing Channels Strategy, Levels of Channels Channel Management, Case Studies.									
Unit – V	Market Logistics and Supply Chain Management								6
Market Logistics and Supply Chain Management: Definition and Scope of Logistics, Components of Logistics, Transportation, Channel Information Systems, Case Studies.

24MBE23 - TEAM DYNAMICS AT WORK									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Fundamental Knowledge on HRM	3/4/5/6	FE	30	0	0	30	60	3
Preamble	This course explores the dynamics of teams, from their formation to problem-solving and conflict resolution. It delves into team effectiveness, decision-making processes, and managing conflicts for cooperation. With a focus on leadership theories and diverse team dynamics, it equips learners with essential skills for organizational success.								
Unit – I	Team								6
Team: Definition, Types, Teams Vs Groups in Organizations, Teams in Organizations Today, IPO Model of Group Functioning, Synergy, Power in Leadership, Theories of leadership.									
Unit – II	Formation of Team								6
Formation of Team: Team Formation and Development, Team Member Socialization, Person - Organization Fit, ASA Model, Understanding the Impact of Diversity on Groups and Teams.									
Unit – III	Team Effectiveness								6
Team Effectiveness: Team Task, Setting Team Goals, Member Identify and Roles and Teams, Three Interventions to Improve Initial Team Functioning: Conducting Role Analysis, Defining Team Goals.									
Unit – IV	Problem Solving and Decision Making								6
Problem Solving and Decision Making: Steps, Strong Members / Un Equal Power, Poor Information Sharing, Group Polarization, Group Think, Intervention: The Nominal Group Technique, Dialectical Inquiry.									
Unit – V	Dysfunctional Conflict and Cooperation								6
Dysfunctional Conflict and Cooperation: Nature, Causes: Social Dilemmas, Social Loafing, Communication Problems, Personality and Individual Differences. Understanding and Managing Different Personalities, Intervention: Conflict Management Procedure, Mediation / Arbitration.

24MBE28 - MANAGEMENT OF SERVICE OPERATIONS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	The aim of the course is to emphasize the importance of effective operations management in service industry. The course also helps the students to develop and specialize on the various approaches to efficient working of service industry								
Unit – I	Understanding Services:								6
Understanding Services: Role of Services in the Economy- Economic Evolution- Nature of services – Characteristics of Service Operations - New service Development - Service Blue Print.									
Unit – II	Designing the Delivery System								6
Designing the Delivery System: Service Quality- Dimensions and Measuring Service Quality- Supporting Facility – Facility Design and Layout - Service Facility Location – Cases.									
Unit – III	Managing Service Operations								6
Managing Service Operations: Managing Capacity and Demand – Strategies - Capacity Planning and Queuing Models – Analytical Models - Forecasting Demand for Services – Forecasting Models.									
Unit – IV	Managing Supplier								6
Managing Supplier: Service Supply Relationships – Managerial Implications of Bidirectional Relationships- Outsourcing Service – Benefits and Risks of Outsourcing- Vehicle Routing – Growth and Globalization of Services – Global Service Strategies.									
Unit – V	Technology in Services								6
Technology in Services: Managing Service Project - Role of Technology in Service Encounter- Internet Models - E-Commerce – E- Business Model – Case Analysis.

24MBF03 - SUPPLY CHAIN ANALYTICS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	SE	20	0	20	20	60	3
Preamble	The course aims at introducing the tools, techniques and optimizing models for supply Chain decisions.								
Unit – I	Fundamentals of Optimization models								4
Fundamentals of Optimization models: Linear programming – Mixed Integer Programming – Modeling Vignettes – Distribution center location models – Network optimization models.									
Unit – II	Descriptive Models								4
Descriptive Models: Demand forecasting – Simulation models – Systems Dynamic models – Activity Based Costing - Data envelopment analysis – Balanced Scorecard.									
Unit – III	Supply Chain Decision Databases								4
Supply Chain Decision Databases: Data aggregations – Facility data – Transportation network data – Inventory data – Supplier data – cost data – customer and market data – Graphical display.									
Unit – IV	Operational Supply Chain Planning								4
Operational Supply Chain Planning: Taxonomies – Vehicle routing model – production planning model – Reverse logistic model.									
Unit – V	Inventory Planning in Supply Chain								4
Inventory Planning in Supply Chain: Classical models – Inventory model for strategic supply chain design – Inventory model for retailing distribution network - Aggregate inventory models									
LIST OF EXPERIMENTS / EXERCISES:									
Students will have practice sessions to use spreadsheet, Mega stat and any one statistical software for the following topics									
1.	Distribution center location model								
2.	Simulation models in supply chain								
3.	Vehicle routing model								
4.	Inventory model for distribution network								
5.	Aggregate inventory model

24MBE40 - ENTREPRENEURIAL MARKETING										
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit	
Prerequisites		3/4/5/6	SE	30	0	0	30	60	3	
Preamble	The course provides an in-depth understanding of marketing theory, concepts and tools used to market a new product offering and/or applicable in an entrepreneurial setting and place an emphasis on the special requirements for creating and executing marketing plans and programs in a setting of rapid technological change.									
Unit – I	Marketing and Entrepreneurship								6	
Marketing and Entrepreneurship: Introduction- Identifying and Understanding Buyers -Sustaining Competitive Advantages of New Ventures-Build a Mission Statement-Integrate selling and marketing in a new business - Case study.										
Unit – II	Identifying Market Opportunities								6	
Identifying Market Opportunities: Market Research -Developing Business Plans - Pitching Opportunities -Demand Forecasting - Linking marketing to financial outcomes- Tools and techniques for new market creation.										
Unit – III	Market Development								6	
Market Development: Digital and online marketing - Forward-looking product design- Product features - Added value- service- Dominant logic- Build a strong brand from scratch- Competing on loyalty-Segmentation - Targeting.										
Unit – IV	Pricing & Channel Management								6	
Pricing: Tools- Market Expansion and Pricing- case study. Channel Management: Power of Trust in Manufacturer-Retailer Relationships-Developing effective Distribution Strategies										
Unit – V	Building Customer Relationships & Entrepreneurial Communication Strategy								6	
Building Customer Relationships: Managing Customers – Relationship Marketing - Traditional-Digital Marketing for Entrepreneurs- Media Marketing-Customer value proposition. Entrepreneurial Communication Strategy: Inbound, Outbound, and Social Media Strategy.

24MBE48 - INTERNATIONAL FINANCIAL MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	SE	30	0	0	30	60	3
Preamble	This course explores global financial environments, exchange rate dynamics, foreign exchange market, risk management strategies and international finance.								
Unit – I	Overview of International Financial Management								6
Overview of International Financial Management: Meaning and Importance of International Financial Management - Nature and Scope of International Management - Comparison Between International Financial Management and Domestic Financial Management - Balance of Payments; Equilibrium, Disequilibrium and Adjustment - Developments in the International Monetary System.									
Unit – II	Intricacies of Foreign Exchange Markets								6
Intricacies of Foreign Exchange Markets: Foreign Exchange Market Quotations - Exchange Rate Determinations in Spot Market and Forward Market - Factors Influencing Exchange Rates - Theories of Exchange Rate Behaviour - Euro Currency and Domestic Interest Rates - Market Rules and Regulation.									
Unit – III	Theoretical aspects of Currency Futures and Options								6
Theoretical aspects of Currency Futures and Options: Concepts of Currency Future and Options - Profit and Loss Calculation in Currency Future Trading - Costs Involved in Future Contracts - Hedging and Speculation in Currency Future Market - Hedging and Speculation in Option Market.									
Unit – IV	Foreign Exchange Risk Management								6
Foreign Exchange Risk Management: Concept of Foreign Exchange Risk - Relevance of Exposure - Transaction, Real Operating and Translation - Need for Hedging Foreign Exchange Exposure - Hedging Technique for Transaction Exposure: Contractual Hedges and Natural Hedges - Case Studies on Foreign Exchange Risk Management.									
Unit – V	International Source of Finance,								6
International Sources of Finance: International Source of Finance - International Capital Budgeting - Evaluation Criteria and Cost of Capital - Non Financial Factors in Capital Budgeting - International Financial Market Instruments: Equity, Bonds, Short term and Medium term Instruments - Case Studies in International Financial and Working Capital Management.

24MBE51 - INTERNATIONAL BUSINESS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	SE	30	0	0	30	60	3
Preamble	This course introduces students to global business dynamics, covering market entry strategies, environmental frame works, cooperation agreements, globalizations impact and collaborative strategies, empowering them to navigate international business complexities.								
Unit – I	Introduction to International Business								6
Introduction to International Business: Overview of International Business Vs Domestic Business - International Orientations and Drivers of Globalization - Stages and Orientations in Internationalization - International Market Entry Strategies.									
Unit – II	Comparative Environmental Frameworks								6
Comparative Environmental Frameworks: Economic Environment in International Business – Social Cultural Environment Impact on Global Trade – Political Environment and its Influence on Business – Natural and Technological Environment Considerations.									
Unit – III	Cross National Cooperation and Agreements								6
Cross National Cooperation and Agreements: Forms of Economic Integration – World Trade Organization (WTO) and its Functions – Regional Economic Integration and Major Trading Groups – Commodity Agreements and Instruments of Trade Control.									
Unit – IV	Globalization								6
Globalization: Forces Driving Globalization - Criticism and challenges of Globalization - Impact of Globalization on Business Operation - Conditions and Advantage of Globalization - Implications of Globalization on Indian Business.									
Unit – V	Direct Investment and Collaborative Strategies								6
Direct Investment and Collaborative Strategies: Types and Factors Affecting Foreign Private Investment - Limitations and Risk of Foreign Capital - Motives and Forms of Collaborative Arrangements - Choosing Collaborative Arrangements for International Business - Case Studies on Direct Investments.

24MBG06 - FRUGAL INNOVATION									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	SEE	0	0	20	0	20	1
Preamble	The course aims at providing students with insights into most critical emerging business models of value creations that use less resource and do more. This course makes the students to prepared blueprint about how to approach businesses in hyper competitive and resource constrained environment.								
LIST OF EXPERIMENTS / EXERCISES:									
After an Introductory session on frugal innovation (Doing Better with less resource), students need to approach cases on the principles and provide valuable solutions.									
1.	Engage and iterate: Costly and rigid R&D verses Market focused Agile R&D - case studies of frugal pioneers such as Arla Foods, Fujitsu, GE, GSK, Intuit and SNCF.								
2.	Flex the Assets – Creating frugal supply chain -Case studies of (BMW and Volkswagen), pharmaceuticals (GSK and Novartis), cement (Cemex), soft drinks (Coca-Cola) and energy (GDF-Suez and GE).								
3.	Create Sustainable solutions –From circular economy to Spiral economy -case studies of Kingfisher, Levi Strauss, method, Tarkett and Unilever.								
4.	Shaping customer behavior- how companies can influence consumers into behaving differently								
5.	Co-create value with prosumers. Empowering and engaging prosumers , Case studies of Auchan -do-it-yourself (DIY) and crowd sourcing pioneers, such as Tech Shop and Quirky.								
6.	Making innovative Friends: Hyper collaboration –Case study GE and Ford.

24MBG08 - INTRODUCTION TO GOODS AND SERVICE TAX (GST)									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	SEE	0	0	20	0	20	1
Preamble	The purpose of this series of experiments is to meticulously examine the multifaceted impact of Goods and Services Tax (GST) on diverse sectors of the Indian economy. Through rigorous analysis and empirical research, our aim is to unveil GST's nuanced effects on consumer prices, small businesses, e-commerce platforms, export-oriented industries, and interstate trade dynamics								
LIST OF EXPERIMENTS / EXERCISES:									
1.	Impact of GST on Consumer Prices: Investigate the impact of GST on consumer prices of essential commodities such as food items, clothing, and electronics. Analyze price changes before and after GST implementation and assess the affordability for consumers, considering factors like inflation and income levels								
2.	GST Compliance and Small Businesses: Study the challenges faced by small businesses in complying with GST regulations, such as timely filing of returns, understanding input tax credit, and managing invoicing systems. Identify common compliance issues and propose solutions to simplify GST procedures for small enterprises.								
3.	GST's Effect on E-commerce Platforms: Explore how GST has affected e-commerce platforms in terms of tax collection, compliance burden, and market competitiveness. Analyze the impact on both domestic and international e-commerce transactions and evaluate the effectiveness of GST in regulating online sales.								
4.	GST's Impact on Export-oriented Industries: Investigate the impact of GST on export-oriented industries such as IT services, pharmaceuticals, and textiles. Analyze changes in export volumes, tax refunds (IGST, CGST, SGST), and competitiveness in global markets post-GST implementation.								
5.	GST and Interstate Trade Dynamics: Evaluate the impact of GST on interstate trade dynamics, particularly in regions with varying tax rates and compliance norms. Analyze logistical challenges, transportation costs, and supply chain efficiencies to assess the overall impact of GST on interstate trade flows

Programme & Branch	Master of Business Administration		Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil		3/4/5/6	ACC	0	0	40	0	40	2
Preamble	The objective of this course is to enhance students performance through experiential learning, specifically through outbound training. This training aims to improve skills such as leadership, communication, planning delegation, team work and motivation among students.									
LIST OF EXPERIMENTS / EXERCISES:										
The outbound training follows a structured experiential learning cycle with the following stages:										
1.	Experiencing/doing									
2.	Reviewing and reflecting on the experience									
3.	Drawing learning from the reflection									
4.	Applying and testing the learning through active experimentation									
5.	Reviewing and reflecting on the active experimentation									
REFERENCES/ MANUAL /SOFTWARE:										
1.	Outbound Experiential Learning Guidelines									
COURSE OUTCOMES: On completion of the course, the students will be able to								BT Mapped (Highest Level)		
CO1	identify gaps between perceptions and experiences.							Applying (K3), Imitation (S1)		
CO2	generate new ideas to implement learning and experiences in forecasted scenarios and apply them in real world situation through active experimentations							Analyzing (K4), Articulation (S4)		
CO3	facilitate behavioural change and relate it to real-life scenarios.							Evaluating (K5), Precision (S3)

24MBG13 - RURAL INNOVATION PROJECT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	ACC	0	0	40	0	40	2
Preamble	This course focus on fostering innovation to address challenges in rural areas. It introduces students to various approaches for rural innovation initiatives, emphasizing the exportation of rural communities.								
LIST OF EXPERIMENTS / EXERCISES:									
1.	Identifying the needs of rural communities.								
2.	Forming teams with shared interests.								
3.	Developing awareness of innovation in agriculture, forestry and rural development.								
4.	Creating new patterns of cooperation and collaborative learning.								
5.	Report preparation and presentation.								
REFERENCES/ MANUAL /SOFTWARE:									
1.	Rural Innovation Project Guidelines								
COURSE OUTCOMES: On completion of the course, the students will be able to							BT Mapped (Highest Level)		
CO1	understand the application of business management principles in rural innovation activities.						Understanding (K2), Imitation (S1)		
CO2	apply analytical skills to identify and categorize cases of rural innovation within our community.						Applying (K3), Precision (S3)		
CO3	analyze the concept of rural innovation and its influence on social, economic and environmental outcomes in rural areas.						Applying (K3), Precision (S3)

24MBE30 - SIX SIGMA									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	FE	30	0	0	30	60	3
Preamble	This course deals with strategies that seeks to improve the quality of process outputs by identifying and removing the causes of defects (errors) and minimizing the variability in manufacturing and business processes.								
Unit – I	Introduction To Six Sigma								6
Introduction To Six Sigma: History of Six Sigma – Six Sigma Fundamentals – Implementing Six Sigma – Linking Six Sigma Projects to Strategies. Six Sigma – Benefits – Team – Master Black Belts – Green Belts – Yellow Belts.									
Unit – II	Six Sigma Metrics and Measurement								6
Six Sigma Metrics and Measurement: DMAIC and DMADV methodology – Process measurement – Process metrics – Process capability – Tools for process analysis – Process improvement – Process control –Process development, optimization and verification.									
Unit – III	Define Phase and Measure Phase								6
Define Phase and Measure Phase: Voice of Customer (VOC) – Understanding Your Customer, Affinity Diagram, Kano Model – Determine CTQ, Develop The Project Charter, Six Sigma Team, Elements of Project Charter, Map The Processes.									
Unit – IV	Analyze Phase								6
Analyze Phase: Identify Possible Causes, Segmentation and Stratification, Cause and Effect Diagram, Pareto Diagram, Control Impact Matrix, Process Analysis With Lean – Overview of Lean.									
Unit – V	Improve Phase and Control Phase								6
Improve Phase and Control Phase: Generate Solutions, Brainstorming Techniques, Prioritizing Solutions, Select Solutions, Refine Solutions, Poka Yoke/ Mistake Proofing, Failure Mode and Effect Analysis (FMEA), Test Solutions, Justify Solutions. Control Phase: Introduction to SPC, Types of Control Charts, Response Plan and Documentation: Case Study Covering All Aspects Of The Training.

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)					
CO1	explain the relevance of Six Sigma for business enterprise.	Understanding (K2)					
CO2	Identify the relevant Six Sigma metric and suggest suitable processing to element measure.	Applying (K3)					
CO3	examine the existing work situation in a manufacturing or service organization to identify Six Sigma projects that will significantly improve customer satisfaction, quality and productivity	Applying (K3)					
CO4	select appropriate Six Sigma measurement and data analysis technique and apply to improve the value of products and services delivered	Analyzing (K4)					
CO5	apply appropriate Six Sigma improvement and control techniques to support the implementation of a company-wide improvement programme	Applying (K3)					
Mapping of COs with POs							
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6

24MBE33 - PROJECT MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	3/4/5/6	FE	30	0	0	30	60	3
Preamble	The aim of this course is to impart necessary knowledge and skills for project formulation and project management relevant for business. This course also empowers the students to conduct project planning activities that accurately forecast project costs, timelines and quality.								
Unit – I	Project Management concept& Project Initiation								6
Project Management concept: Project life cycle - The Project Management process- Benefits of Project Management. Project Initiation: Strategic Management and Project Selection - Criteria of Choice – Nature and Type of Project Selection Models -Non Numeric and Numeric Models (Problems) - NPV, IRR, Payback Period and Profitability Index.									
Unit – II	The Project Manager								6
The Project Manager: Selecting the Project Manager - Negotiation and the Management of Conflict – Nature, Partnering, Chartering and Scope Change - Conflict and the PLC - Requirements and Principles of Negotiation.									
Unit – III	Project Activity Planning & Scheduling								6
Project Activity Planning: Initial Project Coordination and the Project Plan - Action Plan - Work Breakdown Structure and Linear Responsibility Chart Scheduling: Network Techniques - PERT and CPM									
Unit – IV	Resource Allocation Budgeting and Cost Estimation								6
Resource Allocation – CPM - Crashing a Project - Resource Loading &Leveling - Constrained Resource Scheduling. Budgeting and Cost Estimation: Estimating Project Budgets & Improving the Process of Cost Estimation.									
Unit – V	Project Execution								6
Project Execution: Project Management Information Systems - Project Control - Project Auditing - Project Termination.

24MBE38 - IT CONSULTING									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	FE	30	0	0	30	60	3
Preamble	Consultancy is one of the most sought after and remunerative career under Information Technology. This course is designed to know about Principles, Assignment, Various Services, relationships and managing assignments. An IT consultant is responsible for providing relevant and up-to-date solutions on various aspects of business, IT development and market information for companies.								
Unit – I	Overview and Principles of IT Consultancy								6
Overview and Principles of IT Consultancy: Structure of IT Industry, Role of the Consultant, Competencies of Consultant; Consultancy Models – Export, Diagnosis, Collaborative / Process, External and Internal Consultant.									
Unit – II	Consultancy Assignment								6
Consultancy Assignment: Life Cycle of Consultancy Assignment, Contracting: Identification of Problem – Diagnosis, Solution, Implementation, Closure and Review.									
Unit – III	Consulting Services								6
Consulting Services: Portfolio Services, Business Problem Solving, Investigation Techniques and Data Collection, Withdraw from the IT Assignment, Evaluation and Follow up of IT Business Developments.									
Unit – IV	Managing Relationship								6
Managing Relationship: Building Rapport, Handling Client Meeting, Client Behaviour, Assessment for Change, Proposals and Bids, IPR, Negotiation Working in Teams, Team Management and Delegation, Conflict Management, Selling of Consultancy Services									
Unit – V	Managing Consultancy Assignments								6
Managing Consultancy Assignments: Scoping of Assignments and Projects, Project Planning and Management Principles, Progress Monitoring, Communications and Reviews, IT Quality Management Systems, IT Risk Management, IT Legislation, Ethics and Professional Standards.

24MBE54 AI IN ACCOUNTING									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	FE	30	0	0	30	60	3
Preamble	This course provides a comprehensive understanding of how Artificial Intelligence (AI) is transforming the field of financial accounting. It focuses on AI technologies, automation in bookkeeping, financial analysis, fraud detection, auditing, and decision-making. The course bridges the gap between accounting practices and intelligent systems, enhancing the analytical and interpretive capabilities of future finance professionals.								
Unit – I	Foundations of AI and Financial Accounting								6
Introduction to AI in Business - Fundamentals of Financial Accounting - Accounting Cycle and AI Integration - AI Tools in Accounting - AI vs Traditional Accounting Systems - Role of Machine Learning in Accounting - AI-Driven Bookkeeping - Data Sources for Financial AI Systems - AI and Double-Entry System - Ethical Issues in AI Applications in Accounting .									
Unit – II	AI Applications in Financial Reporting								6
Structure of Financial Statements - AI Tools for Financial Statement Preparation - Real-Time Reporting with AI - Natural Language Processing (NLP) for Narrative Reporting - AI in Cash Flow Reporting - Intelligent Reconciliation Systems - AI for Revenue Recognition - AI in Lease and Asset Accounting - AI-enabled Consolidation Processes - Risk Management in AI-driven Reporting.									
Unit – III	Fraud Detection and Audit Automation using AI								6
Introduction to Forensic Accounting - AI Techniques in Fraud Detection - Neural Networks for Fraud Identification - Pattern Recognition in Financial Irregularities - AI in Internal Control Systems - Anomaly Detection in Transactions - Predictive Analytics in Fraud Prevention - Audit Trail Automation- AI in Internal vs External Audits - Continuous Auditing with AI.									
Unit – IV	AI in Financial Planning and Analysis (FP&A)								6
Role of AI in Budgeting - Forecasting using Machine Learning - AI Models for Cost Estimation - AI in Profit Planning - Strategic Financial Modelling - Real-Time Scenario Analysis - Sentiment Analysis for Investment Decisions - AI and Variance Analysis - NLP for Financial News and Market Impact - AI-based Capital Budgeting - Monte Carlo Simulations - AI in Sensitivity Analysis - Case Study: AI in FP&A Systems.									
Unit – V	Future Trends, Ethics, and Regulations								6
Emerging AI Technologies in Accounting - AI in Tax Planning and Compliance - Regulatory Framework for AI in Finance - Data Privacy and Governance - Bias in AI Models - Explainable AI (XAI) in Accounting - Role of Professional Bodies (ICAI, AICPA) - Human-AI Collaboration in Accounting - Sustainable Accounting using AI - ESG Reporting and AI - AI and Corporate Governance - Case Study: AI-driven Decision Making in Finance.

24MBE55 AI IN MARKETING									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	FE	30	0	0	30	60	3
Preamble	This course explores the integration of Artificial Intelligence (AI) into modern marketing practices. It equips students with skills to apply AI tools for customer insights, personalization, and strategic decision-making. Emphasis is placed on ethical use, innovation, and sustainable value creation in AI-driven marketing.								
Unit – I	Foundations of AI in Marketing								6
Introduction to Artificial Intelligence – History and Evolution - Concepts of Machine Learning, Deep Learning, and Natural Language Processing - Importance of AI in modern marketing environments - Differences between traditional and AI-driven marketing approaches - AI's role in marketing automation and intelligence - AI in data-driven decision-making - AI and the concept of Marketing 5.0 - Predictive analytics and its marketing relevance.									
Unit – II	AI in Segmentation, Targeting & Positioning								6
Customer data collection and preparation for AI modeling - Customer segmentation using clustering algorithms (K-means, Decision Trees) - Look-alike modeling and predictive targeting - AI for dynamic buyer persona creation - Neural networks in target customer prediction - Real-time marketing using AI (retargeting and contextual targeting) - Micro-targeting in digital campaigns.									
Unit – III	Personalization, Brand Building & Experience								6
Personalized content generation using AI (NLG, GPT models) - AI-powered CRM and customer service (Chatbots, Virtual Assistants) - Brand monitoring and perception tracking through AI - Image and sentiment analysis for branding - Personalized email and social media campaigns - AI in voice, visual, and conversational commerce - Predictive churn analytics and retention strategies - Omnichannel customer experience design using AI - Case Study: Starbucks' Deep Brew AI platform.									
Unit – IV	AI in Product, Pricing, Promotion & Place								6
AI in product design and innovation (Design Thinking + AI) - Smart dynamic pricing using machine learning algorithms - AI in digital advertising: Programmatic ad buying and optimization - Predictive sales forecasting models - Generative AI in content creation (ads, blogs, videos) - AI-enabled influencer marketing analytics - Augmented Reality (AR) and Virtual Reality (VR) in promotions - Logistics and supply chain automation in distribution (AI in SCM).									
Unit – V	AI in Channels, Ethics, and Sustainability								6
AI in designing omnichannel customer journeys - Automated fulfillment and warehouse robotics - AI in CRM and after-sales support - Ethical issues: Bias, discrimination, transparency in AI - Data privacy laws and AI compliance (GDPR, PDP Bill, etc.) - Fairness and explainability in AI decision-making - Ethical dilemmas in personalization and surveillance - Sustainability with AI: Green algorithms and efficient resource use.

24MBF04 - FINANCIAL ANALYTICS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		3/4/5/6	NFE	20	0	20	20	60	3
Preamble	This course aims at equipping the students to work with historical information of companies and analyze the company performance on relevant financial parameters. This course also helps to analyze the given data to estimate of the valuation of companies/projects for decision making.								
Unit – I	Introduction to Financial Modelling and Spreadsheet Essentials								4
Introduction to Financial Modelling and Spreadsheet Essentials: Basic Excel for Financial Modeling -Formatting of Excel Sheets - Use of Excel Formula Function – Advanced Modeling Techniques – Lookups: Vlookup Match & offset, pivot tables.									
Unit – II	Measuring Risk								4
Measuring Risk: Estimating betas with regression analysis using daily, weekly, and monthly data - Testing market efficiency with regression analysis.									
Unit – III	Portfolio Optimization:								4
Portfolio Optimization: Mean-variance portfolio selection - Computing mean-variance portfolios - Back-testing portfolio performance - Research on portfolio selection - Bond portfolio selection - Term structure estimation - Using macros to generate the efficient frontier.									
Unit – IV	Advanced risk analysis								4
Advanced risk analysis: Monte-Carlo simulation - Risk analysis of discounted cash flow models - Spreadsheet features: Using @Risk for Monte-Carlo simulation and Combining macros with @Risk.									
Unit – V	Black-Scholes Formula and Exotic Option Valuation								4
Black-Scholes Formula and Exotic Option Valuation: Black-Scholes formula - Pricing options, Estimating implied stock return volatilities - Simulating stock price evolution with Monte-Carlo simulation.									
LIST OF EXPERIMENTS / EXERCISES:									
Students will have practice sessions to use spreadsheet, Mega stat and any one statistical software for the following topics.									
1.	Beta Estimation Using Daily, Weekly and Monthly Market Data.								
2.	Market Efficiency with Regression.								
3.	Computing Mean Variance portfolio .								
4.	Generating Efficient Frontier.								
5.	Stock price evolution with Monte-Carlo simulation

24MBE44 - COMMERCIAL BANK MANAGEMENT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil	3/4/5/6	SE	30	0	0	30	60	3
Preamble	The course in Commercial Bank Management is designed to provide students with a comprehensive understanding of the principles and practices involved in managing commercial banks. Through theoretical learning and practical case studies, students will develop the knowledge and skills required to analyze, strategize, and make informed decisions in the banking sector								
Unit – I	Introduction to Commercial Banking								6
Overview of Commercial Banks: Definition and Functions of Commercial Banks - Role in the Financial System - Types of Commercial Banks (Retail, Corporate, Investment Banks) Services Offered by Commercial Banks: Depository Services - Lending and Credit Facilities - Investment and Wealth Management Services. Regulatory Environment and Compliance: Role of Central Banks and Regulatory Authorities - Basel Accords and Capital Adequacy Requirements - Compliance with Anti-Money Laundering (AML) and Know Your Customer (KYC) Regulations									
Unit – II	Financial Analysis in Commercial Banks								6
Financial Statements Analysis: Interpretation of Balance Sheets, Income Statements, and Cash Flow Statements - Ratio Analysis for Performance Evaluation Credit Risk Assessment: Credit Scoring Models - Credit Risk Metrics - Credit Risk Mitigation Techniques Capital Adequacy and Liquidity Management: Basel III Framework and Capital Requirements - Liquidity Risk Measurement and Management.									
Unit – III	Strategic Management in Commercial Banks								6
Strategic Planning and Goal Setting: Vision, Mission, and Objectives of Commercial Banks - SWOT Analysis and Strategic Positioning - Business Model Innovation Market Positioning and Competitive Strategies: Market Segmentation and Targeting - Product Differentiation and Value Proposition - Digital Banking Strategies Technology Adoption and Digital Transformation: Fintech Partnerships and Collaboration - Cybersecurity and Data Privacy - Customer Experience Enhancement through Technology									
Unit – IV	Risk Management and Compliance								6
Risk Identification and Measurement: Operational Risk, Market Risk, and Credit Risk Identification - VaR (Value at Risk) and Stress Testing Credit Risk Management: Credit Approval Process - Credit Portfolio Management - Non-Performing Asset (NPA) Management Regulatory Compliance and Governance: Compliance Frameworks (Basel, Dodd-Frank, etc.) - Internal Controls and Audit Processes - Board Oversight and Corporate Governance Best Practices.									
Unit – V	Innovation and Sustainability in Commercial Banking								6
Innovation in Banking Products and Services: Retail Banking Innovations (Digital Payments, Mobile Banking) - Corporate Banking Solutions (Trade Finance, Cash Management) - Wealth Management and Investment Products Sustainability Practices: Environmental, Social, and Governance (ESG) Factors in Banking - Sustainable Finance and Green Banking Initiatives Corporate Social Responsibility (CSR) Programs. Ethical Considerations and Corporate Governance: Ethical Dilemmas in Banking Operations - Whistle blowing and Ethics Policies - Board Accountability and Transparency.

24MBE52 - INTELLECTUAL PROPERTY RIGHTS									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	NIL	3/4/5/6	SE	30	0	0	30	60	3
Preamble	This course provides an in depth understanding of Intellectual Property Rights (IPR) and their significance in today's knowledge driven economy, it aims to equip studies with the knowledge and skills necessary to navigate the complexities of IP Today's global environment.								
Unit – I	Introduction to Intellectual Property								6
Introduction to IP and IPR - Concept of Property - Importance of IP and Competitive Advantage - Legal Basis and Rationale behind the Development of IP System - Historical Overview of the IP System in India.									
Unit – II	Types of Intellectual Property								6
Overview of Major Forms of IP - Copy Right, Trade Marks, Patents and Industrial Designs - Copy Rights, Registration and Infringement Patents: Introduction, Non - Patentable Inventions and Patent Filing.									
Unit – III	Industrial Design and Other Forms of IP								6
Industrial Designs Definition - Registration and Infringement - Semi Conductor Integrated Circuits Layout Design - Geographical Indications and their Protection - Trade Secrets and Traditional Knowledge - Case Study on Industrial Design.									
Unit – IV	IP Registration and Enforcement								6
Patent Filing Process in India - Enforcement of IP Rights - IP Infringement - Legal Consequences and Case Studies - Role of WIPO and other Organization in IP.									
Unit – V	IP Applications and Global Practices								6
Emerging Area in IP and Global Best Practices - Open Innovation and Open Source Software - Startups and the Importance of IP - Maintenance of Intellectual Records and IP Policy Formulation.

24MBG09 - REVIEW PAPER WRITING

Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil		SEE	0	0	20	0	20	1
Preamble	This course equips students with essential skills in academic research and writing, focusing on identifying research problems, conducting literature reviews using specialized software, and developing hypotheses. These skills are pivotal for producing high-quality academic papers and contributing valuable insights to their fields of study.								

LIST OF EXPERIMENTS / EXERCISES:

1.	Identify a Research Problem: Students will choose a specific business-related topic and articulate a clear research problem statement.
2.	Conduct Literature Review using Software: Utilize specialized software tools to conduct a comprehensive review of existing literature related to the chosen research problem.
3.	Identify Research Gaps and Formulate Research Questions: Analyze the literature review findings to identify gaps in current research and develop relevant research questions.
4.	Outline Research Methods: Create an outline detailing the research methods to be employed, such as surveys, interviews, experiments, or case studies.
5.	Develop Hypotheses: Based on the research questions, formulate hypotheses that will guide data collection and analysis.

COURSE OUTCOMES:

On completion of the course, the students will be able to

		BT Mapped (Highest Level)
CO1	identify basic components of a research problem statement, such as the topic, context, and significance.	Understand (K2), Imitation (S1)
CO2	analyze literature review findings to identify gaps in current research and formulate relevant research questions.	Analyse (K4), Manipulation (S2)
CO3	formulate hypotheses based on research questions, guiding data collection and analysis effectively.	Applying (K3), Manipulation (S2)

24MBG15 - BUSINESS PLAN PREPARATION FOR A VENTURE										
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit	
Prerequisites	Nil	3/4/5/6	ACC	0	0	40	0	40	2	
Preamble	This course aims to familiarize students with the essential steps involved in planning, launching and managing a business, focusing on practical application within a startup context. Students will actively engage in tasks that mimic real-world startup activities, culminating in the preparation and presentation of a comprehensive business plan.									
LIST OF EXPERIMENTS / EXERCISES:										
1.	Market research and analysis experiment.									
2.	Financial projection exercise.									
3.	Marketing plan development task.									
4.	Business model canvas.									
5.	SWOT analysis and risk assessment activities.									
6.	Pitch presentation.									
REFERENCES/ MANUAL /SOFTWARE:										
1.	Business Plan Manual									
COURSE OUTCOMES: On completion of the course, the students will be able to								BT Mapped (Highest Level)		
CO1	analyse market trends and consumer behaviour to formulate strategic business decisions.							Applying (K3), Imitation (S1)		
CO2	analyse financial data to assets the financial viability and sustainability of business ventures.							Analyzing (K4), Manipulate (S2)		
CO3	Evaluate the effectiveness of marketing strategies and tactics through data analysis and performance metrics.							Evaluating (K5), Manipulate (S2)		
Mapping of COs with POs

24MBG18 - INDIAN MANAGEMENT PRINCIPLES: INSIGHTS FROM TRADITION										
Programme & Branch	Master of Business Administration		Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites	Nil		3/4/5/6	ACC	0	0	40	0	40	2
Preamble	This course delves into the rich heritage of Indian management principles, drawing insights from ancient scriptures and traditional wisdom. Students will explore the foundational principles of Indian management and their relevance in contemporary organizational contexts, equipping them with valuable skills and perspectives for effective leadership and management practices.									
LIST OF EXPERIMENTS / EXERCISES:										
1.	Leadership Manifesto Creation: Research and analyze leadership styles from Indian historical figures, culminating in the development of a comprehensive leadership manifesto aligned with Indian management principles.									
2.	Conflict Resolution Simulation: Engage in role-playing exercises based on "Sama, Dana, Bheda, Danda" principles to resolve conflicts within simulated organizational scenarios, evaluating the effectiveness of each approach.									
3.	Mindfulness and Stress Management Workshop: Participate in experiment focused on mindfulness and stress management techniques derived from Indian philosophy, assessing their impact on personal well-being and professional performance.									
4.	Ethical Decision-Making Case Studies: Analyze case studies depicting ethical dilemmas from Indian scriptures, apply principles of "Dharma" in decision-making, and reflect on the ethical implications of various choices.									
5.	Employee Engagement and Well-being Initiative: Design and implement an employee engagement program rooted in Indian values, promoting holistic well-being, mental clarity, and emotional balance among employees, and evaluate its impact on organizational culture and productivity.									
REFERENCES/ MANUAL /SOFTWARE:										
1.	Indian Management Principles Insight from Tradition manual.									
COURSE OUTCOMES: On completion of the course, the students will be able to								BT Mapped (Highest Level)		
CO1	Develop a comprehensive understanding of Indian management principles, including concepts like "Dharma," "Karma," and "Seva," and their relevance in modern management contexts.							Understanding (K2), Imitation (S1)		
CO2	Utilize traditional Indian management techniques, such as "Guru-Shishya Parampara" and "Sama, Dana, Bheda, Danda," to solve complex management problems and enhance leadership effectiveness.							Applying (K3), Precision (S3)		
CO3	Evaluate case studies and scenarios derived from Indian scriptures, assessing ethical dilemmas and decision-making processes based on principles like "Dharma" and "Karma," and demonstrate critical thinking skills in resolving these issues.							Analyzing (K4), Precision (S3)		
Mapping of COs with POs

24MBP61 - CAPSTONE PROJECT									
Programme & Branch	Master of Business Administration	Trim.	Category	L	T	P	SL	TH	Credit
Prerequisites		6	FW	0	0	80	0	80	4
Preamble	Capstone Project provides a learning experience in which students have the opportunity to synthesis knowledge from various areas of learning in business administration, and apply it critically and creatively to real-life situations. Students are able to learn on their own by practice, reflect on their learning and improve upon it. They are also able to provide solution to business problem by adopting a structured methodology and preparing a professional report.								
LIST OF EXPERIMENTS / EXERCISES:									
1.	Review of Literature								
2.	Research gap and Research questions								
3.	Research Methods								
4.	Research Study								
5.	Report Preparation								
REFERENCES/ MANUAL /SOFTWARE:									
1.	Project Guidelines Manual								
COURSE OUTCOMES: On completion of the course, the students will be able to							BT Mapped (Highest Level)		
CO1	discover potential research areas in the functional areas of management.						Applying (K3), Manipulation (S2)		
CO2	demonstrate the knowledge of contemporary issues in their selected field of research.						Applying (K3), Manipulation (S2)		
CO3	formulate and propose a plan for creating a solution for the research plan identified.						Creating (K6), Imitation (S1)		
CO4	conduct an independent research project, resulting in research outputs in the form of journal publication or conference or seminar presentations confidently.						Creating (K6), Articulation (S4)		
CO5	demonstrate an ability to present and defend their research work to a panel of experts.						Evaluating (K5), Manipulation (S2)		
Mapping of COs with POs
